In the elections on April 4 and 11 only about a quarter of the electorate voted. In the large centres the Roman Catholic vote was well organized, and it gave some support to Labour candidates, but many of the former Labour members of School Boards failed to secure seats. Among the successful candidates clergymen were numerous. Most of the University Professors and the best members of the Boards were elected, but the number of women who were successful seemed fewer than it ought to have been. The Education Authorities come into power on May 16, and the Education Department has issued a circular giving information and advice as to the immediate duties of the new Authorities, including the appointment of a whole-time expert executive officer for each Authority; the constitution of School Managements Committees, the territorial spheres of which the Authorities are free to delimit on the sole principle of administrative convenience; the preparation of a scheme for bursaries to facilitate attendance at secondary schools and other institutions, and also of a scheme of scales of salaries for the teachers employed by the Authority, satisfying such conditions as to minimum national scales of salaries as may be laid down by the Department, after consultation with representatives of the Education Authorities and of the teaching profession; the making of an educational survey designed to give full information as to the extent and character of the school staff and accommodation available within their district, and as to the further provision necessary owing to the raising of the school age from fourteen to fifteen; the establishment of an Advisory Council, consisting of persons qualified to represent the views of those bodies interested in education for the purpose of advising the authority on matters of educational interest relating to the education area; the preparing of financial estimates, which for next year must be to some extent speculative; and the making of a scheme for the adequate provision, throughout each education area of the authority, of all forms of primary, intermediate, and secondary education in day schools, the existing organization being in the meantime accepted as satisfactory on the understanding that no marked departure from the curriculum already approved for any school is to be made without previous consultation with the inspector for the district.

As regards the bursary scheme, it is proposed to tide over the present emergency by adopting the schemes of the Secondary Education Committees for each district. The salaries scheme being, especially in the case of the counties, probably the most immediately pressing of all the duties of the Authorities, it is proposed to form an association of education authorities, to communicate with the Department on the institution of a minimum national scale and on other points where an exchange of views would be helpful. One of the important duties of the Advisory Council will be to investigate the continuation class problem. As regards finance, it is impossible at this stage to make any definite statement as to the amount of aid that will be available from the Exchequer; but the new authorities may confidently reckon on receiving this year in grants from the Department not less than 50 per cent. of their approved expenditure.

IRELAND.

In the debate on Irish affairs early in April in the House of Commons, the Chief Secretary dealt first with the reconstruction problem and then with general Irish policy. In reconstruction, he discussed first Irish education, and said that he approached the question with the greatest possible sympathy. He would like to see education in Ireland on the same footing as in England and Scotland, and during his own tenure of office to have someone in the House genuinely and really responsible for all Irish education. The two admirable reports on primary and intermediate education he proposed to refer to a Departmental Committee of experts, with a view to see what proposals could be embodied in a Bill. He brought forward two main points: first, whether a central authority represented in the

House of Commons was not desirable to co-ordinate the three distinct systems of education in Ireland—primary, intermediate, and technical; and, secondly, whether any rate should be levied for purely educational purposes, and whether the rate should be a national or a county one. More money was necessary, as it was not to be expected that education could be given in any country if teachers were poorly paid.

Dr. Starkie, speaking at a public meeting in Belfast under the auspices of the Ireland Branch of the Incorporated Association of Assistant Masters, dealt in detail with the reports, and declared that on secondary education to be a very remarkable document. He himself was in favour of a central authority for education in Ireland, with a Minister responsible to Parliament, and also some form of central body and secretaries instead of the present overlapping and interference between different Boards. The payment of secondary school teachers was a discredit to the Government and the nation, but secondary education could only be made permanently efficient by a national rate. The National Board had unanimously resolved to support the recommendation of the Primary Education Commission. He, in conclusion, advised teachers and the public to concentrate on the reports of the Commission and secure the undoubted advantages they would bring to secondary and primary education.

The Department of Agriculture and Technical Instruction have issued their programme of Summer Courses of Instruction for Teachers for the present year. These will begin on July 1 and close on July 25 except that for Rural Science (including School Gardening), which will begin on August 5 and close on August 29.

The National University and the Queen's University of Belfast are offering the degree of Ph.D. to Americans and Colonial students who are willing to do sufficiently advanced courses. Trinity College is offering the degrees of M.Sc. and M.Lit. and D.Sc. and D.Lit. In all cases the student must have two years' study and research under the guidance of a University professor, and must present a thesis on the subject studied.

SCHOOLS.

OXFORD: SOMERVILLE COLLEGE.—The following elections have been made to scholarships and exhibitions at the College:—Mary Ewart Scholarship of £80 for three years: May McKisack, Bedford Girls' High School for History. Clothworkers' Scholarship of £50 for three years: Amy M. Dale, Central Secondary School, Sheffield, for Classics. College Scholarship of £40 for three years: Mary de Selincourt, Edgbaston High School, for French. Exhibition of £30 for three years: Gwyneth Lloyd Thomas, King Edward's High School, Birmingham, for English. Exhibition of £20 for three years: M. E. Parker, St. Paul's Girls' School, for English.

OXFORD: LADY MARGARET HALL.—E. K. E. Gipps, Blackheath High School, a Jephson Scholarship of £70 (history); M. C. Galpin, Sherborne School for Girls, a scholarship of £50 (English); C. C. J. F. Rudd, Winchester School for Girls, a scholarship of £40 (classics); F. K. Noad, The Lodge School, Binstead, an exhibition of £20 (French); T. S. B. Hony, Mortimer House School, Clifton, an exhibition of £20 (theology).

OXFORD: ST. HUGH'S COLLEGE.—The following scholarships have been awarded:—E. M. Strong, Moorfield, Plymouth, the "Old Students'" Scholarship of £35 (English); D. Rogers, Clifton High School, a scholarship of £25 (history); G. M. Sharpe, Ladies' College, Cheltenham, an exhibition of £20 (mathematics); V. E. Miskin, High School, Bournemouth, an honorary exhibition (history).

ST. BEES SCHOOL.—The following Entrance Scholarship recommendations have been made:—(A) Foundation Scholarships, £55 (open): H. L. Foulkes-Roberts (Mr. R. M. Hugh-Jones, Colet House, Rhyll); E. G. Briggs (Mr. A. H. Raikes, The Old College, Windermere); B. X. Jessop (Mr. G. S. Smart, Corchester Prep. School, Corbridge); H. M. M. H. Irving (Mr. F. C. Carter, New College School, Oxford). (B) Cumberland and Westmorland: J. N. Warren (Mr. W. Snow, The Craig, Windermere); J. C. Maxwell (St. Bees School). (A) Junior Scholarships, £21 (open): J. H. Stephens (Mr. A. G. Grenfell, Mostyn House, Parkgate); F. G. Dady and A. T. Weatherhead (St. Bees School). (B) Close: A. B. Kettle (St. Bees School).

OAKHAM SCHOOL.—The following candidates have been elected to open scholarships: R. S. Ryley (Mr. Gray, Oxted, Surrey); G. O. Brooks (Mr. F. A. B. Fletcher, Aberdovey); D. R. Ridgett, Oakham School.

PRIZE COMPETITIONS.

THE winners of the Translation Prize for March are Miss H. M. Leys, care of Mrs. Lee, Swiss Cottage, Queensville, Stafford, and Mr. H. E. G. Evans, St. Mary's House, Tenby.

The prize for the April Competition is awarded to "Breis-Isel," the second place being given to "Bésigue."

By "BREIS-ISEL."

Au début de l'après-midi nous longions au trot une étroite corniche au-dessus d'un torrent, lorsque le mulet des bagages dont le licol était attaché à la croupière de mon cheval, perdit soudain pied et tomba dans le précipice. Il se cramponna au bord des pieds de devant, le licol lui soutenait la tête, et mon cheval, s'arrêtant aussitôt s'appuya de toutes ses forces contre la paroi rocheuse qui nous dominait, me serrant la jambe entre lui et la selle... J'étais le dernier de la bande et j'eus le plaisir de voir tous mes compagnons continuer à trotter, sans se douter que quelque chose était arrivé pouvant arrêter leur progrès vers le but du voyage. Il faisait si mauvais temps que personne ne pensait à autre chose qu'à avancer. Chacun pour soi, tel était l'ordre du jour. Je ne pouvais descendre de cheval, ma jambe gauche étant pressée si étroitement contre le rocher, qu'à chaque instant je m'attendais à ce que l'os cassât... Nous étions là — les yeux du mulet lui sortant presque de la tête, et tous ses muscles tremblant sous l'effort. A la fin, quelque chose craqua; le crampon à l'arrière de ma selle céda; la croupière fut violemment arrachée, et je crus d'abord que la queue de mon cheval l'était aussi. Le mulet fit un effort désespéré pour regimber, mais en vain, et il retomba, roulant du haut en bas à travers les buissons qu'il écrasait, jusqu'à son plongeon final et bruyant dans les eaux du torrent. Quelques-uns de nos gens, entendant le bruit fait par la chute du mulet se retournèrent et revinrent pour voir ce qu'il y avait, et tous, hommes et chevaux, nous nous penchâmes, le cou tendu, au-dessus du bord, pour voir ce qu'était devenu notre compagnon. Il était là, dans la rivière, la tête seule émergeant de l'eau. Non sans difficulté nous nous frayâmes un passage jusqu'au bord du torrent. Le mulet nous regarda très tranquillement jusqu'à notre arrivée tout près de lui; alors le muletier se mit en devoir de l'aider en lui cognant sur la tête avec une grosse branche d'arbre, sur quoi l'animal commença à se débattre et à grimper, et à la fin, à l'étonnement de tous, sortit sans mal apparent, en tout cas, les os intacts. Les hommes l'examinèrent, lui donnèrent un ou deux coups de pied pour lui demander comment il allait, et finalement, après l'avoir rechargé, nous poursuivîmes notre voyage.

The piece set for translation was selected to allow competitors to show not only their knowledge of French grammar, but their appreciation of certain fine shades of meaning and elegance in the French language. The text was not meant to be followed too closely, but a faithful rendering in good style was required.

No competitor sent up a faultless translation. The best were "Breis-Isel" and "Bésigue." The next in order of merit are "Kim," "Sic vos non vobis," "N.E.T.," "S.F.M.," "Addio," "Marguerite-Alix," "I.M.C.B.," "Dizzy," whose translations, while possessing distinct qualities, have definite mistakes in spelling or style which put them below prize level. For example, "Upon which he took to struggling," does not mean that *le mulet s'accrocha à la branche d'arbre*.

The candidates in the other classes too often show complete

(Continued on page 302.)

VACANCIES IN SCHOOLS

IMPORTANT

So many Schools at present being full, some with long waiting lists, it will be an assistance to us, in dealing with the large number of inquiries daily received, if Principals likely to have vacancies for the next two terms will notify us as early as possible.

J. & J. PATON, Educational Agents,

143 CANNON STREET, LONDON, E.C.4. Telephone: Central 5053.

ignorance of the difference between the imperfect and the preterite, and also of the precise meaning of certain French words. A stream is not *un fleuve*; a narrow ledge is not *une barre*, nor *un récif*, nor *un bord*; "missed his footing" is not *manqué son pas*; nor *manqué le pas*. "The party" is not *la partie* nor *la parti* (sic). "Proceeded to assist him" is not translated by *a procédé à l'aider*.

Finally, the majority of the candidates would be well advised to acquaint themselves thoroughly with the elementary rules governing the use of the subjunctive.

We classify the 72 versions received as follows:—

Class I. (a)—Breis-Isel, Bésigue, Kim, Sic vos non vobis, N.E.T., S.F.M., Addio, Marguerite-Alix, I.M.C.B., Dizzy.

(b) Tricolore, Sperata, P.M.S., K.A.Y., Nisi Dominus Frustra, Ponthieu, Ku, Printemps, Macte Animo, Sans-le-Sou.

Class II.—Cléonte, Cablegram, Newman Noggs, Fitz-Alain, Amarylhis, Louisiana, Twett, A.R.V., Petite-Bête, Chingleput, Maridunum, Abracadabra, Hirondelle.

Class III.—Sabrina, Wynne, Mâcon, Carmelite, Meiros, La Devonne, Tom Turk, Glenleigh, *à dépeça*, Lebos, Trefoil, B.E., Somewhen, B.A.Non, G.M.H., P.C. 49, Panacea, Smee, No Name.

Class IV.—Aucassin, Canynge, Dane, Menevia, Molinara, W.W.M., Traddles, Night, F.B., Old Bill, Nibbidard, Antoine, Calim, J.C.B., Swanage, G.E.M.

Class V.—Amethyst, Rhino, Chrysolite, Vanneau.

["Auntie" arrived too late, and two other versions were without a *nom de guerre*.]

A Prize of Two Guineas is offered for the best translation of the following extract from de Tocqueville's "*Démocratie en Amérique*":—

Dans les démocraties il s'en faut de beaucoup que tous les hommes qui s'occupent de littérature aient reçu une éducation littéraire et, parmi ceux d'entre eux qui ont quelque teinture de belles-lettres, la plupart suivent une carrière politique, ou embrassent une profession dont ils ne peuvent se détourner, que par moments, pour goûter à la dérobée les plaisirs de l'esprit. Ils ne font donc point de ces plaisirs le charme principal de leur existence; mais ils les consi-

dèrent comme un délassement passager et nécessaire au milieu des sérieux travaux de la vie: de tels hommes ne sauraient jamais acquérir la connaissance assez approfondie de l'art littéraire pour en sentir les délicatesses; les petites nuances leur échappent. Ils aiment les livres qu'on se procure sans peine, qui se lisent vite, qui n'exigent point de recherches savantes pour être compris. Ils demandent des beautés faciles qui se livrent d'elles-mêmes et dont on puisse jouir sur l'heure; ils leur faut surtout de l'inattendu et du nouveau. Habités à une existence pratique, contestée, monotone, ils ont besoin d'émotions vives et rapides, de clartés soudaines, de vérités ou d'erreurs brillantes qui les tirent à l'instant d'eux-mêmes et les introduisent tout à coup, et comme par violence, au milieu du sujet

Prise dans son ensemble, la littérature des siècles démocratiques ne saurait présenter, ainsi que dans les temps d'aristocratie, l'image de l'ordre, de la régularité, de la science, et de l'art; la forme s'y trouvera, d'ordinaire, négligée et parfois méprisée. Le style s'y montrera souvent bizarre, incorrect, surchargé et mou, et presque toujours hardi et véhément. Les auteurs y viseront à la rapidité de l'exécution plus qu'à la perfection des détails. Les petits écrits y seront plus fréquents que les gros livres; l'esprit que l'érudition, l'imagination que la profondeur: il y régnera une force inculte et presque sauvage dans la pensée, et souvent une variété très grande et une fécondité singulière dans ses produits. On tâchera d'étonner plutôt que de plaire, et l'on s'efforcera d'entraîner les passions plus que de charmer le goût.

Initials or a nom de guerre must be adopted by ALL competitors, but the prize-winners and the competitors awarded the second place will be required to send real names for publication if necessary.

No competitor will be awarded a prize more than ONCE during a given year, though the name of the competitor gaining the first place will be published each month.

All competitions must reach the Office by the first post on May 14, addressed "Prize Editor," THE JOURNAL OF EDUCATION AND SCHOOL WORLD, 3 Ludgate Broadway, London, E.C. 4.

University of St. Andrews. WALKER TRUST.

PRIZES FOR ESSAYS.

The Walter Trustees, desiring to stimulate thought as to the attitude, the preparations, and the conditions that must precede and lead up to the realization of the highest social educative and reconstructive ideals, invite essays on:—

SPIRITUAL REGENERATION as the basis of World Reconstruction.

Sympathizing with the present aspirations after a better social and international order, and believing that the realization of the highest ideals of humanity will depend essentially on an awakening to spiritual truths which will permeate and inspire all thought, the Trustees desire to essayists to concentrate their attention primarily on the nature and the necessity of spiritual regeneration, and on the methods by which it may be attained.

The Trustees will welcome, from those who do not care to compete for the prizes offered, any essays or suggestions likely to prove helpful under this scheme.

In the event of any essayist showing exceptional understanding of the subject and desiring facilities for the furtherance of reconstructive work, the Trustees may instead of, or in addition to, the prizes offered provide such facilities as the funds available may allow.

The following prizes are offered for the most widely helpful essays:—

I. STUDENTS' PRIZES.—Four separate prizes of £25 each.

II. WORKERS' PRIZES.—Four separate prizes of £25 each.

III. OPEN PRIZE OF £200.—The Trustees may, at their discretion, make additional awards.

Copies of the notice relating to this essay scheme may be had upon application to THE SECRETARY, THE WALKER TRUST, ROTHES, MARKINCH, FIFE.

The University,
St. Andrews, January, 1919.

ANDREW BENNETT,
Secretary.

ROYAL SOCIETY OF MEDICINE.

THE WILLIAM GIBSON RESEARCH SCHOLARSHIP FOR MEDICAL WOMEN.

THIS Scholarship, of the yearly value of (about) £250, is awarded by the Society to qualified medical women who are subjects of the British Empire, and is tenable for a period of two years. In choosing a Scholar, the Society will not decide on the merits of research work already done or contemplated, but will take such work into consideration. The Scholar will be free to use the Scholarship for her maintenance, for travel, or for the purpose of research.

There is no competitive examination, nor need a thesis or other work for publication or otherwise be submitted.

Applications should be accompanied by a statement setting out (1) professional training; (2) degrees or diplomas obtained; (3) appointments held; (4) particulars of proposed research (if any). Applications must be accompanied by two testimonials (1) as to academical or professional status, and (2) as to general character. Envelopes containing applications, &c., should be marked on top left-hand corner, "William Gibson Research Scholarship," and should reach the undersigned not later than Saturday, May 3rd, 1919.

J. W. Y. MACALISTER,

SELECTED :: EDUCATIONAL :: BOOKS.

Botany and Nature Study.

The Senior Botany. By FRANCIS CAVERS, D.Sc., Lecturer in Biology at Goldsmiths' College. Second Edition. **5s. 6d.**
A School course of Botany in which great stress is laid on outdoor and indoor observation and experiment.

Junior Botany. By FRANCIS CAVERS, D.Sc. **3s. 6d.**
Encourages observation and experiment on living plants, and the study of adaptation to environment.

Textbook of Botany. By J. M. LOWSON, M.A., B.Sc., F.L.S. Fifth Edition, Revised and Enlarged. **8s. 6d.**
The standard of this book is that usually required for University Scholarships. The chief aims are simplicity and clearness of statement as regards both facts and principles.

A First Course in Plant and Animal Biology. By W. S. FURNEAUX. **2s. 9d.**
The object of this book is to provide young beginners with a course of Nature Study closely in touch with scientific methods.
The numerous illustrations are a special feature of this work.

Life Histories of Common Plants. By Dr. FRANCIS CAVERS. **4s.**
The greater portion of the work is devoted to detailed instructions for the study, by observation and experiment, of typical plants.

Practical Botany. By FRANCIS CAVERS, D.Sc. Second Edition. **5s. 6d.**
In addition to the ordinary practical work this book also contains experiments on the Physiology of Plants and their response to external stimuli, and on the Chemistry of Plant substances.

School Gardening, with a Guide to Horticulture. By ALBERT HOSKING, Lecturer in Horticulture and Chief Supervisor of School Gardens, West of Scotland Agricultural College. **3s. 6d.**
This book affords teachers sound guidance in the correct methods of teaching his subject and of organizing the classes.

Languages, History, and Geography.

Junior English Grammar, with Parsing and Analysis. By A. M. WALMSLEY, M.A. Second Edition. **2s.**
Based mainly on inductive methods. The recommendations of the Joint Committee on Grammatical Terminology have been completely adopted throughout.

The Matriculation English Course. By W. H. LOW, M.A., and JOHN BRIGGS, M.A. Third Edition. **4s. 6d.**
A graduated course in English grammar, composition, and précis-writing.

An Anthology of English Verse. For use in Schools and Colleges. By A. J. WYATT, M.A., and S. E. GOGGIN, M.A. **3s. 6d.**
A selection of the best in all branches of English poetry except the dramatic, from Wyatt to Swinburne.

The Tutorial History of English Literature. By A. J. WYATT, M.A. Third Edition, continued to the present time. **3s. 6d.**
Attention is devoted to the important aspects of the work of the chief English authors, while tracing the development of our literature.

A Social History of England. By FREDERICK BRADSHAW, D.Sc., M.A. **5s.**
An elementary account suitable for use in the upper forms in schools of the social and economic development of England.

Textbook of Geography. By G. C. FRY, M.Sc. **5s. 6d.**
For use in middle and upper forms. Stress is laid on the interconnexion of Physical, Political, and Economic Geography.

New Junior French Course. By G. A. ROBERTS, M.A. **3s. 6d.**
A year's course in Reading, Grammar, and Translation into French, with material for oral practice, for use in the junior and middle forms of schools.

Direct French Course. By H. J. CHAYTOR, M.A., Head Master of Plymouth College. Illustrated. **2s.** With Vocabulary. **2s. 9d.**
This book is designed for use by pupils of 12 or 13 years of age who are commencing the study of French.

Matriculation French Essays. By H. J. CHAYTOR, M.A., and Dr. W. G. HARTOG, M.A., Examiner in the University of London. **2s.**
A carefully graduated course in Free Composition in French.

Education.

Principles and Methods of Teaching. By JAMES WELTON, D.Lit., M.A., late Professor of Education in the University of Leeds. Second Edition, Revised and Enlarged. **7s. 6d.**
In this work the treatment is theoretical in the sense of setting forth a consistent body of doctrine. But that the principles and methods here set forth are practical has been proved by the successful working of them in school.

Teaching: Its Nature and Varieties. By BENJAMIN DUMVILLE, M.A., F.C.P., late Master of Method and Lecturer on Education in the Islington Day Training College. **5s. 6d.**
An analysis of the processes of teaching as they occur in all subjects. The author examines the nature of the teaching itself, showing why certain methods should be employed.

Principles and Methods of Moral Training, with Special Reference to School Discipline. By JAMES WELTON, D.Lit., M.A., and F. G. BLANDFORD, M.A., Lecturer in Education in the Cambridge University Training College. **4s. 6d.**
This work treats of the general nature of good character—duty, virtue, conscience; of the school as a moral community in which good character is developed, &c.

Psychology, Experimental, in relation to Education, An Introduction to. By C. W. VALENTINE, D.Phil., M.A. **3s. 6d.**
An Introductory Course in Experimental Psychology as applied to Education, for the use of Teachers and Students in Training Colleges.

Textbook of Hygiene for Teachers. By R. A. LYSTER, M.D., B.Sc., D.P.H., Medical Officer of Health for Hampshire. **5s. 6d.**
Meets all the requirements of the Board of Education Syllabuses for Teachers in Training and for the Teachers' Certificate, Section M.

School Organization. By S. E. BRAY, M.A., Inspector of Schools to the London County Council. With a Chapter on "The Place of the Elementary School in a National System of Education," by Sir I. F. YOXALL. Second Edition. **4s.**

Mathematics, Physics, and Science.

The School Arithmetic. By W. P. WORKMAN, M.A., B.Sc. With or without Answers. Second Edition. **4s. 6d.**
An edition of *The Tutorial Arithmetic*, in which portions dealing with the higher theory and over-difficult problems are omitted.

Rural Arithmetic. By A. G. RUSTON, B.A., B.Sc., Science Tutor in the Department of Agriculture in the University of Leeds. **4s. 6d.**
Specially suitable for use in secondary rural schools working under the schemes of the Boards of Education and Agriculture.

School Algebra. By A. G. CRACKNELL, M.A., B.Sc. With or without Answers. **7s.**
A course of Algebra as far as the binomial theorem for positive integral indices, suitable for upper forms.

Preliminary Geometry. By F. ROSENBERG, M.A., B.Sc. With or without Answers. **2s. 9d.**
This is a textbook for young learners beginning the study of Geometry between the ages of 11 and 13. From the beginning the author insists on the learner's reasoning from first principles. The language used throughout is simple.

The School Magnetism and Electricity. By R. H. JUDE, D.Sc., M.A. **4s. 6d.**
For use in the upper forms of secondary schools. Based on Potential and Potential Gradient.

Junior Experimental Science. By W. M. HOOTON, M.A., M.Sc. F.I.C. Second Edition. **3s. 6d.**
A two years' course in Physics and Chemistry, which students may commence when about thirteen years of age.

Senior Chemistry. By G. H. BAILEY, D.Sc., Ph.D., and H. W. BAUSOR, M.A. Second Edition. **5s. 6d.**
A theoretical textbook for upper forms of schools, illustrated by a large number of experiments.

Junior Chemistry. By R. H. ADIE, M.A., B.Sc., Lecturer in Chemistry, St. John's College, Cambridge. Second Edition. **3s. 6d.**
A two years' Junior course of combined theoretical and practical work.

Supplement to
THE JOURNAL OF EDUCATION AND SCHOOL WORLD.

No. 598.

MAY 1, 1919.

Cambridge University Press

NEW PUBLICATIONS

A History of American Literature. Edited by W. P. TRENT, LL.D., Professor of English Literature in Columbia University; J. ERSKINE, Ph.D., Professor of English in Columbia University; S. P. SHERMAN, Ph.D., Professor of English in the University of Illinois; C. VAN DOREN, Ph.D., Head Master of the Brearley School.

Volume II now ready. Royal 8vo. 17s 6d net

This is the second of three volumes supplementary to *The Cambridge History of English Literature*

Cambridge Readings in Literature.

A Series of Anthologies from Homer to Masfield, illustrated with reproductions of pictures by great masters, from Botticelli to William Orpen. Edited by GEORGE SAMPSON. In five books. Crown 8vo. In three styles of binding, viz:—Cloth boards, uncut edges, with bookmarker; cloth limp; and cloth flush. Books I, II, III, 5s net, 4s 3d net, and 3s 6d net, each respectively, according to binding. Books IV and V, 6s net, 5s net, and 4s net

"We have never seen more delightful books of their kind and we predict that they will receive the most cordial of welcomes from teachers of English."—*The Scottish Educational Journal*

Macaulay: History of England, Chapter I. Edited by W. F. REDDAWAY, M.A. Fcap 8vo. 2s 3d net

A Short Italian Dictionary. By ALFRED HOARE, M.A. Demy 8vo. **Volume II—English-Italian.** Ready immediately.

Volume I—Italian-English. Previously published. 9s net

"May be heartily recommended as far and away the best portable dictionary of Italian we have met with. We have tested it with newspapers, fiction, and scientific writings, and in each case it has proved its utility. It has a useful preface giving the conjugation of Italian verbs, and is remarkably free from misprints."—*The Saturday Review* on Vol. I

Lermontov's Novice. Russian text, accented, with introduction, notes, and vocabulary by J. D. DUFF, M.A. Crown 8vo. 5s net

The notes are intended to explain briefly whatever seemed likely to puzzle a reader fairly familiar with the elements of Russian accidence. The vocabulary contains all the words which occur in the text.

The Faith of a Subaltern. Essays on Religion and Life. By Lieutenant ALEC DE CANDOLE, killed in action September, 1918. With a Preface by the Very Rev. the DEAN OF BRISTOL, and a Portrait. Crown 8vo. 2s 6d net

"I strongly recommend to the attention of clergy and laity alike this young officer's vigorous profession of the faith that was in him. It is a valuable contribution to religious thought. . . . There is maturity of grasp of problems and of handling, and evidence of a deeply religious life. The author commands attention by his obvious sincerity, as well as by his ability."—*Extract from the Preface*

The Collected Historical Works of Sir Francis Palgrave, K.H. Edited by his son, Sir R. H. INGLIS PALGRAVE, F.R.S. To be completed in 10 volumes. Royal 8vo. Volumes I and II now ready. 30s net each

Vol. I—The History of Normandy and of England (Vol. I). With memoir, introduction, frontispiece, and 4 maps.

Vol. II—The History of Normandy and of England (Vol. II). With 3 maps.

"Neither cost nor care has been spared in rendering this new edition worthy of the achievement and the place of the author as an investigator and exponent of English history."—*The Scotsman*

The Reign of Henry V, Vol. II (1415–1416). By J. H. WYLIE, M.A., D.Litt., late H.M. Divisional Inspector of Schools, Ford's Lecturer in the University of Oxford, 1899. Royal 8vo. 30s net

"The book is a mine of information on the social life of the time; it deserves, not a mere cursory reading, but serious and sustained study. Probably no historian has made more fruitful use of manuscript sources which are as yet uncalendared; while the author's work is as remarkable for sound judgment as it is for painstaking accuracy. He is as intimately acquainted with foreign history as with English."—*The Athenæum* on Vol. I

History of Modern France, 1815–1913. By EMILE BOURGEOIS. In two volumes. Crown 8vo. With a map. Volume I, 1815–1852. Volume II, 1852–1913. 21s net. Cambridge Historical Series.

In these volumes M. Bourgeois has traced the lines of that remarkable political evolution through which France has been able to realise the principles and to establish the institutions of democracy.

Germany, 1815–1890. By Sir A. W. WARD, Litt.D., F.B.A., Master of Peterhouse. In three volumes. Crown 8vo. Vol. I, 1815–1852, with a map. Vol. II, 1852–1871, with 19 maps and plans. Vol. III, 1871–1890, with two Supplementary Chapters and two maps. 12s 6d net. Cambridge Historical Series.

"A book which gives a record of the most important events in German history, and as a handbook for students is probably superior to anything of the same kind that has been produced in Germany itself."—*The Times*

Latin Epigraphy. An introduction to the study of Latin Inscriptions. By Sir JOHN EDWIN SANDYS, Litt.D., F.B.A., Fellow of St John's College and Public Orator in the University of Cambridge. Demy 8vo. With 50 illustrations. 12s 6d net

This, the first introductory manual of Classical Latin Epigraphy to be published in England, includes a survey of the inscriptions quoted by classical authors, an outline and bibliography of the modern study of the subject, specimens of the several classes of inscriptions with fifty facsimiles or other illustrations, and chapters on the language and style, and on the restoration and criticism of inscriptions.

Botany. A Textbook for Senior Students. By D. THODAY, M.A., Lecturer in Physiological Botany and Assistant Director of the Botanical Laboratories in the University of Manchester. Revised and enlarged edition. Large crown 8vo. With 230 figures. 7s 6d net

"It would be difficult to speak too highly of this admirable handbook. It is clear and concise without being dry. . . . The illustrations are beautiful and worthy of much study."—*Education* on the First Edition

FETTER LANE, LONDON, E.C.4: C. F. CLAY, MANAGER

SCIENCE

ELEMENTS OF GENERAL SCIENCE (Revised Edition)

By O. W. CALDWELL, Ph.D., and W. L. EIKENBERRY. 8vo. Cloth. xii + 404 pages. Illustrated. **5s. 6d. net.**

This volume presents an introductory course on sound lines covering the whole range of science. The revised edition, as compared with the earlier one, contains an additional 100 pages, an entire part devoted to astronomy, and chapters on electricity. The topics discussed are grouped under six major headings: I. The Air. II. Water and its Uses. III. Work, Energy, and Electricity. IV. The Earth in Relation to other Astronomical Bodies. V. The Earth's Crust. VI. Life upon the Earth. While the present edition also contains much new material relating to the applications of science to household, community, and industrial problems, and numerous illustrations, many of them of the "how it works" type, it accords adequate treatment to the formal and theoretical aspects of the subject and will, it is believed, lead the student to acquire those habits of accuracy and the spirit of investigation which make the subsequent study of the differentiated sciences at once more profitable and interesting.

FIRST COURSE IN CHEMISTRY

By W. MCPHERSON and W. E. HENDERSON. 12mo. Cloth. x + 416 pages. Illustrated. **6s. net.**

A book which embodies the latest results of laboratory research. It is intended primarily for those students beginning chemistry, whose study of the subject will cease when they leave the secondary school, though it also furnishes a thorough foundation for those who intend to specialize in the science. The theoretical portions of the subject are developed briefly and as a natural outcome of facts already presented, emphasis being placed wherever possible on the applications of chemistry to metallurgy, manufacture, agriculture, household chemistry, and sanitation. The book contains many interesting illustrations of these applications and photographs and biographical details of the world's great chemists.

A FIRST COURSE IN PHYSICS

By R. A. MILLIKAN and H. G. GALE. 12mo. Cloth. 482 pages. Illustrated. **6s. net.**

In this book the authors have developed their subject on inductive lines, starting by considering the *hows* and *whys* of some simple experiment or well-known phenomenon, and gradually leading the student back to the great principles about which the apparently disconnected facts of physics group themselves. As in **First Course in Chemistry** much attention has been devoted to the applications of physics in everyday life, while the illustrations include photographs of the most notable achievements of physics, and portraits and details of biographical interest of eminent modern physicists as well as of the great pioneers of the science.

THE CARSON-SMITH MATHEMATICAL SERIES

By G. ST. L. CARSON, M.A., M.Sc., Reader in Mathematics in the University of Liverpool, formerly Head Mathematical Master in Tonbridge School; and DAVID EUGENE SMITH, Ph.D., LL.D., Professor of Mathematics in Teachers' College, Columbia University.

ELEMENTS OF ALGEBRA

Part I. 340 pages. Illus. **3s. 6d. net.**
Part II. 214 pages. Illus. **3s. 0d. net.**
Parts I and II. 538 pages. Illus. **5s. 6d. net.**

PLANE GEOMETRY

Part I. 266 pages. Illus. **3s. 0d. net.**
Part II. 216 pages. Illus. **3s. 0d. net.**
Complete. 482 pages. Illus. **5s. 6d. net.**

Answers can be obtained to both books if desired.

ELEMENTS OF ANALYTIC GEOMETRY

By P. F. SMITH and A. S. GALE. 8vo. Cloth. 424 pages. **10s. 6d. net.**

A book which presents all the elementary methods and ideas of analytic geometry as a general science rather than as a detailed treatment of conic sections. The subject is developed after the Euclidean method of definition and theorem without, however, adhering to formal presentation. Each method is summarized in a rule and stated in consecutive steps, and many illustrative examples are worked out in the text.

NEW ANALYTIC GEOMETRY

By P. F. SMITH and A. S. GALE. 12mo. Cloth. 342 pages. **7s. 6d. net.**

This volume provides a thorough and adequate preparation for the study of the calculus and applied mathematics. The subject matter differs in many respects from that included in modern textbooks, the authors having recognized the great importance, in the applications, of the exponential and trigonometrical functions, of setting up and studying functions by their graphs, of parametric equations and the locus problem, and of fitting curves to points determined by empirically given data, and chapters covering all these topics have been included.

INTRODUCTION TO ANALYTIC GEOMETRY

By P. F. SMITH and A. S. GALE. 8vo. Cloth. 217 pages. **6s. 6d. net.**

The first nine chapters of the authors' **Elements of Analytic Geometry** (q.v.) form the basis of this textbook. The volume outlines a course giving an adequate minimum preparation for the calculus and presents a short but thorough course in analytic geometry.

ELEMENTS OF THE DIFFERENTIAL AND INTEGRAL CALCULUS. (Revised Edition)

By W. A. GRANVILLE and P. F. SMITH. 8vo. Cloth. 463 pages. **12s. 6d. net.**

A book which treats of all the topics from which a selection would naturally be made in preparing students either for elementary work in applied science, or for more advanced work in practical mathematics, and is suitable for the pupil who has completed an introductory course but is not yet capable of working with advantage from larger advanced treatises on the calculus. This revised edition incorporates those changes due to recent developments in the study of the calculus and includes a large number of examples without answers, miscellaneous examples, and much practical problem material based on knowledge that all students of the calculus have at their command.

CATALOGUE ON APPLICATION.

GINN AND COMPANY, 9 St. Martin's Street, Leicester Square, London, W.C.2

**SELECTED
LIST.**

COMPOSITION AND READING BOOKS.

LESSONS IN COMPOSITION.

By J. EATON FEASEY, Head Master of Ranmoor Council School, Sheffield.

A series of books for Scholars in Middle and Upper Classes, which aim at training the child's power of expression in words when dealing with subject-matter of all sorts, but chiefly with imaginative exercises.

(Specimens gladly sent to Head Teacher applicants.)

Book.	Pp.	Illustrations.	Paper.	Cloth.
I	56	10 full page	5d.	6d.
Ia	59	9 " "	5d.	6d.
II	64	7 " "	6d.	7d.
Ila	64	7 " "	6d.	7d.
III	78	4 " "	6½d.	7½d.

Teaching Composition. By the same author.
A Teacher's book for use with the above series. 212 pp. with illustrations. 3s. 6d. net.

Preliminary Self-Help Exercises in English. By J. HARDMAN, A.C.P.

Short passages of acknowledged excellence from standard authors are given, and exercises are set to draw the pupil's attention to special and interesting points. 64 pp., paper 6d., cloth 7d.

English Grammar and Composition.
By W. G. WESTON, M.A., B.Sc.

A Manual of Grammar taught through Composition. Not a set of rules and definitions divorced from practical use, but an attempt to arouse intelligent interest in the facts of the language. Crown 8vo, 320 pp., 3s. net.

The Story of a Coal Mine. By T. W. BERRY,
F.C.S., Director of Education, Rhondda.

A Mining Reader, in which simple questions are appended to each chapter as suggestive systematic exercises. Some elementary instruction in mining is carried out in a readable manner. 72 illustrations. 1s. 6d.

The Triumph of Man. With 130 illustrations.
A reading book for boys and girls from twelve to sixteen years old. Contains a simple account of wind, water, steam, and electricity and their applications; of iron and steel and their uses, &c. 2s. net.

Europa's Childhood and Growth,
By A. J. BERRY, M.A. (Oxon.), Director of Education, Preston.

A beautifully illustrated reading-book, giving a general account of the history of Europe approached through Geography. 281 pp., 2s. net.

Britannia's Growth and Greatness.
By the same author.

An historical geography of the British Empire. Adopted by the Oxford Delegates as textbook for the Preliminary Examination. 304 pp., 60 illustrations, 2s.

The True Patriot's Book. By ORME AGNUS.

An ideal citizenship reader, which is both well written and well illustrated. A lucid account is given of the origin of the Great War. 168 pp., 1s. 9d.

Sir Isaac Pitman & Sons, Ltd.

will be pleased to forward you, post free, a copy
of their Educational Catalogue containing fuller
details of these and other suitable books immedi-
ately on receipt of a card at—

1 Amen Corner, London, E.C. 4.

REVIEWS AND MINOR NOTICES.

THE STUDY OF RUSSIAN: SOME NEW BOOKS.

- (1) *A Practical Russian Grammar*. Part I. By R. T. CURRALL. (3s. 6d. Harrap.) (2) *Selections of Russian Poetry*. By B. A. RUDZINSKY. (2s. 6d. Blackie.) (3) *A Russian Vocabulary*. By E. G. UNDERWOOD. (2s. 6d. Blackie.) (4) *Russian Accentuation*. By E. G. UNDERWOOD. (3s. 6d. Blackie.) (5) *Russian Lyrical Poetry*. By A. E. TEBBUTT. (Kegan Paul.) (6) *Kegan Paul's Russian Texts*.—*The Signal*, and *Four Days on the Field of Battle*. By V. GARSHIN. Edited by J. H. FREESE. (2s.) (7) *Oxford Russian Plain Texts Series*.—*Select Fables* (KRILOV), edited by E. G. UNDERWOOD (1s. 3d.); *Men Servants of other Days* (GONCHAROV), edited by NEVILL FORBES (1s. 6d.); *In the Night*, and *Easter Eve* (KOROLENKO), edited by NEVILL FORBES (1s. 6d.).

There are indications that the reaction against the study of Russian, which followed the defection of the Russian army from the alliance, is coming to an end, and that, with the stabilization of political conditions in that unhappy country, Russian will take its proper place in the educational curricula in Great Britain and other countries. The arguments for a widespread interest in this language on the part of Englishmen and women, and English boys and girls in particular, still hold good: they may be grouped under two heads: utilitarian and literary or philological. The field open to British trading interests in Russian-speaking countries is wider and the opportunities greater than in any other expanse of territory in the world, South America itself not excepted; and Russian is the key language to a host of other tongues—the Slavonic group which includes Polish, Bulgarian, Serb, Montenegrin, and other Balkan languages, and has a greater wealth of inflexion and expresses more subtle distinctions than Greek or French respectively. Whatever may be said against it as a subject for secondary education, Russian school books appear to pour forth from English printing presses in ever-increasing volume.

(1) Part I of a "Practical Russian Grammar," by Mr. R. T. Currall, comes from Messrs. George G. Harrap & Co. The appearance of another comprehensive grammar, when there are already at least two very complete and very successful grammars in this country, is in itself of some significance. Mr. Currall makes a special feature of phonetics; he puts forward a new method of dealing with the verb which takes the Past tense (so called) first, and postpones a treatment of aspects to a much later stage. The book contains an elaborate vocabulary and some excellent exercises, and is on the whole a valuable contribution to a serious study of the Russian language.

(2) "Selections of Russian Poetry," by Mr. B. A. Rudzinsky, contains work by the leading Russian poets—excluding those of to-day and beginning with Karamzin; instead of a vocabulary the book has quite literal prose renderings of the verse, and short biographical introductions. It should be of use to those students who have passed the first stage in the study of the language. From Messrs. Blackie & Son comes also (3) "A Russian Vocabulary: the 1,000 commonest words with their English equivalents." Its author, Mr. E. G. Underwood, claims that "in probably no other language is the learning by heart of groups of words so conducive to general progress; the number of actual roots in Russian is not great, and if those included in this book are known the knowledge so gained should supply the key to many thousands of other words since the number of compounds is enormous." It is certainly "easier to learn two—or even three or four—words than one by the association in groups or pairs of words similar, cognate, or opposite in meaning or form," and these principles appear to have been well applied in the compilation of this vocabulary.

(4) "Russian Accentuation," by the same author and from the same publisher is a short work—the only work we have so far seen in English—giving practical rules as to the occurrence of the tonic accent in Russian. Accentuation is admittedly

the greatest difficulty of the spoken language; and this book, its style being simple and clear, and its matter tabulated and systematized, should be of considerable use both to beginners and to those who have already made some progress.

(5) "Russian Lyrical Poetry," an anthology by Mr. A. E. Tebbutt, contains a selection of nineteenth century lyrics beginning with Pushkin and ending with Maikov. While the selection can scarcely be said to be representative of the best of Russian lyric poetry, it has the advantage of including several poems which have not before appeared in English editions. The "notes" are extremely heavy and occupy 100 pages to 60 pages of text; they are not, moreover, very helpful, and are an ineffective alternative to a good vocabulary, which is altogether lacking. We disagree with much that we find in the Preface. A good deal is quite out of place in an anthology of poetry. Mr. Tebbutt asks, for example, "how many students of Russian connect, for instance, замо́къ (castle) and замо́къ (key), with замы́кать (to shut) отмы́кать (open), or ро́е (woe) with го́рький (bitter). We should have said that the connexion was obvious to the merest beginner; it must also be added that замо́къ does not mean "key," but that is probably only a slip on Mr. Tebbutt's part. If sound progress is to be made in the study of Russian in this country it will be necessary to produce editions of a much higher standard of scholarship than is shown in this work.

In (6) Garshin's "The Signal," and "Four Days on the Field of Battle," edited by Mr. J. H. Freese, a useful addition has been made to Messrs. Kegan Paul's Russian Texts; the stories are excellent examples of vigorous modern Russian and the notes and vocabulary are adequate. To the Oxford Russian Plain Texts (7) have been added Krilov, "Select Fables," edited by Mr. E. G. Underwood; Goncharov, "Men Servants of Other Days"; and Korolenko, "In the Night" and "Easter Eve," both edited by Mr. Nevill Forbes. These are well chosen examples of Russian classics, produced in an attractive format at a low price.

THE PRINCIPLES OF ASSOCIATION.

Studies in Word-Association. Experiments in the Diagnosis of Psychopathological Conditions carried out at the Psychiatric Clinic of the University of Zurich.
By Dr. C. G. JUNG. (Heinemann.)

The significance of the principles or "laws" of association for a proper understanding of the working of the mind has been familiar to philosophical psychologists from Plato and Aristotle down to the last members of the so-called English school of psychology. The experimental study of association began in this country with Galton's studies in 1879; and was elaborated by Wundt and his disciples during the succeeding decade in Germany. The work carried out at the Psychiatric Clinic in Zurich by Jung and his colleagues, and published in 1904, gave a new direction to those investigations. The hypothesis of unconscious mental complexes, which has played such a celebrated rôle in the discussions of the doctrines popularly associated with the name of Freud, was largely based upon the results of Jung's experiments, although suggested, elaborated, and confirmed by the broader methods of psychoanalysis.

Of recent years the views of Jung have diverged from the tenets of the stricter followers of Freud, and have been launched upon more speculative and, in the view of many, less scientific lines of thought in books already translated into English. It is, therefore, doubly valuable to have published—thanks to the generosity of Mrs. Harold F. McCormick—an authorized translation of the earlier series of papers which first appeared in the *Journal für Psychologie und Neurologie*. Dr. Eder, who has himself made valuable contributions to the subject treated, has produced a translation which differs from most translations of psychoanalytic books in being not only accurate, but also clear in meaning and readable in style.

The method used by Jung is simple. It is clearly described in the paper on the associations of normals—the longest paper in the book. A prearranged list of words is called out to the

patient, and he is instructed to reply to each with the first word that occurs to his mind. The time taken to reply is measured in fifths of a second by a stop-watch. The replies are classified according to an elaborate scheme; and slow reactions are particularly noted as probably betraying some repressed emotional interest or "complex."

In the present volume the majority of papers are concerned with the application of the procedure to psychoanalysis; they prove conclusively its value in the diagnosis of mental conflicts and complexes underlying hysteria and other morbid states.

To the educationist perhaps the chief interest lies in Jung's demonstration of various individual peculiarities or "temperaments" in the normal mind; for example, the "objective" type, the "subjective" or "egocentric" types, including the "predicate," the "simple constellation," and the "complex constellation" types. The influence of education upon the results is discussed at length; paradoxically enough, the reactions of the educated appear shallower and more superficial than those of the uneducated. The book includes a most suggestive paper upon the mental associations of the feeble-minded. The conclusion is drawn that in the associative reaction experiment we have a valuable adjunct for the diagnosis of mental deficiency, as well as of disorders of an emotional and functional character.

PALGRAVE'S HISTORICAL WORKS.

The Collected Historical Works of Sir Francis Palgrave.
In Ten Volumes. Vols. I and II: *History of Normandy and England*. Edited by Sir R. H. INGLIS PALGRAVE.
(30s. net. Cambridge University Press.)

The Cambridge University Press has commenced the considerable task of printing in ten handsome and portly volumes—each about the size of a volume of the "Cambridge Modern History"—the collected historical works of Sir Francis Palgrave. It is a remarkable undertaking, particularly at the present stage of the world's development. Sir Francis Palgrave died in 1861 at the age of seventy-three, leaving his "History of Normandy and England" unfinished. He had spent an honourable and distinguished life in the public service. Beginning his career as a solicitor, he had been called to the Bar in 1827. At the same date he commenced to work for the Record Commission appointed by Lord Liverpool's Government. He was soon afterwards one of the Commissioners who drew up the famous report on which the Municipal Corporations Act of 1835 was based. In 1838 he was made Deputy-Keeper of the Public Records, and he held this post until his death, twenty-three years later.

His position as custodian of the national archives enabled him to make original and important researches into the early history of the English Constitution. Out of them all he gradually evolved a theory with which his name will be permanently associated. This theory was that the Roman Empire did not pass away in the fifth century of the Christian era, but continued to exist among the barbarian peoples—Franks, Anglo-Saxons, Visigoths, &c.—and was, indeed, the primary formative influence in the creation of their respective polities. He unquestionably recovered the key to the history of the Middle Ages, and so rendered service of inestimable value to all later historians. His tendency, it is true, was to exaggerate the dominance of the Roman element, both in the Anglo-Saxon constitution and in the institutions of Normandy. But he corrected an opposite exaggeration on the part of Thierry and other earlier writers, while his own over-emphasis of the Roman factor has been corrected by such writers as Stubbs and Freeman.

The present republication (with important additions) of Sir Francis Palgrave's writings is a work of piety performed by the last surviving of the historian's four sons. It is almost as notable a monument to Sir Inglis Palgrave as it is to the memory of his eminent father. For Sir Inglis himself has reached the venerable age of ninety-two, and his editorial notes (grouped at the end of each volume) are storehouses of

minute information needed to elucidate, expand, and correct the text.

The writings of so early a pioneer as Palgrave are naturally of historiographical rather than of historical interest at the present day. But, in spite of that fact, there are many chapters in this splendid edition that will repay careful study.

THE GROWTH OF EDUCATIONAL IDEAS.

Education and Social Movements. By A. E. DOBBS.
(10s. 6d. net. Longmans.)

Professional educators are a little suspicious of the contributions of the outsider, so they may look askance at this volume from an economist. But they will find that its author sticks to his last, inasmuch as he deals only with matters over which he has a complete mastery. It is greatly to our advantage to look at our subject from the point of view of a man who has studied it from quite a different angle from our own. So teachers should welcome this handsome volume that explores the interaction of economics, sociology, religion, and education during the period 1700-1850. The work is incomplete, for Mr. Dobbs promises us a second volume, bringing matters up to the present date.

Most of us know, in a general way, the course of educational history during the period selected, but readers need not be alarmed at the prospect of merely another chronological record. Mr. Dobbs treats his subject in a broad, scientific way, and presents a richly documented view of the whole field. His contribution is specially welcome at the present moment, for it traces back to their sources many of the forces that are just now at work. Without doubt our educational unrest to-day is due mainly to social considerations based on economic changes. As we read Mr. Dobbs's pages we realize that we are passing in review different stages in a process that has led up to our present position. We cannot understand Mr. Fisher's problem properly if we do not know the steps by which it has been reached. Mr. Dobbs supplies us with all the raw material necessary to form just opinions, but he does more: he seeks to disentangle the various forces at work, and to explain their origins and effects. We cannot say that at all points we quite follow his argument; but in most cases he is eminently clear, and in all cases cautious and restrained.

The chapter on The Social Environment is specially valuable, as providing the necessary background for speculation on the development of education as a national movement; and the chapter on the Era of Revolutions supplies certain parallels that are of the utmost importance in guiding us at the present time of crisis. Between these two chapters is sandwiched one on Schools and Literature that corresponds to the chapter in the second part on Libraries and Literature. Both of these supply valuable material not readily accessible to the general reader, and we congratulate Mr. Dobbs on the completeness of his inventory, though we miss the "Cottage Library" of pleasant memory. The chapter on Elementary Education has nothing new for the well-read teacher; but the chapter on Education by Collision is fresh and stimulating, dealing as it does with situations extremely like that existing to-day. The final chapter on The Social Outlook gives Mr. Dobbs the opportunity of making a general survey of the position. He pauses for a moment on the wing, and, by generalizing from the facts he has already put before his readers, reaches certain conclusions that help to bridge the gulf between the period he brings to a close and the period to be dealt with in the promised second volume.

A NOTABLE PRIZE ESSAY.

The Baronial Opposition to Edward II. By J. C. DAVIES.
(21s. net. Cambridge University Press.)

The reign of Edward II was until recent years regarded as an arid and unimportant period of English history. It lay as a dull and depressing interlude between the constitutional achievements of Edward I and the military glories of Edward III. The unhappy King himself, defeated by his

enemies, betrayed by his wife, assailed by his barons, appeared as a poor figure of a man alongside his noble father and his resplendent son.

Constitutional historians were the first to suspect that behind the personal conflicts and domestic catastrophes of the reign lay important struggles concerning principles, and could be discerned deep movements of permanent significance. Prof. T. F. Tout, assisted by a band of devoted disciples, spent many years in examining afresh and determining the place of Edward II in English history. He succeeded in showing on one hand that the King himself was by no means so futile or so foolish as had been generally supposed, and, on the other hand, that out of his household there developed during this period a novel and effective type of national administration.

In the present volume Mr. J. C. Davies follows in the footsteps of Prof. Tout, and makes a careful study both of the new administrative system which was growing up in and around the Royal household, and also of the baronial antagonism to it, based upon the theory that the nobles in general, and the earls in particular, were the proper controllers of the policy of the State and the machinery of the Government.

Mr. Davies's work is an expansion of an essay which gained the Thirlwall Prize in 1917. One marvels that so extensive and exhaustive a piece of research can have been done by a young man in the conditions that prevailed at that date. The book displays great diligence in the examination of all available material, both printed and manuscript, a mature historical judgment, and considerable skill in the arrangement and expression of conclusions. It gives Mr. Davies at once a high place among the historians of medieval England, and encourages us to look for further important writings from his pen. Perhaps the most interesting contribution which the present volume makes to our estimate of the characters and incidents of the early fourteenth century is the new and highly favourable account of the Earl of Pembroke and his activities. On the other hand, Thomas of Lancaster stands revealed as even more ignoble and less competent than had been supposed. The whole volume deserves most careful consideration.

EDUCATION.

America at School and at Work. By H. B. GRAY.
(5s. net. Nesbit.)

The purpose of this little work is to make clear that in America the people are really making a fundamental change in their conception of the nature of education. The bookish ideal is going by the board: intellect is being removed from its position of monopoly. Dr. Gray is an enthusiastic admirer of American educational developments, and it will strike some readers that he is inclined to neglect what has been done of late on this side of the Atlantic. He admits that he had written certain of the chapters before Mr. Fisher's Bill had been introduced. Further, Corporation Schools (in the American sense of that term), which he praises so highly, are not altogether unknown among us. But, when all is said, Dr. Gray has made out an excellent case for the United States. It is highly desirable that we on this side should know the implications of such a measure as the Smith-Hughes Bill. We English people may be inclined to think that the Americans have no great need to reduce the amount of purely bookish work done in their schools; but it is only fair that we should know their point of view, and appreciate the skill with which they are in many cases coping with the special needs of their economic situation. Dr. Gray has deserved well of us in writing this book. It deserves serious attention.

Experimental Education. By ROBERT R. RUSK.
(7s. 6d. net. Longmans.)

When the first edition of this book appeared in 1912 it was favourably reviewed in these pages. This new edition contains all the old matter, and has many additions. The old edition had 295 pages, the new has 332. The new pages being printed in somewhat smaller type represent a considerable increase in the matter provided. The whole has been carefully revised, but the most important changes occur in connexion with the important subject of the method of study. This subject has of late received a great deal of attention, an attention that it richly deserves. Dr. Rusk's chapter on "The Economy and Technique of Learning" is

in itself a most valuable contribution to the really "applicable" part of experimental education. The following chapter on "The Conditions Affecting Mental Work" is also of great practical value. The book has been practically rewritten, and, brought up to date as it is, it has really no rival as a clear, authoritative, and practically useful presentation of its subject. Any teacher who is in doubt about the possibility of getting from a book useful hints for the practice of his craft will do well to turn to Dr. Rusk, and be for ever convinced that the thing is possible.

The Training of Youth. By T. W. BERRY.
(7s. net. Fisher Unwin.)

Including the title-page, the Contents, the Dedication, the Preface, and the Bibliography, this somewhat unhealthily distended volume runs to 207 pages. Its literary style leaves something to be desired, and the author has nothing particularly fresh to say. On the other hand, the spirit of the book is excellent, and the presentation here made will be acceptable to those who are interested in social and educational reconstruction, but have not had the opportunity of consulting authorities on the subject. The special subject of the book is the training of adolescents, the chapters that seek to suggest practical reforms being those on "Recreation" and on "Vocational Training." An idea implicit in the volume is that the team work of the public schools may be introduced into the elementary schools. Mr. Berry speaks out fearlessly on the subject of training in sex hygiene, and the ordinary teacher will be glad to learn that instruction in this subject should be relegated to specialists. The book is well documented throughout, the authorities quoted ranging from Ruskin to the *Daily Mail*. Mr. Berry's references are well up to date, though the book contains internal evidence of having been delayed on its way through the press.

The Spiritual Foundations of Reconstruction. A Plea for New Educational Methods. By F. H. HAYWARD and A. FREEMAN.
(10s. 6d. net. P. S. King.)

To begin with, we congratulate the authors of this book upon its lucid arrangement, and upon their wisdom in giving the utmost prominence to their fundamental proposals. As those proposals are radical in character, we think the authors are wise, too, in quoting the considered opinions, obtained before publication, of several eminent persons. The scheme laid down is certainly not lacking in boldness, but it is none the worse for that. Briefly stated, the scheme is—(1) largely to abolish the current class teaching of such subjects as literature, history, music, and Scripture (subjects in which "appreciations, perspectives, and ideals" are paramount), and to substitute a "liturgical, ceremonial, or celebrational treatment"; (2) to give specific moral and civic lessons; (3) to hang on the walls of every school authoritative charts of time, space, and history; and (4) to invite—nay, to urge—representatives of all sects, parties, professions, &c., to address the school on ceremonial occasions. Needless to say, the first proposal, dealing with subjects which are in a sense "better caught than taught," is the basis of the whole scheme. Of the critics we find ourselves most in agreement with Mr. Laurence Binyon. In principle we agree with Prof. Adams that the scheme is well worth a trial. But we think, with Mr. Binyon, that it would be tried with a better chance of success, and therefore of far-reaching influence, if the celebrations were simpler and less frequent than the authors contemplate. There are many points upon which we should like to join issue with the authors, but, on the whole, we cordially hope that their plea will not fall on deaf ears.

The School and the World. By V. GOLLANCZ and D. SOMERVELL. (5s. net. Chapman & Hall.)

As many of our readers will remember, the appearance in December, 1917, of the authors' "Political Education in Public Schools" attracted considerable attention, and the experiment described therein has been a good deal debated. The very fact that such publications as the *Westminster Gazette* and the *Manchester Guardian* on the one hand, and the *Saturday Review* and the *Church Times* on the other, took diametrically opposite views of the experiment was perhaps enough to show that the teaching of politics, in the sense contemplated by the authors, is a thing for which, to say the least, society is not yet ready. The experiment has collapsed, and the teachers concerned have left the school in which it was made. Nothing daunted, they present their *apologia* in the volume before us. They interpreted "politics" in "the widest Platonic sense," but they were not content with the judicial and impartial attitude. On the ground that education must create enthusiasm, they took up a position which, as it seems to us, whether in religion or in politics, is untenable except in a strictly sectarian school. With a little more of the judicial attitude, of which we are not so sceptical as the authors, we think such an experiment might succeed, and might do a world of good.

The Great War Brings it Home. By JOHN HARGRAVE.
(10s. 6d. net. Constable.)

The author of this remarkable book, who is identical with "White Fox" of *The Scout*, tells us that it was compiled long before the outbreak of war, and that on his enlistment it was left for publication in case of his not coming back. It has been partly rewritten, but its main thesis stands; indeed, "the great war brings it home" with greater force than ever. What is that thesis? Civilized man has advanced vastly beyond the savage, but the advance has been lop-sided; it has been an advance in intellectual achievements, but certainly not in morals. Industrial slavery and the conditions of city life have led to a sad deterioration, both physical and moral. The remedy lies in returning to a more natural life, and in applying this remedy we must begin with the children. The boy of ten to fourteen, in whom "White Fox" has obviously specialized, corresponds with the stage of racial development represented by the discovery of fire, the realization of the value of co-operation and of loyalty to a chief, and the evolution of totemism. Hence the boy's love of fraternity gangs, camp-fires, and all that relates to woodcraft. In developing his views on the right treatment of the boy and the adolescent the author is at his best, and his exposition of "tribal training" is helped materially by his effective illustrations. The concluding chapters on primitive love, the "great mystery," and the art of meditation are among the most interesting in an extremely valuable book.

A Textbook of Sex Education. By W. M. GALLICHAN.
(6s. net. T. Werner Laurie.)

A good many books on the much debated subject of sex instruction have been noticed in this journal during the past year or two, but among them we unhesitatingly accord a high, and in some respects a unique, place to Mr. Gallichan's volume. Its tone is sane and sensible throughout; the treatment is comprehensive, the training of boys and girls at successive stages of development being duly considered; and, besides being comprehensive, the treatment is practical, a number of specimen lessons forming a conspicuous feature of the book. The bibliographical notes will also be valuable to many readers.

A Guide to the Education Act, 1918. By K. E. T. WILKINSON.
With a Foreword by ARNOLD S. ROWNTREE. (1s. 6d. Athenæum Literature Department.)

We commend this conveniently arranged guide to the notice of schoolmasters and others who desire to have by them a means of ascertaining quickly what may, or may not, be done under the new Education Act. Mr. Wilkinson may be congratulated upon a good piece of work.

ENGLISH.

The Years Between. By RUDYARD KIPLING. (7s. 6d. Methuen.)

It may be that this volume will not appreciably add to the author's fame. It lacks the spontaneity of those other verse-books which all men know. Some of the pieces have been published before; and a few are, though written but a few years ago, already in need of a commentary. Yet for all this the book is very welcome indeed; it is the history of the thought of the common man, dressed in language he cannot use; and its music is the music he hears in the wind, though he cannot write it down for you. Those critics who call one piece coarse and another jingoish forget the moods and opinions of that great public which no poet in England has ever represented till Kipling came. "The kingdom is within you," is the motto of these verses, and on this motto our lay hymn-writer again and again harps. "The Holy War," "The Craftsman," "A Nativity," "A Pilgrim's Way" are quite as good as anything we know—with the exception of the greatest things; but no reviewer can ever forget these greatest things, and our debt to Mr. Kipling is difficult to assess. "For all we Have and Are," which finds a place here, is already a classic; and "The Sons of Martha" is a psalm of labour. The author sees all sides, and more than one pibroch is shouted.

Essays on Goldsmith and Selections from his Writings.
Introduction by G. E. HADOW and Notes by C. B. WHEELER.
(2s. 6d. Clarendon Press.)

The Essays by Scott, Macaulay, and Thackeray are all printed here, but the editor evidently recommends Thackeray to the young. Her own preface, like so many prefaces, is rather above the heads of the fifth form; the ideal school introduction will not be written till editors cease wholly to write for one another. But a good teacher would soon put that right, and there is nothing but praise for the plan and execution of this book. Indeed, the suggestion in it, that great writers may profitably be used in our estimate of great writers, is capable of much extension. Milton and Chaucer, Tyn-dale and Wyclif, Thucydides and Herodotus, await such treatment. Shelley's two essayists remain in copyright. But the idea might

have been pressed home fully in the introduction, and a plea entered for the good school library. Even at this day schools and teachers are without their proper book-apparatus.

Essays and Addresses in War Time. By Viscount BRYCE.
(6s. net. Macmillan.)

This volume contains eight essays or addresses. The first three were originally issued early in the period of the War as statements of the case of the Allies as against the Germans. As coming from the pen of one so liberal and pacific as Lord Bryce, they were at the time of their publication powerful and effective in their appeal to neutral opinion and impartial conscience. Even now they are valuable not only as historic records, but as damning indictments of militarist Germany, and as clear assertions of the fundamental principles for which the Allies waged their great fight. The second group of three addresses is academic in its nature. The addresses were delivered before learned societies during the years 1915-1916. They deal more generally with the subject of war as viewed in the light of science and history. They institute, moreover, interesting comparisons between the war that was then convulsing the world and the smaller conflicts of older days. The wealth of Lord Bryce's accumulated stores of learning is well employed in lavish illustration of his theme. The concluding couple of studies have been written specially for this work. They deal, the one with the Principle of Nationality, the other with the League of Nations. Both are weighty and timely. They are marked by that sanity of judgment, width of view, and lucidity of expression which one associates with all Lord Bryce's utterances. The whole volume is worthy of its venerable author.

The Study of Poetry. Pamphlet No. 40 of the English Association.
By Dr. E. DE SELINCOURT. (1s. to Members.)

The outside world occasionally gets sight of lectures read to societies, and the pamphlets of the English Association are always welcome. Dr. Selincourt admits that he is but reiterating what has been said before, but it is well to have impressed on us even in these days the value of vision. "Poetry belongs to the realm of mystery lying gracious and becalmed beyond the fretting tides of the world," and, though the lecturer hardly argues and merely states, he manages to tell us old truths in fresh ways. "In good poetry you cannot distinguish sound from the sense." "Our general attitude towards literary criticism should be critical." "The passion for the good and fair . . . is the only source of the poet's impulse to write and of ours to read him." But do people study poetry?

Hindu Tales from the Sanskrit. By S. M. MITRA, and adapted by Mrs. ARTHUR BELL. (1s. 6d. Macmillan.)

A good deal has been done lately to familiarize us with the folklore and the religious tales of India; but the subject seems inexhaustible. The present series of stories would bear annotation, especially as in an interesting but short preface we are told of the ethical uses to which the tales are put in their original home. Mr. Mitra's name is well known, and we gather that the version before us is mainly his. Each story is followed by questions, and to these, if he sees fit, the English teacher may add. We have always held that one of the best and one of the most permissible uses of story lies in discussion by the class after the story is told. There is much to be said for *casus conscientiae*. The stories, nine in number, are all interesting, and are full of information about Indian ways; the English is excellent.

HISTORY.

The Royal Navy, 1815-1915. By the Marquess of MILFORD HAVEN. (2s. 6d. net. Cambridge University Press.)

The noble author of this brief sketch of naval history was Rede Lecturer at Cambridge last year, and the slight brochure before us is a reprint of the address which he delivered in the Senate House on June 16. It makes no pretensions to literary distinction, but it provides in a straightforward and lucid way a useful summary of the many and revolutionary changes which transformed every department of naval service during the century that separated the close of the French War from the outbreak of the German War. About one-third of the lecture is devoted to the naval situation in and around 1914, and as the Marquess of Milford Haven speaks as a first-hand authority on this eventful period, what he has to say of German preparations and British precautions is of high importance. Those, however, who hope to find indiscretions in this lecture will be disappointed.

Simon de Montfort: an Historical Drama. By ALFRED HAYES.
(10s. net. Methuen.)

Mr. Alfred Hayes, of Birmingham, has produced a remarkable drama, which is both high literature and sound history. Messrs. Methuen for their part have issued it in a choice edition, limited to five hundred copies. It is an elect book for the elect. The blank verse in which the drama is written is of a splendid and dignified

order. Again and again it recalls the sonorous cadences of Mr. Stephen Phillips. The thought is lofty, the imagination vivid, the insight penetrating, the knowledge profound. Mr. Hayes has evidently made himself a complete master of his period. His conception of the character of Simon himself is fine and favourable, such as that portrayed by Bishop Creighton and by Dr. G. W. Prothero in their monographs. He has attained to equally clear ideas concerning most of the other leading actors of the thirteenth century—e.g. Henry III weak yet brutal, Richard of Cornwall ambitious and greedy, Prince Edward noble yet resolute in the maintenance of his rights. But besides the political magnates of the time he introduces such notable men as Grosseteste, Adam Marsh, and Roger Bacon. They are all sharply visualized and excellently portrayed. Bacon's vision of the new world of the future is a masterpiece of descriptive verse. But the glory of this fine play is the character of the Princess Eleanor, wife of Simon de Montfort. As conceived by Mr. Hayes, she is worthy to rank with Stephen Phillips's Francesca.

Three Years of World-Revolution. By PAUL LENSCH. Translated from the German by J. E. M. (5s. net. Constable.)

This book is supposed to be a study of history and politics. Its value, however, is wholly psychological and pathological. It is a revelation of the German mind and a manifestation of its mortal diseases. It displays the obsessions of a people essentially unpolitical, devoid of the capacity to comprehend the realities of Statecraft, living in a world of illusions created by their own vanities and hatreds. Its author, Paul Lensch, is a theoretical Socialist of the majority type, a member of the Reichstag. He was an enthusiast for the war so long as it was going well for Germany. He wrote this book in the summer of 1917 when Russia had collapsed, when Rumania was being overrun, when Italy seemed on the verge of disintegration, when America still seemed far away. He is, therefore, cock-a-hoop for victory and for the approaching establishment of *Deutschtum* in world supremacy. He is filled with a blatant German nationalism, combined with contempt for France, and a consuming detestation of England. He regards the war as essentially a life-or-death struggle between Germany and England, and of the German victory he has no doubt. One is tempted to pile up quotations to show the folly and blindness of the deluded author; but the book must be read for its illuminating absurdity to be realized.

Fighting for Sea Power in the Days of Sail. By H. W. HOUSEHOLD. (2s. Macmillan.)

The popularity and success which Mr. Household achieved last year with his little book on "Our Sea Power" have encouraged him to write the volume before us as a sequel and supplement. It contains a dozen stories of famous sea-fights of the seventeenth and eighteenth centuries, vividly told and well illustrated. It is specially intended for children, and it can be cordially commended to those whose duty it is to provide them with books at once interesting and sound.

"The Nations' Histories."—(1) *Switzerland.* By C. F. CAMERON. (5s. net. Jack.) (2) *Rome.* By ELIZABETH O'NEILL. (5s. net. Jack.)

(1) These are two volumes of a series of histories, the publication of which is amply justified by the keen interest in foreign affairs that has been excited by recent events. Switzerland, obviously and naturally, finds a place in the series, for the Swiss, in spite of racial, linguistic, and religious differences, constitute a nation in the strictest sense of the term. Mr. Cameron has written a good and concise history of the early Confederacy and of the later Federation.

(2) The Rome of which Mrs. O'Neill treats is the city, not the Empire. It is not easy to account for its inclusion in the series, for the Romans never, in any sense at all, could be regarded as a nation. The story of the city lacks national unity and continuity. Moreover, it is not at all well told by Mrs. O'Neill. She shows little sense of arrangement or style, and her use of the paragraph is simply distracting. Further, her disconnected scraps of information are by no means always entirely accurate. Both volumes are attractively illustrated by numerous photographs.

MATHEMATICS.

Projective Geometry. Vol. II. By O. VEBLEN. (21s. net. Ginn.)

In this volume Prof. Veblen brings to completion the work which he, in conjunction with Prof. J. W. Young, planned some years ago, of writing a treatise on projective geometry, in which the subject should be developed in a strictly logical manner, with constant reference to the fundamental assumptions involved. The comparatively simple set of assumptions which form the basis of general projective geometry were discussed, and their consequences developed as far as was possible in the earlier volume, but the more difficult and subtle ideas associated with the study of linear order

(Continued on page 326.)

DENT'S EDUCATIONAL PUBLICATIONS

ALMOST READY.

A Rapid Italian Course.

By WALTER RIPMAN, M.A. Crown 8vo. Cloth. 4s. net. Based upon the *Guida allo Studio della lingua Italiana* of D. A. ALGE, but containing many alterations and additions. Kindred words are compared to French and Latin. The book is illustrated; text and notes are entirely in Italian, and there is a useful vocabulary.

The State and the Nation.

By EDWARD JENKS, M.A. Crown 8vo. Cloth. 4s. net. An extension and amplification of the author's well-known "Short History of Politics"; forming a handbook of Citizenship based upon history which will be found exceedingly useful in adult classes, working men's institutes, continuation schools, and university colleges. The argument of the book is consistently directed towards the creation of that sense of community without which no true political well-being is possible.

Comparative Education.

A Study of the Educational Systems of Six Representative Countries.

Edited by PETER SANDIFORD, M.A., Associate Professor of Education in the University of Toronto.

Demy 8vo, cloth. 8s. 6d. net.

This important volume contains chapters on: United States, Germany, England, France, Canada, and Denmark.

Times.—"Dr. Sandiford has produced a really useful book."

Athenæum.—"A valuable contribution to contemporary educational literature."

The New Testament for Schools

Arranged and Edited by Canon MORLEY STEVENSON, M.A., and C. W. BAILEY, M.A.

Crown 8vo. 3s. 6d. net.

The natural companion to the same Editors' "Old Testament for Schools."

How to Read the Bible in the 20th Century.

By SOPHIE BRYANT, D.Sc., Litt.D., formerly Head Mistress of the North London Collegiate School.

Crown 8vo. 3s. 6d. net.

For teachers and pupils in Secondary Schools as well as for the home and the Sunday School of the modern type.

ENGLISH LITERATURE FOR SCHOOLS.

Edited by ARTHUR BURRELL, M.A., formerly Principal of Borough Road Training College. Strongly and Tastefully bound in Cloth. 128 pages. Price 9d. each. Large Type.

Books which interest boys and girls and at the same time introduce them to literature.

Among the 20 books of this Series are the following:—

British Ballads.

Selections from Longfellow.

Morris's Life and Death of Jason.

Selections from Tennyson.

Irving's Old Christmas.

Bible Stories.

Dickens's Christmas Carol.

Seven Champions of Christendom.

Selections from Borrow.

Gulliver's Travels.

Parkman's Conspiracy of Pontiac.

. Teachers applying for specimen copies are asked to state the probable number of books required on adoption.

DENT'S MODERN ENGLISH BOOKS

An English Pronouncing Dictionary. By DANIEL JONES, M.A. Demy 8vo. Cloth. 7s. 6d. net. Based on the system of the International Phonetic Association.

THE TEMPLE POETRY BOOKS.

A new graduated collection for Preparatory School and Lower Forms. In Eight Parts. Limp Cloth. 7d. net.

This Series has been carefully designed to inculcate some of the higher lessons of the War, and contains many copyright pieces, including verses by Rupert Brooke, E. Wyndham Tennant, Emile Cammaerts, Sir Henry Newbolt, and other well-known writers of the present day. Each book contains 72 pages in large type, with four Coloured Plates and several Line Illustrations.

J. M. DENT & SONS, LTD.,
ALDINE HOUSE, BEDFORD STREET, W.C.2.

and continuity were reserved for the present one. In the first chapter the passage is made from general projective geometry to the special geometries which are of importance by reason of their relations to real geometry and other branches of mathematics, by postulating the assumptions appropriate in each case. Following upon this, the elementary theorems of order are developed, and we are then taken on to the discussion of particular types of geometry. With each sort of space is associated a set of groups of transformations, and this gives rise to a cross classification of geometries. Beginning with the simple case of the Affine Group in the Euclidean plane, other geometries of the Euclidean type, both real and complex, are developed, and the ordinal and metric properties of conics are considered. Other chapters deal with Inversion, Affine and Euclidean Geometry of three dimensions, non-Euclidean Geometries, and Analysis Situs. Although it is outside the author's aim to provide an exhaustive examination of any particular geometry, he lays the foundations and provides the scaffolding for the construction of more complete edifices. He and his collaborator have rendered no small service to mathematics in thus co-ordinating and expounding in a remarkably lucid manner the logical principles which form the basis of all purely mathematical sciences.

Solutions of the Examples in a Treatise on Differential Equations. By A. R. FORSYTH. (10s. net. Macmillan.)

Students who have studied Differential Equations in Forsyth's treatise must often have regretted that they had no opportunity of comparing their solutions or attempted solutions with those obtained by the author. Prof. Forsyth has now supplied the want, and by using this key in a judicious manner much may be learned regarding the more refined points of the algebraic and analytical technique upon which success in arriving at a solution largely depends. A few equations given in the treatise contain errors which are here corrected, and apparently three have been found insoluble. A number of references to the sources of some important equations are given, and certain methods of solution not mentioned in the treatise are employed in appropriate cases. Thus place is found for Abel's theorem and for Boole's symbolical methods. Seeing that the treatise discusses nearly every type of differential equation which has hitherto been met with in pure mathematics or in mathematical physics, the two books in conjunction represent pretty

completely the state of knowledge to-day regarding methods of obtaining solutions of a formal character. Further progress on this side is difficult, and attention is being turned to numerical methods of solution.

Elementary Mensuration, Hydrostatics, and Mechanics. By G. F. WOODHOUSE and G. C. MEISTER. (Sedburgh: Jackson.)

This book is intended to provide an introduction to the elementary principles of mechanics, and consists of a course of theoretical and practical exercises. Written in accordance with the recommendations of the pamphlet on "The Correlation of Mathematics and Science," published by the Public Schools Association of Science Masters and Mathematical Masters, it appears to be thoroughly well adapted to achieve the object in view.

An Elementary Course in Differential Equations.

By E. J. MAURUS. (3s. 6d. net. Ginn.)

This brief and unpretentious course in ordinary differential equations serves the double purpose of providing exercises in integration and of giving that thorough grounding in the methods of solving the commonly occurring types of equations which students should possess before going on to applications or more advanced theory. The author has constructed some three hundred and fifty examples, and furnishes answers to the same.

SCIENCE.

Everyman's Chemistry. By E. HENDRICK. (8s. 6d. net. University London Press.)

This highly original book is American in everything except printing, binding, and publishing. It is written for the man-in-the-street who desires to know a little more than the daily Press can teach him. It ought to meet with the success that it deserves, for it is written most persuasively, and at the same time intelligently and intelligibly. There is great need of a book that shall bring within the compass of a layman's apprehension what chemists are doing, and what chemistry means. The business man's idea of research, for instance, is curiously mixed. Any impossible problem is put before his chemist, and a solution is expected with the rapidity and certainty of an automatic machine. Such an attitude of mind is, of course, due to the prevailing state of the "education"

(Continued on page 323.)

PHILIPS' "HUMAN" GEOGRAPHIES

By JAMES FAIRGRIEVE, M.A.
and ERNEST YOUNG, B.Sc.

This series is just what its name denotes—*human*. Everywhere the human note is predominant and the relation of man to his environment insisted upon. The books are not merely human in the sense that they treat of Geography from the human point of view, but also because the kinds of human beings who live in different environments are fully described. Progressive both in difficulty of language and of ideals.

TRANSPORT THE MAGIC CARPET OF INDUSTRY

By J. P. GRIFFITHS

A Non-Technical Volume briefly describing the history and development of Transport by sea, road, canal, and railway. A delightfully fascinating, interesting and instructive book for young people at the inquiring age.

Crown 8vo. 256 pages. Numerous half-tone illustrations and maps. 2/6

PHILIPS' SYNTHETIC MAPS

By E. G. R. TAYLOR, B.Sc.

Eight Sets—**The World, Six Continents, British Isles**

For the study of geographical relationships by the combination of various transparent maps, and the imposition of these upon each of two foundation maps, the latter being coloured to show certain fundamental phenomena with which the transparencies have a cause-and-effect connexion.

Each Set consists of 2 Coloured Foundation Maps and 8 Transparencies, together with Suggestions for Class Use. In stout Manilla case, 11 by 9 in., 9d. net per Set. Maps also separately on cartridge paper, for use as "Hand Maps," 4d. net each.

PHILIPS' COMPARATIVE WALL ATLASES

Edited by J. F. UNSTEAD, M.A., B.Sc., and E. G. R. TAYLOR, B.Sc.
Eight Sets—**World Relations, Six Continents, and British Isles**

Maps, singly, mounted to fold and eyeletted, 6/- net each; complete in this form in box, 8 Maps, 35/- net, or all on roller to turn over, 35/- net. Also supplied without the Political Maps, 7 Maps, mounted on cloth, dissected, folded, eyeletted, in thumb case, 32/6 net.

MINIATURE WALL ATLAS EUROPE & LISTS ON APPLICATION

SELECTED FROM MR. EDWARD ARNOLD'S LIST.

A Social and Industrial History of England. By F. W. TICKNER, D.Lit., M.A., B.Sc. (Econ.) London, late Lecturer on History at the Islington Training College. Illustrated. 7s. 6d. Also in Three Parts, 3s. each.

A History of England. By Prof. C. W. OMAN, M.P., Oxford University. 760 pages. Cloth, 7s. 6d. The continued popularity of this famous History is the best proof of its excellence for school purposes. Also in Two Parts and Three Divisions.

Arnold's Florin English History. By C. E. M. HAWKESWORTH, M.A., Assistant Master at Rugby School. Cloth, 2s.

Outlines of European History, 1814-1914. By G. BURRELL SMITH, M.A., Assistant Master at the Royal Naval College, Dartmouth. With Maps. 3s. 6d.

Scenes from European History. By G. B. SMITH, M.A. 2s. 6d.

The Last Century in Europe, 1814-1910. By C. E. M. HAWKESWORTH. 526 pages. 7s. 6d. net.

A General History of the World. By OSCAR BROWNING, 700 pages. 7s. 6d. net. Also in Three Parts with separate indexes, 3s. 6d. net each.

A Class Book of Geography. By A. W. ANDREWS, M.A. 7s. 6d.

Outlines of Physiography. By A. J. HERBERTSON, M.A., late Professor of Geography in the University of Oxford. 4s.

A School Arithmetic. By A. C. JONES, M.A., Ph.D., and P. H. WYKES, M.A. Without Answers, 5s.; with Answers, 5s. 6d. Also in Three Parts, 2s. each.

Arnold's Half-Crown Arithmetic. By J. P. KIRKMAN, M.A., and J. T. LITTLE, M.A. With or without Answers, cloth, 2s. 6d.

Easy Arithmetic and Accounts. By E. SANKEY and G. A. LORD. In Two Books. Cloth. 1s. 6d. each net. Answers (both in one), 6d. net.

Elementary Algebra. By W. D. EGGAR, M.A. With Answers, 5s. Without Answers, 4s.

Higher Algebra. By W. P. MILNE, M.A., D.Sc., Mathematical Master at Clifton College. 8s. 6d. net.

The Elements of Geometry. By R. LACHLAN, Sc.D., and W. C. FLETCHER, M.A. 3s. 6d.

An Introduction to Projective Geometry. By L. N. G. FILON, M.A., D.Sc., F.R.S. 7s. 6d.

Practical Trigonometry. By H. C. PLAYNE, M.A., and R. C. FAWDRY, M.A. 3s.

Test Papers in Elementary Mathematics. By A. CLEMENT JONES, M.A., Ph.D., and C. H. BLOMFELD, M.A., B.Sc. Without Answers, 3s. With Answers, 3s. 6d.

Preliminary Practical Mathematics. By S. G. STARLING, A.R.C.Sc., B.Sc., and F. C. CLARKE, A.R.C.Sc., B.Sc. 2s. 6d.

The Principles of Drawing. By L. BELLIN-CARTER, F.R.S.A., Art Master at Wellington College. 3s. net.

A Textbook of Physics. By R. S. WILLOWS, M.A., D.Sc. 7s. 6d. net.

Electricity and Magnetism. By C. E. ASHFORD, M.A., Head Master of the Royal Naval College, Dartmouth. 4s. 6d.

Introduction to Magnetism and Electricity. By E. W. KEMPSON, Senior Physics Master at Rugby School. 3s. 6d.

Light. By W. H. TOPHAM, B.Sc., Head of the Army Class, Repton. 3s.

Inorganic Chemistry for Schools. By W. M. HOOTON, M.A., M.Sc., Chief Chemistry Master at Repton School. 5s.

The Elements of Inorganic Chemistry. For use in Schools and Colleges. By W. A. SHENSTONE, F.R.S. 6s. 6d.

Outlines of Inorganic Chemistry. By E. B. LUDLAM, D.Sc., Head of Chemical Department, Clifton College. 5s.

A Class Book of Botany. By G. P. MUDGE, A.R.C.Sc., and A. J. MASLEN, F.L.S. With 200 Illustrations. 8s. 6d. net.

A Manual of Human Physiology. By LEONARD HILL, M.B., F.R.S. With 173 Illustrations. 7s. 6d.

SINGING-CLASS MUSIC.

A series of entirely new Unison and Two-Part Songs for Treble Voices, with Piano Accompaniment and Sol-fa, in addition to Staff-Notation.

UNDER THE GENERAL EDITORSHIP OF
THOMAS F. DUNHILL,
Professor at the Royal College of Music.

All the Songs have been specially composed for this series by the most distinguished British musicians, and are designed for use in Schools and Boys' or Girls' Choirs:—

UNISON SONGS.

1. Dr. Granville Bantock	The Fairy Queen...	4d.
2. Sir Frederick Bridge, C.Y.O.	Violets	3d.
3. Dr. C. H. Lloyd	The Clucking Hen	3d.
4. Dr. Charles Wood	The Knight's Tomb	3d.
5. " "	Make We Merry	3d.
6. " "	Mater Ora Filium	3d.
7. R. H. Walthew	Mr. Nobody	4d.
8. " "	Lullaby of an Infant Chief	3d.
9. Sir A. C. Mackenzie	The Bonnie Burnie	3d.
10. George Rathbone	Alow and Aloft	3d.
11. Sir Charles V. Stanford	Japanese Lullaby	3d.
12. Sir Hubert Parry, Bart.	Neptune's Empire	3d.
13. Harry Farjeon	Blossoms of the Night	3d.
14. " "	The Lavender Lady	4d.
15. W. G. Whittaker	The Squirrel	3d.
16. " "	Buttercups and Daisies	3d.
17. Geoffrey Shaw	When all the World is Young	3d.
18. Sydney Marston	England all the Way	3d.
19. Colin Taylor	The Robin	3d.
20. Thomas F. Dunhill	I saw Three Ships	4d.
21. Dr. Harold Darke	A Spring Song	3d.
22. Martin Akerman	A Cradle Song	3d.
23. Sydney H. Nicholson	The Dandelion	3d.
24. John Ireland	A Song of March	3d.
25. Ernest Farrar	*A Song of St. Francis	3d.
26. Dr. W. G. Alcock	*If I were a Sunbeam	4d.
27. " "	*Early Spring	4d.
28. Dr. George Dyson	*When Icicles Hang by the Wall	3d.
29. " "	*Praise	3d.
30. Dr. A. Herbert Brewer	*Sing Heigh-Ho!	3d.
31. Thomas F. Dunhill	*It was a Lover and his Lass	3d.
32. " "	*A Night Welcome	4d.
33. Edgar L. Bainton	*A Rosebud	3d.

TWO-PART SONGS.

101. Dr. C. H. Lloyd	How Sweet the Answer Echo	3d.
102. Dr. Granville Bantock	Makes	3d.
103. Sir Charles V. Stanford	Pan	4d.
104. " "	The Rose upon my Balcony	3d.
105. " "	The Haymaker's Roundelay	4d.
106. Sir Frederick Bridge	Claribel	3d.
107. Dr. Percy Buck	A Song of England	3d.
108. " "	A Carol of St. Brigit	4d.
109. Sir A. C. Mackenzie	The Windmill	3d.
110. " "	What the Birds Say	3d.
111. Herbert Howells	The Fountain	3d.
112. " "	Under the Greenwood Tree	4d.
113. " "	A True Story	4d.
114. Dr. Charles Wood	A North Country Song	4d.
115. R. H. Walthew	To Blossoms	3d.
116. Colin Taylor	Serenade	5d.
117. Sir Hubert Parry, Bart.	Joy and Woe	3d.
118. " "	The Wind and the Leaves	4d.
119. Norman O'Neill	A Song of the Night	3d.
120. Geoffrey Shaw	Lullaby	3d.
121. George Rathbone	As Joseph was a-Walking	4d.
122. Dr. Harold Darke	London Town	4d.
123. G. von Holst	The Sheep	5d.
124. " "	The Song of the Lumbermen	3d.
125. Thomas F. Dunhill	The Corn Song	3d.
126. Martin Shaw	Song of the River God	4d.
127. Liza Lehmann	The Bird of God	3d.
128. Ernest Farrar	The Daisy's Wedding	3d.
129. Dr. Charles Wood	*Afton Water	4d.
130. " "	*The Milkmaid	4d.
131. Dr. W. G. Alcock	*Orpheus with his Lute	4d.
132. Dr. George Dyson	*The Pedlar of Dreams	4d.
133. " "	*A Wet Sheet and a Flowing Sea	4d.
134. Harvey Grace	*A Fairy Madrigal	5d.
135. W. G. Whittaker	*The Snowflake	3d.
136. John Ireland	*Old King Caraway	3d.
137. Dr. E. T. Sweeting	*May Flowers	4d.
138. George Rathbone	*The Bells of Shandon	4d.
139. " "	*The Gentle Sounding Flute	4d.
140. " "	*A Hunting Song	4d.

THREE-PART SONGS.

(For female voices, unaccompanied.)

201. Dr. Charles Wood	*The Starlings	4d.
202. " "	*Lilies	3d.
203. George Rathbone	*The Early Dawn of Day	4d.
204. Edgar L. Bainton	*The Sea	4d.

Songs marked * have just been added to the series.

London: EDWARD ARNOLD, 41 and 43 Maddox Street, W.1.

which our commercial men have received. Seeing that they cannot be re-educated, the next best thing is to put before them in suitable terms, and with considerable humour, a short account of the range of chemical activity. This the author has done with consummate skill. To the trained chemist the book is a sheer delight, and Mr. Hendrick's peculiar standpoint will, or should, be of the greatest service to any teacher whose outlook has perforce become somewhat hackneyed.

Chemistry Notes and Papers. By G. N. PINGRIFF. In three parts. 2s. 3d. each. With a School Chemistry Method (being the Teachers' Supplement). (1s. 9d. net. Geographia, Ltd.)

An introduction by Dr. Garnett paves the way for the author's views on the importance of the teaching method. It is within the knowledge of all teachers of chemistry that the heuristic system, as commonly understood and when applied to class teaching, has proved a failure. The immediate result of the advocacy of the system was a flood of textbooks, written with the author's one eye on the inspectorial approving face and the other on the annual examination. In point of fact, the pupil was told what to discover, how to discover it, and how to describe the way in which he should have discovered it. In the present series of textbooks the author laudably desires to avoid the suggestion method by handing out the textbook piecemeal in sections, so that, having amassed a stock of laboratory facts, he shall digest these with the assistance of explanatory notes. The series covers a four-year course, and leads a boy up to Intermediate Science standard. Assuming that most of the experiments are worked through, or, at all events, demonstrated, there can be no doubt but that Mr. Pingriff's scheme is an improvement on the so-called discovery method. Everything, of course, depends upon the teacher, and the conditions under which he works. So long as his boys must be prepared for a series of public examinations, so long must there be a need for a compromise between method and matter.

(1) *Michael Faraday.* By J. A. CROWTHER. (2) *Galileo.* By W. W. BRYANT. (2s. net each. S.P.C.K.)

If the succeeding volumes of short biographies which the publishers are issuing under the general title of "Pioneers of Progress" maintain the standard set by the two before us, the series should be popular. Each of these books is written in an

attractive style, and succeeds in conveying a clear idea of the personality and achievements of its subject, and of the environment in which he lived and worked. The scientific explanation of the significance of the work of Faraday—and to a less extent of Galileo—is adequate, and not too technical for general readers. Each book contains a portrait.

MESSRS. METHUEN have reduced the price of *The Modern Office*, by James Stephenson, which was reviewed in our last issue (page 246), from 4s. 6d. to 3s. 6d.

The price of *The New Latin Primer*, by Prof. Postgate and C. A. Vince, published by Messrs. Cassell, and reviewed in last month's issue, is 3s. net, and not 2s. 6d. as stated.

PRIMARY SCHOOL NOTES.

The Easter Conference.

THE Easter Conference of the National Union of Teachers, held at Cheltenham, was notable in many ways. The generous welcome extended to the teachers was widespread, the Mayor, the Lord Lieutenant of the County, Sir James Agg-Gardner, M.P., the Bishop of Gloucester, the local Trades and Labour Council, all testifying upon a common platform to the great awakening of the nation to the imperative need of a sound scheme of public education. The Mayor pointed out the increase of membership in the Union since the last Cheltenham Conference—from 40,000 to 102,000. The Bishop of Gloucester paid a high tribute to Mr. H. A. L. Fisher's expert knowledge of the bearings of education through and through. Speaking as an old schoolmaster, the Bishop made a witty comparison between the President of the Board and his predecessors, who were "generally satisfactory."

The Retiring President.

MISS E. R. CONWAY, M.A., received a remarkable ovation from the representatives present, who numbered 1,800, when she concluded her term of office. Her installation at Cambridge last year took place under the shadow of a national calamity in France, when

THE SECONDARY, TECHNICAL AND UNIVERSITY TEACHERS' INSURANCE SOCIETY (The S.T.U.T.I.S.)

Registered under the Friendly Societies Act, 1896. Regd. No. 1424 London.
Approved under the National Insurance Act, 1911. Approval No. 261.

Chairman: Sir JOHN D. MCCLURE, LL.D., M.A.

All persons whose main work is teaching other than in Public Elementary Schools are eligible for membership of this Society.

STATE SECTION:—

The forthcoming Valuation will, it is expected, show that this Section is in a very strong position and that valuable additional benefits will be able to be offered to its members.

Members who have been insured for at least two years, and who are passing out of Insurance in consequence of the Superannuation Act, or of larger salaries, are entitled to become *Voluntary Contributors*, and thus share in the Additional Benefits which they themselves have helped to create.

DIVIDEND SECTION:—

This Section is independent of the State Section and is for the insurance of those teachers to whom the Insurance Act does not apply, or *who desire additional benefits*. It possesses the advantage of a Savings Bank (by the creation of Own Funds and Deposit Accounts), and offers at a very low cost Sick Benefits up to £3 3s. per week. Hitherto about two-thirds of the members' annual contributions have been returned to them each year by being placed to the credit of their Own Funds.

For information apply to the SECRETARY,

many members were called from the Conference by ill news of soldier relatives. By her cheerfulness and indefatigable efforts, Miss Conway was largely instrumental in securing the sterling success of the meeting. During the past year she has travelled the country from end to end, without respite. She has the proud record of never having missed an appointment throughout the whole period, and her services have been increasingly called upon by teachers and Education Committees alike. Her conduct of Conference has by general consent been scrupulously fair, tactful, and capable.

The Unity of the Profession.

OF the deputations, Mr. D. M. Cowan, M.P., representing the Educational Institute of Scotland, made a deep impression by his account of the unification of the teaching profession in Scotland under the auspices of the Institute. That the advantages of solidarity have not been lost sight of by the N.U.T. was shown in several ways. The whole tone of the Conference was one entirely favourable to the suggestion of unity between the various grades of education. This was particularly shown in the discussions on Whitley Committees and in the desire shown to construct the new scale of salaries for primary-school teachers in definite relation to the schemes suggested for their secondary-school colleagues. The scheme proposed for assistants in secondary schools by Mr. George Sharples, M.A., on behalf of the Higher Education Committee of the Executive was a minimum salary of £200, proceeding by annual increments of £20 to £500 per annum, and, with special responsibility, to £600.

The Referendum on Equal Salaries.

THE referendum on equal payment for men and women teachers resulted in a majority for equal treatment of 19,965 in a poll of 50,043. The fact that only 50 per cent. of the members voted was generally commented upon. It was quite clear, however, that the keenness which marked the discussions of the question last year had largely passed. The immediate result of the vote is the elimination of a separate scale of salaries for women from the Union programme, and the new scale will therefore apply equally to both sexes. It is probable that the case for equal treatment from Education Authorities will in the future be substantially supported by women representatives of the Union, so that a greater accession of

women to official positions in the local associations would appear to be inevitable if the claims of women teachers are to be seriously regarded by the Education Committees.

Central Schools.

THE discussion on Central Schools was interesting both in the criticisms passed upon them and in the suggestions made for their fuller development in the new scheme of Education. Broadly speaking, the members of the Conference were opposed rather to the early system of transference to these schools, and the tendency to bias the instruction in the years when the fundamentals ought to be first considered. The general opinion appeared to favour a good general preparation in Primary School subjects up to the age of fourteen years, and there was evidence that the partiality of the northern and provincial areas for the self-contained school for the majority of pupils up to this age is rapidly gaining support. On the other hand, there was generous support for the plea of Mr. George Sharples for the greatest possible variety of schools, in order to broaden the national conception of Education, with free access to all pupils able to profit from the instruction given in them.

The Sectional Meetings.

THE Sectional meetings held in connexion with the Conference were numerous and highly successful. One of the most interesting was held under the auspices of the National Association of Head Teachers, when Mr. H. E. Storey, of Manchester, read a paper outlining the general and particular functions of Whitley Committees to a crowded audience. The steps which were being taken in various parts of the country to introduce such bodies in connexion with the administration of education were detailed by speakers who had first-hand knowledge, with the result that most valuable practical information became available to members of the meeting. A feature of the reports given was the hopeful feeling which prevailed as to the beneficial results which would be secured by the new committees in assisting education generally. It was shown that substantial progress had already been made in many areas in improving and unifying the interests of all grades of teachers. The discussion was very general, and the meeting was prolonged in consequence of the desire of the teachers present.

THE ROYAL NAVAL COLLEGE, OSBORNE

For information relating to the entry of Cadets, Parents and Guardians should write for "**How to become a Naval Officer**" (with an Introduction by Admiral the Hon. Sir E. R. FREMANTLE, G.C.B., C.M.G.), containing an illustrated description of life at the Royal Naval Colleges, at Osborne and Dartmouth, post free on application to GIEVES, Limited, 65 South Molton Street, London, W.1.

Special Entry of Naval Cadets.

The Secretary of the Admiralty announces that the scheme of Special Entry to Naval Cadetships, which was instituted in 1913, for a period of four years, will be continued until further notice. The examinations are held annually in June, and candidates are required to be not more than 18½, nor less than 17½, years of age on June 1st.

Regulations can be obtained on application to

The Modern Geometry of the Triangle.

By WILLIAM GALLATLY, M.A. In this publication are presented some of the more important researches on the subject which have been undertaken during the last thirty years. The novel and interesting theorems, some British but mostly from French and German sources, will widen the outlook of our mathematical instructors and lend new vigour to their teaching. Second Edition, 124 pages, price 2s. 6d. (by post 2s. 9d.). Specimen pages and synopsis free.

Proceedings of the London Mathematical Society.

First Series of 35 vols., 10s. to 35s. Second Series, 16 vols. already published, 25s. per vol. Separate parts, 7s. 6d. each.

Mathematical Questions and Solutions.

Edited by CONSTANCE I. MARKS, B.A. Of this series 104 half-yearly volumes (Old Series, 75 volumes; New Series, 29 volumes) have been published, containing contributions, in all branches of Mathematics, from most of the leading Mathematicians in this and other countries. Price 6s. 6d. per vol.

The Elements of Logarithms: with Sandhurst and Woolwich Questions. Price 1s. 6d.

Quadratic Partitions.

Everything Educational

FOR PUBLIC, SECONDARY, AND PRIVATE SCHOOLS.
**MORE PAPER OF BETTER QUALITY
 AT REDUCED PRICES.**

Owing to the Board of Trade having announced the cessation of the control and restriction of paper and paper making materials, the mills are now making better qualities at a cheaper price. Consequently the E.S.A. can now supply its well-known series of superior Exercise Books as follows:—

Exercise Book No. 21, 80 pages, superior Cream Laid Paper, bound in strong limp leatherette cover at 55/- gross.

Exercise Book No. 22, 80 pages, superior Cream Laid Paper, bound in stiff art coloured cover, at 51/- gross.

Exercise Book No. 27, 80 pages, superior Cream Laid Paper, bound in stiff leatherette cover stamped in gold on the side, at 57/- gross.

Exercise Book No. 28, 96 pages, superior Cream Laid Paper, bound in stiff leatherette cover, embossed sunk label, at 63/- gross.

The above books can be supplied to order in various coloured covers, and the name of the school printed for lots of 2 gross and upwards. *Specimens will be sent free on request.*

SCIENCE BOOKS AND BLOCKS.

We carry a very large stock of Science Books and Blocks, Graph Books and Papers ruled in Centimetre and Millimetre Squares, Centimetre and Two-millimetre Squares,

Tenths and Half-inch Squares, Fifteenth & One-third-inch Squares at various prices.

Science Blocks (as illustration), ruled in Centimetre and Millimetre Squares, at 7/6 per doz.; ruled in Tenths and Half-inch Squares, at 7/6 per doz.

Specimens free on request.

NATURE NOTE BOOKS.

Nature Note Books—the best and most complete series issued—made of excellent writing paper, interleaved with superior water-colour paper, and strongly bound—at 30/- per gross and upwards.

WE CARRY A LARGE STOCK
 of all kinds of School Stationery including

EXERCISE BOOKS AND PAPER,	NOTE BOOKS,
SCIENCE NOTE BOOKS AND PAPER,	EXAMINATION PAPER,
DRAWING BOOKS AND PAPER,	FOOLSCAP PAPER,
NATURE NOTE BOOKS,	BOOK-KEEPING BOOKS,
BRUSHWORK AND COLOUR BOOKS, &c., &c.	

The E.S.A. at its Factory at Hatton Wall manufactures every kind of School Stationery.

FURNITURE MADE OF ENGLISH OAK.

SUPERIOR FURNITURE.

As imported Pitch Pine is scarce and very dear, the E.S.A. has bought a large quantity of English Oak, which is the most durable and beautiful wood for School Furniture.

Prices compared with pre-war are high, but in view of the high wages the world over, it is doubtful if School Furniture will be cheaper for a long while. We therefore urge our customers to order at once.

THE "STANTON" DESK.

The most perfect Hygienic Desk made—a sliding Desk.

It is supplied in six different patterns and in five distinct sizes—the different parts being carefully proportioned in each height.

SCIENCE LABORATORY FITTINGS FOR SCHOOLS.

The E.S.A. has 25 years' practical experience in the fitting up of school laboratories and carry out the whole of the work, including the gas and water services, flues, and drainage.

The E.S.A. has supplied laboratory fittings to:—

The National Physical Laboratory, Teddington.

Science and Art Department, South Kensington.

Electrical Standardizing Institute, London,

and a large number of Public and Secondary Schools in Great Britain.

The E.S.A. also supplies simple benches for Physical work.

THE "ESAVIAN" PATENT FOLDING PARTITIONS AND SCREENS.

These partitions are constructed on an entirely new principle of patented sliding pilasters between each pair of leaves; this arrangement provides the easiest possible movement. Doors on the Esavian principle thirty feet high have been supplied and have proved to be thoroughly reliable and satisfactory.

The E.S.A. at its Factory at Stevenage manufactures every kind of School Furniture.

Tel. No.: Museum 615.

**THE
BERGMAN ÖSTERBERG
PHYSICAL TRAINING COLLEGE,
KINGSFIELD,
DARTFORD HEATH, KENT.**

Trustees:

Sir GEORGE NEWMAN, M.D. (Chairman).
The Marchioness of SALISBURY.
Major the Hon. WALDORF ASTOR, M.P.
The Rt. Hon. CHRISTOPHER ADDISON, M.P.
The Rt. Hon. Lord SHAW OF DUNFERMLINE.

Principal:

Miss H. WALTON (Oxford Honour School Eng. Language and Literature).

Vice-Principal:

Miss A. WIKNER (Royal Cent. Inst. of Gymnastics, Stockholm).

The College was opened in 1885, and was the first of its kind in England. Students are prepared as teachers of Scientific Physical Education on Ling's Swedish System. The Course extends over two years. It includes the study of Anatomy, Physiology, Theory of Education; the Theory and Practice of Gymnastics; Massage and Medical Gymnastics, Dancing and Outdoor Games. Students practise teaching in schools in the neighbourhood. The College stands in its own ground of 23 acres, in a beautiful and healthy locality close to Dartford Heath.

The demand for mistresses of physical training holding the Diploma of this College is at present far in excess of the supply.

The course begins in **October**. Further particulars may be obtained on application to the SECRETARY.

**BERGMAN ÖSTERBERG
UNION OF TRAINED GYMNASIAC TEACHERS.
*Ling's Swedish System.***

Aim of the Union: To advance the cause of Physical Education on scientific lines.

In placing members of this Union as Teachers in Schools, careful and discriminating choice is exercised, and the exact requirements of each School specially considered.—PHYSICAL TRAINING COLLEGE, KINGSFIELD, DARTFORD HEATH, KENT.

THE INCORPORATED SOCIETY OF MUSICIANS.

FOUNDED 1882.

INCORPORATED 1892.

OBJECTS OF THE SOCIETY.

The objects for which the Society is established are the promotion of whatever may tend to the elevation of the status, and the improvement of the qualifications, of all Members of the Musical Profession, or may aid the musical education of the people.

ADVANTAGES OF MEMBERSHIP.

The inclusion of the names of members in an Annual Register, which is supplied to all Public Libraries and Reading Rooms, for the purpose of affording the public an opportunity of selecting qualified teachers. (The publication of this Register has been suspended for the moment owing to paper and other restrictions, but will be resumed as soon as possible.)

A quarterly periodical called "The Report," in which an account of the Society's work and other matters of interest are recorded, and which is open to members for the discussion of all questions relating to the musical profession.

A Benevolent Fund for members, the Regulations for which have purposely been made as wide as possible in order to meet the many and very varying contingencies which arise from time to time.

An Orphan Fund for the children of musicians, which is open to the dependents of all musicians, whether their parents were members of the Society or not.

Sectional Meetings, which are open to all members in all parts of the country, and at which excellent arrangements are made for the reading of papers and the discussion of matters musical.

Legal Advice on all professional matters; Income Tax Claims; Copyright; The Recovery of Fees, &c.

Registers open to members of "Vacant Appointments" and "Engagements," and for the transfer from member to member of pupils moving to new districts.

Registers of Hotel and other accommodation available for members when travelling to fulfil professional engagements.

LOCAL EXAMINATIONS IN MUSIC.

The examinations of the Society, established in 1884, are carefully arranged in a systematic series of Progressive Grades, embracing a complete course of musical study, and constitute a most valuable guide for Teachers in recording the progress of their pupils.

The Syllabus is prepared by a Committee of experienced Teachers, who are qualified by active practice to judge of the standard which should be attained by pupils in all stages of progress.

A limited number of Prizes and Scholarships are awarded to those presenting exceptional work at the Local Examinations, the Scholarships taking the form of a payment for the further musical training of the Student.

FULL PARTICULARS MAY BE OBTAINED UPON APPLICATION TO THE GENERAL SECRETARY, 19 BERNERS STREET, W.1.

PHYSICAL TRAINING, REMEDIAL GYMNASTICS, &c.

COMMITTEE.

HIGH SCHOOL FOR GIRLS.

MISS ELEANOR TROTTER, M.A.

Required, in September, SECOND FRENCH MISTRESS. Salary according to qualifications and experience. Minimum, £200 per annum.

Application to be made on forms which may be obtained from the undersigned, and must be completed and returned before the 6th June.

A. G. BOYDE,
Director of Education and Secretary.
Education Office, Darlington,
May, 1919.

TUNBRIDGE WELLS HIGH

SCHOOL.—Wanted, in September, a LOWER FORM MISTRESS, to take also Geography and do some secretarial work. Salary according to qualifications. Apply to the HEAD MISTRESS.

CHANNING HOUSE SCHOOL,
SCHOOL, HIGHGATE, LONDON, N.6.—

Wanted, in September, three RESIDENT MISTRESSES.

(1) Science Graduate for Physics and Mathematics.

Salary £70, rising to £80 in two years.

(2) A Mistress to teach Middle Forms. English,

Arithmetic, Elementary Mathematics. Salary £60.

(3) Kindergarten Mistress (Higher Froebel) for

Forms I and II. Salary £60.

Apply, stating age, experience, and qualifications

to the HEAD MISTRESS.

BEDFORD GIRLS' MODERN
SCHOOL.—Wanted, in September, MIS-

TRESS for Middle School. Good French, English, Arithmetic. Degree or equivalent. Salary from £150. Apply to the HEAD MISTRESS.

Posts Vacant—continued.**UNIVERSITY OF BRISTOL.**

THE University will shortly proceed to the appointment of PROFESSORS OF EDUCATION, ENGLISH, MATHEMATICS, PHYSIOLOGY.

Stipend in each case, £800 a year. Particulars from the REGISTRAR, to whom applications, testimonials, and references should be sent by June 16th.

FROEBEL TRAINING COLLEGE, BEDFORD.—Required, in September, (1) COLLEGE LECTURER (Graduate), for Mathematics and Geography and Nature Study. (2) Trained and experienced MISTRESS for Branch Kindergarten. Apply—Miss AMY WALMSLEY, Training College, Bedford.

THE GIRLS' SCHOOL CO., LTD.

ST. BRIDE'S SCHOOL, HELENSBURGH, DUMBARTONSHIRE.

Required in September, thoroughly competent CLASSICAL MISTRESS. Preparation of pupils for English and Scottish Universities. Good degree (or equivalent) essential. Form duties. Salary scale £160, rising to at least £220, non-resident. Initial salary according to qualifications. Concession on long distance railway fare at holiday times. Apply to the HEAD MISTRESS.

REQUIRED, in September, at The Laurels, Rugby.—(1) MATHEMATICAL MISTRESS. (2) SCIENCE MISTRESS (Botany and Zoology). University degree or equivalent essential. Experience desirable. Salary in each case £95 to £110 resident, according to qualifications and experience. Apply to Miss DEWAR, The Laurels, Rugby.

BOROUGH ROAD TRAINING COLLEGE, ISLEWORTH.—Wanted, on August 1st, a MATRON between 25 and 40 years of age, at a salary of £80, rising by £5 a year to £100 per annum, with board and lodging. Forms of application, with particulars, may be obtained from W. PRYDDERGH WILLIAMS, Esq., British and Foreign School Society, 114 Temple Chambers, Temple Avenue, London, E.C.4.

Posts Vacant—continued.**COUNTY BOROUGH OF WEST HAM.**

MUNICIPAL CENTRAL SECONDARY SCHOOL (CO-EDUCATIONAL), TENNYSON ROAD, STRATFORD, E.15.

TEACHER OF CLASSICS required, to take post in September next. Good classical degree and experience essential. The teacher appointed will act as Form Teacher. Initial salary from £180 to £250, according to qualifications and experience, rising by £10 per annum in the case of men to £400, and in the case of women to £300. Subsidiary subjects should be stated.

FORM TEACHER required, with History and Geography as principal subjects, to take post in September next, or earlier if possible. Graduate with good experience. Subsidiary subjects should be stated. Ability to take Class Singing a recommendation. Initial salary £150 to £190, according to experience, with annual increments of £10 to a maximum of £300.

Forms of application may be obtained from the undersigned, 95 The Grove, Stratford, London, E.15, and should be returned as soon as possible.

GEORGE E. HILLEARY,

Education Offices, Town Clerk.
95 The Grove, Stratford, E.15.
9th May, 1919.

TYPEWRITING.

TESTIMONIALS, 6d. per dozen.
MANUSCRIPT, 8d. per 1,000 words. Examination Papers. Perfect work. — M. GLENISTER,
3 Friern Park, N. Finchley, N.12.

WANTED, September, FORM MISTRESS, girls eleven to twelve. Games, Drill, Junior Latin, or Mathematics a recommendation. State qualifications and experience. Resident preferred. Day School. Wiston's, Dyke Road, Brighton.

SEPTEMBER.—Two FORM MISTRESSES, Upper and Lower III, with special subjects Botany, History, Mathematics to Senior Cambridge standard. Inter. Arts or Higher Local sufficient qualification. Apply—Wellington College, Hastings (Private Day School for Girls, with accommodation for Staff).

Posts Vacant—continued.**WEST RIDING COUNTY COUNCIL.**

PHYSICAL TRAINING IN ELEMENTARY SCHOOLS.

The West Riding Education Committee are prepared to receive, from qualified women, applications for appointment as **Organiser of Physical Training** in elementary schools.

Salary £180, rising to £250 a year by annual increments of £10; some allowance may be made for previous service.

Applicants should have taken a complete course of training in the Swedish system, and had previous teaching experience.

Particulars of duties and conditions of appointment, together with application forms, which must be returned duly completed not later than Monday, June 16th, 1919, may be obtained from the EDUCATION DEPARTMENT, County Hall, Wakefield.

SHROPSHIRE EDUCATION COMMITTEE.

HIGH SCHOOL FOR GIRLS, OSWESTRY.

Wanted, in September, a **FORM MISTRESS** (trained Graduate), thoroughly competent to teach Mathematics to Matriculation stage. Experience essential.

Also **FORM MISTRESS (Graduate)** to teach Botany to Matriculation stage. Subsidiary subject. Junior School Mathematics. Salary scale £150 to £330. Initial salary according to experience. Apply — HEAD MISTRESS.

DRAKE & TONSON'S (GIRLS' GRAMMAR) SCHOOL, KEIGHLEY.—Wanted, in September: (1) SCIENCE MISTRESS for Chemistry and Physics up to Advanced Course standard. Degree or equivalent and experience essential; training desirable. (2) TWO MATHEMATICAL MISTRESSES. Degree or equivalent essential; training or experience desirable.

(1) and (2) Graduate scale. Initial trained, £170; untrained, £150, rising by £10 per annum to £330. Allowance for experience up to ten years. Apply to the HEAD MISTRESS.

These advertisements are continued on pages 395-403.

GEORGE GILL & SONS, Ltd.

13 WARWICK LANE, LONDON, E.C.4.

THE OXFORD AND CAMBRIDGE EDITION.**RELIGIOUS KNOWLEDGE**

The books of the Old and New Testaments edited by the Reverend F. MARSHALL, M.A., containing **Maps, Marginal and Foot Notes** with **Text**.

ENGLISH

The chief feature of this series include **Marginal and Foot Notes** with the **Text**. Supplementary Notes and Glossary of uncommon words.

THE JUNIOR GEOGRAPHY

1s. 6d.

Comprising interesting reading matter, Definitions, 63 Maps and Illustrations. Questions covering the general subject matter at the end of each section.

THE COMMERCIAL ARITHMETIC

9d.

Being a concise handbook for preparation of the Arithmetic necessary in business.

THE STUDENTS' WORD BOOK

6d.

A comprehensive and classified arrangement which excites the curiosity and creates a live interest in the subject.

GODS AND HEROES

1s. 3d.

This Reader gives a splendid initiation into the mysteries of Greek Mythology. Fully illustrated.

HISTORICAL ATLAS OF EUROPE

1s. 6d.

From the time of Diocletian to the outbreak of the Great War, 1914. With 36 Coloured Maps.

LA GUERRE. Vol. 2

1s. 3d.

A further selection of **leading articles** on the **Great War** taken from French newspapers, and arranged as a book of French unprepared translation.

Catalogue and Specimen Pages post free upon application.

SCHOLASTIC APPOINTMENTS

University Men and Women seeking scholastic appointments should apply to

Truman & Knightley **SCHOLASTIC AGENTS LTD**

who introduce ASSISTANT MASTERS AND MISTRESSES to the majority of the leading Public and Private Schools at home and abroad.

Through this Agency, well educated gentlewomen with Higher Local and other good Certificates, interested in children and in teaching, can find congenial work in good high-class Private Schools, where the hours are not excessive, conditions pleasant, and the holidays are long. Salaries range from £50 to £100 or more per annum, with board and residence, according to age, qualifications, and experience. There are also many vacancies for Student, Junior Mistresses, and House Governesses or Duty Mistresses at salaries of from £30 to £50 per annum with board and residence.

There is a separate department for
LADY MATRONS and HOUSEKEEPERS
for schools.

No charge for registration.

::

Moderate commission.

SCHOOL TRANSFER DEPARTMENT.

Ladies and Gentlemen seeking Partnerships in, or to take over schools of their own, should communicate personally with Mr. TRUMAN, who undertakes all negotiations connected with the Transfer of Schools, and who is in a position to offer assistance and sound advice to purchasers, to whom no charge is made.

Offices : 158-162 OXFORD ST., LONDON, W.1

Telegrams : "TUTORESS, PHONE, LONDON."

Telephone : MUSEUM 1136.

CLASS BOOKS FOR SECONDARY SCHOOLS

PUBLISHED AT THE

University Tutorial Press.

MATHEMATICS AND MECHANICS.

Algebra, Junior. By A. G. CRACKNELL, M.A., B.Sc., and AUGUSTUS BARRACLOUGH, M.A. **3s. 6d.** With Answers, **4s.**
"Maintains the high standard of excellence we are accustomed to expect from so well known a source. The treatment of the graphic portion is particularly good."—*Journal of the Assistant Masters' Association.*

Algebra, School. By A. G. CRACKNELL, M.A., B.Sc. With or without Answers. **7s.**
"The author has brought the work into closer touch with intelligible calculations, and, at the same time, gives a clear account of the elements of algebraic theory."—*Schoolmaster.*

Algebra, School (Matriculation Edition). By A. G. CRACKNELL, M.A., B.Sc. With or without Answers. **5s. 6d.**
"As a school text-book, this volume has much to recommend it, the examples and test-papers being carefully chosen."—*Mathematical Gazette.*

Arithmetic, Preliminary. By AUGUSTUS BARRACLOUGH, M.A., Second Master at Bournemouth School. **2s.** With Answers, **2s. 3d.**
"An excellent course of Arithmetic."—*Journal of the Assistant Masters' Association.*

Arithmetic, The Junior. By R. H. CHOPE, B.A. With or without Answers. **Third Edition. 3s. 6d.**
"No better Arithmetic for school work has come into our hands."—*Educational News.*

Arithmetic, The School (Senior Local Edition). By W. P. WORKMAN, M.A., B.Sc. This edition of the *School Arithmetic* covers the Senior Local Syllabus, and is amplified by a large selection of examples arranged in Graduated Examination Papers. **4s.**
"The book is of a very high order of merit, and provides a thorough course in Arithmetic."—*School World.*

Arithmetic, Rural. By A. G. RUSTON, B.A., B.Sc. **4s. 6d.**
"We believe the book will be found just what is required in schools of agriculture."—*Secondary Education.*

Book-keeping, Practical Lessons In. By T. C. JACKSON, B.A., LL.B. **Fourth Edition. 4s. 6d.** Also in Two Parts. Part I. **2s. 9d.** Part II. **2s. 9d.**
"A well-arranged and well-explained treatise."—*Educational Times.*

Geometry, Preliminary. By F. ROSENBERG, M.A., B.Sc. With or without Answers. **2s. 9d.**

"A book for beginners containing a judicious blending of practical and theoretical work. Insists throughout on reasoning from first principles. The book is certainly one to be recommended."—*Preparatory Schools Review.*

Geometry, Junior. By A. G. CRACKNELL, M.A., B.Sc. **3s. 6d.**
"A simple treatment of the elements of geometry. A feature of the book is the number of questions which require a numerical answer, incorrect and careless work being thereby easily checked."—*Schoolmaster.*

Geometry, The School. By W. P. WORKMAN, M.A., B.Sc., and A. G. CRACKNELL, M.A., B.Sc. **4s. 6d.**
Also in Two Parts—Part I (Euclid I, III 1-34, IV 1-9). **2s. 9d.** Part II (Euclid II, III 35-37, IV 10-16, and VI). **2s. 9d.**
"Combines the theoretical and practical in a most interesting manner, and shows on every page the skill and care with which the material has been put together."—*School World.*

Graphs, Matriculation. By C. H. FRENCH, M.A., and GEORGE OSBORN, M.A. **1s. 6d.**
"The explanations are remarkably clear."—*Secondary Education.*

Hydrostatics, Matriculation. By Dr. WM. BRIGGS and Professor G. H. BRYAN. **Second Edition. 2s. 9d.**
"The diagrams and illustrations are all very practical."—*Schoolmaster.*

Mathematics for Technical Students, A First Course In. By P. J. HALER, B.Sc., A.M.I.Mech.E., A.I.E.E., and A. H. STUART, B.Sc., F.R.A.S. **2s.**
"The authors have succeeded in creating a 'workshop atmosphere' around this elementary course."—*Nature.*

Mechanics, Junior. By F. ROSENBERG, M.A., B.Sc. **3s. 6d.**
Mechanics, Matriculation. By Dr. WM. BRIGGS and Professor G. H. BRYAN. **Third Edition. 4s. 6d.**
"A practical book for this subject. It will be found exceedingly useful."—*Educational News.*

"Affords beginners a thorough grounding in Dynamics and Statics."—*Knowledge.*

CHEMISTRY, PHYSICS, BOTANY, &c.

Botany, Junior. By FRANCIS CAVERS, D.Sc. **3s. 6d.**
"Dr. Cavers has achieved a useful little book."—*Journal of Botany.*
"A very excellent volume. Practical to a high degree. The diagrams are very good."—*Schoolmaster.*

Botany, Senior. By FRANCIS CAVERS, D.Sc. **5s. 6d.**
"Admirably designed to portray the plant as a living entity, to indicate how structure is subservient to function, and to show what conditions and purpose underlie the manifold variations which plants assume."—*Nature.*

Chemistry, Preliminary. By H. W. BAUSOR, M.A. **2s.**
"A clearly described and interesting course of Preliminary Chemistry for use in the lowest forms of schools."—*Education.*
"Nothing is taken for granted, everything is carefully and simply explained."—*School Guardian.*

Chemistry, Junior. By R. H. ADIE, M.A., B.Sc. **Second Edition. 3s. 6d.**
"A useful and practical course, constructed on thoroughly scientific principles."—*Oxford Magazine.*

Chemistry, Senior. By G. H. BAILEY, D.Sc., Ph.D., and H. W. BAUSOR, M.A. **Second Edition. 5s. 6d.**
"The ground is well covered on experimental lines. There are questions to every chapter and a section on chemical calculations."—*Guardian.*

Chemistry, Senior Practical. By H. W. BAUSOR, M.A. **3s. 6d.** Including preparations, experiments on action of heat, quantitative and qualitative analysis.

Chemical Calculations. By H. W. BAUSOR, M.A. **2s. 9d.**
ADVANCED COURSE. 1s. 6d.
"The calculations which are inseparable from Chemistry from its very beginnings are dealt with concisely, yet at sufficient length to make them clear to a young student."—*Knowledge.*

Heat, Junior. By JOHN SATTERLY, D.Sc., M.A. **2s. 9d.**
"A remarkably clear exposition of the main principles of the science, such as is required by elementary students."—*Secondary School Journal.*

Heat, Senior. By R. W. STEWART, D.Sc., and JOHN SATTERLY, D.Sc., M.A. **4s.**
"The information is accurate and up to date."—*The Journal of Education.*

Hygiene, First Stage. By R. A. LYSTER, M.D., B.Ch., B.Sc. **Sixth Edition, Revised and Enlarged. 3s. 6d.**
"A continuous and well-developed course of instruction in Hygiene. The facts are always reliable, the illustrations serviceable."—*Schoolmaster.*

Magnetism and Electricity, Junior. By R. H. JUDE, D.Sc., M.A., and JOHN SATTERLY, D.Sc., M.A. **3s. 6d.**
"This little book makes a special point of fundamental principles, and is especially adapted to the needs of pupils making a start in the subject."—*Educational Times.*

Magnetism and Electricity, The School. By R. H. JUDE, D.Sc., M.A. **4s. 6d.**
"From first to last there is an originality of treatment which makes it interesting reading."—*Nature.*

Mechanics and Physics (Mechanics, Hydrostatics, and Heat), An Introductory Course of. By W. M. HOOTON, M.A., M.Sc., F.I.C., and ALFRED MATHIAS. **2s.**
"An excellent introduction to the fundamental principles of Mechanics, Hydrostatics, and Heat."—*Educational News.*

Science, Junior Experimental (Physics and Chemistry). By W. M. HOOTON, M.A., M.Sc., F.I.C., Chemistry Master at Repton School. **Second Edition. 3s. 6d.**
"The explanations are clear, and we can recommend the work heartily."—*Secondary Education.*

Sound and Light, Senior. By R. W. STEWART, D.Sc., and JOHN SATTERLY, D.Sc., M.A. **5s.**
"The treatment is lucid and concise, and thoroughly in accordance with the most recent methods of teaching elementary Physics."—*Nature.*

Sound and Light, Junior. By JOHN SATTERLY, D.Sc., M.A. **3s. 6d.**
"Reaches a high standard, with plenty of practical work."—*Guardian.*

OCCASIONAL NOTES.

ON Thursday, May 8, was published in the Press the official summary of the terms of peace presented to the German delegates at Versailles on the preceding day. They are terms which, though just and in the circumstances moderate, leave no doubt upon the mind of the reader as to which side won the War. News of their reception in Germany suggests that they are the first intimation which has reached many people in that enlightened land to the effect that German arms have suffered a reverse and German ambitions experienced a check. First, Germany is compelled to disgorge the conquests achieved in many early conflicts and conspiracies; she has to restore to Poland much of what she took in the eighteenth-century partitions, to Belgium her pickings of 1815, to Denmark a portion of her seizure of 1864, to France the booty of 1870. Altogether she loses one-sixth of her European territory and one-tenth of her European subjects. Secondly, she is deprived of all her ill-gotten and ill-governed Colonial Empire. Its administration is transferred to the League of Nations, which will act through mandatory states. Japan is allowed to take over the German rights and properties in Kiao-Chow. Thirdly, Germany is rendered impotent for future aggressive war. Her army is reduced to 100,000 men voluntarily enlisted; her navy to three dozen vessels, none of which are to be submarine. She is to have no forts or troops within thirty miles of the Rhine, and no air-craft. Heligoland is to be dismantled. Fourthly, she is to make large—but, of course, necessarily inadequate—reparation for the devastation she has wrought. It is to take the form of money indemnities,

ships (ton for ton), coal, machinery, &c. Finally, the Kaiser and other war criminals are to be brought to trial. Such are the outstanding conditions of this stern but equitable pacification dictated to the guilty and defeated enemy. It is a good peace, and one that should act as a warning to aggressive militarism for many centuries to come.

"WHAT touches us ourself shall be last served." There is something of Roman dignity about the order in which the English people have considered the subjects of education. English literature might almost be said to have been produced, as it has been alleged that the British Empire was acquired, "in a fit of absence of mind." It has certainly had little encouragement in the past from schools and educational authorities. At last it is coming into its own, and we welcome the appointment of a Departmental Committee as a proof that Mr. Fisher and his advisers are fully alive to its importance. There is indeed no time to be lost, for it is agreed that English literature must to some extent take the place in our secondary schools which the ancient classics have already lost. It needs scientific training as much as any other branch of study, and the trained teachers are not yet available. No more important question awaits the Departmental Committee than the question of the best training for the teacher of English. Is it more essential, for instance, that he should know the origins of the English language or the literary influences, from the classics and the Renaissance, on English literature? Can history and literature be brought into closer relations in the school curriculum than is the case at present? How much grammar is necessary? Could not oral composition and drama and debate do something to cure our national aphasia? How can the preparatory schools improve their English teaching? How can the school essay be redeemed from barrenness? How can examinations be made a test of English study without destroying the love of literature? On some of these questions the English Association has already done admirable work, but on all of them the educational world will await with interest the findings of an expert Committee.

SUCH appointments as that of Mr. W. H. Fyfe to the head mastership of Christ's Hospital are educational experiments, of possible advantage, but attended with considerable risk to the man and the school. There is no profession of which it is more true that "it is good for a man that he bear the yoke in his youth" than that of schoolmastering. Genius is said to be above ordinary rules, and Mr. Fyfe may have a genius for the leadership of a great school, but even genius is not exempt from the necessity of learning in the stern school of experience. Marshal Foch, the saviour of civilization, is steeped in the theory and practice of arms. It would not be difficult to cite recent instances of harm done by the selection of men without experience of the life and work of a schoolmaster for the headship of important schools. The period of apprenticeship is full of pitfalls. But, even if Mr. Fyfe prove to be a worthy successor of Rice and Lee in the home of "Grecians" and "Mathemats," as we sincerely hope he will be, his appointment cannot fail to be a fresh discouragement to schoolmasters, and a warning to young

men of ability at a moment when such men are imperatively needed, not to choose a profession in which the prizes often fall to outsiders. The prizes of other professions are not awarded thus; solicitors do not become judges, nor do physicians become great surgeons. Governing bodies should remember their responsibility to education. Schools need many assistant masters, able and enthusiastic in their work, and it is not well to say, in effect, to young men choosing a career, that the possibility of rising to the top of the schoolmaster's profession is growing smaller.

Public Schools and the War.

ALL who have had experience in the direction of teaching demobilized officers express the opinion that they are a living and convincing proof of the need of universal military training for our young men. The demobilized officer is keen at his work, serious and prompt in obedience, and compares most favourably with the average product of our public schools of the same age. It will be curious to see if the War will alter the old methods of our ancient foundations. Will the schools take up the attitude that the War has been won chiefly by the gallantry and sacrifice of the public-school officer, and that a system that can turn out such material cannot be bad? If they do they will not only pay a poor compliment to the gallantry of the rank and file who were not public-school men, but they will miss the best moment of reform that may occur for the next forty years. That reform must be concerned chiefly with placing work first, and, while acknowledging the importance of exercise, relegating it firmly to a second place. A Sunday paper, in a notice of the new term at Harrow recently, gave seven lines to the reforms of teaching and half a column to the discussion of the athletics of the school. A straw, maybe, but straws show the way the wind blows.

Class I Clerkships.

THE issue of the new regulations for Examinations for Clerkships (Class I) in the Home Civil Service marks a great advance that was foreshadowed in the report issued in June 1917 by the Committee appointed by the Treasury, of which Mr. Stanley Leathes was Chairman. The recommendations of that report have been adopted with a few slight changes: Arabic and Persian have been added to the languages, and mathematics is divided into pure and applied (the maximum for mathematics remaining the same). The outstanding characteristic of the new scheme is the section of compulsory subjects which demands a broad knowledge of "questions on contemporary subjects, social, economic, and political," and "questions on general principles, methods, and applications of science, including geography," and includes a *viva voce* examination. It is also necessary to show a reading knowledge of one foreign language, and, as additional marks may be gained by taking a paper in translation from a second foreign language, a valuable stimulus is supplied in this direction. There are no fewer than fifty-nine optional subjects, carrying from 100 to 400 marks each; candidates are allowed a choice up to a total of 1,000 marks. It will be noted that classics and modern languages are, for the first time, on an equality as regards maxima, and that natural science is well represented. We congratulate the Civil Service Commissioners on this admirable scheme, and look forward with

much interest to the promised syllabus in the various subjects, and then to the papers; but for these we shall have to wait until August 1921, when the first examination under these regulations will be held.

Teachers' Strikes.

SOME of the utterances at a recent meeting of the London Teachers' Association, indicating as they undoubtedly do a considerable degree of unrest among teachers in regard to the question of salaries, are a sufficient justification for our returning to a subject commented upon in these columns a month ago. This journal has always stood for the principle that the true interests of the teacher are in the long run inseparable from the true interests of the child, and that if the teacher is underpaid the child inevitably suffers along with him. All the more important, therefore, do we believe it to be that in any steps taken by teachers' associations for the improvement of the teacher's position they should be sure that they have the complete sympathy of the public, and in particular of the parents of the children. Especially do we apply this remark to the method of the strike. For one thing, no strike ever did succeed unless the strikers had public opinion behind them. But there is a far deeper sense in which a teachers' strike may be unsuccessful. For the very material upon which the teacher works is, not stocks and stones as in the case of ordinary workmen, but delicate human material. Unless he is perfectly sure of his ground, he cannot dislocate the children's education without grave risk, not only of failing to attain his immediate object, but also of losing that dignity and prestige which are of the essence of his position. Again, therefore, in what we believe to be the very highest interests of the profession, we counsel patience.

Psychological Tests and Vocational Selection.

THE war has given an impetus to the study of Experimental Psychology. There was such a sudden creation of almost innumerable posts, and so vast a number of candidates for them, that it was inevitable that standards of selection should be sought and eventually put forward. To America belongs the credit of making the initial attempt to apply such standards, and of obtaining the first and the greatest success. Over 1,500,000 recruits of the American Army were tested psychologically "for the purposes of assigning men to tasks according to talent, of discovering men of superior intelligence for advancement, of equalizing the organization of different battalions, of eliminating a large number of men from responsible positions." The results, according to Prof. Spearman, who recently lectured on this subject at London University, were "extremely effective." The efficiencies of some battalions were raised 100 per cent. Similar work was also done in the American Navy, but perhaps the most interesting results were secured in aviation, and the researches of French psychologists into what is commonly called the "flying temperament" have produced remarkably trustworthy results. There is no doubt that if these psychological tests could be applied successfully to the world of industry there would be both increased efficiency and increased happiness. "But," said Prof. Spearman, "we shall not wait for adults. We will test in childhood. Children will be tested throughout, and will be allocated to proper spheres." Before, however, we are carried away by Prof. Spearman's

robust optimism, these tests must be circulated for experiment and inevitable improvement, and for comparison with the crude, but fairly safe, though theoretically unjustifiable, methods of "imputed intelligence" hitherto adopted by all school teachers.

THE Code of Regulations for Public Elementary Schools, traditionally known simply as "The Code," is now reprinted as a whole for the first time since 1912. The Board of Education recognize that a thorough revision, involving better arrangement and lessened bulk, might with advantage have been made. Such a revision will be undertaken later. To have undertaken it now would, in the judgment of the Board (a judgment in which we concur), have been embarrassing rather than helpful to the already burdened Local Authorities. The present issue is therefore entitled a draft of the *provisional* code of regulations. Only those changes are introduced which have the effect of incorporating minutes issued since 1912, or which bring the Articles which deal with grants into agreement with the financial clauses of the Education Act, 1918, and with the Regulations for the Substantive Grant for Elementary Education which have been issued already. The other important alterations are only of a consequential character. For example, the Articles relating to grants for Special Instruction, to Higher Elementary Schools, and to "Small Population" grants disappear, because separate grants under these heads are no longer payable. Sundry changes are also made in Schedule I, relating to teachers, in consequence of the passing of the Superannuation Act, 1918.

MR. FISHER'S recent reply, in the House of Commons, to Sir Francis Blake, who directed attention to the provision in the Education (Scotland) Act, under which the Department may sanction travelling expenses necessarily incurred in attending meetings of Education Committees, and asked whether he proposed to take steps to secure that similar provision shall be available to facilitate educational administration in England and Wales, was disappointing, but not surprising. It is obvious that no satisfactory reason can be put forward for differential treatment of those performing similar duties north and south of the Tweed. All that the President of the Board could say was that he did not think members of Education Committees in England and Wales could be treated in this matter differently from members of other Committees of Local Authorities. If that is the case—and it is, of course, a reasonable view of the situation—it is advisable for the general question to be raised as soon as possible. Under present conditions, the high cost of travelling renders it difficult for local representatives in the larger administrative areas to perform their functions efficiently.

A STATEMENT, prepared by Mr. F. H. Owers, shows the expenditure incurred by the majority of administrative counties on Higher Education under the Act of 1902. The fact that the outstanding loans amount to nearly two millions indicates that the authorities have displayed a commendable activity in establishing secondary schools. The West Riding of Yorkshire records a debt of £264,287; Middlesex, £220,045;

Cheshire, £159,971; Essex, £139,676; and Durham, £108,413. Now that the limit of 2d. in the rate for higher education has been removed, and the Board are prepared to meet not less than a moiety of the net expenditure, Local Authorities will be in a position to embark upon important developments in the field of education other than elementary.

DURING the next twenty years a large expenditure on school buildings is inevitable. To the additional provision required under normal conditions, the accommodation will have to be found for new enterprises and for new classes of students; many school buildings, moreover, are quite out of date and ought to be replaced. A Local Authority usually meets capital expenditure by raising a loan, as it appears to be more equitable to divide the cost of a building over more than one generation. It is, however, an expensive method of purchasing property. Suppose, for instance, an Authority contemplated an expenditure of £200,000 over a period of ten years. It might arrange a building programme and meet the cost by raising out of revenue £20,000 a year. To borrow £200,000 at 5½ per cent., and repay it with interest over thirty years, would cost £13,300 annually for thirty years. If the proposition is extended, the economy to be effected by meeting capital charges out of revenue is emphasized. Thus, by raising £20,000 a year for thirty years, £600,000 could be expended on buildings. Loans of (say) £200,000 in each decade would represent a charge of £13,300 in the first ten years, £26,600 during the second, and £39,900 for the last ten years. In addition, the rate-payers would have to find £26,000 and £13,000 respectively for two further periods of ten years.

"GO AS YOU PLEASE" IN THE ORGANIZATION OF LANGUAGE CLASSES.

By W. N. HILLS.

WHATEVER advantages may be claimed for terminal promotion and the set system, no form can be perfectly homogeneous even in a very large school, and in schools of an average size there will always be considerable variations in capacity to learn a language amongst members of the same form or set. After experiments lasting over several years now, I have come to the conclusion that homogeneity in language forms or sets matters very little, if each pupil is allowed to progress at his own rate of speed, and this apparently impossible result may be achieved quite easily by a system of partnership work combined with the principle that no pupil shall be allowed to take a written test on a fresh lesson without having previously gained a satisfactory percentage of marks on those preceding it. In my forms each pupil advances step by step at his own pace, and the cleverer boys help those who are less apt with eminently satisfactory results, as may be proved by any one caring to pay a visit to the higher forms of the Leyton County School.

This is how it is done. First, the language classes are so arranged that each language master keeps the bulk of his pupils from their entrance to the day they leave school. This is not essential, but I claim that it is advantageous from the point of view of both pupil and teacher. Secondly, an oral lesson may be followed with interest and profit even by such pupils as have not yet attained sufficient proficiency to pass a satisfactory written test upon it. My method, then, is this.

After a preliminary course of phonetic instruction, the first lesson in the textbook is read by the whole class; oral exercises are taken upon it, and instruction given in explanation of any difficulties that may arise. After home study, a short written test on the lesson is worked by the whole class.* The work is marked, usually in class, and a *corrigé* is written, which is revised by the class, who work in partnership, two and two together, through the class. When the *corrigé* has been revised, the rest of the time spent in partnership work may be occupied by oral question and answer, the pupils taking turns to ask and answer questions. If a difficulty arises that cannot be solved by either of two partners, they refer the matter to the master, who gets the difficulty solved by the class or explains it himself. A fresh lesson is then read, and this time the written test upon the new lesson is worked by those only who have satisfied in the preceding test, the others repeating their attempt to satisfy in the former lesson. A mark of 5 out of 10 is chosen as the minimum mark qualifying for promotion to a new test. There is no difficulty in setting the tests for the whole class if the textbook chosen has a series of exercises similarly numbered after each lesson, as the numbers written on the blackboard will apply to all the tests, with additional numbers if any number should be wanting in the exercises set at the end of any lesson. This method is continued through the book, no pupil ever being promoted to a new lesson who has not first satisfied the teacher as to his mastery of those preceding it. When any pupil arrives at the end of the book no inconvenience is caused by his promotion to a more advanced book, so long as it contains numbered exercises corresponding with those in the more elementary book.

Something should be said as to the advantage of setting these short weekly or fortnightly tests. It is much better that as much as possible of the written work should be done in class, and a pupil's knowledge is better tested by work written under the master's eye than by work written at home. The *corrigé*, however, can be written at home if checked in partnership in class. I find my pupils always very anxious to conform to the rules of the game. For example, in order that the test may be as thorough as a short test can be, the pupils are told to cover the lesson that precedes the exercises from which the test is chosen in such a way that it does not help them in working the test. They are to see the exercises only, and not the lesson which precedes them, and which they have been studying as homework. There is never any difficulty about this. The boys are always evidently anxious to make the test as fair as possible, and instances of peeping at the lesson are practically unknown. It is assumed that nothing like unfair play will occur, as the interest is not so much in the mark obtained for the test, even though there are rewards for marks of nine or ten in the shape of an entry in the boy's diary. The interest, for all that, is more in the work itself than in the mark received for it. The boys see that no advantage can be gained by deceiving the teacher, who is there to help them to teach themselves, and who cannot do so effectively unless he knows just where each one of them is weak.

It will perhaps be helpful to a teacher who may wish to try this method to describe in detail a week's work in one form. I choose a second year Form, IVa. There are five periods per week, each of forty-five minutes. On Monday a written test is taken. This has been prepared during the latter part of the week before, and in the week-end home-work. There are three half hours per week of home-work, on Monday, Wednesday, and Friday evenings. The test consists of five short exercises chosen from those at the end of one of the reading lessons in the textbook. The teacher puts their numbers on the board, say A (5), C, D (6), E (3), F (2). These numbers are to apply to every boy on whatever lesson he may be taking a test. As it may happen that some of these numbers are missing from the exercises at the end of some of the lessons on which some boys are writing tests, it may be necessary to add other numbers also, until every boy has five questions to

answer, or grammatical exercises on which to write sentences in illustration. The whole business of putting up the numbers should not, however, exceed about five minutes. While the boys are writing their respective tests, the master goes round the form with his blue pencil, indicates errors, ticks off correct solutions—and it sometimes happens that a test is fully marked in class, a great advantage if spare periods for marking are not numerous.

As each boy finishes his test he puts down his pen, takes up a lead pencil, and does his best to correct his work by reference to the book, which has been covered during the test with the exception of the exercises only. He may even begin to write out his *corrigé*, though this is usually done during Monday evening's home-work.

I find it useful to include a tense of a verb in every boy's weekly test, and to make satisfaction in this a condition of passing the test. At the most one fault is allowed in this tense. If any books have not been marked during the period, they are collected and returned marked to the boys before they go home, so that they may complete their *corrigé*.

On Tuesday the boys choose partners and examine each other's *corrigé*, appending their initials or French name (each boy has a French name), when satisfied that the *corrigé* is correct and complete. If a difficulty is found that neither of the partners is able to solve, the master puts it to the class, or, if they cannot solve it, explains it himself. When the partners are satisfied with the *corrigés* they engage in conversation in French or ask and answer each other's questions till the end of the lesson. The master meanwhile goes round the class, pointing out faults where they exist in the *corrigés* or listening to the conversations, with a view to correcting faults in language or pronunciation. The marking of the *corrigé* is almost always completed in class and the marks entered in the master's mark-book.

On Wednesday (there having been no homework on Tuesday evening), it is customary for such boys as wish to do so to bring in illustrations—that is to say, drawings of scenes or objects, with French names affixed to the various objects represented. These are passed round the class, and rewards are given for the best drawings. No drawing is accepted unless all the French names are correctly written. If there are faults in French upon the drawings, they are returned for correction, and may again be submitted the Wednesday following. The rest of the lesson is occupied by the first reading of the new reading lesson. The whole class follow this reading, and it is found that even those boys whose written work is much less advanced than the lesson being read are able to profit by the oral work on the lesson, which forms the subject of Wednesday evening's homework. The class are recommended to share this homework between the lesson being read by the whole class and that on which they will write a test the following Monday, so that, if there are any difficulties in their own lesson that they think will prevent them from satisfying in their test, they may be explained in class on Thursday or Friday.

The Thursday and Friday lessons are devoted to the explanation of such difficulties if they arise and to the study of the new lesson, which is thoroughly studied, all of the exercises being taken orally before a new lesson is read. Nothing is gained by haste. Those boys who are above the average in linguistic ability or in industry or love of the study can go ahead as fast as they are able without being hampered in any way by the rest of the class. The partnership work, and the weekly study of a lesson not so advanced as that they have just mastered, provides them with excellent opportunities for that continual revision of past difficulties that is necessary if the language studied is to become part and parcel of the student's life, a permanent acquisition and a source of pleasure for life. It is by no means disadvantageous to spend the better part of two years over a first-year book, only those boys who have satisfied in it going on to the second year's course. As boys get on, they should be encouraged to attempt extra reading of books not being studied by the rest of the class, though the crowded evening time-table is in most schools a heavy handicap on boys in senior forms.

* Like Mr. de Glehn (see Adams's "The New Teaching"). I have written work done even in the phonetic script.

PERSONAL PARAGRAPHS.

THE Prime Minister's list of honours, the publication of which has been deferred since the New Year, includes the following who are associated with education:—*Baronets*: Sir Henry F. Hibbert, Chairman of Lancashire Education Committee from its inception, Chairman of the Education Committee of the County Councils Association Schools; and Sir William Thomas, J.P., public and local services, more particularly in connexion with the Welsh University. *Knights*: Prof. Israel Gollancz, Secretary of British Academy since its foundation. Prof. Richard Gregory, Member of Council of British Association for the Advancement of Science, Chairman of the Committee on Science Teaching in Secondary Schools, has done remarkable public work in organizing the British Scientific Products Exhibition. Alderman John Harrison, J.P., Mayor of Stockton-on-Tees, 1915–1919, Chairman of Education Committee, Stockton. Francis A. Hyett, Esq., Chairman of the Gloucestershire Education Committee, has rendered valuable services in the sphere of local educational administration. Prof. William Ridgeway, Prof. of Archæology, Cambridge University, since 1892; Brereton Reader in Classics since 1907; Professor of Greek, Queen's College, Cork, 1883; Gifford Lecturer in Religion, Aberdeen University, 1909–11; Stokes Lecturer in Irish Archæology, Dublin, 1900; Member of Council of Cambridge Senate, 1900–04; President of Classical Association of England and Wales, 1914.

* * *

SIR ALFRED T. DAVIES, K.B.E., Permanent Secretary to the Welsh Department of the Board of Education, and Founder and Hon. Director of the British Prisoners of War Book Scheme (Educational), has been gazetted a Deputy-Lieutenant of the County of Denbigh. Sir Alfred is a native of Liverpool, and a past student of University College, Aberystwyth. Previously to his service under the Welsh Department of the Board of Education, he practised for some twenty years as a solicitor in Liverpool. He was a member of the Denbighshire County Council and Education Committee from 1904–7, and became a Governor of his former college. He has published several handbooks on municipal problems and the Welsh language. His appointment as Deputy Lieutenant will be welcomed throughout the Principality.

* * *

THE new head of Sevenoaks School is Mr. Geoffrey Garrod, son of the late Mr. Herbert Garrod, of Merton College, Oxford, and Organizing Secretary of the Teachers' Guild of Great Britain and Ireland. A Scholar of Winchester and of New College, Oxford, Mr. Garrod has only just been demobilized after a fine record in the Army. He is a typical British sportsman-scholar, with a happy optimism, which augurs well for his success and popularity as head master.

* * *

THE Incorporated Association of Assistant Masters in Secondary Schools has appointed Mr. G. D. Dunkerley as organizing secretary, and he will take up the duties of his post in September. Mr. Dunkerley is A.R.C.Sc. and B.Sc. (London), at present second master (for some time acting head master) of Watford Grammar School, has been a member of the executive for fifteen years, and has been, in turn, hon. treasurer, hon. secretary, and chairman of the Association. He is hon. secretary of the Secondary School Teachers' War Relief Fund, and represented assistant masters as a member of the Departmental Committee on Salaries.

* * *

MR. G. A. STOCKS is retiring from the head mastership of Queen Elizabeth's School, Blackburn, at the end of the present term. A scholar of St. Edmund's School, Canterbury, and of Pembroke College, Cambridge, Mr. Stocks was an assistant, and later second, master of Lancaster School. He was appointed first head master to the Barrow-in-Furness High School in 1889, and returned to Lancaster as head in

1893. He received his present appointment in 1903. He edited the records of Queen Elizabeth's School for the Cheetam Society, and has been regarded as an authority on local antiquities.

* * *

THE REV. H. HUGHES, minor canon of Worcester Cathedral, has been appointed to the head mastership of King's College, Taunton, *vice* the Rev. E. H. George, who is taking up the headship of Bloxham School. Mr. Hughes is a late classical scholar of Pembroke College, Oxford. He was Sixth Form master at Clifton College (modern and military), and has also held masterships at Hereford and Worcester.

* * *

MR. GEOFFREY G. MORRIS, Sixth Form master at Sherborne, has been elected a Fellow and Classical Lecturer at Corpus Christi, Cambridge. Mr. Morris was Newcastle Scholar at Eton, a scholar of Trinity College, Cambridge, and Fellow of Jesus College from 1911 to 1914. He was placed in the first division of the First Class in Part I, and in the first class, with distinction, in Part II of the Classical Tripos. He was also awarded Browne Medals for the Latin Epigram in 1908 and 1909, and for the Greek Epigram in 1909, the Winchester Reading Prize, and the Oldham Classical Scholarship.

* * *

THE REV. T. GOUGH is retiring, after thirty-three years' service, from the head mastership of King Edward VI Grammar School, Retford. He will be succeeded next term by Mr. C. R. Skrimshire, who was educated at Monmouth School, and at Merton College, Oxford, where he took a Second Class in Classical Honours Moderations and a Second Class in Modern History Finals. He has held posts at New College, Eastbourne, and Bradford Grammar School, and from 1909 to the outbreak of War was head master of the English High School for Boys in Constantinople. At present he is Sixth Form History Master at Wellington College.

* * *

THE REV. SIR JOHN P. MAHAFFY, G.B.E., C.V.O., D.D., Mus.Doc., Provost of Trinity College, Dublin, died in his eighty-first year, on April 30, after a short illness. Sir John Mahaffy, who was born and partly educated abroad, entered Trinity College, Dublin, in 1856. He was awarded the Wray prize for logic and ethics, and completed a most successful student's career by becoming first Senior Moderator in Classics and Logics, with the second Gold Medal in 1859. He was captain of the cricket eleven, played for the gentlemen of Ireland, and shot at Wimbledon for the Elcho Shield. Amazingly versatile, he took an active part in the music of the College, was president of the Philosophical Debating Society, and his gift of leadership in many directions was recognized by his nickname, "The General." He received the valuable Madden Prize in 1862, and, winning his Fellowship in 1864, he took orders and devoted himself to tutorial college work. Mainly occupied at first with logic and metaphysics, he soon found his true vocation as an historian of the later age of Greece. In 1871 he was appointed Professor of Ancient History in the University of Dublin, and occupied this Chair for over twenty-eight years. He wrote extensively, and his standard publications include: "Prolegomena to Ancient History," "Social Life in Greece," "Rambles and Studies in Greece," "History of Classical Greek Literature," "The Silver Age of the Greek World," "The Empire of the Ptolemies," "The Petrie Papyri Deciphered and Explained," and, with Archbishop Bernard, "Kant's Critical Philosophy for English Readers." Sir John Mahaffy was appointed Provost of Trinity in 1914 on the death of Provost Trail, and received the accolade at his investiture, thus being the first clergyman to be knighted. He gave great help to the military authorities during the Easter rebellion of 1916, and the services of the Trinity O.T.C. during this critical period, and the general services rendered by the College throughout the war, were recognized by the bestowal upon the Provost of the Grand Cross of the British Empire. For

many years Sir John Mahaffy was the foremost figure in Trinity College. He gained a wide European reputation; numerous honorary degrees and titles were conferred upon him by foreign Universities and Academies, and his death is a great loss to education universally.

* * *

By the death of Mr. D. Rintoul, not only has Clifton College lost a distinguished master, but England has lost one of her outstanding teachers of science. Mr. Rintoul was a native of Perthshire, born on the estate of Gask. He received his early education at Madras College, St. Andrews, and graduated M.A. with the highest honours in Mathematics and Natural Philosophy at St. Andrews University. Thereafter he spent a year at Edinburgh, in the laboratory of Prof. P. G. Tait. It was owing mainly to Prof. Tait's influence that Mr. Rintoul proceeded to Corpus Christi, Cambridge, where he became Fourteenth Wrangler in 1885, and was elected to a fellowship. He was appointed almost immediately to Clifton, where he obtained distinction not only as a science teacher, but as a house master and as head of the O.T.C. He was a man of unbending integrity, and thoroughness was the stamp of his work. Those who differed from him in policy and opinion accorded him the same respect as those with whom he saw "eye to eye." What greater honour can one man pay to another?

ONLOOKER.

TOPICS AND EVENTS.

ASSOCIATION OF HEAD MISTRESSES.—The Annual Conference of this Association will be held at King Edward's High School, Birmingham, on June 13 and 14. Miss Reta Oldham, O.B.E., will preside.

THE BRITISH ASSOCIATION.—The British Association for the Advancement of Science will resume its annual meetings next September at Bournemouth, and those who have known the Association only in pre-War days will find the arrangements different in several important details from those with which they are familiar; the meeting will last only five days instead of the more usual eight, and the social festivities will be considerably curtailed. The Education Section has prepared a full programme for the meeting. On September 9, Sir Napier Shaw, F.R.S., will deliver his presidential address at 10 o'clock, the latter part of the morning being devoted to the consideration of the free-place system, with especial reference to the question of maintenance grants and the tenure of the free-place holders. In the afternoon, a discussion upon the Teaching of English will take place. On September 10, the morning will be devoted to considering "The Method and Substance of Science Teaching"; several well known educationists have promised to take part in the discussion, and an interesting debate is expected upon the two reports recently issued by Sir Joseph Thomson's and Sir Richard Gregory's Committees. During the afternoon a joint meeting with Section F (Economics) will consider the question of "Education in Relation to Business." The future of continuation schools is to be discussed on the morning of September 11, and, in view of the changes which the new Education Act will cause in these, this should prove one of the most interesting features of the meeting; for the afternoon an animated debate upon the relation of humanistic and scientific studies is being arranged. It is hoped that Bishop Welldon will be able to open a discussion upon "Training in Citizenship" on the morning of September 12; and in the afternoon of that day the question of private schools will be considered, the latter subject being one of especial interest in towns like Bournemouth. Communications intended for the Section should be addressed to the Recorder, Mr. Douglas Berridge, The College, Malvern.

THIS year's Conference of the New Ideals in Education will be held at the Examination School, Cambridge, from July 25 to August 1. The subject selected is "The Creative Impulse and its Place in Education." Mr. Henry Wilson will give the inaugural address on July 25. There will be papers on "The Effect of Craft on Mind and Body," on "Art and Culture," on "Learning by Doing," and on "The Craftsman in Relation to Education and

Industry." Full particulars can be obtained from the Conference Secretary, 24 Royal Avenue, Chelsea, S.W.3.

UNIVERSITY COLLEGE, LONDON.—A Summer Vacation Course for students and teachers of French will be held at University College from August 6 to 19 inclusive. Six lectures on "French Phonetics" will be given by Mr. Daniel Jones, and six on "Methods of Language Learning" by Mr. H. E. Palmer. Daily ear-training exercises will be conducted by Miss L. E. Armstrong, and there will be daily practical classes. Applications should be made at once to Dr. W. W. Seton at the College.

TONIC SOL-FA COLLEGE.—The Forty-third Annual Holiday Course for teachers and students is to be held at the College Buildings, Earls Court, London, E.7, from July 22 to August 14 next. It is intended to afford opportunity for study to those who are engaged in teaching or preparing to teach singing from either notation on the Tonic Sol-fa method. The course has been helpful to organists, choir trainers, and school teachers. Until recently, this was the only musical institution where, besides theoretical study, the art of teaching was practically and experimentally taught.

PARENTS' NATIONAL EDUCATIONAL UNION.—On May 22 Sir Frederic Kenyon gave an address at the annual meeting of the Parents' National Educational Union on "The Use and Charm of Museums." Sir Frederic began by saying how much the educational principles of Miss Charlotte M. Mason appealed to him by the great stress she lays upon the teaching of history and literature. Most people look upon education as a mere preparation for some trade or profession, but it was far more than that, for during the early years of a boy's or girl's life the foundation of character is laid. A knowledge of literature and history is a perennial source of inspiration and refreshment, and through it children obtain ideals. It is more than ever necessary that children should be brought up in the knowledge of the high ideals and traditions of their country; there is danger that the government of that country may get into the hands of those who have not been so brought up. Museums are a storehouse of valuable and beautiful things, and have a place of education. Sir Frederic told of many old manuscripts and documents which are to be seen in the British Museum, tracing the history of England from its beginning up till now. A museum can provide guide books, picture post cards, photographs, and lantern slides, but it can do more: it can help children to find joy in its treasures by providing guides. But it is the teachers who really matter; it is their part to make children realize the beauty of which the world is full. After the address, visitors were invited to the British Museum, where all the galleries on the ground floor were thrown open to them.

THE TEACHING OF ENGLISH IN SCHOOLS.—The President of the Board of Education has appointed a Departmental Committee to inquire into the position occupied by English (Language and Literature) in the educational system of England, and to advise how its study may best be promoted in schools of all types, including Continuation Schools, and in Universities and other institutions of higher education, regard being had to (1) the requirements of a liberal education; (2) the needs of business, the professions and public services; and (3) the relation of English to other studies. The members of the committee are:—Sir Henry Newbolt (Chairman), Mr. J. C. Bailey, Miss K. M. Baines, Dr. F. S. Boas, Miss H. M. Davies, Miss D. Enright, Prof. C. H. Firth, Mr. J. H. Fowler, Miss L. A. Lowe, Sir A. T. Quiller-Couch, Mr. G. Sampson, Miss C. F. E. Spurgeon, Dr. G. P. Williams, Mr. J. D. Wilson, with Mr. J. E. Hales as Secretary, to whom all communications should be addressed at the Board of Education, Whitehall, London, S.W.1.

UNIVERSITY TEACHERS AND SUPERANNUATION.—A conference, attended by representatives of the professorial and non-professorial teaching staffs of the University institutions of England, Wales, and Ireland, met at the University of Sheffield on April 11, to discuss the position with regard to Superannuation, in view of the recent Act, which confers non-contributory pension benefits upon all teachers in State-aided institutions except University teachers. Since 1913 there has been a Pension Scheme for Universities of a contributory character, known as the Federated Superannuation Scheme, under which the State pays one-half of the total contribution and the other half is paid by the beneficiary. This scheme, which compares unfavourably with the non-contributory scheme under the Teachers' Superannuation Act, is mainly applicable, however, to professorial staffs, as the majority of lecturers are in receipt of salaries so low that they cannot afford to make the

necessary contribution. In these circumstances it became imperative, on the passing of the Teachers' Superannuation Act, that some action should be taken by University teachers. On April 4 a deputation from the Council of the Federated Superannuation Scheme waited on the President of the Board of Education with a view to obtaining a Treasury grant for the purpose of improving the Federated Scheme. The results of this deputation were reported to the Conference, showing what improvement might be expected under a revision of the Federated Superannuation Scheme—namely, that the Government contribution might be doubled. It was understood that the utmost to be expected on behalf of the more senior members of staff is that the Scheme may be made retrospective for five years (instead of for the whole period of service, as in the case of the Teachers' Act). It was apparent that the feeling of the Conference ran in favour of the Teachers' Act. It appeared that only an extension or modification of the Teachers' Superannuation Act, so as to include University teachers, would be considered to meet all the features of the case. A motion was put to the meeting: "That this Conference wishes to urge strongly that the Teachers' (Superannuation) Act, 1918, be extended so as to include the Staffs of Universities and University Colleges," which was carried with one dissentient. A further resolution, carried unanimously, was: "That this Conference urges that before any modification of the Federated Superannuation Scheme for University Teachers be adopted an opportunity be given to the various sections of the staffs of the Universities to place their views directly before the President of the Board of Education and the Treasury, and that this resolution be communicated immediately to the President of the Board of Education." From the spirit of the Conference University teachers will never rest until their claim be recognized to rank with other grades of the profession in legislation conferring superannuation benefits.

TEACHERS' CHRISTIAN UNION.—There has recently been much discussion of the problems of Religious Education in Public Schools, and it is probably true to say that in schools of every type teachers are to-day more alive to, and at the same time more puzzled by, the difficulties of this subject than of any other. While the War seems to have stimulated the ever-ready idealism of youth, and preachers in school chapels who have a real and living message get a ready hearing, in the classroom the Scripture lesson often seems less vital and purposeful than one on any "secular" subject. It was for this reason that the Teachers' Christian Union devoted its annual conference to the Ideals and Problems of Religious Education. The conference was held from April 22-26 at The Hayes, Swanwick, and was attended by nearly 300 members. The time was divided according to the principal stages of psychological development, childhood, adolescence, and adult life, and the religious education appropriate to each stage was discussed fully. The inaugural address was given by Canon B. H. Streeter, and papers on the main topics of discussion were read by Miss Waterhouse, of Homerton College; Prof. Cock, of King's College, London; Mr. Albert Mansbridge, of the Workers' Educational Association; and Prof. Kennett, of Queens' College, Cambridge. Ample time was given to free discussion, which was maintained on a high level, valuable illustrations of the matters discussed being given from the practical experience of those present. A report of the Conference, containing the addresses, with full summaries of the discussions, will be ready by the end of June, and obtainable from the Secretary of the Union, 16 Russell Square, W.C.1.

BRITISH AND FOREIGN SCHOOL SOCIETY.—The general meeting of the British and Foreign School Society was held on May 15. The report presented deals with the urgent need for an adequate supply of the best type of men and women for the profession of teaching, and indicates the effect which the School Teachers' (Superannuation) Act, 1918, may have upon the solution of this problem. Turning to the internal affairs of the Society, it describes the difficulties which have had to be met in carrying on the training of the small number of male students who, being unfit for military duty, have been in residence at Borough Road College. It is hoped to reopen the College under conditions more nearly approaching normal in the coming autumn with a full complement of students, the majority of whom will be ex-service men. The students in the Society's colleges in the year 1918-1919 numbered 378; the staff 54.

STATE AID FOR SCIENTIFIC AND TECHNICAL EDUCATION.—Education in the United States (where scientific and technical education are the forms that prosper best) is on a fast-rising upward curve; the German race, with its eager intelligence, cannot cease, for all its political and military discomfiture, to be a power in the

domain of scientific progress. Some facts collected by the British Science Guild bring out by means of comparative figures the need of England for State aid to promote research and the supply of research workers. In proportion to population the United States has more than twice as many students of University standard as England, Germany nearly three times as many; there are only 5,000 full-time students of science and technology in the United Kingdom, as against 17,000 in Germany and 34,000 in the United States. The total income of Universities in the United States amounts to about £20,000,000, in Germany to nearly £1,800,000, in England to about £2,000,000 or, Oxford and Cambridge excluded, to only £1,000,000; 80 per cent. of the German Universities' income is contributed by the State, whereas but 34 per cent. is the proportion of income arising from Parliamentary grants to the modern Universities of England and Wales; the University of Berlin alone receives yearly from State funds a grant nearly equal to the total annual Parliamentary grants to the Universities and colleges of England and Wales, and the full amount of these grants is less than the separate incomes of nine Universities in the United States. Private benefactions to Universities and colleges in the United States exceed £5,000,000 a year; in the United Kingdom they do not average one-twentieth part of that sum. The colleges of agriculture and the mechanic arts in the United States have a total income of £7,000,000, or ten times that of the whole of the modern Universities of England and Wales. The appropriations of our Parliament to assist scientific research may be regarded as a payment on account. In the new war that is beginning, with the laboratory as its field of action, the State must make a giant effort to provide munitions and attract recruits. Germany, it will be found, will not stint provision for her Universities and technical *Hochschulen*.

EX-SERVICE STUDENTS AND THE UNIVERSITIES.—That part of the Government scheme of financial assistance for the education and training of ex-Service men which relates to higher education at public educational institutions in England and Wales is being administered by the Board of Education. Grants can be made by the Board to assist properly qualified students to take full-time University Degree or Diploma Courses, some Post-Graduate Courses, full-time Refresher Courses, and Courses of Higher Commercial or Technical Education at polytechnics or technical institutes. An intending applicant should, in the first place, communicate with the head of the educational institution at which he wishes to take his course, from whom he may receive a form of application (O. 13). If he needs advice as to the best institution for him to approach, he should consult the Chief Education Officer of the Local Education Authority of the area in which he resides. If he has any difficulty in finding an institution which has accommodation available for him, he should communicate with the Service Students Bureau, Board of Education, Whitehall, London, S.W.1. Applicants who desire to attend Universities in the British Oversea Dominions should communicate with the Secretary, Imperial Education Committee (W.O. S.D. 8), Adastral House, Victoria Embankment, S.W.1.

ROYAL ACADEMY OF MUSIC AND ROYAL COLLEGE OF MUSIC: AWARD OF MEDALS.—The following candidates gained the Gold and Silver Medals offered by the Associated Board of the Royal Academy of Music and the Royal College of Music for the highest and second highest Honours marks respectively, in the Advanced and Intermediate Grades of the Local Centre Examinations in March-April last, the competition being open to all candidates in the British Isles:—Advanced Grade Gold Medal: Amy Maynard, Oxford Centre, Pianoforte, 144 marks. Advanced Grade Silver Medal: Madeleine Windsor, Bath Centre, Pianoforte, 142 marks. Intermediate Grade Gold Medal: Leslie B. Taylor, Derby Centre, Pianoforte, 141 marks. Intermediate Grade Silver Medal: Camilla J. Lloyd, London Centre, Pianoforte, 139 marks.

ASSOCIATION OF ASSISTANT MISTRESSES.—The report of the thirty-fifth year's work of the Association has now been published. The special work of the Association during the year has been the inquiry into the allocation of the Fisher grant. This was the work of the Central Information Sub-Committee. There has been constant correspondence with Education Committees on the subject: in every case brought to the notice of the Executive a letter was written to the Authority concerned. In one instance, the remonstrance led to a higher scale of salaries being adopted; in another, a teacher who had received nothing from the Local Authority for the year 1916-17, because she left the school in July of that year, was sent the increase of salary. The work of the Association increases every week. The members now number 3,547. In order

to meet this growth, a temporary office has been taken for the greater convenience of the secretary. It will, perhaps, come as a surprise to members to realize that since the founding of the Association thirty-five years ago no rent for offices has been paid until last August. The usual Summer Meeting in the provinces, abandoned during the War, was held at Sheffield High School on May 31.

PRIVATE SCHOOLS AND THE NEW ACTS.—The operation of the Education Act 1918 and the School Teachers (Superannuation) Act will affect the future position of private schools, and it is imperative that such schools should take steps to adjust themselves to new conditions. The College of Preceptors, which is charged, among other things, with the duty of promoting the welfare of private schools, offers itself as a centre for common action on behalf of such schools. With this object it invites non-State-aided schools to affiliate themselves to the College. The College hopes to render service to the affiliated schools by offering to the public and to the education authorities a satisfactory guarantee of efficiency, by endeavouring to secure the recognition of such schools as part of the provision for national education, and by furnishing to the schools information and advice. The College will also press the claim of teachers in non-State-aided schools to share in the benefits of the School Teachers (Superannuation) Act, or, alternatively, will promote an endeavour to arrange an independent Pensions Scheme for such teachers. Schools desiring to be affiliated to the College may obtain forms of application from the Secretary of the College of Preceptors, Bloomsbury Square, London, W.C.1.

FOREIGN AND DOMINION NOTES.

UNITED STATES.

As to continuation, the Board of Education, true to their motto, "Here the impossible grows more impossible; here the feasible ceases to be done," lay stress on the difficulties which they are not surmounting. How those difficulties would shrink if the trade unionists were as eager for schools as for higher pay and shorter hours! That persuasive rhetoric, the threat of a strike, a surging mob in Whitehall, a few banners inscribed "Amend Section 10," would train teachers, raise buildings, and repair the Education Act with magic speed. It is for us to use sober argument, not to approve these modern substitutes for the art of reasoning; and this month, to continue our study of Section 10, we examine its notions of the age-limit. In some lands it has been proposed that the continuation school should keep its pupils to the end of their twentieth year—a limit connected with conscription, and the necessity of bridging the gap between the ordinary school and the regiment. In the United States, a country with which we hope to work in closer union, the Labour leaders are almost unanimous for eighteen as the limit. But there organization is different: the primary school covers normally the ages from six to fourteen; the secondary (or high) school those from fifteen to eighteen. Only some 11 or 12 per cent. of the boys and girls who enter high schools now complete the course; and to defend the "tops" of these schools obligatory continuation up to eighteen would be required. But, if we are to judge demand in America from the existing voluntary continuation schools, it is for a lower age, the large majority of pupils in them being fifteen, sixteen, or sixteen and a half years of age. In England, secondary education, overlapping primary, begins, and might therefore perhaps end, sooner than in the United States. The great blunder that Section 10 made was, as we think, its neglect of the advice to adopt "the clean cut at seventeen"; it should have made seventeen the statutory age-limit, whilst giving power to the Local Authorities to raise the limit by by-law to eighteen. Eighteen startled unimaginative citizens and alarmed greedy employers. Nor are we convinced that *all* teachers will want *all* young persons in the continuation classes up to the full age of eighteen; which, nevertheless, could at any time be converted into the statutory age if experience made for the change. And the head masters of our secondary schools would have been content with protection up to seventeen—which they desired. The seventeenth year of life, they said, is often decisive in the shaping of a boy. Now, how has Section 10 dealt with their wishes? Looking wistfully about for grounds of release from the obligation to attend a continuation school, it exempts (i) those above sixteen who have passed a matriculation or some equivalent examination; (ii) those above sixteen who have been under full-time instruction (in a recognized school or elsewhere) up to the age of sixteen, *whether they have*

profited by it or not; and (iii) for seven years from the unappointed appointed day, all young persons above sixteen, without exception. In short, the case stands thus: Seventeen was the age-limit that would have brought orderliness into our educational system; Section 10 provoked opposition with eighteen, then tricked us practically with sixteen. And it was ill done.

Pressure (through the alternative of the obligatory continuation school) to remain in the secondary school to the age of seventeen would not be pressure to leave it then. Let us turn, however, to another subject. Of all possible fruits of the Great War—capable of bearing good fruit, although it is the vilest as well as the greatest of which history can tell—we should value most a treaty of amity, spiritual and permanent, with the American nation. In the past, petty external differences have been causes of friction; to-day the free exchange of thought-products makes for unity. Instead of banter about "accent," you may hear sweet-toned agreement about law and justice. It is significant of change that the quarterly *Yale Review* is now published in London (Dent, 3s.). The April number begins with an article on "The Converging Democracies." Says the writer: "If the various groups of the English-speaking peoples of the world unite in a common democratic federation, a moral union that goes to the core of things, we shall be able to do great and good things for mankind, including the German people." Schools should essay whatever lies in their power to promote that moral union; education may make bonds of friendship even if diplomacy should fail to do so.

The Rockefeller Foundation has undertaken to co-operate with the National Research Council in the promotion of fundamental research in physics and chemistry. For this purpose it is appropriating 500,000 dollars to maintain Research Fellowships for five years. The National Research Council, which will administer the fund, is a federation of various Government research agencies, private societies, and industrial corporations. It is designed not only to encourage scientific inquiries, but also to obtain national and international co-operation in the conduct of them, and its members are named by the National Academy of Sciences. In furthering such objects the Rockefeller Foundation pursues the intention of the founder—"to promote the wellbeing of mankind throughout the world."

FRANCE.

Should teachers organized as trade unionists make common cause with trade unions in general? It is a question much debated. The teacher is not as other labourers. His products are men, not goods; his legitimate instruments are reason and persuasion, not violence and threats of disturbance. He has moral obligations towards the whole community; his influence in the State should be conciliatory, and not disruptive. In the United States, such men as Dr. Snedden and Prof. Kilpatrick, of Columbia University, are opposed to the too intimate alliance of education with labour. Yet the tendency to co-operation grows. The American Federation of Teachers works with other trade unions, and is represented at Conventions of Labour. In France the Chamber has granted to teachers the *droit syndical*, or right of forming syndicates—a right formerly refused them on the ground that they were civil servants. Civil servants they remain; but things have changed, for the Federation of Civil Servants has resolved to affiliate itself to the *Confédération générale du Travail*, or League of Labour. At its September Congress the *Fédération des Amicales d'Instituteurs* will propose that the *Amicales* should be converted into syndicates. If a syndicate is a body of men determined to manage its own business without regard to the business of others, we deprecate the change.

Definite figures as to the proposed increase of salaries for primary teachers, men and women, have now been published. In France these teachers are grouped as to salary in classes, promotion from class to class being partly by seniority and partly for merit; the *Fédération des Amicales d'Instituteurs* has been urging that it should be solely by seniority. We give the figures for Paris. The first of the two sums in each column is the salary proper; the second, allowance for residence. It will be seen that the principle of equal pay for women has prevailed, except in that women assistants receive a lower *indemnité de résidence*.

HEAD MASTERS.

Class.	Old Salary. francs	New Salary. francs	Increase. francs
1st	2,900 + 2,000	5,000 + 2,000	2,100
2nd	2,900 + 1,700	4,600 + 1,700	1,700
3rd	2,900 + 1,300	4,200 + 1,300	1,300
4th	2,900 + 1,000	3,800 + 1,000	900

ASSISTANT MASTERS.				
1st	2,500 + 1,000	5,000 + 1,000 2,500
2nd	2,300 + 900	4,600 + 900 2,300
3rd	2,100 + 900	4,200 + 900 2,100
4th	1,800 + 900	3,800 + 900 2,000
5th	1,500 + 800	3,400 + 800 1,900
6th	"	3,000 + 800 "
HEAD MISTRESSES.				
1st	2,800 + 2,000	5,000 + 2,000 2,200
2nd	2,800 + 1,600	4,600 + 1,600 1,800
3rd	2,800 + 1,300	4,200 + 1,300 1,400
4th	2,800 + 1,000	3,800 + 1,000 1,000
ASSISTANT MISTRESSES.				
1st	2,400 + 1,000	5,000 + 1,000 2,600
2nd	2,200 + 800	4,600 + 800 2,400
3rd	2,000 + 600	4,200 + 600 2,200
4th	1,700 + 600	3,800 + 600 2,100
5th	1,500 + 500	3,400 + 500 1,900
6th	"	3,000 + 500 "

In the communes outside of Paris the salaries for men and women assistant teachers are to be exactly the same, and they will be, roughly speaking, *doubled*—first class, 5,000 francs (instead of 2,500); second class, 4,600 (2,300); third class, 4,200 (2,100); fourth class, 3,800 (1,800); fifth class, 3,400 (1,500); sixth class, 3,000 francs. Having regard to the purchasing power of the franc, we may deem these payments small. Yet the increases involve a new expenditure of 288,400,800 francs. Deduct temporary war supplements, 132,825,960 francs, and you will find that France is prepared to hand over to its primary teachers a further sum of 155,574,840 francs a year.

NEW ZEALAND.

New Zealand showed gloriously in the War, and the Minister of Education, in his Report for 1917 (dated 1918 and just received), gives credit to teachers for what their pupils did and were. "Of all the

forms of influence possessed by our teachers," he says, "there is none more worthy of praise than their moral influence on the children in our public schools, and of all the results of our system of education, of which we may be proud, there is none which should give us cause for higher gratification than does the moral tone of our schools as compared with that of the schools of any other system in the world. No finer tribute has been paid to New Zealand than the general admiration expressed abroad of the fine personal qualities and good behaviour on and off the field of our soldier lads." We are not disposed to trample needlessly on prostrate Germany, but mankind cannot yet forget that German schools produced the men who destroyed the peasants' fruit trees on the Somme. The New Zealand schools sent into the field warriors of a nobler sort.

The Report deplures a weakness in primary education. Nearly

(i) Primary Education.

half of the pupils in primary schools reach the age of fourteen and end their education without passing the Sixth Standard, whilst a large number do not pass even the Fifth Standard. Further provision will have to be made by means of continuation classes to prolong the education of children up to the age of seventeen—to "bring the age of adolescence out of the purview of economic exploitation and into that of the social conscience." Again, the number (1,384) of teachers having no certified educational status is disproportionately large. On the other hand, an increase in the number of primary schools is reported, as well as an improvement in the attendance. Here is a detail that will be interesting to some of our readers. The Inspector for Wanganui found teachers of infant classes who, in their effort to follow in the footsteps of Dr. Montessori, prepared large stocks of material and manufactured part of the recognized Montessori apparatus. He tells of good results obtained by the method.

(ii) Secondary Education.

Although grip is needed to keep "young persons" longer at school, New Zealand has cause to be proud of the facts that an unusually large proportion of its children are able to continue their education beyond the primary-school stage, and that nearly 90 per cent. of these receive their secondary education free, while a considerable number, again, are provided with free education at the University. Perhaps our colonies did wrong in shaping their first schools on English models. At least in New Zealand the old classical drill now finds no favour. An Inspector writes: "The number of pupils beginning Latin is steadily diminishing, partly on account of the introduction of new compulsory subjects, partly because of the growing conviction, even among those teachers who have taken honours in Latin, that for the average pupils time may be more

profitably spent on some other subject. It is doubtful whether half the pupils of our secondary schools now take up the study of this language." The teaching of French has greatly improved in the last few years, and some very able teachers of it are found in the secondary schools.

Higher education continues to prosper. It is noteworthy that

(iii) Higher Education.

each of the four teaching institutions—the Auckland University College, Victoria University College, Canterbury College, and Otago University (situated in the cities of Auckland, Wellington, Christchurch, and Dunedin respectively)—affiliated to the University of New Zealand emphasizes special subjects. Otago University has medical and dental schools, a school of mining and metallurgical engineering, and a school of domestic science; Canterbury College has a school of engineering (mechanical, electrical, and civil); Auckland University College has a school of mines and a school of commerce; whilst Victoria University College lays stress on law and science.

CAPE OF GOOD HOPE.

The *Education Gazette* (xviii, 19) publishes an outline of the Primary School Course, as revised in 1917.

Forward Movements; Vocal Music.

That course will henceforth be regarded as ending at Standard VI, but it is not to be taken for a complete education: the primary school pupil should be prepared to spend some time in a secondary school or in a day continuation school. The full secondary school course is planned for four years, and passage to it is to be made smooth. Among important Draft Ordinances printed in the *Gazette* (xviii, 21) we signalize one to make provision for free education in primary schools under the control of School Boards, and in Mission Schools. Music and singing continue to be recognized at the Cape of Good Hope as important factors in true education. The Primary School Course referred to above contains an admirable scheme for systematic instruction in vocal music through successive standards. At the Cape Town Eisteddfod in April a great variety of competitions for school children was arranged. Again, prizes are being offered for the three best original school songs. A song may be written either in English or in Dutch (including Afrikaans); it must be South African in sentiment, non-provincial, non-racial, and non-political. Music, the healer and reconciler, is an art appropriately cherished in South Africa.

JAPAN.

With long hours, spent in teaching classes sometimes of sixty or

Helping the Teacher.

seventy pupils, with clerical work to do, with a frequent obligation to give instruction in evening schools, Japanese teachers have brief leisure for self-culture. Mr. T. Kobayashi writes from the Aoyama Normal School, Tokyo, of what is done to elevate them and add to their attainments. For the purposes of administration the Japanese Empire is divided into forty-seven prefectures, exclusive of some territories. The elementary schools are almost all maintained by some city, town, or village. But it is the governor of the prefecture that appoints the teachers; in each prefecture there is a secretary of education; and under this secretary serve prefectural inspectors, who visit regularly the elementary schools and work hand in hand with district or city school-inspectors. Every inspector brings with him not only criticism and censure, but also advice and encouragement. Visits from the directors or instructors of the normal schools (all established and supported by the prefectures) are also helpful influences for the primary teachers. Again, every year summer schools are held at normal schools or district centres; to these teachers repair by order of the authorities, success in the examination at the end of a course assisting a teacher to promotion. And from time to time special training classes are organized, to attend which teachers are exempted from their school duties. Or they may hear addresses by prominent men. Even University lectures are nowadays sometimes open to them, giving them touch with the best thought of the age. It has been deplored in England that partial failure in one examination should condemn a teacher for life to a deadening routine of elementary instruction. Japan allows subsequent industry to atone for first insufficiency. Those who have certificates to teach only in lower elementary schools may attend a three years' course in some normal school at Tokyo, and qualify themselves to teach in any elementary school. They follow the classes after the work of the school-day has been done—strenuous to recover lost ground. Mr. Kobayashi is now teaching ethics to one of these classes, and sees among his hearers the bald and the grey-headed. The teachers of Japan have many societies for mutual improvement, and numerous educational journals. Nor does their interest in education know any local circumscription.

(Continued on page 364.)

MESSRS. LONGMANS AND CO.'S LIST.

LONGMANS' CLASS-BOOKS OF ENGLISH LITERATURE.

A Book of Selections from the Writings of R. L. Stevenson. Collected and Edited with Introduction and Notes by S. G. DUNN, M.A. (Oxon.).	s. d.	Tales of King Arthur and the Round Table. Adapted, with Introduction and Notes, by J. C. ALLEN, from "The Book of Romance," edited by ANDREW LANG. With 20 Illustrations by H. J. FORD.	s. d.
English Letters Selected for Reading in Schools. By H. J. ANDERSON, M.A. A Collection of 76 Letters by 43 Representative Authors.	2 0	The Story of the Glittering Plain. By WILLIAM MORRIS. With Introduction, Life, and Notes.	1 4
A Child's Garden of Verses. By ROBERT LOUIS STEVENSON. With an Introduction by GUY KENDALL, M.A., Head Master, University College School; and a Portrait.	1 9	The Story of Sigurd the Volsung. Written in Verse by WILLIAM MORRIS. With Portions condensed into Prose by WINEFRED TURNER, B.A., and HELEN SCOTT, B.A. With Introduction and Glossary.	2 0
The Coral Island. By R. M. BALLANTYNE. (Abridged.) With Frontispiece, Introduction, and Notes by A. S. TETLEY, M.A.	1 4	The Man Born to be King. From <i>The Earthly Paradise</i> . By WILLIAM MORRIS. With Introduction, Life, and Notes.	1 9
Alice in Wonderland. By LEWIS CARROLL.	1 4	Atalanta's Race and The Proud King. From <i>The Earthly Paradise</i> . By WILLIAM MORRIS. With an Introduction and Notes.	1 6
Selections from Dickens. With Notes by L. B. TILLARD, B.A., and 4 Illustrations.	1 4	The Talisman. By Sir WALTER SCOTT. (Abridged.) With Biography by ANDREW LANG; Introduction and Notes by J. THORNTON, M.A.	1 4
Micah Clarke: A Tale of Monmouth's Rebellion. By Sir A. CONAN DOYLE. Abridged Edition. With 20 Illustrations.	1 8	Ivanhoe. By Sir WALTER SCOTT. (Abridged.) With Biography by ANDREW LANG; Introduction and Notes by T. H. ALLEN.	1 6
The White Company. By Sir A. CONAN DOYLE. Abridged Edition. With 12 Illustrations.	2 0	A Legend of Montrose. By Sir WALTER SCOTT. (Abridged.) With Biography by ANDREW LANG; Introduction and Notes by R. LISHMAN, B.A.	1 4
The Refugees. A Tale of Two Continents. By Sir A. CONAN DOYLE. (Abridged.) With Introduction and Notes by G. A. TWENTYMAN, B.A., and 15 Illustrations.	1 9	Quentin Durward. By Sir WALTER SCOTT. With Biography by ANDREW LANG; Introduction and Notes by JOHN THORNTON, M.A.	1 4
Eric Brighteyes. By Sir RIDER HAGGARD. (Abridged.) With Introduction and Notes by J. MALINS, M.A., and with 31 Illustrations and Initials.	1 9	The Lady of the Lake. By Sir WALTER SCOTT. With Biography by ANDREW LANG; Introduction and Notes by W. HORTON SPRAGGE, M.A.	1 4
Lysbeth. A Tale of the Dutch. By Sir RIDER HAGGARD. (Abridged.) With Introduction and Notes by J. B. D. GODFREY, M.A., and 11 Illustrations.	1 9	The Lay of the Last Minstrel. By Sir WALTER SCOTT. With Biography by ANDREW LANG; Introduction and Notes by F. TICKNER, D.Lit., M.A., B.Sc.	1 4
Hereward the Wake. "Last of the English." By CHARLES KINGSLEY. (Abridged.) With Introduction and Notes by W. H. BARBER, M.A.	1 4	Marmion. By Sir WALTER SCOTT. With Biography by ANDREW LANG; Introduction and Notes by GUY KENDALL, M.A.	1 6
The Heroes; or, Greek Fairy Tales for my Children. By CHARLES KINGSLEY. With Introduction and Notes by WALTER R. PRIDEAUX, M.A. 6 Illustrations and 2 Maps.	1 4	Macaulay's Lays of Ancient Rome; with Ivory and the Armada. With Biography by D. SALMON; Introduction and Notes by J. W. BARTRAM, M.A.	1 4
Settlers in Canada. By Captain MARRYAT. (Abridged.) With Introduction and Notes by G. M. HANDLEY, B.A.	1 4	Macaulay's History of England. Chapter I. With Biography and Notes by D. SALMON.	1 6
Macaulay's History of England. Selections. With Introduction and Notes by J. W. BARTRAM, M.A.	1 4	Macaulay's History of England. Chapter III. With Biography and Notes by D. SALMON.	1 6
Literary Selections from Cardinal Newman. With Introduction and Notes by a SISTER OF NOTRE DAME.	1 9	Milton's Paradise Lost. Book I, II, III, IV, V. Each with Biography of John Milton by D. SALMON; Argument and Notes by W. ELLIOTT, M.A.	0 8
A Selection of Poetry for Schools. Edited by JOHN THORNTON, M.A.	1 4	Milton's Comus, Il Penseroso, L'Allegro, and Lycidas. With Biography of Milton by D. SALMON; Introduction and Notes by W. ELLIOTT, M.A.	0 10
The King of the Golden River. By JOHN RUSKIN.	0 8	Tanglewood Tales. By NATHANIEL HAWTHORNE. With Introduction and Notes by GUY KENDALL, M.A.	1 4
Tom Brown's School Days. By T. HUGHES. (Abridged.) With Frontispiece, and Introduction and Notes by A. J. ARNOLD, B.A.	1 4	A Wonder Book. By NATHANIEL HAWTHORNE. With Introduction and Notes by ADA PERRY.	1 4
Selections from Thackeray. With Introduction and Notes by JOHN THORNTON, M.A.	1 4	A Christmas Carol. By CHARLES DICKENS. With Introduction and Notes by E. GORDON BROWNE, M.A.	1 4
Little Women. By L. M. ALCOTT. With Introduction and Notes by J. F. McWILLIAM, The Belvedere School, Liverpool.	1 4	Robinson Crusoe. By DANIEL DEFOE. (Abridged.) With Introduction and Notes by T. W. SILVERDALE, and Illustrations by LANCELOT SPEED and H. J. FORD.	1 4
Tales of the Greek Seas. By ANDREW LANG. With 7 Illustrations by H. J. FORD.	1 4	Gods and Heroes of the North. By ALICE ZIMMERN, Girton College, Cambridge. With Notes and 12 Illustrations.	1 4
Tales of Troy. By ANDREW LANG. With 7 Illustrations by H. J. FORD, and a Map.	1 4		
Froude's Short Stories on Great Subjects. Selections with Introduction and Notes, by J. THORNTON, M.A. With 7 Illustrations.	1 4		
Selections from the Writings of Richard Jefferies. With Introduction and Notes by F. TICKNER, D.Lit., M.A., B.Sc.	1 4		

History of English Literature from Beowulf to Swinburne. By ANDREW LANG, M.A. Crown 8vo. Complete in one volume. 6 6

Also in 5 separate parts:—

Part I.—Early and Mediaeval Literature.	1 4
Part II.—Chaucer to Shakespeare.	1 4
Part III.—Elizabethan and Jacobean Literature.	1 4
Part IV.—Eighteenth Century Literature.	1 4
Part V.—Nineteenth Century Literature.	1 6

A COMPLETE LIST OF ALL MESSRS. LONGMANS, GREEN AND CO.'S BOOKS ON ENGLISH LANGUAGE AND LITERATURE WILL BE SENT POST FREE ON APPLICATION.

LONGMANS, GREEN AND CO., 39 Paternoster Row, London, E.C.4.

MESSRS. LONGMANS AND CO.'S LIST.

- Modern Inorganic Chemistry.** By J. W. MELLOR, D.Sc. With 334 Illus. 8vo. Thoroughly Revised. **12 6** s. d.
- The book has been written from the modern standpoint, and, in consequence, the more recently established principles of physical chemistry have been woven with the facts generally taught in chemistry classes in Universities, Technical Institutes, and other Schools.
- Introduction to Modern Inorganic Chemistry.** By J. W. MELLOR, D.Sc. With 232 Illustrations. Crown 8vo. Thoroughly Revised. **7 6**
- This book can be regarded as an abridgement of the author's "Modern Inorganic Chemistry," in a simpler dress, and it has been adapted to suit beginners in chemistry.
- Higher Mathematics for Students of Chemistry and Physics.** With Special Reference to Practical Work. By J. W. MELLOR, D.Sc. With Diagrams. 8vo. **16 6 NET**
- A Text-book of Inorganic Chemistry.** By G. S. NEWTH, F.I.C., F.C.S. With 155 Illustrations. Crown 8vo. **7 6**
- Manual of Chemical Analysis, Qualitative and Quantitative.** By G. S. NEWTH, F.I.C., F.C.S. With 102 Illustrations. Crown 8vo. **8 6**
- Qualitative Chemical Analysis, Organic and Inorganic.** By F. MOLLWO PERKIN, Ph.D. With 16 Illustrations and Spectrum Plate. 8vo. **7 6**
- Intermediate Physics.** By W. WATSON, A.R.C.S., D.Sc. (Lond.), F.R.S., late Professor of Physics at the Royal College of Science, London. With Diagrams. 8vo. **15 0 NET**
- Elementary Practical Physics: a Laboratory Manual for Use in Organized Science Schools.** By W. WATSON, A.R.C.S., D.Sc. (Lond.), F.R.S. With 120 Illustrations and 193 Exercises. Crown 8vo. **3 6**
- A Text-book of Physics.** With 568 Diagrams and Illustrations, and a Collection of Examples and Questions with Answers. By W. WATSON, A.R.C.S., D.Sc. (Lond.), F.R.S. Large crown 8vo. **15 0**
- A Text-book of Practical Physics. A Book of Reference for the Student working in a Physical Laboratory.** By W. WATSON, A.R.C.S., D.Sc. (Lond.), F.R.S. With 278 Illustrations. Crown 8vo. **10 6**
- Electricity and Magnetism. For Advanced Students.** By SYDNEY G. STARLING, B.Sc., A.R.C.Sc., Head of the Physical Department in the West Ham Municipal Technical Institute. With Diagrams. Crown 8vo. **9 0 NET**
- A Treatise on Light.** By R. A. HOUSTOUN, M.A., Ph.D., D.Sc. With 328 Diagrams. **8 6 NET**
- An Introduction to Practical Mathematics.** By F. M. SAXELBY, M.Sc., B.A., Head of the Mathematical Department, Battersea Polytechnic. Crown 8vo. **3 6**
- A Course in Practical Mathematics.** By F. M. SAXELBY, M.Sc., B.A. With 200 Figures, Examination Questions, and Answers to the Examples. 8vo. **7 6**
- Practical Arithmetic and Mensuration.** By F. M. SAXELBY, M.Sc., B.A., and C. H. SAXELBY, M.Sc., Mathematical Master, Rivington and Blackrod Grammar School. With or without Answers. Crown 8vo. **2 6**

A FULL LIST OF ALL MESSRS. LONGMANS' BOOKS ON HISTORY, GEOGRAPHY, LATIN, AND FRENCH WILL BE SENT POST FREE ON APPLICATION.

LONGMANS, GREEN AND CO., 39 Paternoster Row, London, E.C.4.

They go from prefecture to prefecture studying the schools; and recently teachers from the two largest cities in the Empire, Tokyo and Osaka, were sent to the United States of America, that they might get knowledge and inspiration from the outside world. Japan has long abandoned the principle of cultural isolation.

They are beginning to study French in Japan. The Athénée français, founded at Tokyo in 1912 by M. Cotte, *professeur agrégé* of a French university, has four obligatory classes and two optional classes (for Latin and Greek). All the instruction is given in French. The number of pupils, aged from twenty to thirty, and comprising bank officials, lawyers, doctors, and officers, rose from 26 in 1912-13 to 430 in July, 1918 (*Information d'Extrême-Orient*). Monks and nuns, harassed in France, have established places of education in Japan—the Marianistes a *collège*, the Dames du Sacré-Cœur a *pensionnat*. These schools are flourishing, for, although there are very few Japanese Catholics, other parents are willing that their children should seek knowledge in them (*Bulletin de la Société générale d'Éducation*, L. i). Sixty years ago foreigners were forcing their way into Japan for trade; to-day they are welcomed for their imponderable goods.

PRIMARY SCHOOL NOTES.

The Coming of Provincial Councils.

SINCE the passage of the new Education Act the tendency for Local Education Authorities to combine upon matters of common interest has become more and more pronounced. The necessity of deciding upon guiding principles in drawing up scales of salaries, for example, has compelled action of this kind, inasmuch as the introduction of scales which were in advance of those in force in neighbouring areas at once encouraged the movement of teachers from such areas. As a result, it was found, in effect, that certain Authorities were training teachers for service under other Authorities. The introduction of the terms of the Teachers Superannuation Act has intensified the need for common action in this particular branch of administration, and there are indications throughout the country that Education Authorities are moving steadily in the

direction of taking joint action in fixing scales of salaries for teachers. The provision of secondary and continuative education is another field which lies open to combined action, and steps have already been taken to formulate principles of procedure in several districts. The West Riding of Yorkshire and the county of Lancashire are exceptionally well situated for the formation of a combination of bodies for the administration of Primary, Continuative, Secondary, and University education in their respective areas, and in the latter case matters have already made considerable progress.

The Supply of Teachers.

NOTWITHSTANDING all that has been said and done in order to improve the national system of education, progress threatens to be blocked in every direction owing to the inadequate supply of teachers. The building difficulty promises to disappear with time, since there are many old schools and army structures of a temporary type which can be adapted to school needs until permanent institutions can be set up. The staffing of the new schools threatens to become the more difficult, not only on account of the unwillingness of recruits to come forward, but because of the continued dissatisfaction of teachers with their conditions of remuneration. Strikes are becoming increasingly common among teachers; twelve months ago the average teacher regarded such a course of action with strong disfavour. To-day the conviction is growing among teachers that this policy is the only one that has any effect upon the non-progressive Education Authorities. Among men teachers the feeling is exceedingly bitter; they are unable in many cases to pay their way, and are considerably worse off than in pre-war days. It is perfectly useless, therefore, to expect such teachers to assist in bringing up recruits to the profession; and the position is bound to be complicated, so far as boys are concerned, by the introduction of the equal payment principle for men and women teachers. The men are convinced, for the greater part, that equal pay means a levelling down of salaries. The more progressive authorities are alive to the danger, and are pressing for the adoption of national scales of salary. In the meantime they are considerably improving their own scales. There is general agreement that the national policy is the one which will have to be adopted, and, as this is essential to ensure a satisfied teacherhood and a steady and sufficient

(Continued on page 366.)

PHILIPS' "HUMAN" GEOGRAPHIES

By JAMES FAIRGRIEVE, M.A.
and ERNEST YOUNG, B.Sc.

This series is just what its name denotes—*human*. Everywhere the human note is predominant and the relation of man to his environment insisted upon. The books are not merely human in the sense that they treat of Geography from the human point of view, but also because the kinds of human beings who live in different environments are fully described. Progressive both in difficulty of language and of ideals.

supply of young teachers, it is a matter of growing surprise that there should be so much delay.

The New Substantive Grant.

For the year beginning April 1, 1919, the Board of Education will consolidate their various grants in respect of elementary education. The grant will be based upon the average attendance of a school for the year, 36s. being paid in respect of each unit of average attendance. In addition, the Board will pay three-fifths of the Authority's expenditure on the salaries of teachers in its schools, one-half of the net expenditure on special services, and one fifth of the remaining net expenditure on elementary education, less the product of a sevenpenny rate upon the assessable value of the area. The minimum grant shall in no case be less than one-half of the net expenditure. All grants due up to March 31, 1919, will be paid over to the Authorities, in order that the year beginning April 1, 1919, may become the uniform financial year. Provision is made for increased grants in highly rated areas, and the total grant, when calculated, is to be paid monthly in moieties of one-twelfth of the ascertained sum. This condition will enable Local Education Authorities to summarize their resources with considerable accuracy; and, as they will have a substantial balance in hand on account of the grant paid for the month of March, the result should be a general stabilization of the Education rate. Incidentally, every Education Authority will now be able to make substantial advances in salary scales.

Equal Pay for Men and Women.

THE decision of the National Union of Teachers in favour of a common scale for men and women teachers cannot fail to have an important influence upon the future of the profession. On the one hand, a movement has already been organized by the men to safeguard their position; on the other, the women's movement has reached the point when their case will have to be proved to the satisfaction of Education Committees and Local Authorities. It is clear, therefore, that women will have to take a much more responsible share in the official work of Teachers' Associations; and in due course the chastening effects of leadership which such responsibility always brings may be expected to prepare the way for a complete and harmonious settlement of the whole problem.

In the meantime, discussion of the bearings of the question cannot fail to develop a keener professional outlook upon other aspects of policy in education.

N.U.T. Notes.

THE Constitution of the Standing Committees in the new Executive has now been completed. More concentration upon important phases of Union work will be possible under the re-arrangement of committees, and it is notable that the plan of electing members possessing special qualifications from the general body of teachers external to the Executive has been further extended. The necessary steps are being taken by the Executive to give evidence before the Royal Commission on Income Tax. The formulation of a new scale of salaries entrusted by the Cheltenham Conference to the Executive is expected at an early date.

A TRAINING SCHOOL FOR MUSIC TEACHERS.—This School has been founded because of the many inquiries received from heads of schools and others for teachers qualified to teach aural culture, musical appreciation, and allied subjects. The value of class teaching in music to supplement the weekly instrumental lesson, is now generally acknowledged, but the supply of teachers capable of training such classes falls far short of the demand. One has only to glance at the prospectus of this training school to see that the future music-class teacher must broaden his outlook and equip himself so that his classwork will stimulate his pupils to devote themselves more intelligently to their respective studies. The training of good listeners is of greater importance than the training of bad instrumental players, and the teacher who aspires to influence the rising generation and help to a real knowledge of music should derive real benefit from a course of instruction which includes aural culture (including sight-singing), pianoforte teaching (technical and interpretative), musical appreciation (including the study of style, period, structure, and musical æsthetics generally), the art of voice training, and the problem of the music class. Students taking the course are free to carry on their own studies elsewhere, and a certificate will be awarded to all who complete the full course to the satisfaction of the professors and the Advisory Council. The classes are held at 19 Berners Street, W.1, where a prospectus may be obtained on application to the Secretary.

For the convenience of those requiring the book for certain examinations it is also issued—

In Three Sections, 3s. 6d. each net:—Section I, 55 B.C.—A.D. 1485; Section II, 1485–1714; Section III, 1714–1911.

A NEW GRAMMAR BOOK.

By **AGNES CATNACH, B.A.** (Lond.), Assistant Mistress at King Edward's Girls' High School, Birmingham. 2s. 6d. net.

This book seeks to connect more closely the formal study of language with adequate expression of thought, and to attain this end all the work is based on the study of the sentence. It is hoped that to children studying on these lines English Grammar will be a subject of living interest, and that the various facts of grammar will gain that logical connection which they so often seem to lack.

The matter has been set forth as simply as possible, and in a manner to retain the interest of the pupil.

SOME PRACTICAL HINTS FOR THE YOUTHFUL HISTORIAN.

A Graduated Course for Class Study. Arranged by **FRANK JONES, B.A.**, Senior English Master, King Edward's School, Aston, Birmingham.

In Three Books. Book II, now ready. 2s. net. Books I and III, in preparation.

The chief feature of this series is the teaching apparatus provided at the end of each poem. The objects kept in view in drawing up these aids have been to save the teachers' time, and to provide the pupils with an instrument by which they might test the thoroughness or otherwise of their understanding of the poem studied. Each teacher will no doubt supplement them as necessity arises; and to the pupils who have studied a poem in order to answer the questions asked, the aids will suggest other points for further consideration with the help of the teacher.

A BOOK OF ENGLISH HISTORY FOR CHILDREN. Part I.

By **LILIAS MILROY**, Head Mistress of the Leamington High School for Girls, and **ELIZABETH M. BROWNE**, Formerly Assistant Mistress in the Truro High School for Girls. 2s. 6d. net.

This history book seeks to steer a course between those mere "outlines," which are bound to be lacking in interest for young children, and the books of stories from history, often delightful to the readers, but apt to be rather too bulky for use as textbooks. The aim of the authors has been to select carefully the more important movements and the more picturesque incidents of history, and in connection with these to give those ample details which children love, and at the same time to preserve a clear chronological sequence.

A RAPID SURVEY OF ENGLISH LITERATURE.

By **E. H. BLAKENEY, M.A.**, Winchester College. 2s. net.

"A wonderfully comprehensive selection of brief characteristic extracts, with notes of the times and peculiarities of the writers, and will be found a very interesting book."—*Guardian*.

ENGLISH PROSE EXTRACTS FOR REPETITION.

Selected and edited by **E. H. BLAKENEY, M.A.** 9d. net.

"Mr. Blakeney has done very useful work in producing this little book of prose extracts, fine examples of prose for the use of schools. Extracts from writers such as Gibbon, Scott, Matthew Arnold, Shorthouse, Pater, George Meredith, Ruskin, and some quite recent writers are brought together."—*Times*.

A NEW SERIES OF FRENCH HISTORICAL READINGS FROM ORIGINAL SOURCES.

ÉPISODES MÉMORABLES DE L'HISTOIRE DE FRANCE.

General Editor: **LOUIS A BARBÉ, B.A.**, Officier d'Académie.

PRISE DE LA BASTILLE, from Michelet's *Histoire de France*.

LA ROUTE DE VARENNES,

LES FRANÇAIS A LA 1^{re} CROISADE,

STRONGLY BOUND IN LIMP CLOTH. PRICE 9d. EACH.

BLACKIE'S LONGER FRENCH TEXTS.

From Modern French Literature. Printed in large, clear type, with brief Notes, Exercises, Phrase List, and Vocabulary. Fcap. 8vo, 9d. each.

COURS DE FRANÇAIS, d'après les Textes.

By **M. ANCEAU** and **E. MAGÉE**, Edgbaston High School for Girls, Birmingham. Cloth boards, 2s. net.

A SKELETON FRENCH GRAMMAR.

By Professor **ATKINS, M.A.**, King's College, London. The "irreducible minimum" printed in red and black. 1s. 6d. net. With Exercises, 2s. net. Exercises only, 1s.

A JUNIOR FRENCH COURSE (First Year).

By **E. J. A. GROVES, Lic. ès L.** (Senior French Master, Bradford Grammar School). Fully Illustrated. Cloth extra. 2s. 6d. net.

BLACKIE'S LITTLE FRENCH CLASSICS.

Representing all important French Authors from Montaigne to Bourget. Fcap. 8vo. 6d. each.

LE LIVRE ROUGE.

A First Book of French in Coloured Pictures. By **E. MAGÉE**, Edgbaston High School for Girls, Birmingham. With many full-page Coloured Pictures and other Illustrations. Fcap. 4to. 2s.

LE LIVRE BLEU.

A Second Book of French in Coloured Pictures. By **E. MAGÉE**. With sixteen full-page Coloured Pictures and many other Illustrations. 2s. 3d.

RECENT IMPORTANT BOOKS FOR THE STUDY OF ITALIAN.

By **ERNESTO GRILLO, M.A., LL.D., D.C.L.**, Professor of Italian Language and Literature in the University of Glasgow.

A NEW ITALIAN GRAMMAR.

For the use of Schools, Commercial Colleges, and Universities. 8vo, cloth, 6s. net.

A systematic course of instruction in grammar and in the elementary principles of composition.

SELECTIONS FROM THE ITALIAN PROSE WRITERS. With Critical Introduction. 7s. 6d. net.

SELECTIONS FROM THE ITALIAN POETS. With Critical Introduction. 7s. 6d. net.

Prospectuses post free on application.

ADVANCED COURSES IN MODERN STUDIES.

By DR. FRANK A. HEDGCOCK.

ADVANCED courses in Modern Studies are more difficult to plan than those in the longer established branches of classics, or science and mathematics. For this comparatively new group there are as yet no generally accepted lines of development, and, while considerable variety in details is possible, and even desirable, it is also necessary that the different subjects included should be correlated with one another and should form a homogeneous whole.

The course, though it has, in common with the classics course, the great disadvantage of not fitting in with University degree studies, can easily be made to include pupils, besides those following it for its intrinsic interest, who are preparing for history scholarships and for the too rare scholarships in modern languages; and that all the more easily if the foundation of the course is, as it should be, historical. Whatever æsthetical or moral value the study of a language and literature may have, it cannot have a broad educational value unless it is considered as an inquiry into the evolution of a society, forming part of Western civilization and influenced by the exchanges of thought and commerce between European nations. Whatever discourages insularity is good. The true value of a course of Modern Studies lies in its giving the student a conception of the nations of the modern world, their history, thought, and political relations. If such knowledge were more widely spread, the noble idea of a League of Nations would be more easily realizable than it is at present.

The subjects that must be included in the course are:

- (1) a modern language of Western Europe, with its literature;
- (2) the history relevant to that language, with the history of Great Britain and the United States;
- (3) the study, carried to a less advanced stage, of a second language, or that of

English literature. In most schools the main language chosen will be French. For the second language, many will, no doubt, choose German, carried to the point of ability to read and understand historical and literary texts. Farther it will not be safe to go, for, as we shall see later, the course is heavily charged with work, and the fault, too prevalent in English teaching and absolutely opposed to all true education, of taking up too many subjects and doing none of them thoroughly, should be avoided.

While I sympathize with the desire to secure the foundations of two such useful languages as French and German at school, I believe there is more "advanced" educational profit to be got from a combination of history, French, and English. If the history, civilization, and literature of a foreign country are to be studied with advantage, that can be done only by continually bringing them back for comparison with the history, civilization, and literature of one's own land. To balance a competent knowledge of French literature by a fairly complete ignorance of English literature is to provide a curiously lop-sided education. As English can be included only by excluding German (or Spanish or Italian), it seems best to exclude the latter from the course. Probably in the larger schools more than one choice can be given in this third division of the course.

The general principle that should guide teachers in handling the advanced course is that, while there must necessarily be direction of the studies, with set lectures, correction of work, and individual help by the teachers, the work must, on the whole, be done by the pupils. The masters will not have time always to be teaching; they must train the pupils to collect and assimilate knowledge for themselves. All the work must be active—that is, "effortful." It may be summarized under four heads: (1) direction and suggestion by the teacher, (2) preparation and mental digestion by the pupils, in view of (3) reproduction and personal interpretation, as shown below; followed by (4) discussion in class and criticism by the teacher.

As three-quarters of the school time may be devoted to the group studies, about twenty-six periods may be reckoned, out of an average week of thirty-four, as at our disposal. About ten should be given to History, eleven to French, five to English. French would include—(a) Study of literature; (b) reproduction in oral form (*lecture expliquée*,* discussion, lessons by pupils) or written (essays, *thèmes*, *versions*). But the week should not be shared equally between these two divisions, since plenty of time must often be given to (a) before (b) can be done; moreover, it would overtax both teacher and pupils to ask for a great deal of written work each week. It is better, then, to take a fortnight as the unit; in the first week of this to give, say, seven periods to (a) and four to (b), and in the second to reverse this arrangement. This division of time will need to be modified for candidates for history scholarships; the time given to history will be increased at the expense, probably, of the practical work in French.

The History may be political, constitutional, social, or economic. The object of the course being to give a general knowledge of Modern Europe, it must evidently deal mainly with the political and social aspects. It should be studied, in considerable measure, from French writers: first, for the practice in reading and making notes and summaries from the French text; second, because in such books England enters only as a member of the European family, and so all inclination to exaggerate the importance of purely local matters is avoided.† This arrangement would involve part of the history teaching being taken by the French master, who should certainly be able to

do it; or would call for ability on the part of the History teacher to use a French text; and would, in any case, mean supervision of notes taken in French and correction of French historical essays by the language master.

Each student should have, then, the English textbook or books recommended by his history master; and as a French textbook one of the several excellent series used in French lycées, e.g., those by Malet (Hachette), Jalliffier et Vast (Garnier), or Seignobos (Colin); the two little "Aide-Mémoire," and the "Petite Histoire Contemporaine," by J. Isaac (Hachette) are also very useful. If possible, some volumes of the "Histoire Générale," edited by Lavis and Rambaud, should be in the class reference library beside those of our own Cambridge Modern History; and there, too, should be Rambaud's excellent "Civilisation française" and "Civilisation contemporaine" (Colin).

In French literature also the pupils will require a textbook as guide. This should not be too full and complicated, as are the university manuals of Lanson and Brunetière; nor should it sink to the level of a dull list without reference to the works mentioned. Canat's "Littérature française par les textes" (Delaplane) should meet the case; its constant quotation of the texts explained inculcates the true method of literary criticism, and develops a scientific desire for the truth. But perhaps the best book, if one only is used, will be the "Histoire illustrée de la littérature française," by Abry, Audic, and Crouzet (Didier); its reproductions of contemporary documents and engravings are interesting; it is not too deep, and its critical points are set out with exemplary clearness. Faguet's "Siècles" and other *Essais* should be in the reference library.

Besides a literary history, the student will also require a book of "Morceaux Choisis," not to read entirely, but from which to get connecting ideas of those authors with whose work he has not time to get into closer touch. There is no need to discuss here the views of those superior persons who despise "Morceaux Choisis," and refer to them as "snippets" or "samples." It is certain that to get a first Pisgah-sight of a new land of literature such anthologies are necessary. Of the many collections of "Morceaux Choisis," I much prefer for class use that old French favourite, "Marcou" (Vers, Prose—Garnier). This brings together all the representative pieces that every one ought to know, and others. Moreover, the literary notices are good and to the point.

The editions of French authors used should certainly be entirely in French. It is absurd for pupils who are supposed to be learning to handle the foreign idiom easily, to read their "Introduction and Notes" on a French author in English! I trust that this principle will soon be recognized by English publishing houses, so that we may have editions of foreign authors prepared for the needs of our higher forms in schools and our University classes, and entirely in French. These editions should not be overburdened with explanatory matter. Neither glimpses into the obvious nor learned research into the unnecessary are required. The text, the thought, and the style are the core of the matter. A French series of books that seems admirably adapted for our purpose is that of "La littérature française illustrée" (Didier), which contains many separate pieces of the classical period and many representative volumes of long extracts from later writers.

The linguistic side of our studies can be provided for in the grammatical examination of portions of the texts chosen, and in the oral and written discussions and dissertations on them, with occasional lectures by the teacher on the development of the language. This should not be allowed to narrow into grammatical or philological specialization. Incidentally, of course, the qualities of order and clearness which are characteristic of the French language and literature must be used to develop corresponding qualities in our pupils' minds, so that they may learn to *concevoir bien* and *exprimer clairement*, in the hope of some day being able to apply to themselves the proud saying of Newman: "Every thought I think is thought and every line I write is writing."

The English texts to be studied should be chosen not only

* Useful help and training in this, both for teacher and taught, is provided in Rouston's "Précis d'explication française" (Delaplane), Robert's "Cours de Lecture expliquée" (Colin), and in S. A. Richard's excellent manual (Cambridge Univ. Press).

† I will add, for the sake of those unacquainted with the French school histories I recommend, that they are Histories of Europe; France holds an important place in them, but does not monopolize the stage.

for their own merits, but also on account of their relations with the historical and language work. A Modern Studies course should be homogeneous. Above all, chronological heterogeneity should be avoided. But a closer connexion than that of mere date should be sought. Writings which exerted influence, movements which spread from one country to another, travellers who represented their nation abroad or brought home a knowledge of foreign lands—these should come within the purview of an advanced course. The fascinating story of the relations between those old enemies and admirers, France and England, should be touched on. It is from the point of view of such relations and influences that the appended English course is sketched out; it is, above all, suggestive, and English specialists will probably see omissions to be repaired or substitutions to be made.

For purely linguistic reasons, some French teachers prefer to take the nineteenth century in the first year's programme, the seventeenth and eighteenth later. While I appreciate their reasons, I do not think them valid; and especially in the course as a history of the development of modern Western Europe, chronological order must prevail. In the first year the period 1600–1789 is dealt with; in the second year the nineteenth century. The principal topics to be studied are set out in A (history), and B (French literature); and in C (English literature), some works to be read in correspondence with A and B are suggested. The work for each year is divided into three portions, corresponding roughly to the three terms. It will probably be impossible to read all the books mentioned, but a choice can be made of the most essential and most easily procurable.

Programme (First Year).

A (1).—Summary of the Middle Ages: Formation of the European States existing 1500 A.D. Review of Civilization leading up to the Renaissance. History of Religion, leading up to the Reformation. Attempt of Charles V and Philip II to dominate Western Europe. Absolute Monarchy in France—Richelieu, Mazarin. The Thirty Years' War. Ferdinand III's dream of Pangermanism. Rise of Holland. Attempted Establishment of Absolutism in England: the Stuarts to 1688.

B (1).—Selected "Essais" of Montaigne. The Pléiade, selected poems. School of Malherbe and writers before Corneille from Marcou. Corneille: "Le Menteur," "Le Cid," "Polyeucte."

C (1).—The teacher to use Lee's "French Renaissance in England." Sidney and Spenser. Bacon's "Essays" (influence of Florio's Montaigne). The Early Theatre in both countries: Marlowe and Shakespeare. Influence of Amyot's Plutarch.

A (2).—Le roi soleil—attempted predominance of France down to 1713. Civilization in Western Europe in Seventeenth Century. Eastern Europe: Struggle between Turkey and Austria, Poland and Sweden. Beginnings of Russia and of the Hohenzollerns.

B (2).—Le Grand Siècle. Molière: "L'Avare," "Le Misanthrope." Racine: "Britannicus," "Esther." La Fontaine: "Fables." Portions of Boileau, Bossuet, Sévigné, La Bruyère, Saint-Simon.

C (2).—The teacher to use Charlanne: "L'influence française en Angleterre." Dryden: "Essay on Dramatic Poesy," "All for Love." Pope (cf. Boileau): "Essay on Criticism." Addison: Selected papers from *Tatler* and *Spectator*. Defoe and Swift: Political Pamphlets.

A (3).—Europe from 1715 to 1740. War of the Austrian Succession. Seven Years' War. Rise of British Colonial Power, of United States, of Prussia, of Russia. Eastern Politics: Decay of Turkey and Sweden, Partition of Poland. Civilization in the Eighteenth Century.

B (3).—Decay of Classical Literature. Lesage: "Gil Blas," extracts. Philosophic movement and preparation of the Revolution—Montesquieu: "Grandeur et Décadence des Romains" (cf. Gibbon) or "Les Lettres persanes." Voltaire: "Les Lettres philosophiques," Correspondance (in Lanson's "Lettres du XVIII^e Siècle"), or "Extraits" (Hachette). Rousseau: "Discours sur les Lettres," "l'Inégalité," or "Extraits" (Hachette, Didier).

C (3).—Teacher to use Jusserand's "Shakespeare en France," Texte's "Rousseau et le Cosmopolitisme littéraire," and Babeau's "Les Voyageurs en France." Interchange between France and England (Muralt's "Lettres sur les Anglais et les Français," Abbé Leblanc's "Lettres"); some account of Garrick, Sterne,

Smollett, Goldsmith, Young. Read Chesterfield's "Letters," parts of Walpole's "Letters," Sterne's "Sentimental Journey," Adam Smith's "Wealth of Nations," Sainte-Beuve's *Essays on Madame du Deffand*.

Programme (Second Year).

A (1).—French Revolution. Attempted Predominance of France. Congress of Vienna, Holy Alliance. Reconstruction and Reaction. Growth of Liberal Ideas: Catholic Emancipation, Electoral Reform, Free Trade in England. 1848 in Europe.

B (1).—Chateaubriand: "Mémoires d'Outre-tombe" (parts). Lamartine: "Histoire des Girondins"; or Mignet: "Histoire de la Révolution."

Le Romantisme. Stendhal: "Racine et Shakespeare." Lamartine: Early Poems. Hugo: "Hernani" or "Ruy Blas."

C (1).—Burke's "Reflexions." Wordsworth and Coleridge—Influence of the Revolution, Sonnets against the Revolution.

Byron and Scott. Teacher to use Estève: "Byron et le Romantisme français"; Maigron: "Le roman historique à l'époque romantique."

A (2).—Second Empire in France. Italian Unity, German Unity. Eastern Question: Rise of Balkan States, Partition of Turkey. Crimean War. Colonization of Africa.

B (2).—*Romantisme et Réalisme*. Vigny: Poems and "Cinq Mars." de Musset: Selected Poems. Balzac: "Le Père Goriot," "Eugénie Grandet." Hugo: Selected Poems. Flaubert: "Un Cœur Simple." Augier: "Le Gendre de M. Poirier"; or Dumas fils: "La Question d'Argent."

C (2).—Tennyson and Browning, cf. French Romantics. Carlyle: "The French Revolution."

A (3).—Expansion of the British Empire. The United States in the Nineteenth Century. Latin America. The Great Liberal Powers and the great Empires. Attempted German Predominance. Science in the Nineteenth Century. Civilization of the Nineteenth Century.

B (3).—Realism, Naturalism, Symbolism. Mérimée: "Nouvelles." Daudet: "Jack." Maupassant: Selected "Nouvelles." Zola: "L'Attaque du Moulin" or "Pages choisies" (Colin). Leconte de Lisle. Symbolists from an Anthology; see Eccles, "Century of French Verse" (Constable), with excellent Introduction.

C (3).—The English Novel, cf. French Novel. Teacher to use Cazamian's "Le roman social en Angleterre." Read a novel by Jane Austen (a realist before her time), Dickens, Thackeray, G. Eliot, C. Brontë, Mrs. Gaskell, T. Hardy. Taine: "Notes sur l'Angleterre," or "La littérature anglaise" ("Pages choisies," Harrap). Schérer: "Etudes anglaises et françaises."

For a course like the above a number of books will be needed. It may be necessary in the poorer schools for these to remain school property and to be lent to the pupil at a yearly charge; it would, of course, be better for the pupil to keep them as cherished possessions and the nucleus of an interesting library. The class will also need a small, well chosen collection of reference books. It is time that literature had a larger share in the school budget, on which science has for some time made the greatest claims. If chemical and physical laboratories are necessary although expensive, literary laboratories are no less so.

There can be no doubt that a course on the lines set out would provide a rich education. No mind can hope to embrace the whole circle of knowledge. We must be content with one, or a part of one, of the great divisions: Nature, in its various manifestations, as explained by science and mathematics; the history of the human race in the past, to which the classical languages and ancient history furnish the best key; the study of human activities in our own times, by means of modern history and the principal modern languages. It is the claim of Modern Studies that they can provide a training and a culture equal to that of the other branches; and it is towards that ideal that those who direct them must ever tend.

THE TONIC SOL-FA COLLEGE has issued more than one million certificates and diplomas since its foundation in 1863. This fact was reported to the members of the College at their annual meeting, when Sir Walter Parratt was re-elected president.

TOPICAL SUBJECTS IN THE COMPOSITION LESSON.

By AMY CRUSE.

"GREAT events from little causes spring"; and small things often have their origin in mighty happenings. There is probably no department of national activity, however remote, which the War has not touched. And, now that the great issues are more or less clear before us, we are turning to everyday matters which are our own individual concern, and noting how even here the great force has been at work producing new conditions that must henceforward be reckoned with if the new world—our small piece of it—is to be better than the old.

One of these lesser matters is involved in the larger question, How far has the War affected our national speech? During the past four years we have read the newspapers more diligently than we have ever done before. We have devoured the accounts of special correspondents at the Front; we have thrilled at the pregnant, dignified, restrained phrases in the reports of the great commanders; we have uttered our proud thanksgiving over the brief, almost curt, paragraphs in the *Gazette*, which have told us how heroes do their day's work. We have laughed and cried in a breath at the astounding letters which have been sent from the high seas and from the trenches, and have learnt to recognize in these a distinct style which has made us impatient of the attempts of journalists and bookmakers to imitate and exploit them.

Nevertheless, "war books," containing a mixture of fact and fiction, in varying proportions, have formed a large part of our reading. Words and phrases, borrowed from the vocabulary of the soldier and the sailor, have been assimilated with an astonishing ease and completeness. We have talked about the War constantly; we have heard other people talking about it. It seems only reasonable to expect that all these influences which for four years have been brought to bear upon our language will have had an appreciable result. Has the effect been for good or for evil? Are we as a nation more articulate, able to say what we mean more simply and beautifully? Or has our speech sunk nearer to the slipshod vulgarity of the lower type of newspaper?

It is probably too soon for this question to be answered with any degree of certainty, just as it is too soon to decide whether the War will be followed by a great literary awakening, such as will make our age glorious. But this much, it seems to me, may be said with safety: Our speech *has* been affected, it has become in many respects more malleable, more adaptable, than it was before the War. Children, as well as grown-up people, are readier to "begin again." To-day is the teacher's opportunity. Yesterday the fermenting element was too strongly present; to-morrow the hardening process will have begun. Now is the time to take advantage of the forces that have been at work quickening, invigorating, enriching the language; therefore, the teaching of composition has taken on an added importance. The teacher must study to suit his methods to the new conditions and to enlist on his side the tendencies, practices, and interests which the War has encouraged.

One obvious means to this end lies in the more or less frequent choice of "war subjects" for composition exercises. This need not mean that encouragement is given either to militarism or to boastfulness; the whole matter should be conceived in the nobler spirit of "Lest we forget." Almost every boy and girl at school has something to tell about the war. There are few who have not heard first-hand narratives from father, brother, cousin, or friend; few in whose home the story of some particular deed of bravery has not been told and gloated over until it has become as an household word. The writing out of these stories in school, provided the teacher sees to it that the whole thing is *real*, will be undertaken with eager delight; and the reading aloud of the compositions will give to the author that audience which,

during the war, many of us have desired, but have often had some difficulty in finding.

This is the simplest and most direct form of war exercises; but there are many others that are both valuable and interesting. Passages of prose or poetry of real literary merit, dealing with the war, may form the basis of a great variety of exercises. Take, for example, a paragraph from the *Gazette*, valuable for its suggestiveness and brevity, such as the following, which tells how a chaplain won the D.S.O. :—

For conspicuous gallantry and devotion to duty in volunteering to go with a rescue party for some men who had been left stuck in the mud the previous night between the enemy's outposts and our own. All the men except one were brought in. He then organized a party for the rescue of this man, and remained with him all night, though under rifle fire from close range, which killed one of the party.

The pupils might be asked to tell the story thus summarized, half of them from the point of view of the chaplain, the other half from that of the man who was rescued. Passages from Sir Douglas Haig's and Sir David Beattie's dispatches might be treated in a similar way.

Great use can be made of letters from the front. Take such an extract as the following :—

You probably don't know what a village looks like when it has caught it in the neck. It is a wonderful sight. Each house has chosen its own way of sitting down, and the whole place is all huge pits where the big high-explosive contact shells—Black Maria and her relatives—have burst. It is an extraordinary experience, marching through a place like this for the first time, at night.

The pupils might be asked to write, in the first person, an account of this experience, told by a young private soldier in a letter home. Then there are the delightful letters written by "Uncle John" (Second Lieut. John Small, Black Watch) to his niece Muffie, and published in the *Spectator*. There is the letter in which he compares our flying men to Sinbad the Sailor :—

Each of them is a complete Sinbad in himself. His aeroplane is a great live Roc, though it is hatched in a factory. And he ties himself underneath it while it is standing on the ground—just also as Sinbad did. Then away it flies with him into the limitless blue. Like old Sinbad, our airman has an Old Man of the Sea hanging round his neck. It is the force of gravity pulling him towards the earth, and, like Sinbad, he drugs the Old Man with a spirit: but it isn't fermented grape juice—it's petrol.

And so on through the story. The pupils might be allowed to read "Sinbad the Sailor," and then asked to develop this idea fully.

Passages suitable for exercises in paraphrasing are not difficult to find. Herbert Asquith's beautiful epitaph on "The Volunteer" would surely rouse any class to enthusiastic effort :

Here lies a clerk who half his life had spent
Toiling at ledgers in a city grey,
Thinking that so his days would drift away
With no lance broken in life's tournament.
Yet ever 'twixt the books and his bright eyes
The flaming eagles of the legions came,
And horsemen, charging under phantom skies,
Went thundering past beneath the oriflamme.

And now those waiting dreams are satisfied.
From twilight into spacious dawn he went.
His lance is broken; but he lies content
With that high hour in which he lived and died.
And, falling thus, he wants no recompense,
Who found his battle in the last resort;
Nor needs he any hearse to bear him hence
Who goes to join the men of Agincourt.

An ordinary paraphrase of this passage might be asked for, or the class might apply it to the experience of a particular person whom they have known. Emile Cammaerts' "Le Vieux Paysan," which is worthy of study as well for the simplicity and beauty of its French as for the poignancy of the sentiment it expresses, would afford another example :

Il est un vieux paysan,
A cent pas des lignes ennemis,

Qui n'a pas quitté son champ
Comme il ne peut travailler le jour.
Tel un oiseau nocturne
Il ne travaille plus que la nuit
Avec patience, avec amour.
La bouche close, l'œil taciturne.
A cent pas des lignes ennemis. . . .

Sometimes the process could be reversed, and a prose passage given to be turned into verse. There are many stories told in Sir Henry Newbolt's "Submarine and Anti-Submarine" which would supply the material for a spirited ode. Or, in another vein, some such passage as that which concludes Donald Hankey's "Of Some who were Lost and afterwards were Found" might be chosen.

But, if they lived amiss, they died gloriously, with a smile for the pain and the dread of it. What else had they been born for? It was their chance. With a gay heart they gave their greatest gift, and with a smile to think that, after all, they had anything to give that was of value. One by one Death challenged them; one by one they smiled in his grim visage and refused to be dismayed. They had been lost, but they had found the path that led them home; and when at last they laid their lives at the feet of the Good Shepherd, what could they do but smile?

In connexion with the history lesson, the class might be asked to describe a visit of the shade of the Black Prince, Philip of Spain, Marlborough, or Wellington (according to the period taken), to the battlefields of France and Flanders, or of Blake or Nelson to the North Sea. Of imaginative exercises, a whole series will suggest themselves: the experiences of a London bus that has been used as a transport-waggon, or of a fishing-boat converted into a mine-sweeper; what a London chimney-pot saw of an air-raid; a dialogue between a sea-gull and a swallow concerning the aeroplanes they have seen; what the animals on a farm thought of the "land girl."

It is a long way from the Great War to school composition exercises. But the Great War was fought mainly for the sake of the generation of our children, and so there is really nothing incongruous in seeking help from it to teach English boys and girls to speak their mother tongue clearly, simply, and beautifully.

CORRESPONDENCE.

THE EDUCATION ESTIMATES.

To the Editors of The Journal of Education and School World.

SIRS,—The Education Estimates for 1919-20 contain, *inter alia*, a proposal to endow secondary education in England with the sum of £1,790,660. Taking the established method of computing grants, Ireland's share should be 9/80ths of England's, and thus Ireland is entitled to about £200,000.

Now, Ireland gets for her intermediate education the following voted sums:—(1) A fixed sum of £46,500 (to replace the "whisky money"); (2) the Teachers' Salaries Grant (1914), £40,000; and (3) the fees paid by the Department of Agriculture and Technical Instruction for the Teaching of Science, £30,000; making in all £116,500. There is consequently a balance due of £83,500. Adding to this the cost of administration, inspection, and examination (which is borne in England by the Treasury, but not in Ireland), £27,000, we find the total deficit to be about £110,500.

On his appointment as Minister of Education, Mr. Fisher secured vastly increased grants for all forms of education, and Ireland was voted, in February 1919, an "Equivalent" grant of £50,000. In the Estimates before me the amount of this grant remains unchanged, despite the fact that English Secondary Education gets an increase of £220,000. The shortage in Irish Intermediate Education Grants is thus about £60,000. This is treating Ireland with deliberate parsimony. No one questions the wisdom of voting huge sums of money for all forms of education in England, Scotland, and Wales, but Irish Intermediate Education, at all events, is treated on the old cheeseparing method. All sections of interested opinion should with one voice demand equitable treatment in this matter, and, on behalf of the members of my Association, I enter an emphatic protest.

The cost of living in the past four years has risen by over 100 per cent. The minimum salaries of lay teachers in Irish intermediate schools was fixed by Mr. Birrell's Act of 1914 at £140 per annum. The minimum fixed under Mr. Fisher's Equivalent Grant of 1919 was £160 per annum—an increase of 14 per cent. Further, the majority of the teachers for whom I speak have, during the period of the War, received nothing in the shape of a bonus. I need not labour that aspect of the situation.

I would, then, strongly urge, pending the proposed readjustment of Irish education, that when the Estimates come up for ratification something be done to secure for Ireland added grants more nearly resembling her admitted proportion of moneys voted for education, and that, in the interests of justice and fair play, the minimum salaries be raised to, say, £190 or £200 per annum, so as to be more in keeping with present-day conditions.—I am, Sirs, &c.,

T. J. BURKE,

Chairman, Association of Secondary Teachers, Ireland.

Blennerville, Tralee.

ROADS OF REMEMBRANCE.

To the Editors of The Journal of Education and School World.

SIRS,—May I be permitted to bring to the notice of readers a subject akin to that of War Memorials, but with an even wider significance—namely, "Roads of Remembrance," the practicability of which has been authoritatively attested? Though inherent in its conception is the general improvement of highways, yet primarily, and in origin, its purpose is to urge the planting of trees, especially memorial trees, wherever possible—singly, in line, or groves; but preferably (not essentially) along suitably wide roads, where all may see, remember, and enjoy. By whom more fittingly could the trees be planted than by relative, schoolfellow, or friend of the dead sailor or soldier? And when more suitably than on Armistice (or "Arborstice") Day?

For highway planting the co-operative sanction of the Local Authority (through the surveyor) and of property owners should be sought, and with no less tact than zeal. Possibly, "for remembrance," a strip of wayside land, or land at a dangerous corner, may be secured, and the planting done there; or possibly the trees may be planted within the hedge. To those who look for ward half a thousand years there could be no work of man more eloquent than a line, or avenue, of oaks. But the primary interest of agriculture must be considered, and this imposes the delightful alternative of small trees for blossom and fruit—a compliment which Nature-study children surely deserve; remembering, however, that there are inedible varieties for those who fear temptation.

Teachers in boys' and girls' schools are invited to co-operate and correspond.—Yours faithfully,

M. H. MORRISON,

Hon. Secretary, "Roads of Remembrance."

47 Victoria Street, London, S.W.1.

THE SUPPLY OF GEOGRAPHICAL SLIDES.

To the Editors of The Journal of Education and School World.

SIRS,—An article that appeared in your April issue on the supply of geographical slides has suggested to me that some of your readers may be glad to know of the valuable aid afforded by the Victoria League in the study of the geography of the British Empire. For an annual affiliation fee of 5s. schools may obtain the loan of lantern slides, with lecture notes, of stereographs and stereographic pictures, and of collections of specimens of products and manufactures. Another advantage is the use of a good lending library of books, dealing with the history and geography of the Empire. Correspondence links with schools overseas are also arranged. Full particulars may be obtained from the Secretary of the Victoria League, King's Court, 48 The Broadway, Westminster, S.W.1.—Yours faithfully,

E. R. BROOME.

(Representative of the Association of Head Mistresses on the Victoria League Education Committee.)

County School, Enfield.

THE Association for the Reform of Latin Teaching has arranged a summer school this year at Oxford from September 2 to 9. Demonstration classes, oral and phonetic group practice, Latin author reading classes, and lectures on method, archaeological aids, &c., will be provided. Full particulars can be obtained from Mr. Nigel O. Parry, 4 Church Street, Durham.

UNIVERSITIES AND SCHOOLS.

UNIVERSITY NOTES.

London University has recently extended its facilities for the study of modern languages by the addition of courses specially designed to increase the supply of teachers. The Senate have now approved of a scheme for the foundation of an Institute of Phonetics, of which the existing department at University College, where much valuable work has been done already, will be the nucleus. It is hoped that the Committee which has been constituted for the purpose will succeed in attracting the support of the public to a project which is deserving of all success.

Manchester University, too, has nearly completed its arrangements for providing similar facilities. The department of Russian continues to grow: an entrance scholarship, awarded for the first time last summer, will be again offered in 1919, and, as a further step, a series of public lectures by experts in Russian subjects has been arranged for the present session. A committee has been formed to raise a fund for the institution of a Chair of Italian and a Department of Italian Studies in the University. Mr. Arthur Serena has promised £5,000 on certain conditions, which include the completion of a sum of £10,000, of which his own contribution is reckoned a part. £8,500 has been raised already. The Report on Modern Studies issued last year deplored the lack of adequately trained teachers of modern languages; the Universities seem to be attempting to make provision for this need, which is second only to that for a larger supply of science teachers.

Thanks to a generous endowment, provided in memory of his son by Sir J. E. Jones, Manchester has just adopted a scheme for the training of teachers for the deaf. To the lectureship in connexion with this scheme, Miss Goldsack, mistress in charge of the Worrall School for the Deaf, and previously mistress at the Royal Schools for the Deaf, has been appointed. A "certificate for teachers of the deaf" will be awarded to students who take the usual four years' education course, which includes one year under this scheme; to teachers who take this year, in addition to the ordinary three years at any other approved University; or to teachers, already trained and certificated, who spend another year in training for this certificate.

The controversy over the study of Greek at Oxford has been anxiously followed by educationists, particularly by those connected with our public schools, because of the close relationship between the latter and the University. In view of what has taken place at the older University, it is interesting to note how a younger institution, Manchester, is attempting to solve a similar difficulty. There, a reorganization of its Classical Honours course will take effect at the beginning of next session. *Two separate*, but interrelated, schools in Greek and in Latin respectively have been created. A student who wishes to specialize in one will thus be free to do so, on condition that he reached a pass standard in the other. In this way the more numerous type of secondary school in which the study of Latin, but not of Greek, is carried to the end of the school career is catered for. No student ignorant of Greek can give adequate instruction in Latin language and literature; but this scheme enables such a student to devote the bulk of his time to his favourite language.

The authorities of Manchester University are evidently offering increased inducements to would-be teachers. Yet, if an analysis of the latest figures relating to students now enrolled is any guide to the state of affairs at other Universities, there is little sign of the increased supply which Mr. Fisher hopes may be forthcoming. In 1913 there were 1,537 students, of whom 1,015, nearly 70 per cent., were in faculties other than medicine and technology (from which teachers are not drawn). Thanks to the War, in 1917 the numbers had dropped to 871, of whom 498 were in teacher-supplying faculties. At the beginning of this session, whereas the total had risen to 1,036, only 531—about 50 per cent.—were in these faculties. These figures are far from conclusive evidence; they do suggest, however, that, at Manchester at least, entrants to the University do not consider that the conditions of service in the teaching profession afford prospects sufficiently good to induce them to make education their life work.

CAMBRIDGE.

The British oil companies have agreed to join together in a scheme for endowing a Chemical School at Cambridge. The Burma Oil Company have agreed to contribute £50,000; the Anglo-Persian Oil Company, £50,000; the Anglo-Saxon Petro-

leum Company, £50,000; and Lord Cowdray and the Hon. Clive Pearson between them £50,000, making the total of £200,000 which is required. Mr. Deterding, who has taken very great interest in the scheme from the beginning, has offered to make the £200,000 into guineas by adding a personal contribution of his own of £10,000.

WALES.

The financial outlook of the University has been improved considerably by the announcement recently made by the President of the Board of Education, that the Advisory Committee on University Grants propose to recommend to the Treasury the payment of largely increased annual grants to the three University Colleges. In the case of Cardiff, the new grant will amount to £18,000, together with a non-recurrent grant of £3,500 to meet the abnormal conditions due to the War. In the case of Aberystwyth, the additional annual grant amounts to £6,000 and the special grant to £3,000. Bangor College will receive the same increase in the annual grant, with a non-recurrent grant of £2,500. It is also understood that, as all the counties have agreed to the levying of an additional penny rate for University education, the Government are now prepared to provide the sum of £50,000, which is the equivalent to the total which the rate is expected to reach. The University will therefore benefit to the extent of £100,000, which is the sum originally estimated as necessary to meet the demands of the Royal Commission, though a subsequent consideration of the finances of the University has shown that the sum is still inadequate for the purpose, owing mainly to the depreciation in the value of money.

At the half-yearly meeting of the Court of Governors at Aberystwyth College, Mr. A. E. Zimmern was appointed to the Wilson professorship of international politics, recently founded by Major D. Davies, M.P., and his sisters. Prof. Fleure was also appointed professor of geography and Prof. Stapleton to the Chair of agricultural botany. A generous gift of £10,000 was made by Mr. L. Phillips, of Llanstephan House, Radnorshire, together with an annual sum of £1,000 for ten years, towards the founding of a plant-breeding institute, in which the study of grasses and the growth of cereals in Wales could be promoted.

This Federation consists of representatives of Education Com-

Federation of Education Committees.

mittees and their officials, and they meet periodically to discuss different aspects of education in Wales. The last meeting was held at Llandrindod Wells on May 8, and was well attended. Representatives of Local Authorities in the two important counties of Glamorgan and Monmouth forwarded a resolution to the effect that the time had now arrived when the Board of Education should seriously take into consideration "the advisability of establishing a uniform scale of salaries for teachers in Wales and Monmouthshire." Though the motion was strongly supported by Mr. T. W. Berry, of the Rhondda, where the salary question has recently attained so much notoriety, and by others, the feeling of the Federation as a whole was in opposition to the proposal. The difficulty of formulating a scheme for all types and sizes of schools was so great that, in the opinion of many members, it was useless to proceed with it. On the other hand, the present haphazard system is so unsatisfactory and inequitable that some drastic measure will be necessary before long, and therefore it was an act of wisdom on the part of the Federation not to reject the proposal outright. It will be considered again at a future meeting. It is also interesting to note that a similar movement is on foot in Cardiganshire. A highly influential and representative meeting of members of Education Committees and teachers has met to discuss the ever-present salary question, and it was resolved to urge the formation of a "national scale." It seems to be the only chance of a reasonable living wage for the vast majority of the rural teachers of Wales, for so far, in spite of much agitation, their lot has not been appreciably improved.

Mr. T. J. Rees, Director of Education for Swansea, read a paper on the formation of new schemes under the new Education Act, in which he summarized the recent pamphlet issued by the Welsh Department, where the special needs of Wales are emphasized. Most of the Welsh authorities are taking steps in this direction.

The following meetings were held at the University College, Aberystwyth:—April 23, a business meeting, in which the discussion of the policy and programme of the Branch was opened by Miss A. Ffoulkes, of the Appointments Board for Wales. April 24: After the election of officials, committee, &c., the

INTRODUCTORY ELECTRICITY AND MAGNETISM.

By CARL W. HANSEL, B.Sc.

Over 300 Illustrations and Diagrams. Crown 8vo. **4s. 6d. net.**

A complete first course in electricity and magnetism based upon actual experiment, and embracing the recent changes and recommendations of the Board of Education's new syllabus.

A FIRST-YEAR COURSE IN GENERAL SCIENCE.

A Combined Text-book and Note-book.

By E. A. GARDINER, M.A., F.C.S.

3s. 6d. net.

This book presents an experimental course of general elementary science, and is an attempt to save time for the boy and labour for the teacher. It is divided into three sections:—I, Simple measurements. II, Some Common Apparatus and Instruments. III, Properties of Water and Air.

EXPERIMENTAL DOMESTIC SCIENCE.

By R. H. JONES, M.Sc., F.C.S.

With over 80 Illustrations and Diagrams. Crown 8vo.

2s. 6d. net.

This book provides a suggested course for Domestic Science Schools and Girls' Schools generally, based upon the view that Science can be directly and adequately taught in the Kitchen. The chief scientific principles in their application to domestic subjects are made clear by drawing upon everyday experience, and by the aid of kitchen utensils and commodities.

EXPERIMENTAL MENSURATION.

An Elementary Text-book of Inductive Geometry.

By H. S. REDGROVE, B.Sc. (Lond.), F.C.S.

2/6 net.

The special feature of this book is the combination instead of the usual separation of Elementary Geometry, Trigonometry, and Mensuration. It is suitable for first and second year students of Technical Schools.

NOTE.—Mr. Heinemann will be glad to hear from teachers who have manuscripts on educational matters which they desire to publish.

The Only Authorised Books on the Montessori Method

THE MONTESSORI METHOD.

By DOCTOR MARIA MONTESSORI.

Illustrated. **8s. 6d. net.**

In this book Dr. Montessori gives a clear explanation of her method and the principles upon which it is based.

DR. MONTESSORI'S OWN HANDBOOK.

A Manual for Teachers and Parents.

5s. net.

As a supplement to her larger book on the Method, Dr. Montessori has produced this explanatory manual, which is invaluable for all teachers.

A New Montessori Book.

THE ADVANCED MONTESSORI METHOD.

By DR. MARIA MONTESSORI.

Vol. I. **SPONTANEOUS ACTIVITY IN EDUCATION.** **8s. 6d. net.**

Vol. II. **THE MONTESSORI MATERIAL FOR CHILDREN UP TO ELEVEN YEARS.** **12s. 6d. net.**

"A contribution to scientific pedagogy such as we have not had since the institution of the kindergarten eighty years ago."—*School Guardian*.

A COMMON-SENSE ALGEBRA.

By ASA BURNISTON, L.C.P. (Hons.).

1s. 6d. net. With Answers, **2s. net.**

Suitable for use in the Upper Classes of Elementary Schools, in Evening Schools, and in the Lower Forms of Secondary and Technical Schools. An extremely useful and enlightened introductory algebra.

ELEMENTARY BUSINESS TRAINING.

By V. H. ALLEMANDY.

Crown 8vo. **3s. net.**

This book is intended for use in the Upper Classes of Elementary Schools and in Commercial and Evening Classes.

THE BRITISH ISLES.

By A. B. ARCHER, M.A.

Illustrated. **2s. 6d. net.**

This is the first book in a new series, forming a Secondary School course in Geography, and is suitable for the Lower Middle Forms.

AVENTURES ET MERVEILLES.

A Simple French Reader for Junior Forms.

By C. V. CALVERT, B.A.

Crown 8vo. 300 pp. Illustrated. **2s. 6d. net.**

FRENCH TRANSLATION AND COMPOSITION.

By H. J. CHAYTOR, M.A., and E. RENAULT, B.A.

Crown 8vo. **2s. net.**

SCIENCE AND EDUCATION.

Edited, with an Introduction, by Sir RAY LANKESTER.

1s. 6d. net.

This volume contains seven lectures which were delivered by Whewell, Faraday, Latham, Daubeny, Tyndall, Paget, and Hodgson before the Royal Institution in 1854.

LONDON: WILLIAM HEINEMANN, 20-21 Bedford St., W.C.2.

| 204. Edgar L. Balnton | *The Sea | 4d. |

Songs marked * have just been added to the series.

London: EDWARD ARNOLD, 41 and 43 Maddox Street, W.1.

following questions were discussed: (1) Report of the Modern Language Committee, opened by Mr. A. Lyon, Head Master of Hawarden County School; (2) the question of French and Welsh as alternative subjects in secondary schools, opened by Mr. John Hughes, Fishguard County School. It was decided to send the following resolution to the University Court, the Senates of the Constituent Colleges of the University, the Central Welsh Board, and the press: "It is our opinion that the present privileged position of Latin in the matriculation examination is a hindrance to the study of Welsh and modern foreign languages in secondary schools." An amendment to a motion proposed by Miss Clara Williams (Penarth) was carried, and it was decided to send this resolution to the Central Welsh Board: "That, in view of the fact that the Central Welsh Board encourages the study of French by the direct method, in that a paper is set in French at the junior stage, this meeting of the Welsh Board of the M.L.A. urges the Board to assist the teachers still further by setting a similar paper at the senior stage, so as to avoid the sudden change of method which is at present inevitable; but translation from the native language into French should form part of that paper."

To the Directorship of Education of Pembrokeshire Captain Evan Davies has been appointed, and Mr. G. R. Bennett has been appointed Principal of the Newport Technical College. Mr. Bennett was previously Head Master of the Newport Higher Elementary School. Prof. O. Leigh Richmond has been appointed to the Chair of Humanity at Edinburgh University. Prof. Richmond is the present Professor of Latin at University College, Cardiff. Miss Kendall has resigned the head mistressship of Llandaff Girls' School, after a long and successful tenure of her post.

SCOTLAND.

On May 14, Field-Marshal Sir Douglas Haig was installed as Lord Rector of the University, and delivered his St. Andrews. Rectorial address. He received the honorary degree of LL.D., and the same distinction was conferred *in absentia* on the King of the Belgians, M. Clemenceau, and General Pershing, and also in person on Viscount Esher

and General Sir Lancelot Kiggell, Governor-General of Guernsey and late Chief of the General Staff under Sir Douglas Haig. The list of honorary degrees to be conferred at the July graduation includes the following names:—D.D.: The Rev. George H. Box, Professor of Hebrew, King's College, London; the Right Rev. Bishop Charles E. Plumb, Perth. LL.D.: Mr. G. Claridge Druce, Oxford; Mr. L. T. Hobhouse, Professor of Sociology, University of London; Mr. Leonard Huxley, Editor of the *Cornhill Magazine*; Mr. William Low, of Blebo, the Rector's Assessor in the University Court; Dr. W. H. R. Rivers, St. John's College, Cambridge; and Dr. A. L. Smith, Master of Balliol.

The Académie des Inscriptions, Paris, has awarded the Prix Chavée for 1919 to M. Frédéric J. Tanqueray, Lecturer in French at the University.

On May 8, Field-Marshal Sir Douglas Haig visited the University and received the honorary degree of LL.D.

Glasgow.

The Universities Entrance Board propose to issue, for the consideration of the Universities, a general regulation providing that the medical preliminary examination should be assimilated to the examination for admission to the Faculties of Arts and Science. The proposal of the Board will probably be accepted by all the Universities, and the result will be to raise the age at which medical students begin their curriculum by about two years. The General Council are urging that, as in some of the English Universities, the first examination for B.Sc. and the first professional examination in Medicine should be taken at school, and that, under certain conditions, work done at school should be recognized in place of the first year's work at the Universities. The Faculties of Science at Edinburgh and Aberdeen are prepared to recognize such work, but the Faculty of Medicine at Glasgow state that it is not within their knowledge that any secondary school does or can, in any circumstances, teach scientific subjects of the scope or up to the standard required for the first professional examination in Medicine. In any case, the raising of the standard of the medical preliminary examination will have most beneficial results.

The number of men students who have matriculated at the University for the summer term is 600. Last summer the number was 240, and in pre-war years the average was 80. Of this year's number, 450 are medical students. All of these are men who

(Continued on page 382.)

The TEACHERS' CHRISTIAN UNION.

ASSOCIATED WITH THE Y.M.C.A. AND Y.W.C.A.

President: Miss M. H. WOOD, M.A., Litt.D.

Vice-Presidents: { Mrs. WOODHOUSE,
The Rev. W. TEMPLE, M.A., D.Litt.

Secretary: Miss F. STREET, M.A.

AIMS:—

1. To unite Teachers of all types and denominations, whether men or women, who hold a spiritual conception of education to be fundamental, believing that "Spirituality is the basis and foundation of human life rather than the apex or final attainment of it."
2. To seek through fellowship a clearer apprehension of the Christian Faith.
3. To contribute through Christian Education to the solution of social, international, and missionary problems.

The SECRETARY,
16 Russell Square,
London, W.C.1

will forward particulars of Subscriptions, conditions of membership, list of Branches, and publications. Among these are:—

- "Education: its Spiritual Basis and Social Ideals," being Report of 1918 Conference, post free 2/8.
- "Ideals and Problems of Religious Education," being Report of Swanwick Conference, 1919 (in the press).

THE SECONDARY, TECHNICAL AND UNIVERSITY TEACHERS' INSURANCE SOCIETY

(The S.T.U.T.I.S.)

Registered under the Friendly Societies Act, 1896. Regd. No. 1424 London.
Approved under the National Insurance Act, 1911. Approval No. 261.

Chairman: Sir JOHN D. MCCLURE, LL.D., M.A.

All persons whose main work is teaching other than in Public Elementary Schools are eligible for membership of this Society.

STATE SECTION:—

The forthcoming Valuation will, it is expected, show that this Section is in a very strong position and that valuable additional benefits will be able to be offered to its members.

Members who have been insured for at least two years, and who are passing out of Insurance in consequence of the Superannuation Act, or of larger salaries, are entitled to become *Voluntary Contributors*, and thus share in the Additional Benefits which they themselves have helped to create.

DIVIDEND SECTION:—

This Section is independent of the State Section and is for the insurance of those teachers to whom the Insurance Act does not apply, or *who desire additional benefits*. It possesses the advantage of a Savings Bank (by the creation of Own Funds and Deposit Accounts), and offers at a very low cost Sick Benefits up to £3 3s. per week. Hitherto about two-thirds of the members' annual contributions have been returned to them each year by being placed to the credit of their Own Funds.

For information apply to the SECRETARY,

Zander System, FUNCTIONAL RE-EDUCATION APPARATUS, Swedish Medical Apparatus, &c.

48, 52 & 54 GOSWELL ROAD, LONDON, E.C. 1.

T.A., "Abacot Barb," London.

T. Nos., Central 621 and 12030.

have been on war service, and it has been found impossible to admit any others, as accommodation is quite insufficient and it has been necessary to use classrooms in the extra-mural colleges and the Royal Technical College. Eighty soldiers from the American Army have been temporarily released to take courses at the University in Arts and Science. The number of women entrants has fallen from 40 last year to 19.

Among those who are to receive honorary degrees at the graduation in June are the following:—D.D.: The Rev. Thomas Barclay, Formosa; the Right Rev. Bishop Brent, Philippines; the Rev. Principal Glaister, Brisbane; the Rev. W. P. Hanks, London; the Rev. J. Primrose, Glasgow; and Father Nicholas Velimirovic, Serbia. LL.D.: Surgeon-General Sir William Baptye, V.C.; Colonel John Buchan; Lord Glenarthur; the Very Rev. Principal Sir John Herkless, St. Andrews; Prof. Sir John M. Jones, Bangor; Sheriff A. O. Mackenzie, K.C., Glasgow; Prof. Magnus Maclean, Glasgow; Prof. J. Hepburn Millar, Edinburgh; Mr. Hugh Reid, C.B.E., Glasgow; and Mr. Herbert F. Stockdale, Technical College, Glasgow.

Prof. C. R. Marshall, Professor of Materia Medica and Therapeutics at St. Andrews University, has been appointed by the Crown to the Regius Chair of Materia Medica at the University of Aberdeen, in succession to Prof. Theodore Cash. Prof. Marshall is a graduate of Manchester and Cambridge, and has held the St. Andrews Chair since 1899.

Prof. A. S. Pringle-Pattison, Professor of Logic and Metaphysics at the University of Edinburgh, has intimated his resignation of the Chair as from September 30 next. Prof. Pringle-Pattison was appointed to the Edinburgh Chair in 1891. He was Professor of Logic and Philosophy at University College, Cardiff, from 1883 to 1887, and Professor of Logic, Rhetoric, and Metaphysics at St. Andrews University from 1887 to 1891. In 1883 he was appointed to a Lectureship in Philosophy, founded by Mr. A. J. Balfour, and he was Gifford Lecturer at the University of Aberdeen from 1911 to 1913. He is the author of many valuable books on philosophical subjects, and his many friends and former students will hear of his resignation with much regret. The patrons of the Chair of Humanity, vacant by the death of Prof. W. R. Hardie, have elected to the Chair, Prof. Oliffe Leigh Rich-

mond, Professor of Latin in the University College of South Wales. He was educated at Eton and King's College, Cambridge, of which he was for ten years a Fellow and Classical Lecturer. Dr. Harold Pringle has resigned his Lectureship in Histology, on his appointment to the Chair of Physiology at Trinity College, Dublin. Major Ewing has been appointed Lecturer in Colonial and Indian History, in succession to Mr. James Munro, resigned.

At the spring meeting of the General Council it was reported that the overseas soldiers attending the University under the education schemes of their respective Armies number 220 from the United States, about 80 from Canada, 50 from Australia, and a few from New Zealand. About 900 demobilized men have matriculated since Christmas, and the matriculations for 1918-19, up to April 25, number 3,287, compared with 1,811 in 1915-16 and 3,283 in 1913-14. The Business Committee of the Council suggested the institution of degrees in Mining and in Architecture and Designing, lectureships in Spanish and other European languages and in Mineralogy and Oceanography; a strengthening of the staff, to set heads of departments free for research and post-graduate work; further post-graduate courses of study; and the development of movements such as the Workers' Educational Association. Principal Sir Alfred Ewing mentioned that within a period of about two years nine new Chairs had been or were in course of being instituted. Preliminary proposals are being considered for the extension of the existing hostel scheme, and increased accommodation for women students is urgently required. It is proposed to approach the Carnegie Trust and the Scottish Education Department as to the necessary capital expenditure.

Entrance Board.

It has been decided that the seat of the Board shall be at St. Andrews University. Prof. Burnet, of St. Andrews, has been elected as Chairman of the Board.

Education Authorities.

The new Authorities are making preparations for undertaking their work, and considerable numbers of officials, many of whom served under the School Boards, are being appointed. The Glasgow Authority have appointed Mr. John Clark, formerly Clerk of the Glasgow Board, to be Director of Education and Clerk and Treasurer to the Education Authority, at a salary of £1,500 a year.

PITMAN'S MANUALS FOR ART CLASSES

DRAWING AND DESIGN. By SAMUEL CLEGG, with a Foreword by Prof. WILLIAM ROTHENSTEIN.

A school course in composition with the following salient features:—1. Some of the plates are printed from wood blocks designed and cut by scholars. 2. Special attention is paid to design in needlework. 3. Art and craft work are linked together. 4. The subject of lettering and manuscript writing is treated suggestively as part of the course in Art.

280 pp. 10/6 net. 18 plates in colours.
Size 10 in. by 7½ in. 148 other illustrations.

SIMPLE ART APPLIED TO HANDWORK. By H. A. RANKIN and F. H. BROWN, A.R.C.A. Two vols.

Describes how the art work of the school may be linked with the handwork. Vol. II deals especially with staining wooden surfaces, gesso, metal work, leather work, &c.

Illustrated in colour and black and white, each 5/- net.

THE TEACHING OF COLOUR. By H. A. RANKIN, *Art Master, Silver and Bronze Medallist.*

This is a very suggestive book, dealing in an original way with colour problems, and treating them, especially in certain observational exercises, in as simple a manner as possible.

55 plates in colour, black and white, 5/- net.

Write for eight-page descriptive prospectus of

London: UNIVERSITY OF LONDON PRESS

18 Warwick Square, London, E.C. 4.

Miss E. L. Waldie, Inspecting Supervisor for the South-west of Scotland under the National Kitchens Division of the Ministry of Food, and formerly on the staff of the Glasgow and West of Scotland College of Domestic Science, has been appointed to the post of Inspector of Domestic Subjects under the Scottish Education Department.

IRELAND.

A very important announcement was made by the Irish Attorney-General, speaking in the House of Commons in the debate on the Second Reading of the Belfast Education Bill, which was eventually talked out. He stated that, consequent upon the Reports of the two recent Vice-Regal Committees on Primary and Intermediate Education, the Irish Government had appointed a Departmental Committee, which would meet the following week and would draw up, on broad lines, a scheme for the complete re-organization of Irish education. The Committee consists of Mr. Alexander, of the Scottish Department of Education; Mr. Barnett, Inspector of the English Board of Education; Mr. Butler, Assistant Commissioner of the Irish Intermediate Board of Education; Mr. Fletcher, Assistant Secretary in respect of Technical Instruction of the Department of Agriculture and Technical Instruction; and Mr. Wyse, Secretary of the Irish National Board of Education. The Attorney-General added that the Government hoped to introduce a Bill at an early date which would reform education without interference with religious teaching in the schools.

Speaking the previous week during his visit to Belfast, the Chief Secretary also made a promise to introduce an Education Bill for Ireland. Education there was, he said, based upon a fiction. There was no Education Act behind it and no Education Board to look after the interests of education. It was intolerable that, if anything was to be done for Irish education, it was always necessary to go to the Treasury. Out of every ten boys in Scotland nine attended regularly, in England eight, and in Ireland only six. It was a scandalous state of affairs that in Dublin 75 per cent. of the boys who wished to enter a technical school could not pass the ordinary entrance examination. As privilege in education had been abolished in Scotland, so he should like to see it abolished in Ireland, so that the lad of parts could go triumphantly from the Board school to the University. He added that the teaching profession required complete reform, and the first thing to be done was to give to the teachers a living wage with a better chance in life before them.

It is interesting to see that the Teachers' Associations are widely concentrating their efforts on supporting the Majority Reports of the two Committees. The Primary Teachers, at their annual Easter Congress, held this year in University College, Dublin, passed this resolution:—"That we call upon the Government to give immediate effect to the recommendations of the Killanin Committee." The Majority Report of the Intermediate Committee has been supported in the same way by the Schoolmasters' Association, the Ulster Head Masters' Association, the Incorporated Association of Assistant Masters, the Assistant Mistresses' Association, and the Central Association of Irish Schoolmistresses.

The Roman Catholic Bishops, on the other hand, seem to have decided to oppose reform on the lines proposed by the reports. Their language is not, however, clear. They offer their cordial support to the co-ordination of the different branches of education on lines of true progress, but they object to the proposed Minister of Irish Education; they are strongly opposed to the abolition of the existing semi-independent boards for the purpose of placing education in Ireland under the control of a Minister responsible not to Irish, but to British public opinion. They think this would be an altogether retrograde proceeding. What do they mean by co-ordination on lines of true progress? Again, if the Minister is supported, as suggested, by an Advisory Committee representative of different Irish interests, and his recommendations are backed up by the Irish members of Parliament, there is little danger of British public opinion interfering with them. The Bishops also object to an Irish local or national rate in aid of education, and wish the question to be first settled of the overtaxation of Ireland. Are these merely obstructive tactics, or do the Bishops really wish the reform of Irish education to wait for the settlement of this difficult financial and political question?

In the educational estimates for 1919-20 the amount of the
(Continued on page 386.)

The Estimates. Duke grant remains stationary at £50,000. It was definitely stated when the grant was first made in 1918 that it was not a fixed sum, like the Birrell grant of £40,000, but an equivalent grant for intermediate education, and would increase with the increase of the Treasury grant for secondary education in England. On this basis the Duke grant, which was £50,000 for 1917-18, should have been £70,000 for 1918-19, and should be £95,000 for 1919-20. It is also a remarkable fact that the grant per head for Irish education as a whole, which in previous years was higher than for England and Wales, is for 1919-20 considerably lower. The estimates for England and Wales have risen by over £12,000,000, and those for Ireland by only £500,000. The excess per head for England and Wales is more than 3s., the amounts being 17s. for England and Wales and 14s. for Ireland.

Trinity College has suffered a great loss in the death of its Provost, Sir J. P. Mahaffy, on April 30. As the **Sir J. P. Mahaffy.** *Times* justly said: "For more than a generation Dr. Mahaffy has unquestionably been the foremost figure of Trinity College, Dublin. He was the one man there with a European reputation outside the circles of specialists." He was in his eighty-first year, and had been Provost since 1914. He was elected a Fellow as long ago as 1864. The resignation of Mr. Justice Madden, Vice-Chancellor of the University, a contemporary of Dr. Mahaffy's, removes another well known figure from the life of the University. The Chancellor, Lord Iveagh, has appointed Dr. Bernard, Archbishop of Dublin, to be Vice-Chancellor in his stead.

SCHOOLS.

WESTFIELD COLLEGE.—The Council of Westfield College (University of London) have offered a research studentship for next year to an overseas graduate, Miss Julia Grace Wales, A.M. Miss Wales, who is a Canadian, graduated at McGill University, Montreal, in 1903, obtaining first-rank honours and the Shakespeare gold medal. The following year she obtained a scholarship at Radcliffe College, taking her A.M. degree at the end of the year. In 1910 she was awarded the Mary M. Adams Fellowship in English at Wisconsin University, and in 1912 she was appointed Instructor in English at that University.

FARADAY HOUSE ELECTRICAL ENGINEERING COLLEGE.—On the results of the examinations held for entrance scholarships at Faraday House in April, the following awards have been made:—"Faraday" Scholarship of fifty guineas per annum, tenable for two years in college and one year in works, to R. A. Emerson, Plymouth College, Guernsey; "Maxwell" Scholarship of fifty guineas per annum, tenable for one year in college and one year in works, to D. E. Bird, Elizabeth College, Guernsey. The following entrance exhibition and prizes have also been awarded:—To J. P. H. Read, Newton College, Devon, Entrance Exhibition of twenty-five guineas per annum, tenable for one year in college and one year in works; to M. W. Foulkes-Roberts, St. Bees School, Cumberland, an Entrance Prize of twenty-five guineas; to S. J. Bausor, Surrey County School, Richmond, an Entrance Prize of twenty guineas.

HARRAP'S LATEST PUBLICATIONS.

HARRAP'S INTRODUCTORY ALGEBRA. By WILLIAM FARQUHARSON, M.A., Daniel Stewart's College, Edinburgh. Cr. 8vo, 180 pages, with Answers, 2s. net. Also without Answers, 1s. 9d. net.

From the Principal of a Preparatory School:—"Farquharson's Algebra is first-rate, and I shall put an order through in due course. I hope the book will have the success it deserves, for, of the large number of elementary Algebras I have perused in my search for something suitable for beginners, this is the only one that appears to have realized and provided for the extraordinary difficulty of the subject for small boys."

ENGLISH EXTRACTS AND EXERCISES. For Comparative Study and Training in Composition. By F. H. PRITCHARD, Lecturer in Literature at the Municipal Technical School, Devonport. Large cr. 8vo, 256 pages, 2s. 6d. net. (Prospectus on application).

An admirable practice-book in English for lower and middle forms in secondary schools and for upper classes in primary schools. The main idea is to centre all the week's work in English round a suitable extract. The exercises are abundant and in many cases novel in character. No essential point in elementary English is left untouched, and wherever possible opportunity is taken to stimulate interest in the author or extract under consideration.

A SCHOOL GRAMMAR OF PRESENT-DAY FRENCH. By J. E. MANSION. Crown 8vo, 256 pages. 3s. 6d. net.

A new French Grammar for middle and senior forms, special features of which are the stress laid on fundamental principles, and careful differentiation between the normal constructions of the language and those which belong to emotional, colloquial, or literary expression.

EN CAMPAGNE. By MARCEL DUPONT. Edited by G. Bossett, L.-ès-L., with Notes, Re-translation Exercises and Vocabulary. Small crown 8vo, 192 pages, 2s. net.

Incidents of the French campaign in 1914-15 as seen by a French Cavalry Officer who has also served in the French Flying Corps. The style is simple, and the narrative vivid.

FRENCH PLAYS FOR CHILDREN. By JOSETTE E. SPINK. With Illustrations and Vocab. Sm. cr. 8vo, 96 pages, 1s. 6d. net.

This little book is designed primarily as a reader for class use.

EN FRANCE. With Notes, Oral Exercises, and Vocabulary, by Prof. C. FONTAINE, Columbia University. Fully illustrated. Crown 8vo, 224 pages, 2s. 6d. net.

This new reader gives in pleasant idiomatic French a description of the country and people both in Paris and in the provinces.

MARGUERITE ET SES AMIS. Livre de Lecture et de Conversation de la deuxième année. By V. LOUIS. With Illustrations, Exercises, Vocab., and Model Scenes for Acting. Cr. 8vo, 120 pages, 1s. 9d. net.

Seventeen illustrated readings descriptive of the daily life of a little girl, followed by four *scènes dialoguées* for acting at school or at home.

A FIRST SPANISH COURSE. By Profs. E. C. HILLS and J. D. M. FORD. With Exercises and Vocabularies. Crown 8vo, 340 pages, 4s. 6d. net. Key, for Teachers only, 5s. 3d. net.

This easier course is designed for much younger pupils than the Authors' previous work.

PEQUEÑO VOCABULARIO. By ALBERT A. MÉRAS, Ph.D. Size 5½×3 inches, 72 pages, limp cloth, 8d. net.

This book contains classified lists of two thousand Spanish words with English equivalents.

CAPÍTULOS ESCOGIDOS DE V. BLASCO IBÁÑEZ. With Notes and full Vocab., by E. ALEC WOOLF, D.Litt. Crown 8vo, 188 pages, 2s. net.

Selections—each one complete in itself—from the words of the foremost Spanish novelist of the present day, whose works have been translated into every European language.

HARRAP'S BILINGUAL SERIES.

General Editor—J. E. MANSION.

Each Book price 1s. 6d. net.

Modern Language Readers for the student who wishes to enlarge his vocabulary through reading. Each book consists of a carefully selected story, or other suitable material, with text and translation on opposite pages and a few Notes. The Series will include books in all the principal languages.

London: **GEORGE G. HARRAP & CO., LTD.**

Directors: GEORGE G. HARRAP & G. OLIVER ANDERSON.

2 & 3 Portsmouth Street, Kingsway, W.C.2.

A. & C. BLACK'S LIST.**SCHOOL SHAKESPEARE.**

Price 1/- each.

Each volume contains Introduction, Examination Papers, Notes, and Index.

**MIDSUMMER NIGHT'S DREAM. HENRY IV (Part I).
MERCHANT OF VENICE. KING LEAR.
MACBETH. RICHARD III. JULIUS CAESAR.**

PICTURE LESSONS IN ENGLISH.

Each containing 14 full-page Illustrations in colour, Questions, and Notes.

Demy 8vo. Price 1/- each, Limp Cloth.

Book I	...	For Stds. I & II.
Book II	...	For Stds. III & IV.
Book III	...	For Stds. V & VI.
Book IV	...	For Stds. VI, VII, & Ex-VII.

No plan of approaching this subject is better than that of using pictures which assist the pupil in the work of self-interrogation and at the same time cultivate the habit of observation.

COMPOSITION FOR JUNIOR FORMS.

By GEORGE H. GREEN, L.C.P.

Containing 15 full-page Illustrations, of which 8 are in colour. Crown 8vo. Price 1/8.

This book provides materials which is suited for development in class discussions, and which is likely to promote a love of self-expression by means of prose writing on the part of pupils ranging from ten to fourteen years of age. The exercises are numerous, and of an interesting and suggestive character. It deals with composition only, and is in no sense a handbook of grammatical rules and questions. A noteworthy feature is the selection of beautiful illustrations which have been employed as the basis of many interesting and stimulating exercises.

SENTINEL READERS.

Edited by E. E. SPEIGHT.

Each volume with 8 full-page plates in colour.

Book I	...	Price 1/4
Book II	...	" 1/6
Book III	...	" 1/8
Book IV	...	" 2/-
Book V	...	" 2/-
Book VI	...	" 2/6

Sentinel Hours (an Anthology of Prose and Verse). 2/6.

The aim of this set of Readers is not only to awaken intelligence and impart knowledge, but to widen the sympathies of boys and girls in all humane directions.

LITERARY READERS.

Edited by JOHN FINNEMORE

Each volume with 8 plates in colour and many in black and white.

Book I.	Including Introduction to	Price
	Little Folk of Many Lands	1/4
Book II.		1/6
Book III.	Introducing the "British Empire":	
	how won, how kept, how used	1/8
Book IV.	Dealing with North America	2/-
Book V.	Dealing with Australia, New Zealand, and South Africa	2/-
Book VI.	Dealing with the Indian Empire	2/6

The special feature of this set of Readers is that in all Books above the Second an attempt is made to show how Britain came by her world-wide Empire.

38 Soho Sq.,
London, W.1.**CHAMBERS'S LIST**339 High St.,
Edinburgh.**MACHINE
DRAWING AND SKETCHING**

By JOHN H. DALE, A.M.I.M.E. Quad. Hons.,
Bronze Medallist, Winner of King's Prize in
Machine Drawing, Lecturer in Engineering at
the Darlington Technical College.

3s. 6d. net.

The book is intended for the use of students of
about the fourth and fifth years of a Technical
Course. It contains 84 machine drawing examples,
most of which are presented in the pictorial. Each
example is complete in itself and, with the necessary
homework, is estimated to occupy one class-night.
There are also 200 sketches of machine details and
190 questions on sketching, numerical calculations,
and workshop practice.

**STUDENT'S HISTORY OF
ENGLAND & GREAT BRITAIN**

By W. J. BEES, B.Sc.

772 pages, 6s. net.

PART I—55 B.C. to 1485 A.D.; II—1485 to 1910. Each
3s. net. SECTION I, 1066 to 1485; 2, 1485 to 1714;
3, 1688 to 1910. Each 2s. net.

The Teacher says—"An ideal text-book. This is
decidedly one of the very best of students' English
histories that we have seen, and we very heartily
commend it to the notice of teachers and students in
secondary schools, and indeed in all institutions
where English history is taught."

**CHAMBERS'S
PERIODIC HISTORIES**

In this series due prominence is given to the de-
velopment of social life; the progress in arts and
crafts; the advancement of learning; the great
struggles for religious and political liberty; the
growth of the constitution.

The New Way The Best Way

of Teaching Geography with History.

The Requirements of busy Teachers are met in

The New Waverley Publication
now complete,

THE WORLD WE LIVE IN

*An Illustrated description of the Lands and Seas of the
Globe, their Peoples, Animals, Plants, and Products, with
valuable Educational Plates and Pictures,*

and including a section on

"HOW GEOGRAPHY AFFECTS HISTORY."

By Sir H. H. JOHNSTON, G.C.M.G., &c.

"That son of mine . . . twelve years old . . . knows that Lisbon on the Tagus is the capital of Portugal . . . that furry things on the maps are mountains, and he can tell you the export of Burmah. But he doesn't know the least thing about *geography*—real geography. He couldn't tell you by looking at a map whether a bit of road ran uphill or down. He has no idea why London came to stand where it is, and he can't understand why the Huns had only two ways of retreat open to them from France. . . ."

"Well, why should he? We shouldn't if we hadn't been obliged to carry maps all round that silly war."

"BUT THOSE ARE THE THINGS THAT MATTER. . . . Learning names isn't any good. Geography is *the study of the earth's surface*— . . . *it ought to be*; and that is what I would make it in my school. . . . I would have the boys sent to me for a month every year. When they first came they would just learn physical geography. I would show them mountains, capes, peninsulas, and the rest. Then they would go to maps. . . . How many schoolmasters do you suppose ever dream of helping out their geography lessons with Ordnance maps of their own neighbourhood? And all that would lead up to the effect of physical geography on mankind. I would show them WHY cities were built, WHY nations grew powerful and declined and HOW POLITICAL GEOGRAPHY IS A CONSEQUENCE OF PHYSICAL GEOGRAPHY."—(From an article in the *Daily Chronicle*.)

PRIZE COMPETITIONS.

THE winner of the Translation Prize for April is Miss A. Delibes, 4 Avenue du Collège, Morlaix, Finistère.
 The Translation prize for May is awarded to "Rusticus Exspectans," and the second place to "Dob."

Extract from de Tocqueville's "La Démocratie en Amérique."

By "RUSTICUS EXSPECTANS."

In democracies it is far from being the case that all who take an interest in literature have received a literary education; and, even among those who have some tincture of polite letters, the greater part follow a political career, or else they embrace a profession from which they can step aside only at odd moments and taste by stealth the pleasures of the mind. They do not, therefore, make of those pleasures the chief attraction of their existence, but regard them as a fleeting, though necessary, distraction amid life's serious tasks. Such people can never acquire a knowledge of the literary art profound enough for an appreciation of its delicacy; minute and fine shades of meaning escape their notice. They like books which they can get without trouble, books which are read quickly, and do not call for learned researches in order to under-

stand them. They demand a type of beauty that is easy in its self-surrender, and which they can immediately enjoy; above all, they must have what is novel and unexpected. Accustomed to a monotonous, struggling, matter-of-fact existence, they feel the need of quick and lively emotions, of sudden flashes of illumination, of dazzling truth and dazzling error, taking them out of themselves upon the instant, and introducing them straightway, and as if by violence, to the heart of the subject.

Taken in its entirety, the literature of democratic epochs cannot present, in the same way as it does in aristocratic times, the impress of order and regularity, of science and art. As a general rule, form will be found neglected and at times despised; often a bizarre and incorrect style will reveal itself, diffuse and flabby, and almost always vehement and breaking bounds. Its authors will aim at rapidity of execution rather than at finish in details. Short compositions will be commoner than large works, wit than learning, imagination than deep feeling. Its thought will be dominated by a rude, an almost savage, force, and in the products of such ages there will often be a very great variety, a singular richness. The endeavour will be to astonish rather than to please, and strenuous efforts will be made to engage the passions rather than to gratify the taste.

De Tocqueville, in writing this passage, obviously had in mind the difference between the literature of the age of Louis XIV and that of his own generation. To consider how far his descriptions can be justified by English, American, and French literature would be fascinating, but we have no space for the attempt. "Rusticus Exspectans" has given us a good crisp version, which calls for little criticism. "Polite letters" is certainly the right rendering of *belles-lettres*, though only two candidates besides the prize-winner chose it. To transcribe *belles-lettres* argues ignorance of English; no one who loves his mother-tongue will admit a foreign word into a literary composition if he can possibly avoid it; even "bizarre" is doubtful. "Attraction" and "distraction" in succeeding lines is an offence against euphony. The sentence, "do not call for learned researches in order to understand them," is clumsy; say, rather, "do not require for their comprehension learned research." For *surchargé*, "overloaded" is an exact equivalent; the word implies excess of ornament or epithet, or too

(Continued on page 394.)

The Technical College

LOUGHBOROUGH, LEICESTERSHIRE.

H. SCHOFIELD, M.B.E., B.Sc. (Hons.) Lond.; A.R.C.Sc.Lond., A.M.I.C.E., PRINCIPAL.

DEPARTMENTS OF MECHANICAL, ELECTRICAL AND MOTOR ENGINEERING.

Complete Courses of Training are arranged in both Theory and Practice of the above branches of Engineering.

The Workshops of the College provide accommodation for 500 students working at the same time.

The equipment is on most modern and comprehensive lines, and comprises plant for turning, fitting, milling, grinding, automatic lathe operating and tool setting, tool and gauge making, foundry work, pattern making, drawing office work, heat treatment, viewing and testing of all kinds.

None but first-class work of a productive character is undertaken by the students, working under the skilled supervision of a fully qualified technical staff.

The complete course covers a period of five years, during which works training in all the above sections will be given, and this will be accompanied by a full theoretical course of instruction in the College Lecture Rooms and Laboratories.

Intending students should be at least sixteen years of age, and have had a good Public School or Secondary Education.

The fee is £5. 15s. 6d. per term, and there are three terms in the College session.

Boarding accommodation is provided in Hostels attached to the College, full particulars of which, together with illustrated Prospectus, will be forwarded upon application to the Principal.

W. A. BROCKINGTON, O.B.E., M.A.,

Director of Education.

The County of the White Rose

AN INTRODUCTION TO THE HISTORY
AND ANTIQUITIES OF YORKSHIRE.

BY

A. C. PRICE, M.A.,

Formerly Scholar of Pembroke College, Oxford, Author of "Leeds and its Neighbourhood," &c.

EDUCATION.—"This book is well worth reading by all who love the history of our country. Much History has been made in Yorkshire, and here we get just enough about it to make us want to know more. There are chapters on the Land and its Inhabitants, from the earliest historical times down to modern Yorkshire—castles, abbeys, churches, towns, each in turn are described and illustrated. There are 383 pictures, plans, and maps. The whole book is a treasury of information and most delightful reading."

great violence of language. *Il y régnera une force inculte et presque sauvage*: there is much of this rude and almost barbaric power in Hugo, Michelet, Carlyle, and others, whose minds seem to have been not so much guided by reason as under the sway of the great elemental forces of human nature.

We classify the 127 versions received as follows:—

Class I.—(a) Rusticus Exspectans, Dob, Dane, E.A.N., Boy, Papinian, Bésigue.

(b) Granfer, Sobrina, Omar, Etern, Obscura, Poisson d'Avril, Playshaw, W.G., Thomond, Llanandras, Goldie, F.B., Esse quam videri, Menevia, Tantalus, Mamble, Moi, M.A., Maridunum.

Class II.—Percy, Gilbey, Sirach, Ziebar, F.T.D., W.W.M., Meiros, Timbuctoo, Jacqueline, Hlawill, Rose, Somewhen, Switzerland, M.M.H., Jolande, Isolde, Chingleput, West Wind, Amalek, Petite Bête, B.O.K., Cablegram, E.L.K., C.F., James, Malvina, Albion, Serclun, Tom Turk, Puella, La Devonne, Leander, Oswald, Egg, Rolyan, Loo, Camel, Carisbrooke, Borderer.

Class III.—R.M.B., Hope, Derdlim, Ken, Herb Robert, C.L., Bridget, Jack, River, Embark, C.T., Cymraes, Ichabod, C.C.F., Clune, Sperare est humanum, Moloch, Dash, Corncrake, C.W.J., Hibernia, Corkscrew, M.M., Sirius, Aster, Einna, Kathrick, Lonely, Frerodosia, Salamander, San Fairey, Chipwork, Britannia, Réveuse, Goo-goo, Trefoil, Bomb, Catrina, Busy Bee.

Class IV.—Caractacus, Ayesha, Ekkehard, R.H.R.R., Decky, Reinga, Wyuna, Pegs, Vivienne, Alcie, Basil, Antelope, Wynne, Howarth, Réver, Bubbles.

Class V.—Aspirant, Yvonne, Rhino, Pip, Catriona, Pipette, Frances.

A Prize of Two Guineas is offered for the best translation of the following extract from Th. Jouffroy's lecture on "L'Etat actuel de l'Humanité," delivered in 1826:—

Il ne faut pas qu'on s'y trompe, la civilisation, en s'avancant, a élevé la mission de l'homme d'Etat; l'instruction et les vœux qui suffisaient jadis à un Richelieu ne suffisent plus aujourd'hui. Il ne

s'agit plus aujourd'hui en politique de la balance de l'Europe, mais de l'avenir de l'humanité. Les guerres civiles de l'Europe sont finies; la rivalité des peuples qui la composent va s'éteignant, comme s'éteignit, sous la domination d'Alexandre, la rivalité des cités grecques, et comme s'effaça, sous l'unité de la domination royale, la diversité des provinces de la France. La Grèce devint une seule nation sous Alexandre; et la question qui était auparavant entre Lacédémone, Athènes, la Béotie, et la Macédoine, fut entre la Grèce et la Perse. Et de même l'Europe commence à n'être plus qu'une nation depuis qu'il y a une Amérique, une Asie, une Afrique. C'est de l'unité de l'Europe contre ces masses, et de la balance de ces masses entre elles que l'homme d'Etat doit à présent s'occuper. M. Canning avait commencé à le comprendre; c'est là son titre de gloire et la pensée qui lui a valu d'un bout à l'autre de l'Europe les applaudissements du sens commun que cette pensée avait fait tressaillir. Les grandes idées couvent longtemps dans les esprits avant de s'y préciser: celui-là a du génie qui le premier les met en lumière. Le ministre, qui, sortant le premier des idées étroites du patriotisme, conduira la politique de son pays, non vers le but usé de son agrandissement et de l'abaissement de ses voisins, mais au profit et dans le sens de l'union de l'Europe et de la civilisation du monde par l'union et les idées de l'Europe, ce ministre-là sera l'homme d'Etat du dix-neuvième siècle, et fera la puissance et la gloire de sa patrie, précisément parce qu'il aura abjuré le dogme du patriotisme.

Initials or a nom de guerre must be adopted by ALL competitors, but the prize-winners and the competitors awarded the second place will be required to send real names for publication if necessary.

No competitor will be awarded a prize more than ONCE during a given year, though the name of the competitor gaining the first place will be published each month.

All competitions must reach the Office by the first post on June 14, addressed "Prize Editor," THE JOURNAL OF EDUCATION AND SCHOOL WORLD, 3 Ludgate Broadway, London, E.C. 4.

CONVEYANCING DEPARTMENT.

This Department is now under the direction of **Mr. F. C. NEEDES, B.A.**, whose experience, advice, and assistance are unreservedly placed at the disposal of **Purchasers** free of charge.

TRANSFERS and PARTNERSHIPS arranged by correspondence or interview.

INSPECTIONS and VALUATIONS undertaken.

An **unusual opportunity** offers itself to a young energetic lady of good social position, with educational qualifications, to acquire a **partnership** in one of the best **Finishing Schools** near London. Sound investment, but monetary consideration of secondary importance.

FOR SALE (*inter alia*).

- Surrey.—High Class Girls' Day School**, worked on Public School lines. 44 pupils. Receipts £936 last year. Good premises, with well-equipped class room—all "Louise" desks, &c.; handsome gym. and Assembly Hall, with every gym. apparatus. Good garden. Rent £110. Fine scope for developing a large Day School. Boarders can be easily secured if desired. Purchaser should be a lady of good Educational qualifications and definite Church views. Goodwill, one term's fees. School furniture, &c. at valuation. Inspected and recommended.
- Home Counties.—High Class Day** connexion of about 35 pupils to be had, with probably a few young boarders, all at high fees. Good chance of working up a large day connexion. Excellent premises, with grounds of nearly 3 acres. Rent about £300. One Term's capitation fees accepted. Suitable for a lady of good educational qualifications anxious to secure a High Class Day connexion, or a lady wishing to remove her Boarders to an attractive residential locality.
- Cheshire.—High Class Girls'**, unopposed, and situated in a wealthy and hunting centre. 8 weekly Boarders, and 12 Day, all at high fees. Receipts about £1,000. Excellent premises. Expenses small. A lady of good social position and education would find this a unique School and investment. Goodwill £400. Unreservedly recommended.
- On the Borders of the Peak District.**—Flourishing Girls' and Boys' Preparatory of 80 pupils, of whom a few are Boarders. Receipts £1,350 last year. Profits over £600. Splendid investment for two ladies, or for a married gentleman whose wife could assist with the girls. Goodwill and all School furniture, &c., 700 guineas.
- Lincoln.** old estab., **good Middle Class Girls' School**.—19 Boarders. 6 day ditto and 40 Day pupils. Receipts £1,052. Large house and grounds. Rent only £100. Vendor, who is going abroad, will accept one Term's capitation fees.

University Correspondence College.

(FOUNDED IN 1887.)

Principal :

WILLIAM BRIGGS, LL.D., D.C.L., M.A., B.Sc., F.C.S., F.R.A.S.

During the last Fifteen Years

6940

University Correspondence College Students

have passed

**INTERMEDIATE AND DEGREE
EXAMINATIONS OF THE LONDON UNIVERSITY**

In addition to gaining **5207** successes at Matriculation and numerous other successes
at other Examinations exempting from Matriculation.

Some Press Opinions of University Correspondence College.

"There will always be large bodies of students who from unfavourable circumstances of locality, means, time, age, or for other special reasons, cannot avail themselves of the opportunities of oral instruction. To these a well-organized Correspondence College, such as that which flourishes under the direction of Dr. Briggs, with its highly qualified and expert teachers, its clerical staff, and well devised machinery, is a help of the most valuable kind."
—*The Schoolmaster*.

"The Tutors of the College are experts in clearing up difficulties, and no student who follows their instructions and has the necessary industry need anticipate failure in the successive ordeals to which the graduate must submit."
—*School World*.

"When a tutorial staff gives its whole time to a special kind of work, with the result that it has over twelve thousand successes to chronicle for a period of twelve years, the omens are favourable to candidates seeking its advice."
—*School Guardian*.

"The success achieved by the University Correspondence College and the opportunities and encouragement given by it to home-students are now universally recognized."
—*Girls' Realm*.

"The most renowned institution of this kind is probably the University Correspondence College."
—*The School Journal, U.S.A.*

"A large organization that has developed remarkably upon its inherent merits. The College is doing eminently useful work."
—*The Educational Times*.

"University Correspondence College is itself, in a sense, entitled to University rank: in conjunction with London University it is fulfilling a function of truly national importance."
—*Educational News*.

"University Correspondence College is doing a splendid work, offering as it does most of the advantages of College or tutorial training to such students as draughtsmen engaged in works in isolated districts where no technical college exists."
—*Engineering*.

"For London University Examinations we can recommend University Correspondence College with the greatest possible satisfaction. The College staff is one of remarkable brilliance."
—*London Teacher*.

"University Correspondence College, the most remarkable modern educational institution in the kingdom, whose system of tuition by correspondence is to-day recognized both in the home country and in our principal colonies as the most successful of its kind in existence."
—*Publishers' Circular*.

THE CLASSICAL ASSOCIATION.

THE Classical Association held its annual general meeting at Oxford on May 16 and 17. Sir William Osler opened the Conference with a presidential address on "The Old Humanity and the New Science." He pointed out "that there was nothing really antagonistic between science and the humanities, and quoted from old times many names of distinguished men of science who had also won renown in scholarship. But the extraordinary development in every branch of scientific knowledge which had taken place in the last hundred years had thrown the humanities into the shade. Considering the importance of the newer studies, they ought to occupy a higher position in our Universities than they do at present, and science was inclined to be resentful. But it should not be supposed that the days of humanistic education are past; both science and classics had their proper place in education, and the present hostility between the two was harmful to both. It was true that classical studies had tended to run too much on conservative lines, generally insisting on a lengthy training in the minutiae of grammar which was useless and tedious to any but the specialist; but, on the other hand, science had gone too far in its revolt from the humanities.

"Men of science, instead of losing themselves in the backwaters of premature specialization, should be made to realize the continuity of the history of their own studies. The foundations of a knowledge of the system of Nature had been laid by great writers of old—Hippocrates, Galen, Theophrastus, Hero, Aristarchus, and others—who could only be known by the help of classical scholars. Let men of science study the anthropological speculations or the magnetic theory expounded by Lucretius, and they would realize their debt to antiquity; but at the same time let the Humanists play their part by pointing out the value of ancient science and making it more accessible. Great good should result from the establishment of a new Honours School of Philosophy in relation to Science, which the friends of both great branches of learning were hoping to establish in Oxford."

That the supporters of classical education are fully alive to the needs and opportunities of the time was shown by the discussion, lasting over three hours, on the report of a special committee appointed to consider Greek Curricula in Schools. The complaint is constantly made that a boy or girl may spend years on the subject, and yet leave school without knowing anything of Greek literature, or, at the best, having read only a book or so of Xenophon. The report was divided into two sections: the first on public-school teaching, in which Greek occupies a prominent place; the second, and more important, dealing with schools where only a strictly limited time can be spent on Greek.

Both sections were entirely reasonable and satisfactory; the latter, in particular, proved that, by the use of a proper system, boys and girls may be taught in a couple of years, and with only four or five short lessons in a week, to read and appreciate the best literature.

An evening reception was held at the Ashmolean, where Prof. Percy Gardner, lectured on recent acquisitions of the Museum and Mr. A. B. Cook on Pillar-worship in Greece, and Prof. Grenfell exhibited a collection of papyri. On the following day Prof. J. L. Myres gave an able lecture, entitled "Gladstone on Homer," and Prof. J. S. Phillimore gave a witty review of the progress of modern criticism. A long business meeting closed a very satisfactory Conference.

GLAMORGAN SUMMER SCHOOL.—The fourteenth Annual Holiday Course will be held at the County Schools, Barry, from July 28 to August 23 next, under the directorship of Mr. A. Sutcliffe. A staff of experts has been appointed, and additional instructors will be engaged immediately they are required. Special importance will be given to hygiene and physical training. Application forms for admission to the school may be obtained from the Chief Education Official, County Hall, Cardiff.

REVIEWS AND MINOR NOTICES.

THE CAMBRIDGE HISTORY OF AMERICAN LITERATURE.

A History of American Literature. Supplementary to the "Cambridge History of English Literature." Vols. I and II. (17s. 6d. net each. Cambridge University Press.)

Have the interest and importance of American literature for teachers of English ever been sufficiently appreciated? The ordinary histories of English literature either exclude American authors from their survey or give them casual and perfunctory notice. This is natural enough, and it is intelligible on literary as well as on national grounds. For even the contributors to this history, Americans all of them, are constrained to admit, by implication if not directly, that America has produced few writers of genius. But it would be regrettable if the scant space accorded to American authors in English histories of literature should lead the English teacher, as it easily may, to ignore the value of these authors for his special task. That very lack of the profundities which forbids us to attribute to any of them a place among the supremely great may be of some advantage in the school-room. Neither in thought nor in expression are the best American writers of the nineteenth century very difficult for a boy or girl. And to this negative advantage we may add a positive one. These writers belong, on the whole, to "the entre," to the great tradition of English literature. They have a reverence for that tradition, a sense of the greatness of their literary inheritance and of what is due to it, which makes them sound guides for the beginner. It may detract from the greatness of O. W. Holmes that he should be, as Dr. Brander Matthews says, "a survival of the eighteenth century, when English literature conformed to French principles"; but for the youthful practitioner in essay-writing it is all to the good that he should have a nineteenth-century model who is of the school of Addison.

As an elderly reviewer turns over the pages of these two goodly volumes, it comes to him with something of a shock to find how large a place the Americans filled in his youthful reading nearly half a century ago. In childhood there were Hawthorne's "Wonder-Book" and "Tanglewood Tales," Mrs. Beecher Stowe's "Uncle Tom's Cabin," Irving's "Rip van Winkle," and Longfellow's poems—including what Prof. Trent happily dubs "the egregiously anabatic" "Excelsior." Later, there were Hawthorne's novels, Motley and Prescott's histories, Poe's tales and poems, Whittier; and, a little later again, Lowell, Emerson, Thoreau, and Whitman, W. D. Howells and Henry James, and the short stories of Bret Harte, G. W. Cable, and T. B. Aldrich. (If Mark Twain is not in this list it is not because he was not read and enjoyed, but because some of his writing, e.g. "A Yankee at the Court of King Arthur," will be kept out of the way of youth by the judicious preceptor: its aggressive Philistinism is the more deadly because of its cleverness.) Do we make all the use we might of these authors nowadays? Poe, for instance, is not a great poet, but Prof. Campbell is right in saying that his metrical influence has been great, and his metres have a fascination for schoolboys.

In the small space here available it has seemed more worth while to point out the educational importance of American writers than to attempt criticism of the separate chapters in what is a collection of monographs of unequal merit by American professors of literature. The weak points of the "history" are mainly those which have been noticed in the English volumes to which these are a supplement—a lack of proportion and uniformity of standard, and the tendency to include too much for the sake of completeness. Not merely in the copious bibliographies, but in the actual text, many books are mentioned which Charles Lamb would certainly have counted *biblia abiblia*, "books that are no books." Some of the writing is more American than literary, e.g. "The informational path trod first by Goodrich and Abbott grew to be the main road for future juveniles." The essays on Emerson, Hawthorne, Longfellow, and Holmes are real

contributions to criticism; but the general impression left by the two volumes is that the professors enlisted have not risen to the full height of their opportunity. A third volume, completing the work, is in preparation.

CLASSICS.

Harvard Studies in Classical Philology. Vol. XXIX. (6s. 6d. Harvard University Press.)

This volume contains three articles of great interest. The most important is undoubtedly the first—Plato's View of Poetry—in which Mr. Wm. Chase Greene, following the dialogues in historical order, shows that Plato approached the subject of poetry and its relation to his philosophic system from different points at different times. He deals somewhat fully with the two attitudes to poetry in the earlier and later books of the "Republic." In one sentence his view is that in the earlier books Plato admitted poetry to his commonwealth so far as it imitated the good and the beautiful, but in the tenth he excluded it because, "as imitation, it is incapable of apprehending the truth." In other words, Plato, both here and in other dialogues, changes his ground. For Plato was himself a poet as well as a philosopher; he knew the good of poetry and how sometimes it was inspired, but he felt also at times its serious danger, especially in the compositions of his contemporaries. His creed about poetry was never permanently fixed. In the second article Dr. Cary gives us the collation made by himself and the late Prof. J. W. White of the MSS. of Aristophanes' "Birds." Unfortunately Prof. White died before publishing any of his work on Aristophanes on which he had been engaged for years. He had amassed "the most complete apparatus, including collations of the MSS. for both text and scholia," and he had published some preliminary studies such as his "Verse of Greek Comedy" and "Scholia on the Aves," but he had before his death completed his final revision of the text and commentary for only one-third of this one play. Dr. Cary, who had done most of the preliminary collation, publishes here the results of his own and Dr. White's work for the whole play. The third article, by Mr. G. W. Robinson, is a collection from the works of the greatest of modern scholars, Joseph Scaliger, of his estimates of the authors of classical antiquity. These are always suggestive, and their number is extraordinary. We are glad to see that of all ancient writers Scaliger thought Virgil the greatest: *divinus poeta; doctissimus Romanorum, omnium poetarum princeps.*

EDUCATION.

Education and Statesmanship in India. By H. R. JAMES. Second Edition. (4s. 6d. net. Longmans.)

Mr. H. R. James's work on Indian education deservedly reaches its second edition, the first having been issued three years before the War broke out. Mr. James wrote to defend the policy of the Government, and to remove misunderstandings which, in his view, lay at the root of a good deal of adverse criticism. The War, he says, has been a test, and may reasonably be claimed as a complete vindication of the main thesis of his book. "A system which has shown its results in such splendid loyalty and munificence and valour at a time of supreme crisis—results not to be paralleled in the world's history—cannot have been mistaken." But the programme of reform planned in 1913, a programme which embraces all grades of education, has of necessity been for the most part suspended during the War. It will, says Mr. Marsh, go forward on the return of peace. Yet when peace is restored the need of a right understanding of educational problems in India will be greater than ever. Mr. Marsh writes from the conviction that only better education can overcome the difficulties of inevitable political transition.

Human Nature and its Remaking. By WILLIAM E. HOCKING. (12s. 6d. net. H. Milford: Yale University Press.)

To those who are willing to do some hard thinking, and be led back to first principles, this stimulating study in human personal development, both in its individual and social aspects, by the Professor of Philosophy in Harvard University, may be warmly commended. Dr. Hocking skilfully surveys, in a series of illuminating chapters, the whole wide field suggested by his title, in its broader aspects. This discussion, which seems to us to be singularly well-balanced and well articulated, is divided into seven parts, which, after a preliminary "orientation" (Part I), deal respectively with "the natural man," "conscience," "experience," "society," "art and religion," and "Christianity." We can only here refer cursorily to the author's treatment of "Education," which forms the subject of a special chapter in Part V. In accordance with his view of human nature as a group of instincts which require for their development "exposure" to their appropriate stimuli, he insists that Education has an instinctive basis and function. Its *milieu* must be a society which has developed "social self-consciousness and self-criticism."

But though it proceeds necessarily in an attempt to reproduce the type from which it springs, it must provide for growth beyond, and variation from the type. "To bring instincts into action, all that any social environment need do (and almost all it can do) is to supply the right stimulus, together with an indication of what the stimulus means. A response cannot be compelled; for whatever is compelled is not a response. No behaviour to which we might drive a child would be play; if playthings and playing comrades fail to bring out the play in him, we are all but helpless. A response can only be *educated*." Dr. Hocking rightly sees that if definite religious teaching is to be excluded, some adequate substitute must take its place. "The pre-war experience of France in secular education has furnished a striking instance of the principle that in education a vacuum is equivalent to a negation. In one case, as in the other, instinct is robbed of its possibility of response." The author insists that an essential and fundamental part of education is concerned with the *will*, with evoking and guiding the instinct of "the will to power." He makes some wise remarks on the importance of "proportion" in any educational system, of "happiness" in the teacher, and of the necessity of ultimate "self-elimination of society" in the process of a true education.

The Port-Royalists on Education. By H. C. BARNARD.
(7s. 6d. net. Cambridge University Press.)

In his "The Little Schools of Port-Royal," Mr. Barnard has already treated his subject in the orthodox way of the University training college. Here he gives us that newer sort of book that is rapidly coming into favour with those who teach the history of education. We are presented with the actual work of the Port-Royalists themselves. Enough is given by way of introduction to enable the student to place the movement in the general line of educational development. Further, there is an account of each of the prominent people connected with the movement. But the body of the book is taken up with the actual writings of the "Gentlemen." The selection has been well made, with the result that we have here a thoroughly representative body of doctrine that will give the student the chance of forming his own opinion of the real meaning and importance of the contribution of this remarkable educational institution. The book is well adapted for class use, but is so self-contained that the private student will find in it all that he can possibly want. At first we were inclined to cavil at the "Notes," and to make disagreeable references to the old-fashioned annotations to Shakespearean texts. But to our surprise we found ourselves glad to fall back upon the notes on our own account—as, for example, to find out who was "the greatest man of recent years." Accordingly, we welcome the whole book, notes and all, as a valuable addition to the literature on the subject.

Pedagomania. By a BACHELOR OF ARTS.
(4s. 6d. net. Fisher Unwin.)

There is material enough here to form a good magazine article. But "A Bachelor of Arts" has no right to ask the public to spend its time on his unwholesomely distended pages. It is not that the subject does not lend itself to humorous treatment—such treatment is greatly to be desired—but that the method is not well applied. The Simple Simon style is here carried to a ridiculous excess, and repels the reader. The strength of the book lies in the typification of the ancients and moderns. There are some excellent points, too, in the "Methods of Teaching." If the author will cultivate self-restraint, and take a little more trouble, he has the ability to produce a really effective bit of humorous writing.

The Gary Schools. A General Account. By A. FLEXNER and F. P. BACHMAN. (25 cents. New York: General Education Board.)

Hitherto the Gary system has been presented to us either in terms of glowing eulogy or of grim distrust. Here we have a reasoned statement of the scheme as it actually is. The writers have been afforded every opportunity, and have fully availed themselves of all that has been offered. A good many misconceptions are removed by the plain statements of fact here made. While not unfriendly to the novelties involved in the Gary plan, the writers maintain an eminently judicial attitude, as is to be expected from experts who have been called in by an educational authority to report upon the education provided. The general conclusion reached is that in the ordinary school subjects the Gary schools barely hold their own as compared with other districts, but that, in the newer lines of workshop and laboratory work and in wholesome physical training, they are in advance. The authors are almost too diffident in passing opinions. In any case they regard the system as still under observation. "The 'duplicate' school organization should, therefore, be viewed as an experiment to be watched and modified, rather than assumed as a principle according to which a school schedule may be arbitrarily arranged." Other volumes are to follow this general account.

The Music of Life. By CHARLES T. SMITH. (6s. net. King.)

Here we have an account of the artistic work done by an enthusiastic assistant master in an elementary school in the Isle of Dogs. Mr. Smith obviously has been remarkably successful in his music teaching, and he is particularly proud of producing grand opera ("Faust") with elementary-school children as performers. We wonder whether he has read what Dr. Percy Buck has written on school concerts on page 308 of "The New Teaching." We must leave the experts to fight it out amongst themselves, but the problem of the number of "parts" to be used in school choral work need not obscure the whole firmament. Mr. Smith has done an admirable piece of work in supplying us with examples of how appreciation of the various forms of art may be cultivated in the elementary schools. It is pathetic to read his descriptions of things as they are and as they might be. He recognizes all the difficulties of the situation, but faces them in a spirit of optimism that cannot fail of success in his own case, and may well stimulate others to emulate him. He does not limit himself to music and dancing. He supplies a remarkable chapter on the teaching of art—a chapter that deserves the respectful attention of all who are honestly desirous to improve the condition of our working classes. We wish Mr. Smith God-speed in his work.

Biology of Sex, for Parents and Teachers. By Dr. T. W. GALLOWAY. (2s. net. Heath.)

Though the fact is strangely enough ignored in this re-issue, we may mention, lest any reader should be misled, that Dr. Galloway's book was published first in America in 1913, and that there is little difference between the new edition and the old. We gladly direct attention, however, to this edition published in England because of our high opinion of the book. Whatever one's views may be about sex instruction, there is no doubt that adults responsible for the training of children should themselves be duly instructed. It is for them that Dr. Galloway writes, and they could not have a saner or a more suggestive guide. Some books on the subject are coldly scientific, and others are far too sentimental. Dr. Galloway's matter and manner strike us as just right. An excellent instance in point is his suggestion for dealing with a boy addicted to self-abuse. We unreservedly recommend the book to our readers.

Living Water: Chapters from the Romance of the Poor Student. By HAROLD BEGBIE. (2s. 6d. net. Headley.)

All our readers have heard of the interim Report of the Committee on Adult Education, and we hope that most of them have made acquaintance with it. We can hardly describe Mr. Begbie's little book better than by saying that it may be regarded as a most refreshing and illuminating concrete commentary on that Report. A dozen examples of the poor student, with his ideals and his struggles, of the working man who is not ashamed of his labour but is profoundly dissatisfied with his ignorance and the ignorance of his class, are here vividly and sympathetically described. The prevailing note of the book is that the modern labour movement, which has, perhaps, inevitably struggled only for material objects, has got to learn that man does not live by bread alone, and that "no worse fate could befall a country than to be governed by an uneducated democracy." The operations of the Workers' Educational Association and of kindred movements receive fine illustration in Mr. Begbie's most interesting sketches.

Patriotism and Popular Education. By HENRY ARTHUR JONES.
(3s. 6d. net. Chapman & Hall.)

This passionate and often indignant discourse deals with a thousand and one subjects as diverse as the conditions of our theatres and the League of Nations, or slang and internationalism, and is addressed in the form of a letter to Mr. Fisher, as President of the Board of Education. It is not meant to be a textbook for teachers, but they, in common with other citizens, will find what Mr. Jones has to say both thought-compelling and heart-searching. We heartily agree with him that the first great lesson of popular education is that honest, careful, useful, productive work for our fellows, each in our allotted sphere, is the first and main duty of us all to the State. All careless, scamped, and dishonest work is a crime against the State. With another of his governing rules for popular education there will be less complete agreement, though the great majority will acquiesce: it should impress every boy with the idea that it is his duty to defend his country, and prepare him so far that he may easily be made fit for that duty. Mr. Jones accuses himself of "most irritating and wearisome reiteration," and we have to confess that we think the book would have been greatly improved by severe pruning. And if the word "whimsies" could have been used a little less frequently one reader would have been saved much irritation. If some day Mr. Jones could say, in the length of one of the seven chapters of the present volume, where he thinks our education has gone wrong and how he would propose to put it right, severely restraining himself at each step and

avoiding every alluring byway, he would probably do a real service to the cause of education, which he has very much at heart.

FRENCH.

"Manchester University Modern Language Texts."—(1) *Alfred de Vigny: Poèmes Choisis*. Edited by E. ALLISON PEERS. (3s. 6d.) (2) *Selected Letters of Madame de Sévigné*. By Prof. A. T. BAKER. (3s. 6d.) (Longmans.)

(1) We welcome the series of texts which the Manchester University Press is issuing, because they are the products of British scholarship, and are thoroughly British both in substance and manner. We have always held that the study of French literature in this country will never be anything but a sickly exotic till it is inspired and guided by British scholars. Not, of course, because British scholars are superior to French scholars; on the contrary, where French literature is concerned, they must obviously be in many ways inferior, but because in all teaching perfect sympathy with the mind of the pupil is of more importance than profound learning, and, just as English literature is interpreted to Frenchmen and Germans by their fellow-countrymen, and not by Englishmen, so French and German literature, so far as it needs interpretation, must be interpreted to Englishmen by Englishmen. And the authors of the two books before us both treat their subjects in British fashion. Mr. Peers dwells on de Vigny's stoicism rather than on his *sensibilité*; he has little to say about Mme de Dorval, and scarcely touches his author's literary technique. It is remarkable that "Eloa," the poem so much admired by Frenchmen, is not mentioned in his introduction, except in two quotations from French authors. Indeed, the only side of de Vigny's character fully dealt with is his pessimism. Of this and of the parallel sentiments in contemporary poets in England, Spain, and Italy, Mr. Peers has made a thorough study, and his sketch is valuable and informing. He has also traced the fortunes of de Vigny's poetry with learning and ability. His treatment is enthusiastic rather than critical; but, as these texts are intended for University students, this is a fault on the right side. We think it a mistake, however, that he has given no account of de Vigny's life; from the introduction we do not learn even that the poet was a soldier whose military experiences had considerable effect on his character. The notes give us the sources of the poems, and explain the more recondite allusions. There is an extensive bibliography.

(2) Prof. Baker has given us a useful selection of Mme de Sévigné's letters, but they occupy only a trifle more than half his book—108 pages as against 101 devoted to introduction and notes. University students might benefit perhaps by having more of the author's work and less of the editor's. The introduction might have been shorter. Do we need a sketch of French history from 1589 in order to understand correspondence written between 1667 and 1691? The really valuable portions of the essay are those which describe the social life of the period: for instance, the more serious side of Court society, the books read by ladies, the doctors, the Army, the Post Office, and the roads. The notes also contain a mass of valuable information on contemporary personages and contemporary manners. To this rather than to questions of language Prof. Baker has wisely devoted his space. Indeed, it is one of the best points of both books that linguistics occupy very little room. There is a short, but useful, bibliography.

A Matriculation French Free Composition. By F. A. HEDGCOCK and HENRI LUGUET. (2s. 6d. net. Bell.)

Nothing is so badly done in language examinations as the Free Composition, says the preface to this book. This comes as a blow to us; we had been led to believe that in free composition lay the solution of the problem of teaching French composition. Dr. Hedgcock and Mr. Luguët do not despair of Free Composition, and they have written their book in the hope of improving it. The volume contains twenty pieces of French adapted from French authors, or in some cases from French newspapers, or imitated from English writers. Each is followed by (1) notes in French on difficult points, (2) *questionnaire*, (3) English sentences for translation into French; (4) exercises into Free Composition. The principle is that the French matter should be worked up into every variety of form, and so be assimilated by constant use. The idea is good, but it seems a mistake to give under *Sujets à développer* pretty full analyses of the proposed essay. The student is left with nothing to do but form the words into sentences, and the method has a suggestion of cram about it. Two or three of the pieces strike us as rather trivial—for example, *Le Bon Marché* and *Un Raid de Zeppelins*—and we cannot agree with the authors that the passages are hard enough to afford practice in unseen translation. But the book, as a whole, is well worth examining by those who are dissatisfied with the Free Composition of their advanced pupils.

GEOGRAPHY.

The Kingsway Book of Geography Stories. By R. J. FINCH. (Evans.)

As Mr. Finch says, "all children love stories," but we rather fancy they resent any tampering with the story to make it teach the beginnings of some subject or other. Healthy children love learning, and like to know about the world and its peoples, and if the teachers will only talk about these in a simple and natural way they will have no difficulty in arousing and maintaining interest. But teachers who cannot talk simply and naturally, and want ready-made stories that will keep the attention of their classes and impart useful knowledge at the same time, cannot do better than make use of Mr. Finch's help.

The Kingsway Book of Famous Explorers. By R. J. FINCH. (Evans.)

The story of the great navigators and explorers who were pioneers in world-discovery is well told in this book, and geography teachers will find it useful in the preparation of their lessons. The ten simple sketch-maps will serve excellently as blackboard illustrations. Mr. Finch's large experience has enabled him to confine his attention to the essential facts in each case.

"The Human Geographies."—Book I: *Children Far Away*.

By ERNEST YOUNG. (1s. 6d.) Book II: *Homes Far Away*.

By ERNEST YOUNG. (1s. 6d.) Book III: *The British Isles*. By J. FAIRGRIEVE and E. YOUNG. (1s. 9d.) (Philip.)

These books can be thoroughly recommended to teachers desirous of emphasizing the relation of man to his environment. Books I and II provide an excellent approach to the formal geography lessons which will come later; they are particularly well illustrated. Book I consists chiefly of fairy tales of the Eskimo, Red Indian, Negro, and others. Mr. Young not only writes in a simple, pleasant style, but he knows exactly how to tell a fairy tale to little people.

Book II is a little more advanced; ten different types of people are chosen, and the conditions under which they live are described in an interesting manner. Book III provides a good introduction to a more detailed study of the British Isles. The human factor is kept in view throughout the book, and great care is taken to show why important towns have grown up at particular places. In Chapter XIII it should be pointed out that London originated as a place of defence, and not as a bridge town, and reference should also be made to the growth of Westminster as a separate city. In a second edition, the statement (page 19) that "the first Christian missionaries built Canterbury Cathedral" should be corrected.

HISTORY.

Characters from the Histories and Memoirs of the Seventeenth Century. Edited, with Introduction and Notes, by D. N. SMITH. (6s. net. Clarendon Press.)

Prof. Nichol Smith has produced, with much skill and learning, a book of remarkable charm. It contains seventy-six biographical sketches of notable men of the Stuart period, beginning with James I and ending with James II, written by their contemporaries. The excellence of the sketches justifies Prof. Smith's judgment that the seventeenth century was "the great age of the character in England." Of the "characters" here presented no less than thirty-five are from the pen of Clarendon. Bishop Burnet comes second with nine delineations. Other writers are Sir Philip Warwick, Thomas Fuller, and John Dryden. The volume is prefaced by a long introductory essay by the editor on "The Character." It is an important and most original contribution to the study of English literature.

Russia: from the Varangians to the Bolsheviks. By R. BEAZLEY, N. FORBES, and G. A. BIRKETT. (8s. 6d. net. Clarendon Press.)

This is a book of great interest and value at the present time. It is of the highest practical importance that the problems which Russia presents should be studied dispassionately and seriously, and these problems can be approached satisfactorily only by the avenue of history. The last few years have witnessed the publication of several Histories of Russia varying much in length and in quality. None, however, of these recent publications can compare in fullness or authority with this book, which is the joint product of three writers, all of whom are qualified by both linguistic and historical attainments to treat their subject with complete mastery. Prof. Raymond Beazley, of Birmingham, provides a sketch (82 pages) of early Russian history from the coming of the Varangians or Swedish Vikings in the ninth century to the death of the founder of the Tsardom, Ivan the Great, in 1505. Mr. Nevill Forbes, Reader in Russian at Oxford, carries on the narrative (260 pages) to the beginning of the nineteenth century. Mr. G. A. Birkett, Russian Lecturer in Sheffield University, completes the story (210 pages), bring-

TEACHERS REGISTRATION COUNCIL.

REPRESENTATIVE OF THE TEACHING PROFESSION

(Constituted by Order in Council of 29th February, 1912.)

THE

OFFICIAL LIST

OF

REGISTERED TEACHERS

IS MAINTAINED BY THE COUNCIL.

**The Official List contains the names
of all qualified teachers who have
applied to become Registered, and
have been accepted by the Council.**

Unregistered Teachers should apply at once to

THE SECRETARY,

**Teachers Registration Council, 47 Bedford Square,
London, W.C.1.**

ing it down to the abdication of Nicholas II. The book also contains an able and illuminating introduction by Mr. Ernest Barker, who tries to interpret in the light of history and political science the meaning of the Russian Revolution. Numerous tables, a bibliography, and six maps, further increase the usefulness of what will for long be regarded as an indispensable textbook of Russian history.

"Empire Builders."—(1) *An Empire Builder of the Sixteenth Century*. By L. F. RUSHBROOK WILLIAMS. (7s. 6d. net. Longmans.) (2) *Thomas Coram, Empire Builder and Philanthropist*. By H. F. B. COMPSTON. (3s. 6d. net. S.P.C.K.)

(1) The Empire builder described by Mr. Rushbrook Williams is Babur, the founder of the Mughal, Mogul, or Mongol dominion in India. Mr. Williams has been able to draw upon sources unknown to both Erskine and Lane Poole, the earlier biographers of the great Mohammedan leader. He has produced within reasonable compass a scholarly and readable life which easily takes rank as the authoritative exposition of its theme.

(2) The seventeenth-century Empire builder of whom Mr. Compston treats is a man whose walk in life was much humbler, less sanguinary, and more beneficent than that of Babur. Thomas Coram, a native of Lyme Regis, was a pious and prosperous English seaman whose useful and honourable career was marked by a prominent share in the colonization of Georgia and by the establishment in London of the Foundling Hospital. Mr. Compston has written a fascinating sketch from original sources.

Reference History of England. By M. E. H. HUNTER and G. G. LEDSAM. (6s. net. Melrose.)

The two ladies who have compiled this full and laborious reference history anticipate the reviewer by assuring the public in their preface that the book will be "of great assistance" . . . to examinees, to private students, and to pupils in schools. All that remains for the reviewer to do is to say that their testimonial to themselves is well justified by the conscientious contents of their work. Beginning with William the Conqueror and ending with Bernard Shaw, it gives masses of well classified and briefly summarized information not easily procurable in anything like so accessible a form elsewhere. There are few students, and indeed few teachers of history, who could not double their stores of useful and interesting knowledge by a judicious use of this reference book in

conjunction with their ordinary textbooks. Numerous outline maps and tables enhance the value of the volume.

The Making of Modern Italy. By M. C. BAYLEY. (7s. 6d. net. Cassell.)

This book provides an interesting sketch of the history of Italy during the critically important period, 1814 to 1875. It does not profess to add anything to knowledge, and the list of the couple of dozen "chief authorities consulted" consists entirely of works either written in or translated into English. Hence its purpose is distinctly popular. This modest purpose, however, it fulfils distinctly well. It is adorned with seven portraits and reinforced by a map.

America and Britain. By A. C. McLAUGHLIN. (4s. 6d. net. Dent.)

In May 1918, Prof. McLaughlin, Head of the Department of History in the University of Chicago, came to England on the invitation of the Imperial Studies Committee of the University of London, in order to explain to academic audiences in this country the attitude of America towards the War. He delivered a series of lectures at the various Colleges of Great Britain which attracted large attendances and excited much interest. The present volume comprises five of the more important of these timely utterances. The first lecture—on America's entry into the War—served a purpose which has now ceased to be urgent. The remaining four lectures, however, deal with themes of permanent historical interest, viz. British and American relations from 1783 down to the present day, the Monroe Doctrine, and the Background of American Federation. The lectures make very good reading, and there can be no doubt that they will serve the useful end of increasing the mutual understanding which is re-uniting in spirit the long severed sections of the Anglo-Saxon race.

MATHEMATICS.

A Treatise on Gyrostatics and Rotational Motion. By A. GRAY. (42s. net. Macmillan.)

This comprehensive treatise on the dynamics of spin comes with peculiar appropriateness from the pen of the successor of Lord Kelvin in the Chair of Natural Philosophy at Glasgow. The famous work of Thomson and Tait played a leading part in revealing the importance, the beauty, and the complexity of the pheno-

(Continued on page 416.)

From MR. HERBERT RUSSELL'S LIST.

English Composition: A Systematic Course for School Use. By HARRY PINE, with an Introduction by F. H. HAYWARD, D.Lit., M.A., B.Sc.

Teacher's Edition. Crown 8vo, cloth. Price 2s. net.

Pupil's Edition. In Two Parts. Price 6d. net each.

The work is intended for class use, and aims at the direct teaching of composition on a definite plan by means of a series of original and progressive exercises. These are designed to correct the faults most frequently found in children's composition, both oral and written. It forms the basis for the teaching of children of all ages, and yet leaves plenty of scope for originality on the part of the teacher.

School Poetry (Part I) for the Junior Division. Crown 8vo, limp cloth, 64 pp. Price 6d. net.

School Poetry (Part II) for the Senior Division. Crown 8vo, limp cloth, 144 pp. Price 9d. net.

It is published in two Parts, each containing three Sections so graded as to meet the requirements of three consecutive classes or standards—Part I is designed to serve the Junior Department, and Part II the Senior Department of the School.

Book Ways: A Fascinating History of English Literature. By EDITH KIMPTON, M.A., A.K.C. New edition with a prefatory letter by the late THEODORE WATTS-DUNTON. 8vo, cloth, 296 pp. Price 3s. net.

A Comparative Geography of the Six Continents. By ELLIS W. HEATON, B.Sc., F.G.S.

Treated under two main divisions—(a) The Three Northern Continents; (b) The Three Southern Continents. Containing 119 Maps and Diagrams, all new and specially drawn for this work, and 10 full-page Photographic Plates. Crown 8vo, cloth, 319 pp. Price 2s. 6d. net.

Copies lent from our Office Library on application to

MR. HERBERT RUSSELL, 35 & 36 TEMPLE CHAMBERS, LONDON, E.C. 4.

Plant Study in School, Field, and Garden. A textbook on Rural Science and Gardening. By J. S. BRIDGES, B.Sc., F.C.S., Director of Education for Willesden, and A. J. DICKS, B.A., B.Sc., F.L.S., Head Master of Walthamstow County Secondary School. Crown 8vo, cloth, 432 pp. Price 4s. 6d. net.

Inorganic Chemistry, both Practical and Theoretical, with Chemical Calculations and Graded Questions. The best, latest, and cheapest textbook on the subject produced for the requirements of the University Locals. By S. W. BURNELL, LL.B., B.Sc., and A. J. DICKS, B.A., B.Sc. Crown 8vo, cloth, 376 pp. Price 4s. 6d. net.

The Junior Scientific Geographies.

By ELLIS W. HEATON, B.Sc., Principal, Tynemouth Municipal High School.

(1) **Junior Physical Geography**. 1s. 9d. net. (2) **Junior British Isles**. 1s. 6d. net. (3) **Junior British Empire**. 1s. 6d. net. (4) **Mediterranean Region**. 1s. 6d. net. 143 CANNON STREET, LONDON, E.C.4. Telephone: Central 5053.

mena dependent upon gyrostatic action, and to Kelvin and his successor we are indebted for many ingenious experiments illustrating the theory of these phenomena. The introductory chapter contains a non-mathematical account of gyrostatic action, together with descriptions of the principal practical applications of the same which had been made before the outbreak of the War. In the preface the promise is made that after the War a supplementary part will be published describing a variety of gyrostatic devices which are now used for naval and military purposes and in engineering. We have no doubt it will contain some interesting revelations of the part played by science in obtaining victory. The development of the theory of the subject is in the main due to Poincaré, Thomson and Tait, Greenhill, and Klein and Sommerfeld, and much space is naturally devoted to their work. At the same time the contributions which other mathematicians have made to the elucidation of particular problems are passed in review, and accounts are given of recent discussions relating to such matters as the free precession of the earth's axis and the Eötvös revolving balance. It is, of course, impossible to proceed far without introducing elliptic functions, and unfortunately the meaning of expressions containing such functions is not as readily perceived as when only algebraic or circular functions are involved. Numerical evaluation by the aid of tables would assist, but though abbreviations of Legendre's Tables of the first two integrals are readily obtainable (though the author does not appear to be aware of the fact), the evaluation of the third species has to be performed in every case *ab initio*. A chapter is therefore devoted to the explanation of methods of evaluating the integrals, and further examples, with diagrams illustrating the motions, will be given in the supplementary volume. The author has certainly rendered a great service to mathematicians and physicists in bringing together such a vast amount of material which has remained hitherto scattered amongst many books and periodicals. At the same time he has made original contributions both on the practical and theoretical sides of no small importance. We have only to add that the volume is produced in a way reflecting the greatest credit on printers and publishers.

RELIGIOUS KNOWLEDGE.

The New Testament for Schools. Arranged and edited by Canon MORLEY STEVENSON and C. W. BAILEY. (3s. 6d. net. Dent.) In this arrangement of the text of the New Testament the English

text of the passages is given in the language of the A. V. with some few and slight corrections. The extracts are furnished with appropriate headings (which give the reference): there are no notes: The collection is divided into two parts: Part I deals with the life of Christ; Part II with the History of the Early Church. In the latter the text of the Acts furnishes the basis of the narrative; at appropriate points extracts from the Pauline and other letters are introduced. The whole concludes with a brief extract from the Apocalypse (Rev. vii, 9-17). We welcome such attempts as this which may ultimately lead to the production of a real "Children's Bible," i.e. a Bible specially edited for school use. The right principles are here embodied. If such an edition is ever to be realized, it can only come ultimately, perhaps, from some authoritative Committee, which ought to include representatives of religion and education. We may add that children who work through the edition of Canon Stevenson and Mr. Bailey will gain quite an adequate idea of the New Testament as a whole.

"The Modern Churchman's Library." — *The Evolution of the Christian Ministry.* By J. R. COHU. (Cloth, 3s. 6d. net; paper covers, 2s. net. Murray.)

Mr. Cohu's volume is useful and interesting. Its aim is to give "an accurate account, free from ecclesiastical bias, of the evolution of the Christian Ministry from the Apostolic age to the present day." Perhaps this is a somewhat ambitious programme, which could hardly be fully achieved in a small volume of 124 pages. Nevertheless the book is thoroughly competent, and avoids both undue compression and superficiality. The author is thoroughly at home in the literature of the subject, and his pages are never dull. The following paragraph will illustrate his view of the growth of the bishop as distinct from "elders" and "deacons" in Apostolic times:—"Thus (1) as presiding at the council-meetings of elders, (2) as almoner-in-chief, (3) especially as officiating at the Holy Communion—the president-presbyter, though only one of the elders, was already chief among his peers; while the deacons were far more closely associated with him than with the other elders, both in the care of the poor and in Holy Communion. Here we have the first stage on the road to the later monarchical bishop surrounded by his council of presbyters; also the first stage in the close association existing later on between bishops and deacons. In

A SOCIAL HISTORY OF ENGLAND

BY

FREDERICK BRADSHAW, M.A. Oxon., D.Sc. Lond.

Lecturer in Economic History at Armstrong College,
 Newcastle-upon-Tyne.

The primary object of this volume is to supply within reasonable compass a textbook suitable for use in Colleges and Upper Forms of schools, and dealing with such matters of social and economic history as are not to be found in the ordinary history textbooks, which as a rule devote themselves solely to political and constitutional topics.

"The book illustrates the indissoluble connexion between social progress and education."—TIMES EDUCATIONAL SUPPLEMENT.

"A clear and concise textbook which offers a compendium of the development of our social institutions from the Stone Age to the present day, exceedingly well expressed and well set out—it is indeed the best book of reference on this difficult topic that we have seen."—GUARDIAN.

later days the monarchical bishop was so much more closely associated with deacons than with presbyters that it is the chief representative of the deacons, the archdeacon, who is the bishop's 'eye' and lieutenant, and usually his successor" (page 24). Mr. Cohu values the episcopal form of church government as safeguarding continuity, and as possessing other merits, but does not regard it as absolutely essential. He shows that till 1662 the Anglican Church did not insist on episcopal reordination in the case of ministers who had been ordained abroad in the reformed (non-episcopal) churches, allowing such ministers to hold benefices in England with cure of souls. He denounces "sacerdotalism" as a retrograde development, alien to the spirit of the New Testament.

Religio Grammatici: The Religion of a "Man of Letters."

By Prof. GILBERT MURRAY. (1s. net. Allen & Unwin.)

This is the Presidential Address delivered to the Classical Association in January of last year, which is now published in pamphlet form for the benefit of those who are not members of the Association. Although, perhaps, somewhat more ephemeral than the majority of Prof. Murray's utterances, it is no mean expression of the eternal worth of literary values, for which reason it should especially be read at a time like this, when such things stand in some danger of being temporarily forgotten.

The Epistle to the Philippians. With Introduction and Notes.

By MAURICE JONES. (7s. 6d. net. Methuen.)

If learning and dullness often seem to be inseparable, the work of Dr. Maurice Jones is a conspicuous exception to the rule. His pages teem with learning, but they are never dull. He writes with a verve and enthusiasm which will carry away the most lethargic reader. In an introduction which occupies nearly a hundred pages he discusses vividly, and in the light of the most recent research, the great themes suggested by the Epistle. This Introduction is an excellent piece of work. Every point is fully discussed. Not only are such topics dealt with as the place where the Epistle was written, its authenticity and integrity, occasion and purpose, historical value and characteristics, but there are sections devoted to the history and development of Philippi, the historic significance of which is well brought out, and a remarkably fresh treatment is given to the idea of the Church in the Epistle, and the origin of the Christian Ministry. Here Dr. Jones owes much to Hamilton's *People of God*. In the doctrinal section the Kenosis Theory is thoroughly well treated. In the commentary proper, which follows, the notes are full and remarkably readable. The reader is also helped by a good paraphrase. In his Preface the author says: "This commentary is throughout the product of the War period, and every line of it was written under the shadow of the deplorable calamity that has overcome this world of ours. . . . I can imagine no more effective mental or spiritual tonic, and no more powerful incitement to patience, courage, and joy, however gloomy and depressing the outlook may be, than the study of this letter." We are confident that readers of this commentary will feel some of the author's enthusiasm as they study his fresh and illuminating exposition.

SCIENCE.

Alternating Current Electrical Engineering. By PHILIP KEMP. (17s. net. Macmillan.)

The author has covered the main ground of modern alternating current practice, and intends the work to be an aid to candidates for the Grade II examination in this subject for the City and Guilds and the University examinations for B.Sc. in Electrical Engineering, as well as to the electrical engineer in general. An advanced knowledge of mathematics is not required in the reader, as the vector work is treated fully, and a working knowledge of trigonometry will suffice. Certain problems are treated by the calculus, but these can be omitted without serious loss. In the earlier chapters alternating quantities, including E.M.F.'s, currents, and magnetic fluxes, are treated in the usual manner. Then follow Inductance, Reactance, Impedance, Power and Power Factors, with their measurement, in an interesting and comprehensive manner. In the chapter on Wave Form the author gives several methods of harmonic analysis, including one of his own, which is accompanied by a schedule for enabling the amplitudes and phases of the first seventeen harmonics of a wave to be obtained with a minimum of labour. Transformers and alternators are dealt with comprehensively; in each case a chapter on design follows the account of the main principles. In the remaining chapters synchronous motors with power factor improvement, rotary converters, rectifiers and valves, rotating fields, induction motors, motor converters, series motors, and repulsion motors are dealt with. The subject is treated in a sound manner and the book is illustrated amply and supplied with many worked examples. The book is decidedly an acquisition to the literature available for the student of electrical engineering.

A SELECTION FROM GINN AND COMPANY'S MODERN LANGUAGE LIST

SPANISH.

PRIMERAS LECCIONES DE ESPAÑOL. By MARCIAL DORADO. 307 pages. Illustrated. 4s. net.

An attractive text for use by the pupil who is beginning the study of Spanish. The lessons are brief, and each contains a vocabulary, reading matter, conversation and exercises involving only the simplest words in common use. The reading matter consists of brief stories, simple descriptions of Spain, dialogues, &c. Folk songs, with their musical accompaniments, form an integral part of the text. Grammatical rules and explanations are given in English, and the book contains much material for oral drill and conversational practice. There are five full-page illustrations and many smaller sketches of Spanish life and customs.

A FIRST READER IN SPANISH. By R. SCHEVILL. 181 pages. 3s. net.

ELEMENTARY SPANISH READER. Edited by E. S. HARRISON. 79 pages. 2s. 6d. net.

INTERMEDIATE SPANISH READER. Edited by E. S. HARRISON. 234 pages. 3s. 6d. net.

SPANISH COMMERCIAL READER. Edited by E. S. HARRISON. 238 pages. 4s. net.

ESPAÑA PINTORESCA. By MARCIAL DORADO. 332 pages. 4s. net.

A reading book for the student who has done some preliminary work in Spanish. The selections of which the book consists have been chosen because they are illustrative of what is most distinctive in Spanish civilization. They are simple but of real literary quality, such authors as Santa Teresa, Lopez de la Vega, Selgas Pio Baroja, Trueba Marquina having been drawn upon. Games and songs are included in the text. Other valuable features are the questionnaires for oral practice, exercises for translation, in the form of a diary of a girl travelling in Spain, based on the text, and the inclusion in the vocabulary of all irregular verb forms occurring in the text.

TROZOS DE HISTORIA. By F. E. SPENCER. 210 pages. 3s. 6d. net.

MARIA. By G. ISAACS. Edited by R. H. KENISTON. 209 pages. 3s. 6d. net.

EL PAJARO VERDE. By J. VALERA. Edited by G. G. BROWNELL. 69 pages. 2s. net.

DOÑA PERFECTA. By P. B. GALDÓS. Edited by A. R. MARSH. 271 pages. 4s. 6d. net.

ITALIAN.

AN ITALIAN GRAMMAR. By R. S. PHELPS. 328 pages. 5s. 6d. net.

A book which serves the double purpose of a lesson book for beginners and a grammar for reference purposes in more advanced work. The first twenty-seven lessons equip the student to read easy Italian narrative. The early part of the book is particularly easy, the difficult subjects being broken up and studied in sections, but before the book is finished all the essentials have been treated thoroughly.

DUE COMMEDIE MODERNE:

O BERE O AFFOGARE. By LEO DI CASTELNOVO.

LUMIE DI SICILIA. By LUIGI PIRANDELLO. Edited with Notes and Vocabulary by EMILIO GOGGIO. 130 pages. 2s. 3d. net.

These two comedies of present-day Italy contain many of the simple colloquial expressions necessary for any real acquaintance with the language. The editorial matter consist of brief biographical sketches of the two authors, notes, and a vocabulary.

FRENCH.

LE FRANÇAIS POUR TOUS par la méthode directe. By NOELIA DUBRULE. Illustrated. 281 pages. 4s. net. [In the press.]

A first year book. It is composed of 33 picture units (La Salle de Classe, La Bibliothèque, La Maison, La Cour, Le Petit Salon, &c.), each of which, considered as one week's work, is divided into four parts, each representing one day's work. As an aid in the acquirement of a vocabulary, there are many interesting *jeux de mémoire* or *jeux d'esprit*; *chansons* with their accompaniments form an integral part of the book, while other interesting features are the thorough and frequent pronunciation drills and the adoption of the method, used in the schools of France, of beginning the study of the verb from the present rather than from the infinitive. A model lesson is included in the preliminary suggestions to teachers.

NOUVEAU COURS FRANÇAIS. By A. C. FONTAINE. 272 pages. 4s. 6d. net.

CONTES ET SAYNETES. Edited with Notes and Vocabulary by T. F. COLIN. 179 pages. 2s. net.

DIX CONTES MODERNES DES MEILLEURS AUTEURS DU JOUR. Edited with Notes, &c., by H. A. POTTER. 1s. 9d. net.

CONTEMPORARY FRENCH WRITERS. Edited with Notes by R. MELLÉ. 212 pages. 2s. 9d. net.

SAINT-SIMON: PAGES CHOISIES DES MÉMOIRES DU DUC DE SAINT-SIMON. Edited by A. N. VAN DAELL (with Notes in French). 238 pages. 3s. 3d. net.

GERMAN.

JUNG DEUTSCHLAND. By A. T. GRONOW. Illustrated. 264 pages. 4s. 6d. net.

A first year course in German which presents the fundamental principles of grammar in and through the language itself. Oral work is emphasized, and the subjects for discussion, reading and exercises have been chosen from the German home and the activities round it. The book contains numerous illustrations and has a very attractive appearance.

GESCHICHTE UND SAGE. By A. T. GRONOW. Illustrated. 330 pages. 4s. 6d. net.

A companion volume to the above intended for second year students. The subject matter is carefully graded, and consists of selections illustrating German life, scenery, history, literature and drama. In this volume the grammatical rules are given in English, but in all other respects the book is uniform with "Jung Deutschland."

FÜR KLEINE LEUTE. By A. T. GRONOW. 194 pages. 3s. net.

SCHRITT FÜR SCHRITT. By H. M. OEHLMANN. 151 pages. 3s. net.

ALTES UND NEUES. Edited, with Vocabulary, by K. SEELIGMANN. 125 pages. 1s. 9d. net.

LESSING: MINNA VON BARNHELM. Edited with Introduction, Notes and Vocabulary by R. A. VON MINCKWITZ and A. C. WILDER. 218 pages. 2s. 6d. net.

GOETHE: IPHIGENIE AUF TAURIS. Edited with Introduction, Notes, &c., by P. S. ALLEN. 218 pages. 3s. net.

Complete list of modern language texts on application. Books sent on approval to teachers.

THE BERGMAN ÖSTERBERG PHYSICAL TRAINING COLLEGE, KINGSFIELD, DARTFORD HEATH, KENT.

Trustees:

Sir GEORGE NEWMAN, M.D. (Chairman).
The Marchioness of SALISBURY.
Major the Hon. WALDORF ASTOR, M.P.
The Rt. Hon. CHRISTOPHER ADDISON, M.P.
The Rt. Hon. Lord SHAW OF DUNFERMLINE.

Principal:

Miss H. WALTON (Oxford Honour School Eng. Language and Literature).

Vice-Principal:

Miss A. WIKNER (Royal Cent. Inst. of Gymnastics, Stockholm).

The College was opened in 1885, and was the first of its kind in England. Students are prepared as teachers of Scientific Physical Education on Ling's Swedish System. The Course extends over two years. It includes the study of Anatomy, Physiology, Theory of Education; the Theory and Practice of Gymnastics, Massage and Medical Gymnastics, Dancing and Outdoor Games. Students practise teaching in schools in the neighbourhood. The College stands in its own ground of 23 acres, in a beautiful and healthy locality close to Dartford Heath.

The demand for mistresses of physical training holding the Diploma of this College is at present far in excess of the supply.

The course begins in **October**. Further particulars may be obtained on application to the **SECRETARY**.

BERGMAN ÖSTERBERG UNION OF TRAINED GYMNASIAC TEACHERS.

Ling's Swedish System.

Aim of the Union: To advance the cause of Physical Education on scientific lines.

In placing members of this Union as Teachers in Schools, careful and discriminating choice is exercised, and the exact requirements of each School specially considered.—**PHYSICAL TRAINING COLLEGE, KINGSFIELD, DARTFORD HEATH, KENT.**

INTERNATIONAL GUILD.

6 RUE DE LA SORBONNE, PARIS.

CLASSES in the French Language, Literature, History, and Phonetics.

Students are prepared for the Certificat d'Etudes Françaises of the Sorbonne, and the Diplôme d'Etudes Françaises of the Guild.

For further information apply to the **SECRETARY**.

CHANNING HOUSE HIGH SCHOOL AND BOARDING SCHOOL FOR GIRLS,

HIGHGATE, LONDON, N.6.

Head Mistress: Miss LILIAN TALBOT, B.A. Honours, London.

Pupils prepared for Matriculation and Intermediate Examinations of London University. Healthy situation, good playground and garden. Great attention given to physical training. Special terms for daughters of Unitarian Ministers. All inquiries to be addressed to the **HEAD MISTRESS**.

TEACHERS FOR SOUTH AFRICA.

QUALIFIED Women Teachers of all grades should apply to—**THE EDUCATION SECRETARY, South African Colonization Society, 23 Army and Navy Mansions, 115 Victoria Street, S.W.1.**

University Tutorial College.

LONDON.

(Incorporated with University Correspondence College.)

SUMMER VACATION CLASSES.

SEPTEMBER MATRICULATION.

A Recapitulation Class for the September Matriculation commences Monday, August 25th, and extends to date of Examination.

Annually for the last twenty-five years about 100 Students of the University Tutorial College have passed London Matriculation.

LEEDS UNIVERSITY.

ADMISSION OF STUDENTS. OCTOBER 1919.

THE next session of the University will open on Monday, the 6th October, 1919. Owing to the greatly increased demands upon the accommodation of the University, it is necessary that students desiring to enter in October next should make application at the earliest possible moment, and in any case not later than the 30th June. In the present exceptional circumstances, no guarantee can be given to reserve places for all desiring admission, especially in the case of those whose applications are received after the date mentioned. Should it be found necessary to limit the number of admissions, a preference will be given to the older students. Forms of application may be obtained from the SECRETARY, The University, Leeds.

Application need not be made by students who have already applied for acceptance as King's Scholars. Present students desiring to return to the University next session will fill up a special form which will be supplied by the SECRETARY.

UNIVERSITY OF LONDON, UNIVERSITY COLLEGE.

Students who desire admission to full-time Undergraduate Courses, in October next, should apply for admission immediately. Those who have just sat for Matriculation can make their applications contingent on success in that examination. Owing to the large number of applications already received, it is unlikely that any application will be successful that is received later than Saturday, July 5th.

WALTER W. SETON, M.A., D.Lit.,
University College London. Secretary.
(Gower Street, W.C.1.)

NORTH OF ENGLAND.

THE

CALDER GIRLS' SCHOOL,

Seascale, Cumberland.

Mountain and Sea air,
dry, bracing, and sunny.

The aim is to give a sound education to Girls on Public School lines.

One of the five houses is set apart for Juniors under 14 years of age.

Well equipped classrooms, laboratory, gymnasium, and good playing field.

Illustrated Prospectus on application to the Head Mistress.

THE INCORPORATED SOCIETY OF MUSICIANS.

FOUNDED 1882.

INCORPORATED 1892.

OBJECTS OF THE SOCIETY.

The objects for which the Society is established are the promotion of whatever may tend to the elevation of the status, and the improvement of the qualifications, of all Members of the Musical Profession, or may aid the musical education of the people.

ADVANTAGES OF MEMBERSHIP.

The inclusion of the names of members in an Annual Register, which is supplied to all Public Libraries and Reading Rooms, for the purpose of affording the public an opportunity of selecting qualified teachers. (The publication of this Register has been suspended for the moment owing to paper and other restrictions, but will be resumed as soon as possible.)

A quarterly periodical called "The Report," in which an account of the Society's work and other matters of interest are recorded, and which is open to members for the discussion of all questions relating to the musical profession.

A Benevolent Fund for members, the Regulations for which have purposely been made as wide as possible in order to meet the many and very varying contingencies which arise from time to time.

An Orphan Fund for the children of musicians, which is open to the dependents of all musicians, whether their parents were members of the Society or not.

Sectional Meetings, which are open to all members in all parts of the country, and at which excellent arrangements are made for the reading of papers and the discussion of matters musical.

Legal Advice on all professional matters; Income Tax Claims; Copyright; The Recovery of Fees, &c.

Registers open to members of "Vacant Appointments" and "Engagements," and for the transfer from member to member of pupils moving to new districts.

Registers of Hotel and other accommodation available for members when travelling to fulfil professional engagements.

LOCAL EXAMINATIONS IN MUSIC.

The examinations of the Society, established in 1884, are carefully arranged in a systematic series of Progressive Grades, embracing a complete course of musical study, and constitute a most valuable guide for Teachers in recording the progress of their pupils.

The Syllabus is prepared by a Committee of experienced Teachers, who are qualified by active practice to judge of the standard which should be attained by pupils in all stages of progress.

A limited number of Prizes and Scholarships are awarded to those presenting exceptional work at the Local Examinations, the Scholarships taking the form of a payment for the further musical training of the Student.

FULL PARTICULARS MAY BE OBTAINED UPON APPLICATION TO THE GENERAL SECRETARY, 19 BERNERS STREET, W.1.

"THE JOURNAL OF EDUCATION AND SCHOOL WORLD."

MARCH 1919; also January, February, and May, 1919. One Shilling each offered for copies in good condition, to complete urgent orders in hand from India, Australia, Japan, South Africa, Poland, &c.

(Founded 1890 by the Society of Friends.)—
This School for Boys from 12 to 19 stands on an
estate of 45 acres of park land. Its aim is to provide
a liberal education on Public-school lines; to develop
individuality and initiative; to encourage hobbies
and open-air life.

Leighton Park has its biological, chemical, physical
laboratories and working museum. There is also a
swimming bath, an astronomical observatory, and a
gymnasium.

Examinations will be held in February 1920 for two
MINOR OPEN SCHOLARSHIPS of £50 each for
three years.

For details and for Prospectus and Yearbook,
please apply to the Head Master, C. I. EVANS, M.A.,
Leighton Park School, near Reading.

Intermediate Science and

B.Sc. (Theoretical Subjects only),

L.L.A. (St. Andrews),

College of Preceptors' Diploma.

SINGLE subjects may be taken if desired.

Address—THE SECRETARY,
Burlington Correspondence College,
14 Elsham Road, Kensington, W.14.

SCHOOL
WORLD

WANTED. — Parts
for MARCH, 1904 (Vol. 6).

MR. JOHN DAVIS,
13 PATERNOSTER ROW, E.C. 4.

Posts Wanted.

POSTS ABROAD.

LADY TEACHERS are earnestly advised to consult the Continental Secretary of the Girls' Friendly Society, 14 & 16 Holbein Place, Sloane Square, London, S.W.1, before accepting any post abroad. Apply by letter, enclosing stamped addressed envelope. A small charge is made for verification.

GAMES, DANCING, SWEDISH GYMNASTICS.—For trained and certified teachers, having had experience, apply to THE SECRETARY, Association of Past Students, Physical Training College, Liverpool.

POST of VISITING ART MISTRESS wanted now or September by fully qualified Teacher R.D.S. (Ablett). Good Secondary School experience. Drawing, Painting, Design, Pen and Ink.—Miss WILMOT, 5 Carlyle Studios, King's Road, Chelsea, S.W.3.

YOUNG Lady educated at Versailles High School seeks a situation as **TEACHER OF FRENCH** in a school. Best certificates, secondary-school diploma, University degree. Can teach Music, Drawing, Water Colours too. Apply—Mlle BOULANGER, 72 Boulevard Montesquieu, Roubaix, France.

HANOVERIAN Woman (40), University education, seeks work to keep herself and adopted child (English, age 11). Experience (in England), 12 years' teaching, including English subjects, Modern Methods, and 3 years' Social Welfare Work. Write—Box 491, HARRODS ADVERTISING AGENCY, Hans Crescent, S.W.1.

Posts Wanted—continued.

YOUNG Lady seeks position as **SECRETARY** in High School. Shorthand 120. Typing 40. Good Coach for Junior Sports. Bournemouth vicinity preferred. Write soon to—CATHERINE, 101 Stennington Avenue, Bishopston, Bristol.

AS MUSIC MISTRESS.—Trained teacher Singing (Voice Production), Piano A.T.S.C. London; R.A.M., R.C.M. certificates; 7 years' reference. Keenly interested in pupils' progress.—1,002 D, HOOPER'S (Educational Agents), Ltd., 13 Regent Street, S.W.1. Established 1881. Others. Heads of Schools invited to make known their requirements for next term.

AS KINDERGARTEN MISTRESS.—N.F.U. Certificate, 2 years' reference, coached students. Experienced junior classes. Ablett's Drawing, Class Singing, Needlework, Games.—1,681 E, HOOPER'S (Educational Agents), Ltd., 13 Regent Street, S.W.1. Others disengaged. Established 1881.

AS FRENCH MISTRESS.—Bright young French Protestant Diplômée. Experienced English School routine. Junior Music, Needlework.—7,023 F, HOOPER'S (Educational Agents), Ltd., 13 Regent Street, S.W.1. Others, English, Art, Languages, Music. Selected List gratis if requirements stated. Heads of Schools invited to make known early their requirements for next term. Established 1881.

AS LADY HOUSEKEEPER.—School or College. Highest testimonials. Trained cooking, catering, care of stores, supervision of maids. Thoroughly reliable, responsible gentlewoman.—1,233 N, HOOPER'S (Educational Agents), Ltd., 13 Regent Street, S.W.1. Many others. Also Matrons and Lady Nurses, Daughters and Widows of professional men, with excellent experience and warmly recommended.

TWO Friends require Posts together, in September, as **SECRETARY** and **HOUSE-MISTRESS** or **MATRON-HOUSEKEEPER** in School or Institution. Experienced. Salary required £100 resident, respectively. Write—Miss M. DIXON, 24 Clifton Gardens, W.9.

GEORGE GILL & SONS, Ltd.

The Oxford and Cambridge Edition.

Ready August 30.

MILTON—COMUS, LYCIDAS, and ENGLISH SONNETS

The above will be issued uniform with other works already included in the English Section of the Oxford and Cambridge Edition.

Complete Educational Catalogue and Specimen Pages post free.

LONDON: GEORGE GILL & SONS, Ltd., 13 WARWICK LANE, E.C.4.

SCHOLASTIC APPOINTMENTS

University Men and Women seeking scholastic appointments should apply to

Truman & Knightley —SCHOLASTIC AGENTS—LTD—

who introduce ASSISTANT MASTERS AND MISTRESSES to the majority of the leading Public and Private Schools at home and abroad.

Through this Agency, well educated gentlewomen with Higher Local and other good Certificates, interested in children and in teaching, can find congenial work in good high-class Private Schools, where the hours are not excessive, conditions pleasant, and the holidays are long. Salaries range from £50 to £100 or more per annum, with board and residence, according to age, qualifications, and experience. There are also many vacancies for Student, Junior Mistresses, and House Governesses or Duty Mistresses at salaries of from £30 to £50 per annum with board and residence.

There is a separate department for

LADY MATRONS and HOUSEKEEPERS

for schools.

No charge for registration.

::

Moderate commission.

SCHOOL TRANSFER DEPARTMENT.

Ladies and Gentlemen seeking Partnerships in, or to take over schools of their own, should communicate personally with Mr. TRUMAN, who undertakes all negotiations connected with the Transfer of Schools, and who is in a position to offer assistance and sound advice to purchasers, to whom no charge is made.

Offices : 158-162 OXFORD ST., LONDON, W.1

Telegrams : "TUTORESS, PHONE, LONDON."

Telephone : MUSEUM 1136.

Messrs. RIVINGTONS' LIST

Their Complete Educational List can be had, post free, on application.

LATIN.

ELEMENTARY LATIN TRANSLATION BOOK.

By the Rev. A. E. HILLARD, High Master of St. Paul's School, and C. G. BOTTING, Assistant Master at St. Paul's School. 2s. 9d. [Just ready.] This is not a book of Selections, but a series of pieces specially written in which the authors try to keep the principle of their other books by not introducing at any stage any construction or form which has not already been learnt. The order in which constructions and forms are introduced is that of the authors' **ELEMENTARY LATIN PROSE EXERCISES**, and parallel references are given. The subject-matter drawn upon for the pieces is mainly Roman History, and almost from the start an attempt is made to give a "continuous" narrative in each piece instead of separate sentences.

BEGINNERS' GUIDE TO LATIN, being a First Latin Translation Book.

By GEORGE G. LOANE, Assistant Master at St. Paul's School. 2s. 6d. This attempts to provide a self-contained guide for the beginner of Latin. The accident is given in small portions, and the passages for translation contain only such forms as have been so far learnt. The easier idioms are explained from time to time, and are then used in the translation. The whole accident is thus covered and most of the elementary constructions come in.

ELEMENTARY LATIN PROSE EXERCISES.

By the Rev. A. E. HILLARD, High Master of St. Paul's School, and C. G. BOTTING, Assistant Master at St. Paul's School. 3s. A Key, 3s. 6d., postage 2d.

LATIN PROSE COMPOSITION.

For the Middle Forms of Schools. By M. A. NORTH and the Rev. A. E. HILLARD, 4s. A Key, 6s. net, postage 2d.

ADDITIONAL LATIN EXERCISES.

By the Rev. A. E. HILLARD and C. G. BOTTING. 3s. A Key, 4s. net, postage 2d.

CONTINUOUS LATIN PROSE.

By H. J. DAKERS, Assistant Master at Manchester Grammar School. 5s. 6d. This book is intended for the use of Upper Forms of Schools and to provide for the writing of **Continuous Latin Prose** up to scholarship standard. A fairly complete **Prose Construction and Syntax** is supplied, as well as a careful apparatus. The Exercises have numerous references at the foot to establish a connexion between the Syntax and the Exercises. The Exercises have been tested in Manchester Grammar School, where the book was in use for a time before publication.

JUNIOR LATIN PROSE.

A Latin Version, 6s. net, postage 2d. By H. J. DAKERS. Crown 8vo. 4s. In September. The aim of this book is to make the transition from the drill of detached sentences to the translation of simple stories as speedy as possible. There are a limited number of exercises of Sentences to give practice in the more important rules of Syntax. It is suggested that the best way of using these is to work through them orally with the pupils. These are followed by 130 short pieces, historical or mythological for the most part, for translation into **Continuous Latin**. The exercises and the Pieces for translation are all freely supplied with references to the **Syntax**, which it is hoped may thus be absorbed in use. Many of them have already been practically tested in class teaching, and all of them were written in Latin before the English took its final shape.

LATIN ELEGIAIC VERSE COMPOSITION.

By ROY MELDRUM, Assistant Master at St. Paul's School. 5s. This book of 208 pieces puts into practice the use of Latin Repetition. The selection of Latin and English passages has one common theme, so that the pupil may have a chance of collecting his thoughts to treat one theme adequately, and of becoming familiar with one set of words at a time, instead of passing hastily and in confusion from one set to another.

ELEMENTARY LATIN ELEGIAIC VERSE COMPOSITION.

By ROY MELDRUM. 2s. 6d. Latin Version to each of the above:—Latin Elegiac Key, 6s., postage 2d.; Elementary Key, 5s., postage 2d.

FRENCH.

By A. R. FLORIAN, Head Master of the Priory School, Shrewsbury.

FIRST FRENCH COURSE. 3s.

SECOND FRENCH COURSE. 3s.

FRENCH UNSEENS.

In Two Books. Junior, 1s. 6d.; Senior, 1s. 9d.

PASSAGES FOR TRANSLATION INTO FRENCH. In Two Books.

Junior, 1s. 6d. A Key, 5s. net, postage 2d.

Senior, 2s. A Key, 5s. net, postage 2d.

GRAMMAR OF MODERN FRENCH. 3s. 6d.

This deals with the French language as it is written to-day, and covers all the ground necessary for a good knowledge of French. The examples are mainly taken from modern authors, and their names are appended to the quotations.

ELEMENTARY GRAMMAR OF MODERN FRENCH. 2s. 6d.

This is an abridgment of the above Grammar suitable for pupils during their first three years of French.

FLORIAN'S FRENCH GRAMMATICAL READERS.

Series A. With *Vocabularies*, 2s. each:—*Le Blocus*, par Erckmann-Chatrian. *L'Évasion d'Edmond Dantès*, par Alex. Dumas. *L'Homme à l'Oreille Cassée*, par Edmond About.

Series B. Without *Vocabularies*, 2s. each; or with *Vocabularies*, 2s. 6d. each. *Nouvelles Gênoises*, par Rodolphe Töpffer. *Le Capitaine Pamphile*, par Alexandre Dumas. *Contes Choisis*.

POESIES, FABLES ET CHANSONS FOR REPETITION.

With Notes, Exercises and Vocabulary for use in Lower and Middle Forms. Edited by BASIL READMAN, Assistant Master at Eton College. 4s. 6d. [In September.]

SENTENCES FOR TRANSLATION INTO FRENCH, ILLUSTRATING GRAMMATICAL RULES.

For Middle and Upper Forms. By A. W. STREET and ARNOLD LEE, Modern Language Masters in King Edward's High School, Birmingham. 2s. 6d.

Adjectives—Their position and comparison—Adverbs—Pronouns—Agreement of Past Participle—Reflexive and other Verbs—Use and omission of the Articles—Uses of *devoir*—Subjunctives—Verbs—Prepositions—Uses of Tenses—Inversion of Subject—Comparative Sentences—Active Voice in French for English passive—Verbs followed by a Preposition—Miscellaneous Sentences.

By F. VICTOR MASSARD, Senior French Master of Hamilton Academy, N.B.

ELEMENTARY FRENCH COMPOSITION, according to the New or Direct Method. 3s.

A Key, 5s. net, postage 2d.

A FRENCH COMPOSITION BOOK According to the same Method. 3s.

A Key, 5s. net, postage 2d.

MASSARD'S FRENCH READERS According to the same Method.

JUNIOR SERIES. With separate Vocab., 2s.

La Mare au Diable, par George Sand. *Quatre Contes*, par Prosper Mérimée. *Lettres de Mon Moulin*, par Alphonse Daudet. *Deux Contes—Pierre et Camille et Croisille*, par Alfred de Musset.

SENIOR SERIES. No Vocabularies, 2s. 6d. each. *Bug-Jargal*, par Victor Hugo. *Pêcheur d'Islande*, par Pierre Loti. *Colomba*, par Prosper Mérimée. *Le Roi des Montagnes*, par Edmond About.

A FRENCH GRAMMAR.

For pupils who have been studying French for two or three years. By F. VICTOR MASSARD, and CHARLES DURNO, Assistant Master at Hamilton Academy. 4s.

A FRENCH EXERCISE BOOK, forming a companion volume to the above Grammar. By the same authors. 2s. 6d.

HISTORY.

By W. S. ROBINSON.

THE STORY OF ENGLAND.

A History for Junior Forms. In Four Parts or Two Vols. Part I, From Early Times to 1272, 2s. 6d.; Part II, 1272 to 1603, 2s. 6d. Parts I and II in One Vol., 4s. Part III, 1603 to 1760, 2s. 6d. Part IV, 1760 to 1910, 3s. Parts III and IV in One Vol., 4s. 6d.

A SHORT BRITISH HISTORY.

One Vol., 3s. Or Two Periods:—Period I, To Elizabeth, 1603, 1s. 6d. Period II, To George V, 1914, 1s. 9d.

AN ILLUSTRATED HISTORY OF ENGLAND. For Middle Forms.

One Vol., 4s. Or Two Periods, 2s. 6d. each:—Period I, To end of Commonwealth, 1660. Period II, To George V, 1914.

By ARTHUR D. INNES.

A HISTORY OF ENGLAND AND THE BRITISH EMPIRE.

In Four Vols. 6s. 6d. each. Vol. I, before the English came, to 1485. Vol. II, 1485–1688. Vol. III, 1689–1802. Vol. IV, 1802–1914.

A SKETCH OF GENERAL POLITICAL HISTORY FROM THE EARLIEST TIMES.

One Vol., 4s. 6d. Or Two Parts, 2s. 6d. each.

AN OUTLINE OF BRITISH HISTORY.

One Vol. 5s., or in Two Parts:—Part I, Earliest times to 1763. 3s. Part II, 1760–1910. 2s. 6d.

JUNIOR BRITISH HISTORY.

One Vol. 3s. Or in Three Periods:—Period I.—To 1485. 1s. Period II.—1485–1688. 1s. 3d. Period III.—1688–1910. 1s. 6d.

BRITISH HISTORY. From the Earliest Times to the Present Day.

By L. CECIL SMITH. Modern History Master at St. Paul's School. One Vol., 6s. Or Two Periods:—Period I, To 1485, 3s.; Period II, To 1914, 4s.

A CLASS BOOK OF ENGLISH HISTORY.

For the use of Middle and Upper Forms of Schools. By ARTHUR HASSALL. One Vol., 4s. 6d. Or Two Parts: Part I, 449–1603, 2s. 6d.; Part II, 1603–1910, 2s. 6d.

AN ELEMENTARY HISTORY OF ENGLAND.

For the Lower Forms of Schools. By Professor CYRIL RANSOME. With Maps and Plans. One Vol. 2s. Or in three parts, 9d. each:—Part I, to 1485; Part II, 1486–1688; Part III, 1689–1914.

AN ADVANCED HISTORY OF ENGLAND.

By Professor CYRIL RANSOME. One Vol., 8s. 6d. Or Two Periods: Period I, to Elizabeth, 1603, 4s. 6d.; Period II, to George V, 1914, 4s. 6d.

NOTES ON BRITISH HISTORY.

By WILLIAM EDWARDS, Head Master of the Middlesbrough High School. Part I, to 1485, 2s. 6d.; Part II, 1485–1660, 2s. 6d.; Part III, 1660–1783, 2s. 6d.; Part IV, 1783–1901, 5s. Parts I–IV, in One Vol., 12s. 6d.

JUNIOR BRITISH HISTORY NOTES.

By the same author. Part I, B.C. 55 to A.D. 1485, 1s. 3d.; Part II, 1485 to 1660, 1s. 3d.; Part III, 1660 to 1783, 1s. 3d.; Part IV, 1783 to 1901, 2s. 6d.

THE NEW TESTAMENT FOR SCHOOLS.

The Text of the Revised Version, with Introductions and Notes and Maps to each volume. Edited by the Rev. A. R. WHITHAM, Principal of Culham College, and Examining Chaplain to the Bishop of Oxford and Primus of Scotland.

St. Matthew's Gospel. 3s.

St. Mark's Gospel. 2s. 6d.

St. Luke's Gospel. 3s.

The Acts of the Apostles.

One Vol. 3s. 6d. Or Two Parts:—

Part I, Chaps. i–xv, 2s.

Part II, Chaps. xvi–end, 2s.

OCCASIONAL NOTES.

THE crossing of the Atlantic by American sea-plane and British aeroplane should set all teachers of applied geography thinking. The old division of methods

Across the Atlantic
by Air.

of transport into roads and canals, railways and steamers, with latterly a half-humorous appendix on air, is out of date. Whether the Atlantic, or any other ocean, be crossed directly in sixteen hours, or by island stages in twice as long, is immaterial. The job has been done, and there is no shadow of doubt will be improved upon. It is but a few years ago that the quidnuncs were sorely agitated at the possible supersession of our London-Bombay mail route by the German Bagdad Railway, and were arguing that our possible best time might be reduced to eleven and a-half days, while the Constantinople-Basra-Karachi route would only take ten days. General Salmond has taught us that, reckoning the flight at one hundred miles an hour, it can be done in *twenty hours* by the shortest route, and only fifty hours by the present Egypt-Mesopotamia air line. Many difficulties, of course, have to be surmounted. In over-sea passages, for instance, there is the question of navigation. N.C.4, ably as she was "navigated," ran into fog on her way to the Azores, and, having to depend on dead reckoning, found she was 45 miles out in 170 miles. Nor will it be a paying proposition always to safeguard the commercial air boat of the future with relays of route-marking vessels. Again, overland air journeys will be fraught with diplomatic difficulties—at any rate, for a time. One conclusion is certain—and we can neglect for the time being such problems as the erection of suitable landing-places, the making of air-maps, the use of wireless telephony, the introduction of vertical beams from light-houses (these will all come)—and that is, a great

"speeding-up" of transport and human communication is at hand. The longer the distance the greater is the gain of the air-vessel over other means of transport. No place on earth is farther than five days from London at eighty miles an hour.

THE result of the fight in Convocation at Oxford over the "compulsory Greek" was nominally a victory for the Conservative party, but practically a majority of six in a house of 618 means that the days of Greek as a *corvée* are over. Even the Hellenist party—all except a few "die-hards"—are pledged to the policy of

relieving at least students of mathematics and science from the need of cramming up Xenophon for Responsions. The only question that remains to be settled is whether this policy, or the bolder and larger view embodied in the proposal rejected on June 17, is to prevail. Prof. Gilbert Murray and others wish still to preserve Greek as the necessary basis for all humane studies, including presumably not only history, but also modern languages and law. We cannot ourselves see that any substantial benefit is to be derived by any one from a study of Greek which is never carried beyond the rudiments exacted in a University entrance examination. Through the speeches in favour of compulsion ran the same fallacy, that an acquaintance with such beggarly rudiments is a real initiation into the life and thought of Greece. Of the opinion of the teaching profession there can be no doubt. The charter of liberty was carried in Congregation by a majority of four to one, and the Associations of Head Masters and Assistant Masters have pronounced against the present system repeatedly. The speech of the Master of Marlborough was welcome, for he told Convocation the truth, that the exaction of Greek in Responsions has not helped to keep Greek alive in secondary schools. Greek has lived, and Greek will continue to live, as a study because there are a certain number of minds to whom Greek literature and art appeal with irresistible force, and if ever it becomes extinct as a study it will be because the world has ceased to need it.

A PART from the important changes relating to the constitution of governing bodies, and a few minor alterations, the new regulations are identical with those in force for 1918-19. The alterations made in Articles 23 and 24 place denominational secondary schools on much the same footing as denominational elementary schools. The provision in the old regulations that for schools to be eligible for grants the trust deed must not require the majority of the governing body to belong, or not to belong, to any particular religious denomination, is deleted in the new. Similarly, the declaration that the trust deed must not provide for the appointment of the majority of the governing body by an appointing authority required to belong to, or not to belong to, any particular denomination no longer appears. For the future, too, there need be no majority of representative governors if at least one-third of the total number of governors are appointed by the Part II Authority. The Board are satisfied that the changes will cause no diminution of the control of Local Education Authorities over public education in their areas, and are confident

Secondary School
Regulations,
1919.

that the balance of public advantage lies on the side of opening the entrance to the system of State-aided schools to a larger number of efficient secondary schools. The former regulation, sanctioning a lower standard of secondary school life in rural areas, is abolished, and no school will be recognized unless an adequate proportion of the pupils remain at least four years in the school and up to and beyond the age of sixteen.

THE Report of the Board of Education for 1917-1918 (Cmd. 165) begins in a style as unlike the ordinary Blue book as it is possible to imagine. We welcome the change. From the first paragraph we quote: "Victory has come to us, and now we are facing the momentous issues of Peace. The tension and suffering of the War have revealed many things which we had forgotten or to which we were indifferent, and we now know that the shattered temple of Peace has to be rebuilt more nobly and the fabric of society has to be reconstructed upon more generous lines. The task requires no less discipline, no less resolution, no less patience, than were needed to defeat our enemies." The second paragraph continues: "In the work of reconstruction, in the realization of our hopes and aspirations for better living, the influence of education is the most fundamental, the most fruitful, the most permanent. . . . The hard discipline of the War has taught the nation to recognize how great is the debt which it owes to its schools and to those who teach in them; how vital are their services in shaping the national character, which is the foundation of our welfare and security; how imperative it is that the public system of education should be generous and comprehensive." We need quote no further to convince teachers that here at least is an official report on education which is interesting and emphatically one to be read.

THREE recently published memoranda prepared by the Labour Party's Advisory Committee on Education deserve the careful attention of students of education. The booklet, which can be obtained from 33 Eccleston Square, S.W.1, price 7d., makes it very clear that the responsible leaders of the Labour Party will do all they can to secure what they consider to be the best kind of "continued education" under the new Education Act. The primary object of the new continuation schools should not be, the Committee wisely insist, to impart specialized industrial or commercial training, but to give boys and girls a general education similar in character to that provided by secondary schools, to develop their physique and character, and to prepare them for the responsibilities and problems of adult life. The number of students per class in the new schools must not, the pamphlet tells us, be more than twenty-five, and the remuneration of the continuation-school teachers must be at least equal to that of teachers in secondary schools, and the teachers must be secured adequate leisure. All believers in education will sympathize sincerely with demands such as these, but unfortunately the memoranda do not explain how a sufficient number of suitable teachers is to be secured in view of the present shortage of teachers in existing schools of all grades. Where the money required to carry out the schemes described is to come from has yet to be made clear.

THE Board of Education have issued a memorandum on Advanced Courses (Circular 1112), which is useful as stating briefly the present position. The total number of courses so far approved is 239, of which 138 are in science and mathematics, 26 in classics, and 75 in modern studies. The articles of the 1919 Regulations for Secondary Schools that deal with the advanced courses are practically the same as in 1918, when an important change was made in the modern studies section, English taking the place of Latin as a main subject. As was to be expected, this led to a considerable increase of applications for the recognition of advanced courses, especially in English, French, and history, a combination likely to be most widely adopted. Work in the "Modern Humanities" is still to some extent a matter of groping and experimenting, and the memorandum gives much space to the course in modern studies. Partly, it is true, the statement is explanatory of changes made by the Board in the foreign languages considered admissible; but there are also sections that contain valuable directions which should prevent the sending in of crude and ill-considered schemes. The only point on which no guidance is vouchsafed is the exact meaning of "a modern language of Western Europe." Germany is presumably in Western Europe, "Central Europe" having disappeared. Is the phrase just a polite way of excluding Russian and the other Slavonic languages? The final chapter, on "Administrative and Financial Considerations," contains much that is of interest. The Board do not intend that any part of the advanced course grant shall be devoted to remission of fees or provision of maintenance allowances; it is mainly intended to increase the salaries of the responsible teachers, but part of the grant may also be spent on equipment. The question of transfer is dealt with at some length and with good judgment. The troublesome matter of the University Intermediate Examinations is touched upon in another part of the memorandum, and "the Board hope that an early solution of these . . . difficulties may be reached by consultation between the Examinations Council and the University Authorities concerned." That would indeed be a feather in the cap of the Examinations Council.

CONSIDERING the enormous number of teachers that will be required for working out the possibilities of the Education Act of 1918, the Board of Education's "List 170," giving statistics of recognized "intending teachers" for elementary schools, is not a reassuring document. The total number of entrants in England and Wales fell from 6,544 in 1916-7 to 6,260 in 1917-8. The figures for 1918-9 are not yet completed, but so far the Board can only report 5,867. Clearly something must be done to make the profession more attractive. Of course the tendency to improved salaries, and the passing of the Superannuation Act, which will in future influence parents faced with the problem of what to do with their boys and girls, have not affected the figures we have quoted. The immediate question is that of making the path to the teaching profession as smooth as the paths to competing occupations. This, we think, must always in the main be the task of the Local Authorities, because conditions differ so much in different areas. It is to be feared that many Local Authorities have not done their duty in this matter, and the Board do well to

supply figures which will enable those Authorities to judge whether they are doing their duty well or badly. In rural areas much good material has been lost by the too hasty destruction of the old pupil-teacher system. Probably, also, a good deal has been lost through the Board's rather pedantic regulations as to qualifications for admission to the training colleges.

SOME striking figures dealing with the recent growth in the number of pupils in State-aided secondary schools are contained in the last report of the Board of Education. The number of such schools is now 947, as compared with 943 in 1917-18, and the increase in the number of pupils in them for the year 1917-18 was 26,741. The increase for 1916-17 was 18,006, and for the two previous war years 9,272 and 8,980 respectively. In October, 1918, the number of new admissions to these secondary schools was five times as large as in October, 1913. This increase in numbers, together with the shortage of teachers, has resulted in considerable overcrowding. On October 1, 1917, there were 1,722 classes (in 532 schools), with more than the normal limit of 30 pupils, and 74 classes with more than 35 pupils. Side by side with this regrettable state of affairs, we find, in another part of the report, that there has been a marked decrease during the last three years in the number of men and women taking courses of secondary training in the colleges recognized by the Board. The number of men who completed such courses of training in 1914-15 was 25 in all the recognized training colleges of the country, and in 1917-18 the number had fallen to 4. The corresponding numbers for women were 212 and 108. It is not surprising to read in the report: "We have come to the conclusion that it is impossible to expect an adequate number of persons to take a year of training after completing their degree without some further financial assistance."

IT has been suggested that the Appointments Department of the Ministry of Labour might well be utilized to supplement the work of such bodies as the Future Career Association, and of the various Appointments Boards of the Universities, in bringing the boys who leave secondary schools into touch with employers, and in supplying them and their parents with sufficient information as to opportunities offered by the various professions to enable them to choose that for which they are best fitted. The Department was instituted to find posts for demobilized officers and men of good education, and has done, and is indeed still doing, excellent work. The machinery set up, and the vast amount of information already collected for this object, could, however, be equally well used to bridge the gap which undoubtedly exists between school and career. The success of any such scheme would to a great extent depend upon the goodwill and co-operation of the head masters of the schools concerned, for they, or men on their staffs appointed for the purpose, would almost necessarily be the intermediaries between the Department and its district organizations on the one hand, and the parent and boy on the other. Such a large proportion of the boys who leave our secondary schools take almost the first post that offers, simply because they have little knowledge of their own special aptitudes or of the direc-

tion in which their abilities would be best employed, that some form of co-ordinated effort seems needed. For this purpose, the Appointments Board appears to be most suitable.

THE Manchester Education Committee have given instructions for a new examination to be carried out in all the elementary schools, testing the work of every girl and boy between the ages of eleven and thirteen. The Director of Education recently published a survey of the educational needs of the city. In it he called attention to the importance of the eleventh birthday as a pivotal point in the educational history of every child. This new examination is by way of bringing every parent and every head teacher face to face with the significance of the issues which hinge upon that eleventh birthday. Each head teacher is instructed to examine each child between the ages of eleven and thirteen in English and arithmetic. The papers are set by a Committee of Teachers and are the same for all. There is also a *viva voce* test, and the school record is taken into account. The names of all those who earn above 50 per cent. in this examination are sent to the Director, and the parents are communicated with. They are informed that there is *prima facie* evidence that this child is fit to profit by higher education, and asked whether they are willing for him to take one of the examinations which open the door to the secondary school, a central school, or other place of higher education.

THIS scheme does not imply that there is in Manchester a new and more abundant provision already made for such upward mobility. Unfortunately there is not. But it does establish the principle that every child of this age has a right to be considered. Its work is to come up for review, and, if that work is good enough, the parents shall have definitely put before them the chances of higher training which open up. Hitherto there has been a considerable number of primary schools which have never sent forward any children for higher work; they seem never to have envisaged the possibility of it. The new move will, at any rate, broaden the basis of selection. It will do this immediately, and it will do much in the future to provide an increased flow in the stream of pupils going forward to higher work of all kinds as soon as the channels are opened out.

THE problem of the place of housecraft in the curriculum of secondary schools for girls is not as easy as the cheap journalist imagines. Its proper analogy is with military training for boys in school, especially as it has to be added to the subjects of a general education in preparation for careers. Girls nowadays all but universally expect to earn a living; they must pass the same examinations as boys, and often compete with them for the scanty number of University scholarships. If boys have to find time for compulsory military training during secondary-school life, no injustice will be done to the girl who has compulsory housecraft added to her curriculum. Many of us would say, however, that the proper time for both these specialized trainings was later—for the boy, if needed, at regular military age; for the girl when, as the wise article in the *Schoolmistress* of May 29

states, she "begins to think about marriage and a home of her own." The same article hits the nail on the head when it hopes for a time "when domestic work will be a skilled occupation which girls of good education may enter, as they joined the 'Waacs' or the 'Wrens' or the V.A.D.'s, without loss of social status." Then, and not till then, will the housecraft departments, established already in some secondary schools at the top, be crowded as the secretarial and commercial departments are. Such specialized housewifery courses at present lead to nothing practical: only the well-to-do girl can afford to enter them. No "free place" pupil is found there.

THERE are possibilities, however, for short courses in cookery, laundry, &c., given to girls of fourteen before the pressure of school certificate work comes along. The real difficulty—at least, in the north of England, where the custom of housework for women of all classes

The Parents' View.

has never been lost—is the objection of the parents. The father says: "No one can teach my girl better than that best of housewives, my wife." The mother says: "I don't care to pay fees for or have her spend time at school learning what I can teach her." All girls in secondary schools, especially nowadays, have to help with domestic work; they are absent or have excuses for lessons because so often there is no one else to do it. In other words, they learn at home, from their mothers: the proper place and the proper teacher. Girls can best learn how to manage a home *in* a home. What the school must do is to leave time for this, through holidays and the limitation of school activities, and to teach science, the foundation of housecraft, as of engineering and agriculture.

AMONG other interesting points in connexion with the teaching of science in schools, raised at the recent Conference arranged by the London County Council on the report of the Committee appointed by the Prime Minister to inquire into the position of natural science in the educational system of Great

Practical Work in the Teaching of Science.

Britain, was the question of the place and value of practical work in teaching science. Sir Joseph Thomson suggested that some of the time given to experimental work in the science classes of schools and colleges could be more profitably employed. It is important, of course, that all students of science should receive a sufficient training in manipulation, and become familiar with the methods of experiment, but teachers of science would do well to consider if enough of this necessary training could not be obtained by means of the practical work in any one subject. The amount of school time thus released would make possible the study of many more branches of science, for these could be taught by means of lectures illustrated by experimental demonstrations and supplemented by judicious reading. In this way it would be possible, for instance, to broaden and humanize the science work in our secondary schools, and especially to introduce boys and girls to the biological as well as to physical and chemical sciences.

UNDER the auspices of the Modern Language Association, Mr. E. Allison Peers will give a lecture at the College of Preceptors on July 5, at 3 p.m., on "Experience and Experiments in the Teaching of French Composition." All interested in modern languages are welcome without tickets.

EDUCATION IN THE ARMY.

"CEDUNT arma togae"; the schoolmaster's gown is on the way to cover, and protect, his khaki. When Kitchener laid low the Sudan Mahdi, he set about bringing his old enemies to school; his successor has gone one better, for the victorious army of these days is bringing itself to school. Very significant facts are presented in two official documents of recent issue. One is a pamphlet from the War Office on "Educational Training—Armies of Occupation," the other a report from one of H.M. Inspectors of Schools dealing with visits paid to two "Army Schools of Education," with criticisms and suggestions. The first of these two papers bears ample witness to the energy of Colonel Lord Gorell and Sir W. H. Hadow and their staff of "S.D. 8"; the second is a proof that their efforts are calling out with effect the right sort of "carry-on" spirit.

When fighting-time was over in the largest area of conflict, "Educational Scheme 50, Gen. No. 5332" was launched as a preliminary venture, and this, with its several successors, is superseded by the pamphlet first named. It is addressed to commanders of formations and their subordinates, combatants and non-combatants, instructing them how and why they are to arrange for the education of troops under their several commands. Military training and duties come first, as should be; but, that point secured, they are to see that "adequate facilities are provided for the attendance of men at classes." The general scheme bases itself solidly on national requirements, and claims its due place as part of the educational movement which found expression in Mr. Fisher's Act of 1918. We have great armies still in being, and we are not likely, within any measurable period, to be without fighting forces under discipline. The community of which the soldiers are a part is determined to have them not only intelligent soldiers, but intelligent citizens, and the curricula proposed are therefore very various and cover a good deal more ground than what is merely "vocational." There are six great units of organization: the armies at home; the forces in France and Flanders; the army of the Rhine; the force in Italy; the armies of the Middle East, Egypt, and Murmansk; the garrisons of the Crown Colonies and India.

In Great Britain and Ireland provision is made for co-operation with Local Education Authorities, with whom officers of the general staff are in close contact. Arrangements are made for instruction in subjects for which men have aptitude, and certificates are to be issued (on strictly supervised conditions, no doubt), some of which are provisionally to be accepted by Universities and other bodies as entitling to the privileges of matriculation or its equivalents.

It is an open secret that this endeavour to keep the fires of education burning in the new armies has its counterpart in a determined effort to raise the status of the fine body of men who have already been trained and are serving as army schoolmasters under old regulations. The army schoolmaster should certainly rank as a commissioned officer in his own right; but equally or even more important is the fact that it would be hard to overestimate the value of such a step in raising the status of schoolmasters over the whole country.

Of course it is easy for critics to look upon the scheme, necessarily vast and complex and dependent on imperfect machinery, as ambitious, and to call it too ambitious. If its agents and operatives are chosen inconsiderately, if its wheels are not generously oiled and scrupulously watched, then its ambition is a sin and it will fall as fell the angels. But with good men, sufficient funds, and scrupulous administration, it should achieve a high standard both as to numbers and results.

The report of H.M.I. on his visits to schools at Oxford and Cambridge where emergency teachers are being trained as army instructors is a satisfactory proof that the Staff Duties Directorate know that the first requisite of success is the provision of capable teachers. The courses given can be but short; the intending teachers may or may not be to the manner

born; but the courses are intensive and the raw material seems to be on the whole well prepared, for the army to-day contains a large number of men whose general education has been above the average. It is well to have commendation from a competent authority of the zeal and intelligence shown in a difficult task. Already a considerable number of well known teachers have done, and some are still doing, solid work. There have been set-backs and disappointments. Some teachers, familiar with the ordered traditions and progress of which they themselves have been a part, have expected as much in the case of units "fresh from the protoplast." The hurry, the early organization, the inevitable inexperience of some of the first education officers appointed, the difficulties of administration, all these have undoubtedly led to much waste of effort, made all the worse by the chaos of demobilization. But there is enough to give good reason for looking hopefully to developments yet to come.

AGRICULTURAL EDUCATION AND SECONDARY SCHOOLS.

By C. W. H. GREAVES.

THE statement has been widely circulated in the daily and weekly press that the Government propose, subject to the approval of Parliament, to expend during the next five years about £2,000,000 on agricultural education and research. This is welcome evidence that "the powers that be" realize the urgent need of a national system of agricultural education, comprehensive and coherent, which shall furnish adequate scientific and technical training for land workers of all types and grades, and provide for more extensive research in connexion with the many difficult problems confronting the practical agriculturist.

It is estimated that at present there are probably not more than forty trained men engaged on research in agricultural science. It is hoped to increase this number to one hundred and fifty during the next decade. Higher agricultural education is to be encouraged by liberal grants to existing colleges and to the agricultural departments of Universities, and it is hoped to bring the farmer into closer touch with these institutions by establishing more demonstration farms and by means of advisory work undertaken by the college staffs. This last proposal is highly important, for, although the attitude of practical agriculturists towards the colleges is becoming more sympathetic and appreciative, yet it must be admitted that many farmers regard them with indifference or distrust, and comparatively few send their sons to them.

Further, the Government proposals include greatly augmented financial assistance to the Local Education Authorities, many of whom have already in operation more or less comprehensive schemes; for each £1 expended by the L.E.A. the State is to contribute £2. It is expected that most of the counties will set up farm schools or institutes, the latter providing short courses for adult students of both sexes, and affording facilities for school teachers who wish to qualify in the rural subjects required in the continuation schools to be established under the Act of 1918.

In view of these far-reaching proposals, the recent publication by the Agricultural Education Association of their "Memorandum* on the Reconstruction of Agricultural Education in England and Wales," is most opportune.

This document is the outcome of the labours of a series of Committees set up in July, 1918, for the purpose of formulating their views. To each Committee was assigned the task of surveying a particular section of the field of inquiry. The

Association consists of members of the teaching, research, and advisory staffs of practically every agricultural college in Great Britain, of county agricultural organizers and instructors, together with others connected with public bodies in Ireland and the Colonies interested in agricultural education. Its Chairman is Prof. W. Somerville, of the School of Rural Economy, Oxford University.

The memorandum may therefore claim to be authoritative, as the considered opinion of a body of experts. As such it deserves careful study by all educationists. It may also claim to be comprehensive, dealing as it does—exhaustively in many cases—with such topics as Rural Continuation Schools, County Work (by lectures and practical demonstrations), Farm Institutes, Agricultural Colleges, University Courses and Degrees, Research, Advisory Work, Dairying, Horticulture (very properly regarded as a subject distinct from Agriculture), Poultry-keeping, and so on.

"But," the reader may inquire, "where does the secondary school come in?"

So far as the memorandum is concerned, it does not come in at all. In a concluding section on the "Fundamental Importance of Co-ordination in Agricultural Education," the following passage occurs:—"With regard to teaching work, proposals have been outlined for a graduated system of agricultural education starting in the continuation school or rural secondary school and passing through the farm school or institute to the higher college or University department. It is clear that the effectiveness of such a scheme will be seriously impaired unless specific provision for co-ordination be made to prevent overlapping of the work carried on at the various stages of instruction." Careful perusal of the memorandum, however, reveals no further reference to secondary schools, with the exception of the complaint that "the teaching of pure science in colleges appears to be still necessary, as secondary schools have not yet reached the stage of providing sufficient science teaching to dispense with the teaching of pure chemistry, botany, and physiology at technical institutions." After this, one may perhaps assume that the Association regarded the case of the secondary schools as hopeless, and therefore deleted all references thereto except the passages quoted!

A hint of the feeling of some of the Agricultural Association experts may be gathered from the section dealing with the rural continuation school:—"We are of opinion that for pupils between the ages of fourteen and sixteen years the courses should, as a rule, derive their vocational character rather by giving a rural bias to all the matters studied than by including specific technical instruction. We believe that pupils of the ages mentioned will derive most benefit from courses which aim at the development of the imagination, the general expansion of the mind, and the training of the faculties of observation and deduction; and we consider that, whether as the final education of the pupil or as a foundation for specialized instruction at a later stage, a course for the development of the intelligence is preferable to one designed chiefly for the imparting of technical information."

This is sound doctrine, and applicable equally to the secondary school of any type. If practised consistently it would go far to disarm those critics to whom the slightest suggestion of vocationalism is anathema. It is, of course, quite possible to make a school "vocational" without making it technical.

Whatever the critics may say, the secondary school with a rural bias has come to stay. The Grammar School at Shepton Mallet, Sexey's School at Blackford, and the Rural Secondary School at Knaresborough, have, amongst others, demonstrated the practicability of devising courses which are peculiarly suited to the needs of future agriculturists, and at the same time afford a sound general education not unsuitable for those destined for other work.

It is incumbent upon those responsible for secondary schools in rural and semi-rural districts, either as administrators or as teachers, to determine whether—and, if so, how—they are to be fitted into the new scheme. Otherwise it is not impossible that they may in several instances find themselves "left out in the cold." It is probable that in the near future the smaller counties should each possess at least one or two

* Obtainable from the Hon. Sec. of the Association, Harper-Adams, Agricultural College, Newport, Salop. Price 1s., post free.

secondary schools with a ruralized curriculum, while the larger counties might with advantage have several.

Having decided upon the ruralization of any particular school, or the establishment of a new school, the next business of the Authority will be to determine which of the two main types shall be adopted—namely, (a) the traditional "grammar" school plus an agricultural "side," or (b) the school whose whole curriculum has a bias, more or less pronounced.

With a head master who is himself an enthusiast for things pertaining to the land, and who has a properly qualified man at the head of the "side," the former type is capable of rendering efficient service, as is shown by several existing schools. But there is considerable risk, where conditions are less favourable, that the agricultural side may become a dumping ground for dullards, or at best afford a "soft option" for the indolent.

The trend of opinion appears to be towards the second type. It is pretty generally agreed that the actual teaching of agriculture does not lie in the province of the secondary school, the place for this being the farm institute or agricultural college. The necessary bias, which is both legitimate and desirable, may be given (1) by devoting more time than ordinarily to science, so that the pupils may take Nature study and biology throughout the school concurrently with physics or chemistry; (2) by making the mathematics more practical, paying much attention to mensuration and the rudiments of land surveying; (3) by arranging a course of woodwork of a special type; (4) by letting all pupils cultivate a garden plot; and (5) by the constant endeavour in teaching every subject to find points of contact with the actualities of rural life and industry. This last factor is the most important of all, and the one which makes the greatest demands upon the resources of the teacher. Indeed, the ideal man for the job is somewhat of a rarity.

HEAD MISTRESSES IN CONFERENCE, 1919.

By EDITH M. BANCROFT,
Chelmsford County High School.

EACH June sees the Association of Head Mistresses of Public Secondary Schools gathered in Council, and the early summer sunshine which on this occasion streamed through the lofty windows of the hall of King Edward's High School at Birmingham has for forty-five years fallen on a similar scene. Yet it is no idle fancy which enables one clearly to discern an individual note which marks each Conference as a thing apart from others.

In 1917, at St. Paul's School in London, on the threshold of new educational developments, we were vividly conscious of ourselves as teachers, members of a great profession, whose work was about to receive a new stimulus and inspiration from the enlightened policy of a great reformer in educational legislation. Last year the circle widened, the civic idea dominated our discussions. Education was the training of citizens-to-be, and the community life of school was a many-sided preparation for life in the wider community of the nation.

This year in Birmingham, where the civic tradition is renowned and strong, we were conscious of a yet further widened circle. In the presidential address, in discussions diverse in theme and nature, again and again, for a brief moment, we saw our work unobscured by its multifarious detail as—to quote the President's words—"a minute fraction of a great and noble task; that of the reconciliation of men"; and we were the more inspired for our work as teachers in our profession, as citizens in the State, because of its relation to the wider brotherhood of man. This note of co-operative effort sounded strongly and recurrently throughout the hours of the two days' deliberations.

The Conference opened with a brief glance of retrospect at the year which had brought the cessation of fighting, and had placed the Education Act and the School Teachers' Super-

annuation Act upon the Statute Book; and a resolution of congratulation was forwarded to the President of the Board of Education. But the past ever leads to the present, and discussion rapidly arose upon the problems pressing for solution. Reference was made to the work of important Standing Committees created by the President to deal with questions of new urgency: notably that of the Education Sub-Committee appointed to consider educational principles, to collect information, and to investigate experiments and results of educational research. The insistence of some present problems was made appallingly clear in the discussions opened by Miss Barratt on the need for more secondary-school accommodation, by Miss Hiley on the lack of University provision for women, and by Miss Hewetson on the dearth of hostels and residential flats for professional women.

We heard of an increase of over 26,000 secondary-school pupils, while the increase of schools stood at four; of a London school where five vacancies received fifty applications. And Miss Hiley pleaded forcibly that in the world of to-day which calls for enlightened leadership, when women are summoned as pioneers into new vocations, when more than ever they need that power of seeing life whole which a University training can bestow, it is a grave matter that applications at the women's colleges far exceed the available accommodation (at Girton, for example, in the proportion of three to one). The copious and startling statistics furnished by Miss Hiley proved conclusively that, while the present demand is slightly influenced by conditions of a temporary nature, yet the lack of provision for the higher education of women is a matter towards which the attention of the State and the generosity of the public should be directed without delay.

Twelve months' interval had not effaced the profound impression left upon the minds of all those who heard the Presidential Address of last year's Conference, and, in consequence, the opportunity of hearing Miss Oldham again was eagerly anticipated. To attempt a summary would be to mutilate a noble thing. It is to be hoped that the inspiration of Miss Oldham's words will not be confined to the 260 silent listeners whose hearts were quickened as they heard, but that the paper, in its entirety, may be available for the thoughtful consideration of a wide circle. All that is possible is briefly to indicate its theme, but its wealth of suggestiveness and beauty must be the possession of those alone who were privileged to hear it.

Miss Oldham gave us hope and inspiration as she deciphered the signs of the times, hailed the breath of new life now stirring in civilization, and welcomed the changed outlook of men upon the world. Two portents she discerned as tokens of hope and promise: the desire in the popular mind for the amelioration of social conditions, for a life of ampler and nobler opportunities, and the trend towards a wider fellowship, a genuine brotherhood of nations.

Vital changes were at work, moreover, in education, changes in the thoughts of men with regard to its object, its content, its methods. No longer could education be conceived as a thing of academic isolation from the world, a building of ladders for the few. It was a part of social service, based on a reverence for human life, on respect for all that is good and true and beautiful; a spirit, not a curriculum. Its function was to prepare the young, by developing the powers of thought and sympathy, for the wider fellowship of the world.

As part of the content of education, Miss Oldham emphasized the need of training in the use of leisure, in the appreciation of the arts, and her words formed a fitting prelude to the interesting discussion introduced later by Miss Gwatkin, of Liverpool, and Miss Phillips, of Clifton High School. In urging the inclusion of music and drawing as duly recognized examination subjects for school certificates and as subjects for advanced work, both speakers pleaded for freedom in adjusting curricula to individuals, and for a just estimate of the value of the æsthetic side of education. Both papers were reasoned closely and forcibly, and, though the resolution they brought forward struck at the long established convention of English examinations in favour of purely in-

(Continued on page 442.)

tellectual subjects, yet the preponderating vote in its support showed the conversion of the audience to a new point of view.

In touching upon methods of educational administration, Miss Oldham deprecated the too rigid division between the educational administrator and the teacher, especially in the case of women; and here again her words received, in another portion of the Conference, a supplement in the resolutions proposed by Miss Sparks, of Colston's Girls' School, Bristol, and Miss Coates, of Aigburth Vale. Here the subject for consideration was the suggestion of Whitley Councils in connexion with education. In a clear and able paper Miss Sparks dealt with the fundamental principles underlying these Councils, their applicability to the work of education, and suggestions as to the manner and purpose of their election; while Miss Coates dealt with the constitution of smaller Local Councils of the same character. Again the Conference, by an overwhelming majority, affirmed approval of this principle of constructive co-operation.

The closing words of the address emphasized once more the relation of the teacher to the great world for which she is preparing her pupils, and the need for an intelligent and sympathetic attitude towards its problems. The educational history of Japan and Germany had demonstrated the susceptibility of youth to an ideal impressed upon it by its teachers. Increased facilities afforded by legislative reform would increase also the teachers' responsibility, calling from them a full measure of strenuous service and a jealous guarding of spiritual and intellectual interests.

A generous share of the agenda was given to questions more purely academic in character and more closely related to the curriculum. Resolutions were passed urging the Government to put into effect the recommendations of the Committee on Modern Languages, and supporting the recommendations of the Science Report. Miss Howes Smith, in a paper on the preparation necessary for the many-sided work of a head mistress, conveyed much useful information and helpful counsel in witty and pungent phrase.

Miss Stoneman expressed the feeling of all when she tendered the thanks of the Conference to the President not only for the address to which they had just listened, but also for the wise statesmanship, the able counsels, the amazing record of public service, all of which have been Miss Oldham's gift to the Association and to the cause of education.

An account of the Birmingham Conference would indeed be incomplete without a reference to the gracious hospitality which we received as guests of the great city. As we separated for the long journeys homeward, we carried with us pleasant memories of the Lord Mayor's reception on Friday night in the fine Council Room and Art Gallery, of our visit to the beautiful Handsworth School, and of the warmth and kindness shown to us at King Edward's High School by the Head Mistress and her staff and members of the School.

It is pleasant to reflect that in Miss Major, our chief hostess of this year's Conference, we hail the President for the coming year.

SECONDARY SCHOOLS ASSOCIATION.—The twelfth annual report for 1918-1919 is very short. The steps to be taken, to enable secondary schools providing denominational instruction to obtain Government grants under the Regulations of the Board of Education and to be included in the National System of Education, have engaged the special attention of the Committee during the year. Early in the year arrangements were made to lay before the President of the Board of Education the views of the Association, and on January 29 Mr. Fisher received a deputation, which was introduced by Sir Philip Magnus, Bart., M.P., chairman of the Association. Mr. Fisher received the deputation sympathetically, and promised to give consideration to their representations. The School Teachers (Superannuation) Bill contains a provision suggested by an amendment of Sir Philip Magnus, enabling teachers of schools which are not grant-aided to be eligible, subject to conditions to be approved by the Board, to receive pensions under the Act. During the year under review five additional schools have joined the Association, bringing the membership to 137. The number of individual members remains as before.

PERSONAL PARAGRAPHS.

THE honour conferred on Dr. Michael Sadler by the King, on the occasion of His Majesty's birthday, will be welcomed by all interested in education. As Professor of Education at Manchester, as Vice-Chancellor of Leeds University, and as Chairman of the Calcutta University Commission, Dr. Sadler has rendered invaluable service to education, and, as a result of his earnest advocacy, the movement towards the more complete correlation of educational and imperial policies has been advanced greatly. The Birthday Honours List includes, among others, the following decorations:—K.C.S.I.: Dr. Michael E. Sadler, Chairman of Calcutta University Commission. Knights Bachelor: Dr. J. H. MacFarland, Chancellor of the University of Melbourne; Lt.-Col. H. A. Rose, D.S.O., ex-Chairman of the Edinburgh School Board, Chairman of the new Scottish Education Authority and Food Commissioner for the East of Scotland.

THE announcement that the King has been pleased to approve of the appointment of the Most Rev. Dr. J. H. Bernard, Archbishop of Dublin, to be Provost of Trinity College, Dublin, in succession to the late Sir J. P. Mahaffy, has been received with satisfaction in University and other circles. Dr. Bernard entered Trinity College in 1876; in 1879 he gained the first Science Scholarship; in the following year he graduated, winning the Mathematical Studentship, with large gold medals in ethics and logic; and in 1884 he was elected to a fellowship. From 1888 to 1911 he was Archbishop King's Lecturer in the Divinity School, and became Archbishop of Dublin in 1915. A scholar and a preacher, the new Provost is, in addition, a brilliant administrator, and he has in late years made many valuable contributions to the Church's work and progress. He is President of the Royal Irish Academy, and, as a member of the recent Irish Convention, he won the respect and confidence of all parties. With Dr. Bernard as Provost, Dublin University can rest assured that the far-reaching measures of academic reform, begun so well by Sir John Mahaffy, will be carried on to successful maturity.

THE resignation of Miss Florence Gadesden, Head Mistress of Blackheath High School since 1886, will leave a great gap in the educational world. Miss Gadesden has for many years taken an active part in public work connected with education. As President of the Head Mistresses' Association in 1907, she was one of the first to recommend publicly the adoption of the School Record as a partial substitute for the laborious examination system, and as a means of gauging a pupil's capacity as a whole. She was one of the promoters of the Federal Council of Associations of Secondary Schools, and the formation of the Teachers Registration Council was advanced considerably by her endeavours. Miss Gadesden will be remembered as a pioneer in educational reform no less than as one of our great head mistresses.

MR. PERCIVAL SHARP, Director of Education at Newcastle-on-Tyne, has been appointed Director of Education under the Sheffield Education Committee. Mr. Sharp has seen service as an assistant teacher in elementary and secondary schools, and he has been head master of an elementary school. Formerly Director of Education at St. Helens, he succeeded Mr. Spurley Hey at Newcastle in 1914. Mr. Sharp was a prominent member of the Departmental Committee which reported on Salaries in Secondary Schools and Institutions for Higher Education, and he has carried out with marked success many new experiments in educational administration at Newcastle.

MAJOR E. W. MAPLES, O.B.E., Assistant Secretary and Deputy Education Officer to the Middlesex Education Committee, has accepted the directorship of education under the Herefordshire Education Committee. A former pupil of

Mansfield Grammar School, Mr. Maples received his further education at Selwyn College, Cambridge, and Trinity College, Dublin. He is a barrister-at-law of Gray's Inn, and has been an assistant master at Limsfield School and head master of Ealing Secondary School (1897-1904). He was appointed under the Middlesex Authority in 1904, and on the outbreak of war obtained a commission as captain. Subsequently he was promoted major and second in command of a battalion of the New Army.

* * *

MR. C. F. MOTT, the acting director for higher education in Staffordshire, has been appointed director of education under the Cheshire Education Authority. The Staffordshire Education Committee have placed on record their great appreciation of the services rendered to the county by Mr. Mott since he took up the duties of assistant secretary for higher education in 1911, and especially of his invaluable work during the absence of the director in France on national service. Mr. F. A. Hughes, late of Wellington College, who was appointed junior assistant secretary for higher education in January last, is to carry on Mr. Mott's work in Staffordshire for the present.

* * *

THE Governing Body of Fettes Trust have appointed Major A. H. Ashcroft to the Head Mastership of Fettes College, in succession to the Rev. Dr. Heard, who retires at the end of this term after twenty-nine years' tenure. Mr. Ashcroft was educated at Birkenhead School, where he was head of the school and captain of the cricket and football teams. He went to Cambridge with an Open Classical Scholarship at Gonville and Caius College, and obtained First Classes in the First Part of the Classical Tripos and the Second Part of the Historical Tripos. From 1910 to the outbreak of war he was an assistant master at Fettes, when he obtained a commission in the Army. He has seen active service in Gallipoli, Egypt, and France, and became second

in command of his battalion. He was three times mentioned in dispatches, and was awarded the D.S.O. and the Order of the Crown of Italy. He has represented England and Cambridge University at Rugby, 1908-9.

* * *

MR. W. ST. BODFAN GRIFFITH is to succeed Mr. Glynne Williams, who retires from the Head Mastership of Friars' School, Bangor, at the end of this term. Mr. Griffith took a First Class in each part of the Natural Science Tripos, and he has held a mastership at Uppingham for the last thirteen years.

* * *

MR. A. J. B. GREEN, Assistant Master at Perse School, Cambridge, has been appointed Head Master of Guildford Grammar School. Mr. Green was educated at the Roan School, Greenwich, and Jesus College, Oxford. He took a First Class in the Modern History School, and has been on the staff of the Perse School since 1907.

* * *

THE REV. H. COSTLEY-WHITE, Head Master of Liverpool College since 1917, has been appointed Head Master of Westminster School in succession to the Rev. Dr. Gow, who retires at the end of the present term. Mr. Costley-White was educated at Malvern College and Balliol College, Oxford. He gained a First Class in Classical Moderations and Second Class Final Honours Lit. Hum. His experience has been gained as an assistant master, first at Sherborne and afterwards at Rugby. He was Head of Bradfield from 1910 to 1914.

* * *

THE death is announced of Miss E. M. Creak, formerly Head Mistress of King Edward's High School for Girls, Birmingham, and previously Head Mistress of the Girls' High School, Brighton. Miss Creak was among the first five students at Newnham College, and took her degree

London: EDWARD ARNOLD, 41 and 43 Maddox Street, W.1.

with double honours in classics and mathematics at the early age of nineteen years. In the education of girls Miss Creak anticipated, and put into practice at King Edward's School, innovations which are now advocated almost universally by educational bodies. She combined domestic training with a high-school education, reduced the school examinations to the two definite types, "general" and "specializing," introduced the teaching of the laws of health, and postponed the public examinations until after the age of sixteen. She was essentially a pioneer, and to few pioneers has it been given so abundantly to see their principles universally vindicated. ONLOOKER.

TOPICS AND EVENTS.

THE OXFORD SUMMER SCHOOL OF EDUCATION.—The School will be held from August 6 to September 2 inclusive. It will provide a course of lectures on the teaching of school subjects and on the aims and social bearing of education. In each week lectures are given and conferences held on the detailed methods of special subjects. These subjects are throughout considered with reference to their place in a general scheme of education, and a series of lectures on educational theory and on new experiments in school organization runs through the course; it is thus equally suited to specialists and to those who wish for an introduction to the scientific study of education. The school subjects are treated in the following order:—August 6-12, History and Geography; August 13-19, Mathematics and Science; August 20-26, Latin and French; August 27-September 2, English. Entry forms can be procured from the Secretary, Secondary Training Delegacy, Old Clarendon Building, Broad Street, Oxford, and must be sent to him with fee as soon as possible, and in any case before the beginning of the Course. Students should state during which weeks of the Course they propose to attend. The Director of the School is the University Reader in Education, Dr. M. W. Keatinge, 40 St. Margaret's Road, Oxford. The place of the lectures and conferences will be the Hall of St. John's College.

SELBORNE SOCIETY RAMBLES.—The Ramble Section of the Selborne Society has arranged a number of excursions for July. On the 2nd and 9th there will be visits to the General Post Office to see the sorting of the night mails; on the 5th "Father Thames and his Bridges" will be visited; and on the 12th there will be a whole day visit to Horsham and Christ's Hospital. Full particulars may be obtained from the Secretary, Mr. P. J. Ashton, 83 Avenue Chambers, Vernon Place, W.C.1.

COMMERCIAL EDUCATION.—The annual presentation of scholarships, medals, and prizes to the successful students, competitors in the Commercial Education Examinations of the London Chamber of Commerce, will take place at the Mansion House on July 18 at 3 p.m. Sir Robert Horne, K.B.E., Minister of Labour, will present the awards.

SUMMER SCHOOL IN SNOWDONIA.—The programme of the Summer School in Geography, Botany, and Geology, which is to be held at Llanberis from July 30 to August 13, has been designed to prepare teachers to take responsible charge of courses in the School Camps and Open-air Courses which will be developed under the new Education Act. Most of the work will be done in the Pass of Llanberis, by streams or tarns, or on the summit of Snowdon. The district is rich in instances of escarpments, faults of diagrammatic clearness, U-shaped and hanging valleys, river terraces and pot-holes, moraine dammed lakes, *roches moutonnées*, and perched blocks; while to the English teacher the district has all the interest of a foreign country. Visitors interested in the development of our water-power resources will be able to visit the generating station of the North Wales Power Company and the Marconi Trans-Atlantic Station. The arrangements are being made by Mr. H. Valentine Davis, of the Cheshire County Training College, Crewe.

SUMMER COURSES IN ENGLAND.—The Board of Education have issued, at the price of 2d. net, a conveniently arranged table of Summer Courses in England for instruction in various subjects to be held during the coming vacation. The table describes the character of the different courses, gives precise dates and fees, and

See page 422.

To Lecturers and Teachers

*When giving instruction regarding the feeding
of Infants, the following points should be borne
in mind:—*

FRESH COW'S MILK

is unsuitable for very young babies unless diluted with
Barley Water made from ROBINSON'S "Patent"
BARLEY, which prevents the milk clotting and
renders it extremely easy for the infant to assimilate.

DRIED OR CONDENSED MILK

is simply cow's milk from which the water has been
extracted. The addition of water in certain propor-
tions, therefore, results in liquid milk possessing the
same constituents as before it was dried or condensed.

THE SAME PRINCIPLES APPLY

when using Dried or Condensed milk as with fresh
Cow's milk: it should always be reconstituted with
Barley Water made from

ROBINSON'S "Patent" BARLEY

(not with plain water). As in the case of fresh cow's
milk, the Barley Water separates the curd and pre-
vents its accumulation in the stomach, thus enabling
the most delicate infant to digest the milk.

provides the addresses from which full particulars can be obtained. The Welsh Department of the Board have published a similar list dealing with the summer schools which have been arranged in Wales.

TRAINING COURSE BY DR. MONTESSORI.—Dr. Maria Montessori has now definitely decided to hold a training course in London. Her course will consist of lectures on theory and demonstration with children from three years to eleven years of age; it will start on September 1 and last until the end of December. The lectures are intended for teachers who wish to teach classes of children according to the Montessori method; but parents desirous of studying the method may be enrolled, although the total number of students will be limited. Diplomas will be given to those who complete the course satisfactorily, and are deemed capable of applying the method. Full particulars and application form may be obtained from the Hon. Secretary, Mr. C. A. Bang, 20 Bedford Street, London, W.C.2.

A FRENCH Holiday Course has been organized for the Board of Education at Bedford College from August 26 to September 9. Lectures will be given by M. Rudler, Professor of French Literature in the University of London, on "Literary Method" and on a subject taken from French literature. The lectures only are open to the public on payment of a fee. Further particulars may be obtained from Miss Batchelor, Bedford College, N.W.

BRITISH SCIENCE GUILD.—The report of the Executive Committee was presented at the Annual Meeting of the Guild on June 17. Among the numerous activities of the many Committees which are described in the report, special attention may be directed to the work of the Education Committee. During the past year the work of the Committee has been mainly the consideration of (a) industrial research and the supply of trained scientific workers, and (b) the developments to be recommended for the promotion of University and higher technical education, in view of the Education Act of 1918, which deals mainly with elementary and secondary education. The following resolutions were passed by the Committee at a meeting held on February 3, 1919:—(1) "That a Departmental Committee should be appointed by the Government to inquire into

the provision of University and higher technical education in this country." (2) "That a Consultative Committee, consisting principally of representatives of industry, should be appointed to advise the University and Technological Branches of the Board of Education on all matters affecting the relationship of University and higher technical education to industry." These resolutions, with an accompanying memorandum, were forwarded to the usual official authorities. It is interesting to note that resolutions in the same sense were adopted by the Teachers in Technical Institutions at their recent annual conference at Manchester.

EDUCATION IN INDUSTRY AND COMMERCE.—To justify the formation of a new educational society is difficult, but the promoters of the "Association for the Advancement of Education in Industry and Commerce" feel that they are breaking fresh ground—at least so far as this country is concerned. The Association was inaugurated at a Conference, held on May 28 to 30, in London, at the invitation of Messrs. Harrods, Ltd. The name originally proposed for the Society was "Employers' Educational Association," but the more comprehensive title was adopted after careful consideration. Lord Leverhulme is the president of the Association, and delivered his address on the first day of the Conference. Sir Woodman Burbidge is the vice-president. The president entertained those attending the Conference to a garden party, following which there were important addresses by Dr. Fisher and Sir Robert Blair. Speakers at other sessions included Dr. H. B. Gray, Principal H. Schofield, Major T. Knowles, and Messrs. F. Hall, J. D. Blair, N. J. Maclean, and J. Hill. The three last-named contributed papers on Works Schools, and the discussion on this subject indicated that the educational standard aimed at in these institutions is distinctly high and likely to compare favourably with anything possible in publicly maintained day continuation schools. Visits to trade schools and to the school and works of the Marconi Company completed a full programme. Membership of the Association is open—under certain conditions—to individuals, though the bulk of the supporters are firms carrying on educational schemes. The chairman of committee is Mr. J. Knox (Lever Bros.), and the honorary secretary Mr. R. W. Ferguson (Cadbury Bros.). The annual subscription for firms and for individuals are

five and three guineas respectively. It was decided to apply for affiliation with the Workers' Educational Association and the January Educational Conference, also to support the proposed Institute of Psychology and Physiology as applied to Industry and Commerce.

COMMITTEE ON WAGE-EARNING CHILDREN.—This Committee, which was formed to increase the efficiency and promote the reform of existing legislation for the protection of children in employment, has issued suggestions to Local Education Authorities for the drafting of by-laws under the Employment of Children Act, 1903, as amended by the Education Act, 1918. The Committee desire the total abolition of child labour, but, as this cannot be immediately realized in some localities, they offer suggestions, the more important of which are: that child employment on school days be limited by by-law to two hours employment between fixed hours, such as 5 to 7 p.m. or some similar period appropriate to local conditions; that there should be no morning employment before school hours; that no child be employed on days other than school days except between the hours of 9 a.m. and 1 p.m. and of 5 and 7 p.m.; that no child be employed on Sundays (except in religious services); certain employments should be forbidden altogether for children under fourteen years of age; no boy or girl under sixteen years of age should be allowed to undertake street trading; that no child attending school full time be employed until the employer has registered the conditions of employment for each child employed.

CORRESPONDENCE.

HOLIDAYS IN SECONDARY SCHOOLS.

To the Editors of The Journal of Education and School World.

SIRS,—We find ourselves somewhat seriously concerned at a recent suggestion which has been made for the rearrangement of holidays in secondary schools. For instance, the four-term year has been suggested, the terms to be separated by only a few days' recess. The difficulties of the application of this system to secondary schools appear to be the following:—

1. There is danger that there would be no one really long vacation of at least seven weeks, in which staffs might broaden their outlook by foreign travel and private reading, and pupils in large urban centres regain mental and physical vigour by a protracted stay in the country. In rural districts children too long shut up within the four walls of the schoolroom miss the opportunities of education in the practical matters of home and farm life. The tendency among teachers to a stereotyped outlook upon life, already criticized, would be accentuated if the intervals between school terms were shorter than they are at present.

It may be pointed out that in other countries the practice of a very long vacation in the summer has done nothing to reduce the quantity of actual work done in the school year; whereas it is noticed now that after the shortest holiday of the year, about two weeks, both senior girls and mistresses return to school without having fully regained their freshness of mind.

2. The break in the continuity of school work and discipline which would be the result of the release of a mistress for one term out of the four, as has been suggested, would be a very serious defect in school education where training of character must take a foremost place.

There has been of late years a tendency to reduce the holidays of secondary schools in order to make them approximate more closely to those of elementary schools; the result of this has been to lower the standard of work, especially in the upper forms, where it has been found, from actual experience, that work done after thirteen weeks of term is practically useless. These considerations suggest the necessity of lengthening the holidays of elementary schools rather than shortening those of the secondary schools.

To those who would rejoin that the elementary-school holiday cannot be lengthened because the children of the poorest neighbourhoods have unsatisfactory home conditions, we would say that such an answer is an indictment of the Education Authority of a great city which has failed to provide adequate play centres, camps, and other opportunities for well employed leisure.

DUSTLESS AND HYGIENIC SCHOOLS

On all
School, Laboratory, Library, &c., Floors and Linoleums of every description

USE

FLORIGENE

(A Registered Name suggested by FLOOR-HYGIENE)

(British owned)

EARLY in the SUMMER VACATION for best results.

"Florigene" is an aid to the prevention of throat and other diseases, has been awarded the MEDAL of the
ROYAL SANITARY INSTITUTE,

and is strongly recommended by Medical and other expert authorities.

It costs little, saves labour, and is easily applied by the unskilled. Not sticky—the ordinary daily dry sweeping alone required.

It is IMPORTANT to NOTE that

ONE APPLICATION of "Florigene" effectively allays the dust and dirt for
2 to 12 months, according to the traffic, not only **during each sweep-**
ing (without sprinkling of any kind), but **also throughout all the inter-**
vening periods—which is even of **greater hygienic importance.**

"Florigene" has been continuously used for many years on the floors of The Royal Colleges and other important Government Buildings; also in numerous Colleges, Schools, Laboratories, &c., throughout the United Kingdom and Colonies.

BLACKIE & SON'S NEW LIST

 Experience has proved that Messrs. BLACKIE & SON'S Books take a foremost place by reason of their scholarly editing, clear type, strong binding, and reasonableness in price. 

THE GROUNDWORK OF BRITISH HISTORY.

By **GEORGE TOWNSEND WARNER, M.A.**, sometime Fellow of Jesus College, Cambridge; Master of the Modern Side in Harrow School; Author of "A Brief Survey of British History," &c.; and **C. H. K. MARTEN, M.A.**, Balliol College, Oxford; Assistant Master at Eton College. With Maps, Time Charts, and Full Index. 764 pp., super-crown 8vo. **7s. 6d. net.** Complete in One Volume.

In Two Parts, **4s. 6d.** each net. Part I, 55 B.C.-1603; Part II, 1603-1911.

For the convenience of those requiring the book for certain examinations it is also issued—

In Three Sections, **3s. 6d.** each net:—Section I, 55 B.C.-A.D. 1485; Section II, 1485-1714; Section III, 1714-1911.

A NEW GRAMMAR BOOK.

By **AGNES CATNACH, B.A.** (Lond.), Assistant Mistress at King Edward's Girls' High School, Birmingham. **2s. 6d. net.**

This book seeks to connect more closely the formal study of language with adequate expression of thought, and to attain this end all the work is based on the study of the sentence. It is hoped that to children studying on these lines English Grammar will be a subject of living interest, and that the various facts of grammar will gain that logical connection which they so often seem to lack.

The matter has been set forth as simply as possible, and in a manner to retain the interest of the pupil.

SOME PRACTICAL HINTS FOR THE YOUTHFUL HISTORIAN.

By **C. H. K. MARTEN, M.A.**, Balliol College, Oxford, Assistant Master at Eton College. **3d. net.**

N.B.—The above is No. 1 of a Series entitled "Aids to the Study of History."

THE GOLDEN BOOKS OF ENGLISH VERSE.

A Graduated Course for Class Study. Arranged by **FRANK JONES, B.A.**, Senior English Master, King Edward's School, Aston, Birmingham. In Three Books. Book II, now ready, **2s. net.** Books I and III, in preparation.

The chief feature of this series is the teaching apparatus provided at the end of each poem. The objects kept in view in drawing up these aids have been to save the teachers' time, and to provide the pupils with an instrument by which they might test the thoroughness or otherwise of their understanding of the poem studied. Each teacher will no doubt supplement them as necessity arises; and to the pupils who have studied a poem in order to answer the questions asked, the aids will suggest other points for further consideration with the help of the teacher.

A BOOK OF ENGLISH HISTORY FOR CHILDREN. Part I.

By **LILIAS MILROY**, Head Mistress of the Leamington High School for Girls, and **ELIZABETH M. BROWNE**, Formerly Assistant Mistress in the Truro High School for Girls. **2s. 6d. net.**

This history book seeks to steer a course between those mere "outlines," which are bound to be lacking in interest for young children, and the books of stories from history, often delightful to the readers, but apt to be rather too bulky for use as textbooks. The aim of the authors has been to select carefully the more important movements and the more picturesque incidents of history, and in connection with these to give those ample details which children love, and at the same time to preserve a clear chronological sequence.

A RAPID SURVEY OF ENGLISH LITERATURE.

By **E. H. BLAKENEY, M.A.**, Winchester College. **2s. net.**

"A wonderfully comprehensive selection of brief characteristic extracts, with notes of the times and peculiarities of the writers, and will be found a very interesting book."—*Guardian*.

ENGLISH PROSE EXTRACTS FOR REPETITION.

Selected and edited by **E. H. BLAKENEY, M.A.** **9d. net.**

"Mr. Blakeney has done very useful work in producing this little book of prose extracts, fine examples of prose for the use of schools. Extracts from writers such as Gibbon, Scott, Matthew Arnold, Shorthouse, Pater, George Meredith, Ruskin, and some quite recent writers are brought together."—*Times*.

LONDON: MR. WILLIAM RICE, 3 LUDGATE BROADWAY, E.C. 4.

THE WORKS SCHOOL AND ITS PLACE IN OUR EDUCATIONAL SYSTEM.

By REGINALD W. FERGUSON, Educational Organizer to the
Bournville Works.

THE term "works school" cannot be defined in a few words, because the various organizations which are loosely described by that name do not conform to any standard type. They have not as yet been moulded by any code of restrictive regulations. The work done in these schools varies about as widely—in aim and in curriculum—as the trades and industries in which they are carried on. Educationally they can be better classified by reference to their modes of origin, or to the motives of the firms which have started them.

Although the name "works school" has been commonly used only during the past eighteen months or so, the idea is really much older. Half a dozen years ago it was employed as a convenient term by which to describe collectively a variety of educational work carried on by a firm, without the intervention of the Local Education Authority, but, more or less, with the recognition and approval of the Board of Education. Groups of evening technical classes in factories or engineering works are, of course, a still older arrangement, though they never became common. Over forty years ago works classes of this kind were set up by at least one engineering firm.

During 1918, when the successive Education Bills were under discussion, the works school began to be spoken of as a new feature of some consequence in our educational system, and then usually in the restricted sense of a works day continuation school—"a school held at or in connexion with the place of his employment," says the English Act.

Works schools which originated before the Education Act, and without reference to its probable provisions, differed widely in detail, but two examples will serve to illustrate what they

were intended to do. Much of the instruction required by apprentices and other learners must in these days be given systematically if it is to be given at all. The older method of picking up information from older workers cannot be relied on, and is, at best, too haphazard. In a large engineering works space can be set aside as a classroom and suitably equipped. At stated hours of the day groups of apprentices come in from the various shops for regular class teaching. The instructors may be selected foremen, or members of the drawing office staff, or other officials possessed of sound training in theory, or practice, or both. Textbooks or trade periodicals are sometimes to be found in the same room, and the apprentices are encouraged to refer to them. If the instructor's qualifications are practical rather than theoretical, let him have a colleague to supervise note-taking and manipulate the blackboard—that stumbling-block to the unprofessional teacher. The expansion of this kind of work is a simple and natural operation. To the demonstrations on trade processes can be added classes in the physical, mechanical, and chemical principles on which metallurgy and engineering are based; then come classes in workshop arithmetic and practical mathematics, and—for older students—design, costing, economics of industry, and even citizenship, though the bearing of this subject is not so obvious. Thus the approach to a wide range of knowledge is made, as it were, through a vocational gateway, and without serious encroachment on the legitimate domain of the municipal technical school which the same students doubtless attend at night or on certain afternoons.

Take another and less ambitious example: a large manufacturing or distributing concern finds that the ordinary classes of the local school of commerce can usefully be supplemented by instruction on the direct applications of commercial principles to the firm's own business. A series of office classes can be arranged, each section of the course being taken by the lady or gentleman to whose province this particular work belongs. In large offices sectionalization has gone a long way, and only by some such method can junior clerks be brought to see the exact bearing of their own work on the operations which either precede or follow it. Of course it will be urged that those who teach classes of this kind sometimes possess the knowledge without the gift of imparting it, but many teachers in technical or commercial schools are open to the same criticism.

So much for the "pre-Education Act" works school, though many other examples might have been cited had space permitted. One important point, however, arises at this stage. A school of the engineering type, such as is described above, may in origin have been frankly vocational, but as it developed has probably assumed a much more general character. If the work is well and efficiently done, by qualified teachers and under satisfactory conditions, a further broadening of curriculum, with the introduction of English subjects and physical training in due proportions, may readily qualify the school to rank as a day continuation school within the meaning of the Act. Inspection and recognition by the Board of Education will do the rest.

Somewhat different in conception, and generally (but not always) more recent in origin, are those schools established with one eye on the continuation school clauses of the Education Act, and the other eye, more or less definitely, on the needs of a particular business. Up and down the country, from Scotland to Somersetshire, firms are anticipating the "appointed day" by opening their own day continuation schools. To these firms the Board of Education apparently look for much pioneer work, which will ultimately benefit Local Authorities and the community at large. Every such school has doubtless its own special features of interest or value, but one can speak only of those about which certain particulars are available. There are probably others about which little or nothing has yet been made public. At present there is no need for these schools, being experimental and in one sense voluntary, to conform to all the rules about 320 hours per school year, and so forth; and the time given to study varies considerably, while the curricula may not include everything

contemplated in the Act. Let it be noted, in passing, that this pioneer work is by no means confined to the very largest firms.

One interesting experiment, for instance, is a school of quite moderate size in the West of England, where the girls learn to do simple carpentry and household repairs, in addition to all the necessary subjects of a more conventional character. In a school just starting in a large London warehouse it is hoped that self-government, free discipline, and some application of Montessori methods will be the characteristic features. North of the Tweed at least one drapery firm has for some time carried on a day continuation school of its own in quite an unobtrusive fashion. It is in Lancashire, and, furthermore, in the textile industry, that perhaps the best example of a works continuation school is to be found. This school is conceived on broad educational lines, embodying the spirit as well as the letter of Mr. Fisher's Act, and provides for all sections of junior employés a liberal curriculum, with due recognition of physical training, as well as all the other elements of a general education. In its inclusiveness it differs from several other important pioneer schools which cater only for apprentices and office staff, and in which no provision is yet made for unskilled or semi-skilled workers. One of the oldest works schools in England, connected with a very well known factory, and accommodating workers of all grades, began, I believe, with physical training, handicrafts, and domestic subjects, English and its allied subjects being only introduced later.

However diversified these schools may be at present, they will naturally approximate towards some measure of uniformity as the appointed day approaches, but it is fairly certain that most of them will retain a great measure of individuality. In some directions at least the teachers in them will have more freedom and scope for initiative than in the publicly controlled continuation schools. On the other hand, the staff may be awkwardly placed during a strike.

Whether or not an employer need open his own school instead of simply co-operating with the education authority is a matter to be determined by the local circumstances or by the opinions of the Board of Directors. (Generally the firms taking the former course are limited companies.) Some of the arguments for and against such a course are fairly obvious, and may be summarized here.

In a progressive and well organized factory there is a magnificent opportunity for original work, should the employer desire to open a works school on thoroughly educational lines, with the minimum of external interference or inspection. The additional cost involved to such a firm is partly balanced by simplicity of arrangement. The school buildings belong to the firm; the teachers are their employés; the hours of opening and the dates of holidays can be adjusted to meet works arrangements; the educational scheme can be closely co-ordinated with other forms of social and welfare work; the withdrawal of students from any one section to attend day classes may be conveniently distributed throughout the school week; dislocation generally can be reduced to a minimum.

Whether or not the works school is the *best* form of continued education is a different question and more difficult to answer. Most widely divergent views are held on this point. Two opinions are well worth quoting, especially as both were given on the same occasion, when works schools were being discussed at the recent annual meeting of the Association of Technical Institutions. One educationist of long experience said emphatically that work of this kind should be left severely alone by the employer, presumably because his point of view was fundamentally wrong, and that young persons would suffer by attending a works school instead of one publicly maintained. Other speakers held that a properly conducted works school is quite the ideal unit for the development of corporate spirit and well fitted for inculcating principles of citizenship and self-government. The truth lies probably somewhere between these two extreme views. Apart from the danger—real or imaginary—that works day continuation schools may aim at developing efficient wage-earners rather

than citizens, other considerations come into this question. It is well, for example, that employes of different firms should mingle both in the serious work of the day class and in the social, or club side, which ought to be a feature of our day continuation schools. By so doing they learn that grievances and grumbles are not confined to any one factory, and they derive benefit in the same way as older students do by attendance at a college of the cosmopolitan type. The balance of advantage, whether to students or to employers, will in any given case be decided by the relative weights of arguments such as those here indicated. A compromise may well be made, and it is quite possible that in the future many works schools will be based on such an arrangement.

The idea can be outlined quite briefly. Let the Education Authority assume responsibility for general continued education—the seven or eight hours required by the Act, the firms of the district co-operating as keenly as they like. Then let the employer who wishes to go a step further build up the curriculum of his works school from subjects not already covered, such as trade processes, instruction which has special bearing on his own factory, courses of training for certain types of employé, recreative classes, and whatever else meets the needs of the particular case, employes of all ages being included.

All these, together with the keeping of educational records, examinations for selective or qualifying purposes, and the linking up of educational progress with advancement in the factory, make up a programme quite as large as most firms will care to face. Furthermore, it is work which no one but the employer can adequately undertake, and it supplements public education without overlapping it.

This represents a works school of another kind, and time alone can show whether the last type or those described earlier will prove the most general or the most useful.

A careful study of the whole question suggests that no general rule can be laid down. If an employer is prepared to incur the trouble and expense of running a works continuation school *better* than that which could be provided locally out of public funds, by all means let him do so. If not, then the Education Authority is the proper body to do the work. In all probability, the great majority of young persons will attend schools of the public type, and in any case the Act lays down that a Local Education Authority shall not require a student to attend a works school without his consent.

FOREIGN AND DOMINION NOTES.

UNITED STATES.

We are laying, as it were, new foundations for history in the future, with law and justice as basic stones. **About History.** The American Association for International Conciliation has been formed "to awaken interest and to seek co-operation in the movement to promote international good will," and it circulates trustworthy documents in furtherance of this object. What the future must avoid is shown by the records of the past, which reveal, to quote President Wilson, "how helpless peoples have too often been a prey to powers that had no conscience in the matter." This and other teachings of history are being eagerly sought in the United States. Much has to be unlearned, much discovered. The primary reasons for the struggle that freed the greatest of nations in America from the control of a European power were not appreciated until a century and more after independence had been attained, the first writer to make them clear being the late Prof. Osgood, the historian of the Thirteen Colonies (*Columbia University Quarterly*, XXI, 1). That chapter of history, by the way, was one that yielded us good instruction. "From the American Revolution Great Britain learned how to govern colonies," says Prof. Zook in an article, "The British Empire and what it stands for" (*Historical Outlook*, x, 3). And the methods of teaching history, no less than its subject-matter, seem to need revision. A Joint Committee was lately appointed by the American Historical Association, the National Board for Historical Service, and a Commission of the National

Education Association, to examine the whole question of the content and mode of history teaching in schools, and its preliminary report has just been issued (*Historical Outlook*, x, 5). Lantern slides and films are educational auxiliaries that enable us to develop new tactics. The Parthenon or the Roman Forum may now be visualized as well as described. Methods of historical inquiry are also an important subject of investigation, for even about recent happenings it is difficult to get certainty. If history in general be a "Mississippi of lies," it were hard to deny that contemporary history has supplied a few tributary streams.

The study of English history, which for the last two decades of years there has been a tendency to drop in the secondary schools of the United States, is now being recommended as a stay of the Anglo-American *entente* (*Historical Outlook*, x, 5).

The tradition of government in America is mainly an English tradition, unintelligible apart from its origins. American and English children should alike be led to "understand the common foundation on which the Anglo-American institutional edifice rests, and to take a sympathetic share in the continuance of its building in years to come."

In the regulations of Clark University, Worcester, Massachusetts—we have received "The Register and Thirty-first Official Announcement, 1919"—the English reader is impressed by the large powers and duties assigned to the President. The University has eight departments—Mathematics, Physics, Chemistry, Biology, Psychology (the special province of the President, Dr. G. Stanley Hall), Pedagogy, Sociology, and History; and no other department may be established until the existing departments have been brought to the highest state of efficiency. A characteristic of the University is the absence of any clearly marked line between students and instructors. "Fellows," that is to say, post-graduate students of promise who are fitting themselves for an intellectual career, after getting some mastery of a special subject, sometimes give brief courses on it, which may be attended by professors; and any member of the University Faculty may appoint one or more "quiz masters," who, with the aid of the professor's lecture notes, may conduct review classes or make preliminary tests of attainment. Every candidate for the degree of Doctor of Philosophy is examined in French and German. The Department of Pedagogy offers a course for that degree; and, as might be expected in an academy presided over by Dr. Stanley Hall, it connects its work closely with psychology and anthropology.

We used to write of enlightenment on the sexual relation under the rubric, "Germany"; the United States has become for the art and science of education a better standard of comparison and origin of suggestion. In January, 1919, a Conference of Educators representing schools and colleges of Maryland, Delaware, Virginia, and the District of Columbia considered the subject of this paragraph. It laid down that sex problems should be approached with a reverent attitude of mind, and in the light of accurate scientific knowledge. Resolutions were passed to the effect that sex education should be included in the high school programmes of the United States, and that in working out its place the following principles should be recognized:—(i) That sex education be given in connexion with physical education, biology, physiology, hygiene, general science, and other subjects to which it has a rational relation; (ii) that it is desirable that such essential matters as reproduction in a few typical forms of plants and animals, elementary facts concerning ductless glands, including sex glands, the true significance of physiological changes occurring during puberty and adolescence, the main facts concerning the cause, manner of spreading, and possible results of certain diseases, and the fundamental facts concerning heredity, be taught during the first year of the high school; and (iii) that the courses in physical training, biology, physiology, hygiene, or general science, throughout the four years of high school, and especially during the last three years, should make definite provision for carrying on the instruction.

FRANCE.

Universities, like booklets, have their fates. In Belgium, the Communal Council of Ghent has voted for the immediate suppression of the German-Flemish University and the restoration of the French University. With Alsace the University of Strasbourg reverts to French control. Let us look back. When the French took possession of the town the military authorities, it is said, bade the German professors and librarians quit it in twenty-four hours. The Universities of Leipzig and Heidelberg protested: the German

scholars, leaving all their effects behind them, were parted so from the fruits of a laborious life, to the prejudice of international culture. The Swedish University of Upsala undertook the circulation of this protest in hostile and neutral countries (February 1). Of the answers from the academies addressed we have before us the stinging rejoinder (dated April 15) of President Butler of Columbia, who points to the unclean hands of the complainants. The French case is put by M. Gustave Lanson (*Revue Universitaire*, XXVIII, 5): "Il a fallu dès notre arrivée liquider l'Université allemande, foyer de pangermanisme, et renvoyer les professeurs allemands, dont beaucoup s'étaient signalés par leur zèle oppresseur et insolent." Before the German complaint was published abroad the French had organized academic work at Strasbourg, and M. Christian Pfister, on January 20, opened the lectures with the first of a course on "The History of Alsace from 1648 to the present day." A fortnight later the revived French University could boast of eight hundred students. In 1914, before the War, the German University of Strassburg had two thousand on its register, and France hopes to attract to the lecture rooms Americans, Englishmen, Rumanians, Serbians, Greeks, and Syrians in such numbers as to make good the loss. And why not Germans—penitent Germans? Strasbourg was French in the days when Goethe studied there, and consorted memorably with Herder, Jung-Stilling, Lenz, and Franz Lersé. International hatred is a plant that dies in the higher regions first; the trained intelligence rejects it soonest. Universities must lay the new foundations of human brotherhood, teaching the ways of law, justice, and righteousness to all comers.

Instruction by means of "the pictures" makes little progress in France. It is useful, but expensive. An extra-parliamentary Commission on the Kinema was appointed four years ago. While the French soldiers were winning the War the Commission hatched—a project. It decided that every school in every commune of France should have a complete cinematographic installation. But the cost? More than two hundred million francs. The children are still waiting for their "pictures."

L'Education (x, 4) begins with notes by Prof. Starling, of University College, London, on the Report of the Committee as to the place of natural science in education. An article by M. Gaston Sévrette urges the claims of poetry—*un art éminemment évocateur*, calling forth feelings and vague ideas latent in the depths of the Ego. The school, he says, should grade the poetry that it offers to its pupils. To the youngest it should present songs and pœms that treat of the joy of life: Maurice Bouchor and Jacques Dalcroze the best laureates for them. For the older, poetry should be a commentary on the beauties of Nature, and France, where Nature-study, fit introduction, is not yet a regular school subject, should make large use of an André Theuriot, a Maurice Rollinat, a Fabié. With the oldest, poems that induce thought should be substituted for those which stimulate seeing and feeling. Now prosody should be taught and the writing of verses encouraged. "There exists at Cambridge a *collège*, the Perse School, the pupils of which are, as the result of methodical training, poets and dramatic authors. Every *bachelier* (commencing student) worthy of the name should be able to write a *ballade* or a sonnet." We observe that in *La Vie Universitaire* for May a writer avers that an Englishman is a poet by nature. It is an unmerited compliment. What of poetry there is in us would be developed if our children, studying French, learned to sing French songs; François and Mailfait's "Recueil de chants scolaires" might be a serviceable guide.

ITALY.

France has lately withdrawn girls from the right of attending boys' lycées. Italy continues to approve co-education (or rather co-instruction) in secondary schools.

For the girls there are the same courses, examinations, and diplomas as for the boys; but the girls wait for the opening of the classes in a special room, under the surveillance of a lady; moreover, they enter and leave the class-rooms a few minutes later than the boys. The Royal *Liceo* of San Remo had, in 1918, 27 girls among its 181 pupils; in another *liceo* 139 out of 379 pupils were girls. Reports agree that studies, discipline, and morality have sustained no damage from this co-instruction.

INDIA.

So far as India can be said to have a voice, it is a cry for self-determination, and the proposed transfer of education to provincial Indian Ministers would do something to satisfy the national aspirations.

An outline of existing conditions is presented by "Indian Edu-

cation in 1917-18," a volume issued by the Bureau of Education. It summarizes and combines Reports from the Provinces, some of which have been noticed in this column. We observe that the War made its influence felt especially in Burmah, but a decrease in the number of pupils there did not prevent a general increase. There was no appreciable change in the percentage in primary stages to population. The principal feature of the year in primary education was the movement in favour of compulsory elementary education; in secondary education, the institution (in Bombay and elsewhere) of a school-leaving examination. Laudable was the encouragement given to Oriental studies: a grant was made towards the publication of the Bombay Sanskrit series and to the Cama Oriental Institute, whilst the Government Library of Sanskrit Manuscripts at the Deccan College was handed over to the Bhandarkar Oriental Research Institute.

The Trichinopoly District Educational Conference asked lately for the establishment of a University of Trichinopoly. We take occasion to point out the insufficiency of the provision for University education in India. The appealing figures that follow relate to the year 1916-17, and are taken from the Quinquennial Review of the Progress of Education in India.

University.	Area assigned in sq. miles.	Population of area.
Calcutta	376,402	65,480,716
Bombay	195,111	29,127,722
Madras	237,159	59,766,897
Punjab	394,138	32,015,118
Allahabad	452,408	84,436,197
Patna	111,881	38,435,293
Mysore	29,475	5,806,193

NEW ZEALAND.

Of the 1,902 students attending in 1917, the four University colleges affiliated to the University of New Zealand 873 were receiving free tuition as holders of some form of scholarship. From the Education Report, it appears that 44 per cent. were taking the arts course, whilst 15 per cent. were studying medicine, 11 per cent. engineering, 10 per cent. law, 9 per cent. commerce, and 4 per cent. science. Something is being done, and something remains to be done, for the encouragement of science studies in New Zealand. Up to the present, eighteen Research Scholarships have been awarded in the University, two being operative in 1917. One Scholar was inquiring into the dissolution of gold by solutions of sodium cyanide; the other was pursuing an investigation of New Zealand grasses. It is proposed—and the proposal is supported by the New Zealand Institute and the National Efficiency Board—to constitute a Board of Science and Industry, having a statutory grant and empowered to subsidize research whether conducted in public laboratories or by private persons. Again, the Cawthron Institute, founded by the late Mr. Cawthron, of Nelson, has a capital of more than £200,000. The income will be applied to buildings, the equipment of laboratories, and the maintenance of scholarships and fellowships in science. For the fruit industry, in particular, the trustees of the Institute expect that research will supply a powerful aid.

ORANGE FREE STATE.

The brief Report just received from the Orange Free State Province deals with the nine months ended December, 1917, and is signed by Acting-Director Schmidt, the late Director, Dr. W. J. Viljoen, being engaged on a revision of the education laws of the Province. We note briefly from it that schools grew more numerous and were better attended; that a difficulty was experienced in finding teachers for secondary and technical subjects; and that Afrikaans, the home language of the children, was supplanting Netherlands in schools. The Inspector of the South-Eastern Circuit reports weakness in history. "The average Standard IV child rarely has an accurate idea who Paul Kruger was."

THE last report of the Council of the Royal Society of Arts shows that the increase in the entries for the Society's examinations, which began in 1917, has been continued, the numbers being 34,173 for this year, as compared with 31,135 in 1918, and 26,185 in 1917.

UNIVERSITIES AND SCHOOLS.

OXFORD.

So much correspondence has appeared in the press on the subject of compulsory Greek that it may be advisable to summarize briefly both the history of the controversy and the actual proposals. In 1912 the Council of Oxford University proposed the complete abolition of Greek as a necessary subject of Responsions, but this was defeated in Congregation, which consists of the resident teachers of the University, and a compromise was accepted by which students in science and mathematics and those not seeking honours in other subjects should be excused Greek. Though Congregation passed this, Convocation, which comprises all M.A.'s, refused it.

This year Council brought in a statute abolishing Greek entirely as a necessary subject, and Congregation passed it; but a determined attempt was made to persuade Convocation to substitute the compromise of 1912 for the statute which requires candidates to offer two languages other than English, one of which must be classical, and in addition to offer two other subjects, one of which must be mathematics or natural science, or a combination of both. On June 17, Convocation refused to pass this statute, the voting being 312 to 306.

It is the business of secondary schools, first and foremost, to give a general education up to the age of sixteen at least, and in the great majority of such schools, owing to the number of subjects which must find a place in the curricula, it is almost impossible to begin Greek before that age. This is clearly shown to be the case by an investigation into the school certificate examinations of seven Universities in 1918, conducted by Mr. Cyril Norwood. He found that, whereas there were between 20,000 and 30,000 candidates, less than 1,000 offered Greek at the age of sixteen-seventeen, and, if the older and larger schools are excepted, less than 300!

It is claimed that secondary schools ought to keep their pupils until they are eighteen and, in the case of those who intend to proceed to a University, this is usually done. Where this happens schools are prepared to consider suggestions from Universities—which, of course, take the form of regulations for University examinations. Such schools could well accept the 1912 compromise. On the other hand, the statute afforded such liberty of choice within the main subject-groups taught in secondary schools as to furnish an almost ideal solution.

Summer vacation courses supply to the teacher an opportunity of keeping in touch with the progress of University thought. Such a course will be taken at the University College of London University between August 6 and August 19 inclusive for students and teachers of French. It will include phonetics and methods of language learning. A summer school of Italian will be held at Girton from July 28 to August 16, and include the history of Italian civilization, Italian drama, and the making of modern Italy. The Geography School at University College, Aberystwyth, will deal with the human geography of Eurasia, the teaching of the subject, and the modern developments in climatology.

WALES.

At the half-yearly meeting of the Central Welsh Board, held at Swansea, an encouraging report was received from the Executive Committee on the progress of the schools. The number of pupils is steadily growing, reaching the total of 18,283 in 1918 as against 16,955 in 1917, but it was pointed out that the increase would have been still more marked if there had been more accommodation in the schools, for unfortunately the premises are at present generally taxed to their utmost capacity. This is really one of the acutest problems in Wales at the present time, and many people are urging the authorities to try to induce the Board of Education to remove the present restrictions on building operations as quickly as possible. It is not, however, very probable that immediate action in this direction will be taken, because most authorities have not yet decided on their educational policy under the recent Education Act, and as in the larger counties in particular the problem of providing extra accommodation is very complex and difficult, we must exercise a degree of patience, as a mistaken policy would have a disastrous effect on educational progress within the area concerned. That some of the Welsh authorities are alive to the necessity for forethought and a thorough consideration of every aspect of the question before deciding on a general plan is proved by a reference to an excellent pamphlet which Mr. T. J. Rees, the Director of Education for

Swansea, has just issued. In it he deals exhaustively with elementary and secondary schools, as well as with evening classes and continuation schools, and as the conditions in Swansea are fairly typical, his conclusions and suggestions are of general interest. The total number of children attending all grades of schools is 20,604, and of these about 3,000 each year reach the age of twelve, and for whom full-time education must be provided until they reach the age of fourteen or fifteen (Mr. Rees strongly recommends the raising of the school age to fifteen) and part-time education up to eighteen. The scheme for dealing with these 3,000 children is briefly as follows. As each year they reach the age of twelve, they shall be submitted to some system of classification, based partly on examination tests and partly on head masters' reports and partly on the wishes of their parents. He recommends the transference of the best children to the two intermediate schools, the next best to one of the four municipal secondary schools, and the remainder to the Middle Schools which will be established under the Act, and which will provide courses from twelve to fifteen or sixteen and part-time up to eighteen. The system is not to be absolutely rigid, for under proper guarantees transference from one type of school to the other will be possible. If some such plan is adopted, we have no doubt that it can be made workable and efficient, and that a far larger proportion of elementary school pupils will be induced to follow a thorough course of secondary education than at present. There are other sections in the pamphlet of great interest on art education, technical education, physical education, &c., and we believe that authorities may derive much enlightenment and help from a careful study of the suggestions put forward in it.

At the same meeting of the Central Welsh Board it was resolved to apply for the recognition of the Senior and Higher Certificate Examinations of the Board by the Examinations Council, and the Executive Committee was empowered to continue negotiations with the view of securing the most advantageous financial position under which the Board might join the Council. Some members were inclined to lay considerable stress on the financial aspect of the question, while on the other hand it was argued that, as the recognition was mainly an educational question, financial considerations should not really determine the issue, and this view was ultimately adopted by the Board.

A special session was devoted to a discussion on the Modern Languages Report. The references to Wales are very scanty, and the Committee, though many witnesses attended from the Principality and gave evidence, do not seem to have had the courage to deal with the interesting bilingual problem. All they have to say is: "To these results, bilingual education may be an assistance rather than an impediment"—surely a very vague and ambiguous conclusion. The Chief Inspector of the Board, Mr. William Edwards, in a carefully compiled memorandum on the Report, on the other hand, gives full consideration to the fact that many of our secondary school pupils have acquired a fair knowledge of English and Welsh before entering school, and it is impossible to ignore it in any discussion on language teaching in Wales. With this pamphlet as a basis, an excellent paper was read by Miss Price, Assistant Inspector of the Board. She is of opinion that in teaching French, more use of Welsh could be made with advantage, and that it is possible to acquire, under proper conditions, a very satisfactory knowledge of two modern languages, thus differing from the Chief Inspector, who believed that only a comparatively elementary knowledge of a second language—up to the reading stage—was in most cases possible. An interesting suggestion was made that a small Commission of Inquiry into other bilingual countries, such as Scandinavia and Belgium, would be able to throw considerable light on the question of language teaching in Wales, as their report would be more likely to be serviceable than the special reports of the Board of Education, which do not generally deal adequately with the bilingual problem. There was a useful discussion afterwards, in which many secondary-school teachers and others interested in modern languages took part.

A conference of secondary-school teachers from the counties of Carmarthen, Pembroke, Cardigan, Brecon, and Radnor recently met at Carmarthen to consider the question of salaries in the intermediate schools. Mr. G. Gwyn Jones, Head Master of Llandilo School, was in the chair. Mr. G. T. Lewis, Head Master of Tregaron County School, in his opening address, expressed great anxiety as to the future of education in rural schools unless they were better financed and better salaries were paid. Some education authorities had increased their rate already, but others had not realized how insufficient the present scales of payment were under existing conditions. The conference, after a long discussion, pledged itself to united action, with the view of obtaining the Depart-

mental Committee's scale and to demand as a minimum for a head master and head mistress a salary of £600, as recommended by the Welsh County Schools Association.

Swansea College.

The Mayor of Swansea has been informed that the Privy Council have granted the petition of the Authority, and that, under certain specified conditions, a University college will be established in the borough. This decision has given great satisfaction locally, and no doubt steps will be taken immediately to comply with the terms laid down in the Charter. As soon as the Court of Governors is constituted it is probable that a Principal will be appointed immediately, as the Court will of necessity be mainly guided by him in the initial steps and in the formation of the faculties. Dr. W. M. Varley, the present Principal of the Technical College, has been appointed to the Principalship of the Brighton Technical College. He has been in Swansea since 1910, and has played a prominent part in securing the present Charter for the College.

Mr. D. V. Johnston, Head Master of Newtown Intermediate School, has been appointed Head Master of Lewis School, Pengam. He graduated as a Wrangler in Cambridge University.

Personal.

Mr. W. St. Bodfan Griffith, of Uppingham School, has been appointed to the Head Mastership of Friars' School, Bangor. He obtained First Class in both parts of the Natural Science Tripos, Cambridge.

Mr. T. R. Coombes, of Lincoln Choir School, has been appointed Head Master of Llandaff Cathedral School.

The students of Swansea Training College have sent the following petition to all the Welsh education authorities:—"We, the students of Swansea Training College, have been considering the question of commencing salaries established by various education authorities for certificated teachers entering their employ from college, and we feel that the minimum salary has not received the same attention as the maximum. We beg to draw your attention to the following points: The high cost of living at the present day. The late age at which a teacher commences to earn. The smallness of the salary in comparison with the wages received by women of similar ages in other trades and professions—qualified girl chemists receive £3 or £3. 10s. per week. The frequent demand made upon teachers for contributions towards charitable and philanthropic movements and institutions. The need for women teachers to keep up a good appearance in order to secure the respect of those amongst whom they live and work. The need of a good initial salary to enable students to show in a practical way their indebtedness to parents and friends who have helped them in their college career. We suggest, therefore, that the minimum salaries be increased in proportion to the cost of living, thus lessening the gap between the minimum and the maximum."

On June 17, Dr. A. H. Trow was appointed Principal of the University College, Cardiff. Out of twelve applicants, five were selected to appear before the Council for an interview. Dr. Trow has been Acting Principal since the retirement of Dr. E. H. Griffiths, and therefore has already had some experience of the difficulties and responsibilities of the post. The new Principal is a native of Newtown, Montgomeryshire, and was educated at the Normal College, Bangor, and at the University College, Aberystwyth. In 1893 he was appointed Professor of Botany at Cardiff, and in 1899 obtained the D.Sc. of London University. He is fifty-six years of age.

SCOTLAND.

Prof. David MacEwan has resigned the Chair of Surgery in the University, which he has held for twenty-one years. The Bacteriology Department of the University, at University College, Dundee, is now being fully equipped under the management of Dr. W. J. Tulloch, Lecturer in Bacteriology, and it is proposed to carry out in the laboratory examinations of material submitted by local public health authorities under their V.D. schemes.

St. Andrews.

President Poincaré, Lord Rector of the University, has announced his intention to visit Glasgow before the expiry of his tenure of office on October 25.

Glasgow.

Ordinances for the foundation of the William Jacks Chair of German and the Chair of Mercantile Law have been approved by Orders in Council, and appointments to these Chairs, as well as to the Chair of French, will probably be made at an early date. An Ordinance providing for pensions or allowances for lecturers, assistants, &c., has also been approved. On

the recommendation of the Senate, the University Court has approved the removal of the restrictions on bursaries and scholarships which have been suspended or postponed in consideration of the absence of candidates on war service. There is expected to be a very large increase in the number of students attending the University next autumn, and the University Court has approved a proposal of the Senate that intending students be asked to give information as to the classes they desire to attend next session. It may not be possible to provide accommodation for all new students. The Educational Institute has suggested to the University Court that the secondary schools and the women students of the University should be represented on the Universities Entrance Board. The Court has replied that the present constitution of the Board has recently been fixed by Ordinance, and that the Court has no power to make a change. Mr. John Bruce, Inverallan, Helensburgh, has given £40 to the University for the purchase of a silver coin of Crete, of which only two other examples are known, one in Florence and the other in Paris. The coin is believed to have been taken away from the University collection in one or other of the thefts which are known to have occurred. The coin has been gradually traced from one collection to another. The British Museum had acquired an option on it, but has allowed it to be restored to the original collection.

At a meeting called by the Institution of Engineers and Ship-builders in Scotland it was resolved to commemorate the centenary of the death of James Watt by raising a fund to provide additional training facilities for engineers and to increase the endowment of the Engineering Department of the University. It is suggested that an additional Chair of Engineering should be founded. The sum considered necessary for the purposes of the memorial is £50,000, and over £6,000 has been subscribed already.

The Senatus has resolved to confer the honorary degree of LL.D. on Emeritus Prof. Cash, formerly Professor of Materia Medica in the University; Emeritus Prof. Japp, formerly Professor of Chemistry; Admiral Sir Roger Keyes; Dr. John Scott Riddell, Red Cross Commissioner at Aberdeen during the War; and Mr. William Howard Taft, formerly President of the United States.

On May 28 Sir Douglas Haig received the freedom of Edinburgh, his native city, as well as the honorary degree of LL.D. from the University. Prof. G. F. Stout, St. Andrews University, is giving his first course of Gifford lectures in Natural Theology at Edinburgh University. His subject is "Mind and Matter in Man and the Universe." Dr. John Tait, Lecturer in Experimental Physiology and senior assistant to Prof. Sir E. A. Schafer, has been appointed to the Chair of Physiology at McGill University, Montreal. He served for over two years with the R.A.M.C. in Macedonia and Italy.

Edinburgh.

Prof. Graham Kerr, of Glasgow University, has contributed to the Royal Philosophical Society of Glasgow an interesting paper on the importance of science in education. He emphasizes the value of elementary physics in a general education and as the basis of study in the more complex biological sciences. He is also convinced of the importance of scientific knowledge in relation to the problems of society and the State. In this connexion he holds that it is necessary to develop popular literature and popular lectures on science, and he suggests that the Corporations of University cities should give the use of one of their halls on one evening each week during the winter season for lectures by the best qualified local representatives of various departments of science. Prof. Graham Kerr's argument is perfectly sound, and his paper may be read with profit, not only by teachers of science, but by all who are concerned in the general education of the community.

Science and Education.

The Governors of the College are endeavouring to obtain a new development fund of £100,000, for the purposes of increasing the staff, improving the facilities of the College for conducting inquiries designed to aid the development of local industries, providing research studentships, and furthering the general purposes of the College. Application has been made to the Government for aid from public funds to meet its most urgent necessities, arising, first, from an increase of £3,000 in the annual cost of heating and maintaining the building—the largest structure in the country devoted to education; and, second, necessary additions to salaries, in order to provide for its 600 day students and nearly 5,000 evening students. The Secretary for Scotland has intimated that the College is to receive an annual grant of £3,000 and a special non-recurrent grant of £6,000. This will meet about one-half of the additions to pre-war expenditure.

Mr. Hugh McCallum, one of the Committee's principal Lec-

(Continued on page 460.)

SOME USEFUL BOOKS FOR THOSE PREPARING FOR THE 1920 EXAMINATIONS.**ENGLISH.****THE NEW HUDSON SHAKESPEARE.**

With Introduction and Notes by HENRY NORMAN HUDSON, LL.D. Edited and Revised by E. C. BLACK, Ph.D., Glasgow, with the co-operation of A. J. GEORGE, Litt.D. Each volume **1s. 9d. net.**

The following volumes are now ready:— **AS YOU LIKE IT. CORIOLANUS. HAMLET. HENRY V. JULIUS CAESAR. KING JOHN. KING LEAR. MACBETH. MERCHANT OF VENICE. MIDSUMMER NIGHT'S DREAM. MUCH ADO ABOUT NOTHING. RICHARD II. RICHARD III. ROMEO AND JULIET. THE TEMPEST. TWELFTH NIGHT.** (Illustrated Prospectus on application.)

THE STANDARD ENGLISH CLASSICS SERIES.

While not encumbered with editorial matter, each volume in this series contains notes and introductory material, which includes a biography of the author and other information designed to help the student to form a critical estimate of the classic as a work of art, and to appreciate the reason for the place which has been assigned in literature to the book and its writer.

The following is a selection of the volumes in the Series. A complete list will be sent post free on application:—

ARNOLD: SOHRAB AND RUSTUM (with other Poems, including **THRYSIS** and **THE SCHOLAR GIPSY**). **1s. 6d. net.**

AUSTEN: PRIDE AND PREJUDICE. **3s. net.**

BURKE: SPEECH ON AMERICAN TAXATION. **1s. 6d. net.**

BURKE: SPEECH ON CONCILIATION WITH AMERICA. **1s. 9d. net.**

GINN AND COMPANY, 9 St. Martin's Street, Leicester Square, London, W.C.2

Glasgow Provincial Committee.

turers in Method, has been appointed Director of Studies, in succession to Mr. D. Macleod, who retires in September under the age limit. The Joint Committee of the four Provincial Committees has suggested that the University authorities should consider the question of instituting a degree of B.A. on the successful completion of a five-subject curriculum, which could be taken concurrently with a three-years' course under the Provincial Committees. The number of students who will be admitted to training during the current session will be only about twenty more than last year, notwithstanding the return of demobilized men, as there are about fifty fewer women entrants.

At the invitation of the Scottish Education Department, a Conference of representatives of Education Authorities met in Edinburgh on May 16 and resolved to form an Association of Scottish Education Authorities. An interim committee was appointed to draft a Constitution for the Association. One of its immediate duties will be the consideration of a national scale of teachers' salaries.

Association of Education Authorities.

The draft scheme of superannuation under the Education (Scotland) Superannuation Act was tabled in the House of Commons on June 6.

Teachers' Pensions.

The Conference of the Institute at Dumfries in May rejected by a large majority a resolution in favour of admitting into the profession demobilized Service men and other people with a good education.

Educational Institute.

The Treasury has intimated that it will no longer be necessary for local authorities to obtain the sanction of the Treasury for capital expenditure, and accordingly the Scottish Education Department announce that they are now in a position to deal finally with any applications that may be made for consent to the raising of a loan. The Department impress upon Education Authorities the necessity for acting in this matter with due deliberation, and suggest that plans inherited from an authority's predecessors should be most carefully reconsidered.

Loans and School Buildings.**IRELAND.**

The proposed Bill for the reform of Irish education is eagerly awaited. Meanwhile there is an increasing feeling of unrest and dissatisfaction with the present conditions. The grounds for this are obvious. In the rest of the United Kingdom, education has been placed upon a new footing and given generous and enlightened assistance, with possibilities of rapid progress. The estimates there show an increase for the year of £12,000,000. In Ireland, two Vice-Royal Committees have proposed important reforms and have made suggestions which are generally recognized as reasonable and essential. Of all the teachers in the United Kingdom, those in Irish intermediate schools and technical schools alone have received no financial aid since the War began, and it is a literal fact that many of them find it almost impossible to make ends meet. The Government in the House of Commons has done little to mollify the discontent. The Irish Attorney-General, when asked why the Duke grant of £50,000 was not being increased this year as an equivalent grant as he himself had promised, fell back upon the evasive reply that its amount depended upon the grant to education as a whole. What the Attorney-General does not seem to have grasped is that the new Bill for Irish education, even assuming that it is passed, will do nothing for teachers this year, and it is this grievance that the natural and automatic increase of the Duke grant would have largely met.

Reform of Irish Education.

The National teachers are the only class in Ireland which have received War bonuses. They put forward this year a claim for an increase in them, and this having come before the Conciliation and Arbitration Board in London, the following award was agreed upon: Men, £60 per annum; women (including teachers in convent schools), £50; junior assistant mistresses, £40. These awards date from April 1 and represent an increase on previous War bonuses of £15. 10s. for men, £12 for women, and £6 for junior assistant mistresses.

War Bonuses.

The annual Irish Technical Congress met in Dublin in June, with Sir Bertram Windle, President of University College, Cork, in the chair. His address was devoted to the present condition of technical education in Ireland and the difficulties from which

The Technical Congress.

it was suffering. Pleading the claims of teachers, he said he was sometimes told he should think first of the pupils, to which his reply was that in thinking of the teachers he was in fact thinking of the pupils, for whom the teachers exist. He summed up the programme for teachers under three F's: Fixity of tenure, Fair salaries, and Freedom from anxiety for old age. The income of the Department had diminished and the expenses of the technical committees had increased, and the immediate prospect was that there was not only no hope of opening the new classes that were required, but some of the present classes must be closed. Summing up a general discussion on technical instruction, Mr. Fletcher, Secretary to the technical education side of the Department, said that the plain issue was that, even to maintain the work at the pre-War standard, largely increased funds were required. Apprentices must be allowed time in the day to attend technical classes at the local school, as evening classes were utterly inadequate for their education. Where demanded, special classes were formed and apprentices were given maintenance allowance by the Department. In these classes they should receive their technical instruction, which should not begin until boys left the primary schools, where they should obtain the requisite general education.

How important this last point is, is shown by the facts concerning evening continuation classes in Dublin, which have lately been published in a little pamphlet containing a report of the deputation to the Irish Government on this subject. In the National boys' schools in Dublin there are 1,700 in the third standard; of these, 1,200 reach the fourth and 800 the fifth standard. More than one-half the boys leave school with a very low mental equipment, and more support is necessary for the maintenance of efficient continuation classes, but the deputation received very scant encouragement from the Government, although it was representative of all educational interests and strongly supported by the Dublin Juvenile Advisory Committee of the Ministry of Labour.

The new Provost of Trinity is the Most Rev. J. H. Bernard, D.D., Lord Archbishop of Dublin, who was born in 1860, entered Trinity College in 1876, and was elected a Fellow in 1884. He was for many years Archbishop King's Lecturer in Divinity, became Dean of St. Patrick's in 1902, Bishop of Ossory in 1911 (when he resigned his Fellowship), and Archbishop of Dublin in 1915. He is also President of the Royal Irish Academy, a Commissioner of Intermediate Education, and has made many contributions to divinity, philosophy, and Irish archaeology.

Continuation Classes in Dublin.

The University College, Cork, has for some time wished to break off from the National University and to become an independent University for the province of Munster. There are always difficulties about a federal University like the National University, which consists of colleges in Dublin, Cork, and Galway, as well as Maynooth. The *locus standi* of Cork was brought before the Senate of the National University, which referred the matter to a meeting of Convocation early in June. The question, unfortunately, has become mixed up with politics, and Convocation decided against the claims of Cork to be a separate University, one of the arguments being that the establishment of a new University there would require an Act of Parliament at Westminster. It is only, however, in general opinion, a matter of time before a new University is established in Cork, and then the constitution of the National University, and the relationship to it of the college in Galway, will require revision.

The Department of Agriculture has published the spring number of its quarterly *Journal*. The articles deal with potato diseases, the poultry industry, tobacco growing, the Irish hunter, flax seed, calf rearing and diseases, egg laying, and Red Cross work in the College of Science; and also contains various official documents dealing with different phases of the Department's work.

HARRAP'S LATEST PUBLICATIONS.

HARRAP'S INTRODUCTORY ALGEBRA. By WILLIAM FARQUHARSON, M.A., Daniel Stewart's College, Edinburgh. Cr. 8vo, 180 pages, with Answers, 2s. net. Also without Answers, 1s. 9d. net.

From the Principal of a Preparatory School:—"Farquharson's Algebra is first-rate, and I shall put an order through in due course. I hope the book will have the success it deserves, for, of the large number of elementary Algebras I have perused in my search for something suitable for beginners, this is the only one that appears to have realized and provided for the extraordinary difficulty of the subject for small boys."

ENGLISH EXTRACTS AND EXERCISES. For Comparative Study and Training in Composition. By F. H. PRITCHARD, Lecturer in Literature at the Municipal Technical School, Devonport. Large cr. 8vo, 256 pages, 2s. 6d. net.

An admirable practice-book in English for lower and middle forms in secondary schools and for upper classes in primary schools. The main idea is to centre all the week's work in English round a suitable extract. The exercises are abundant and in many cases novel in character. No essential point in elementary English is left untouched, and wherever possible opportunity is taken to stimulate interest in the author or extract under consideration.

A SCHOOL GRAMMAR OF PRESENT-DAY FRENCH. By J. E. MANSION. Crown 8vo, 256 pages. 3s. 6d. net.

A new French Grammar for middle and senior forms, special features of which are the stress laid on fundamental principles, and careful differentiation between the normal constructions of the language and those which belong to emotional, colloquial, or literary expression.

EN CAMPAGNE. By MARCEL DUPONT. Edited by G. Bossett, L. & L., with Notes, Re-translation Exercises and Vocabulary. Small crown 8vo, 192 pages, 2s. net.

Incidents of the French campaign in 1914-15 as seen by a French Cavalry Officer who has also served in the French Flying Corps. The style is simple, and the narrative vivid.

EN FRANCE. With Notes, Oral Exercises, and Vocabulary, by Prof. C. FONTAINE, Columbia University. Fully illustrated. Crown 8vo, 224 pages, 2s. 6d. net.

This new reader gives in pleasant idiomatic French a description of the country and people both in Paris and in the provinces.

MARGUERITE ET SES AMIS. Livre de Lecture et de Conversation de la deuxième année. By V. LOUIS. With Illustrations, Exercises, Vocab., and Model Scenes for Acting. Cr. 8vo, 120 pages, 1s. 9d. net. Seventeen illustrated readings descriptive of the daily life of a little girl, followed by four scenes dialogues for acting at school or at home.

A FIRST SPANISH COURSE. By Profs. E. C. HILLS and J. D. M. FORD. With Exercises and Vocabularies. Crown 8vo, 340 pages, 4s. 6d. net. Key, for Teachers only, 5s. 3d. net.

This easier course is designed for much younger pupils than the Authors' previous work.

PEQUEÑO VOCABULARIO. By ALBERT A. MÉRAS, Ph.D. Size 5½×3 inches, 72 pages, limp cloth, 8d. net.

This book contains classified lists of two thousand Spanish words with English equivalents.

CAPÍTULOS ESCOGIDOS DE V. BLASCO IBÁÑEZ. With Notes and full Vocab., by E. ALEC WOOLF, D.Lit. Crown 8vo, 188 pages, 2s. net.

Selections—each one complete in itself—from the words of the foremost Spanish novelist of the present day, whose works have been translated into every European language.

PSYCHOLOGICAL TESTS.

THE MEASUREMENT OF INTELLIGENCE. By LEWIS M. TERMAN, Professor of Education in Leland Stanford Junior University. With an Introduction by Prof. J. J. FINDLAY. Large Crown 8vo, 384 pages, 6s. net. (Prospectus on application.)

The constant and growing use of the Binet-Simon intelligence scale in Europe and America is evidence of the intrinsic worth of the method. This book is the first comprehensive and detailed account of the system prepared for the use of educators in dealing with school children, and the outstanding merit of Prof. Terman's work lies in the craftsmanship displayed in presenting the whole subject to the English student who has not previously been able to secure a ready means of understanding the Binet method, or of training himself in its procedure.

TEST MATERIAL FOR THE MEASUREMENT OF INTELLIGENCE. To accompany the above. By Prof. LEWIS M. TERMAN. 3s. 6d. net.

"All intelligent teachers will agree with Professor Findlay who introduces Professor Terman's valuable and welcome book to the scholastic world on this side of the Atlantic, in giving it a cordial reception. The Binet-Simon tests are known by name to a large number of teachers and teacher-students, who nevertheless have found it difficult to get a concise account of what exactly they stand for and how they are worked. Their difficulties are now cleared away. Professor Terman, who is less well known in Britain than he deserves to be, has supplied in a well-arranged volume of moderate compass all that the beginner requires to know, and with the aid of the test material supplied any one can start on the helpful and interesting task of measuring with some degree of accuracy the intelligence of his pupils. Child-study is apt to degenerate into somewhat poor work, but with Professor Terman as a guide it may be done on scientific lines."—*Glasgow Herald*, June 13th, 1919.

ADDRESS YOUR INQUIRIES TO

MCDUGALL'S EDUCATIONAL Co., Ltd.,
8 Farringdon Avenue, London, E.C. 4.

The TEACHERS' CHRISTIAN UNION.

ASSOCIATED WITH THE Y.M.C.A. AND Y.W.C.A.

President: The Rev. Canon A. A. DAVID, D.D., Head
Master of Rugby.Vice-Presidents: { The Rev. W. TEMPLE, D.Litt.
Miss M. H. WOOD, Litt.D.

Secretary: Miss F. STREET, M.A.

AIMS:—

1. To unite Teachers of all types and denominations, whether men or women, who hold a spiritual conception of education to be fundamental, believing that "Spirituality is the basis and foundation of human life rather than the apex or final attainment of it."
2. To seek through fellowship a clearer apprehension of the Christian Faith.
3. To contribute through Christian Education to the solution of social, international, and missionary problems.

The SECRETARY,
16 Russell Square,
London, W.C.1

will forward particulars of Subscriptions, conditions of membership, list of Branches, and publications. Among these are:—

- "Education: its Spiritual Basis and Social Ideals,"
being Report of 1918 Conference, post free 2/8.
"Ideals and Problems of Religious Education,"
being Report of Swanwick Conference, 1919,
post free, 2/2.

**THE SECONDARY, TECHNICAL AND UNIVERSITY
TEACHERS' INSURANCE SOCIETY**

(The S.T.U.T.I.S.)

Registered under the Friendly Societies Act, 1896. Regd. No. 1424 London.
Approved under the National Insurance Act, 1911. Approval No. 261.

Chairman: Sir JOHN D. McCURE, LL.D., M.A.

All persons whose main work is teaching other than in Public Elementary Schools are eligible for membership of this Society.

STATE SECTION:—

The forthcoming Valuation will, it is expected, show that this Section is in a very strong position and that valuable additional benefits will be able to be offered to its members. O1 03462

Members who have been insured for at least two years, and who are passing out of Insurance in consequence of the Superannuation Act, or of larger salaries, are entitled to become *Voluntary Contributors*, and thus share in the Additional Benefits which they themselves have helped to create.

DIVIDEND SECTION:—

This Section is independent of the State Section and is for the insurance of those teachers to whom the Insurance Act does not apply, or *who desire additional benefits*. It possesses the advantage of a Savings Bank (by the creation of Own Funds and Deposit Accounts), and offers at a very low cost Sick Benefits up to £3 3s. per week. Hitherto about two-thirds of the members' annual contributions have been returned to them each year by being placed to the credit of their Own Funds.

For information apply to the SECRETARY,

10 Mecklenburgh Square, London, W.C.1.

VACANCIES IN SCHOOLS

IMPORTANT

So many Schools at present being full, some with long waiting lists, it will be an assistance to us, in dealing with the large number of inquiries daily received, if Principals likely to have vacancies for the next two terms will notify us as early as possible.

DRUMMOND LATHES

Are right at the Front.
 The important part played by Lathes in the present war cannot be exaggerated.
 A knowledge of Lathe Work means that at all times you are "Right There" and your services indispensable.
 DRUMMOND LATHES stand for the "HALL MARK" of Accuracy, and in the education of all a good knowledge of Lathes and their uses is invaluable.
 The 3½ in. Lathe illustrated below is low in price, but capable of the highest class work.

As supplied by the British Admiralty.

Catalogues on application to **DRUMMOND BROS., Ltd.**, VIEW HILL, GUILDFORD.

Works by John Carroll.

World-wide in scope, of special pictorial beauty, abounding in interest and information, and specially suitable as reward books or for the school library.

ALL ROUND THE WORLD

The Series started with a fine range of books which immediately "caught on" and continue in steady demand, because they filled a popular need—the *Peeps* at Many Lands and Cities. Of ordinary guide books there was no lack, but these compact, well-written and beautifully illustrated volumes covered the countries and cities so informingly and entertainingly, and were published at so reasonable a price, that they made the right impression and ran into edition after edition. In every case the author was an authority who had seen, investigated, and knew what he was writing about, and, with but few exceptions, the fine illustrations in colour were from drawings done on the spot. Over sixty of these volumes have been published. One portion of them deals with the lands of the older civilizations, embodying the stories of Ancient Assyria, Egypt, Greece, and Rome, with important pictures of relics and remains. And as to the modern world, it is all brought under survey—the countries and chief cities of Europe, Asia, Africa, and America, and embracing the various overseas dominions and colonies. They are books for the traveller no less than the home reader, and their Peace-time expansions are bound to be great.

EDUCATIONAL ASPECTS

Every one of the books of the "Peeps" series is of direct educational value, and it is not surprising that they are to a considerable extent in use as school books. How forcibly the geography and outstanding features of the life and external appearance of "Many Lands and Cities" are impressed upon the mind by an acquaintance with the particular series treating upon them! Then there is the "Peeps at History" group, consisting of ten volumes wherein the historic record of America, Canada, France, Germany, Holland, India, Ireland, Scotland, Japan, and the Barbary Coast receives adequate literary and pictorial treatment. Another set of "Peeps" books of special importance in these days when Nature studies are so eagerly undertaken is the "Peeps at Nature" series, edited by the well known author of "The Open Book of Nature," the Rev. CHAS. A. HALL. Birds, moths, butterflies, wild flowers, ferns, the garden, the sea-shore, land mammals, and pond life are among the subjects which have separate volumes in this Nature series, and wonderfully well are they handled and illustrated.

AN ALWAYS EXTENDING RANGE

New books on new subjects are frequently being added to the "Peeps" series. The great railway systems have been thus honoured; and the great steamship lines; also Architecture, Astronomy, Heraldry, Industries, and many more; and there is a dainty group of "Beaux Voyages" in French (independent works, not translations), which has its own special point of appeal.

A LIBRARY OF KNOWLEDGE AND ENTERTAINMENT

There are three strong notes struck and maintained in this collection of books:—(1) instruction viewed from the present-day standpoint; (2) art as applied to the attractive illustration of the leading characteristics of the places and subjects; (3) a practical handling which aims at direct service and utility.

A Complete List of the "Peeps" series up to date will be sent on application to—

A. & C. BLACK, Ltd.,
 4, 5, & 6 Soho Square, London, W. 1.

CADET CORPS GALT'S for UNIFORMS

WE SPECIALIZE IN THESE,

And **OUTFIT** numerous Public School Officers' Training Corps and Cadet Corps, including the following:—

Harrow, Haileybury, Clifton College, Cheltenham, Tonbridge, Wellington (Berks), Wellington (Salop), Wellington (Somerset), Oxford University, Felsted, Trent College, Brighton College, Aberdeen University, Sheffield University, University of Wales, St. Bees School, &c., &c.

Estimates and Patterns of Cloth will be forwarded FREE of charge to any School requiring Uniforms.

HOBSON & SONS (LONDON) LTD.,

ARMY OUTFITTERS.

Manufacturers of every description of
Uniforms, Head-dresses, Accoutrements, Lace, and Embroidery for Officers and Rank and File.

Address inquiries to:

154-164 TOOLEY ST., LONDON, S.E.1.

27 JOHN DALTON STREET,
MANCHESTER.

Posts Wanted—continued.

These School and Teachers' Advertisements are continued from page 432.

YOUNG lady desires post as MUSIC STUDENT in Girls' Boarding School next September. Would oversee Needlework in lower forms if required. Highest references. North of England preferred. Address—No. 10,827.*

EXPERIENCED and fully qualified MISTRESS, with wide experience, wishes post as Form or House Mistress in large Public School. Usual subjects, with French and German acquired abroad. Address—No. 10,833.*

WANTED, post as resident ELOCUTION MISTRESS. Gold medallist, I.L.A.M. Elocution. Able to combine with House Mistress-ship. French conversation. Address—No. 10,834.*

TRAINED teacher (gentlewoman) seeks vacancy as ENGLISH SPECIALIST with Arithmetic and Geography in a good Secondary School. Experienced, successful, qualifications equivalent to degree. Address—No. 10,835.*

GENTLEWOMAN requires post as LADY-SUPERINTENDENT of School Boarding House, or as LADY-HOUSEKEEPER in high-class school. Thoroughly experienced in household management, control of a staff of servants, in the care of girls, and the supervision of health. Excellent testimonials. Address—No. 10,836.*

A POST is required by a gentlewoman to take charge of a Junior House in connexion with a good School (Girls'), or to act as LADY MATRON in Private School. Highest qualifications. Excellent references. Address—No. 10,837.*

SECRETARY (lady).—Wanted, in September, post as SECRETARY in a school. 3 years' office experience. Shorthand, speed 110; Typewriting, 50-55. Address—No. 10,850.*

Posts Wanted—continued.

WANTED, post as SECRETARY in School: Boys' School, by sea, preferred. Secretarial training, Shorthand (120), Typewriting (40), elementary Book-keeping. Help with Games or Junior Teaching. Held temporary post in school. Address—No. 10,840.*

EXPERIENCED FRENCH MISTRESS (diplômée) requires post for September. Public School preferred. Direct Method. Excellent results in Oxford and Cambridge Local Examinations. Good testimonials; references. Address—No. 10,841.*

EXPERIENCED GEOGRAPHY MISTRESS (registered) seeks non-resident post, in or near London, in September. Subsidiary subjects, Botany, Nature Study, English, elementary Arithmetic and Algebra, Needlework. Would undertake Secretarial work. Visiting considered. Address—No. 10,843.*

LADY, B.A. Lond., seeks post in good Girls' School. Latin, Mathematics, French, History, and usual English subjects. Previous experience of both Boys' and Girls' Schools. Address—No. 10,845.*

L.R.A.M., Prof. Dip. I.S.M., seeks Post in School for September. Experienced teacher. Preparation for all exams. Good testimonials. Address—No. 10,846.*

ART MISTRESS requires appointment in Boys' School in September. Drawing, Geometry, Geography, and Preparatory School Work. Preparation for Art Examinations. Art Class Teacher's Certificate, S.K. Cambridge Higher Local in Geography. Experienced. Good testimonials. Address—No. 10,847.*

LADY, who has held responsible positions in several good schools, requires Post in September. Could take over the Domestic side of a house or the entire charge of Health. Excellent testimonials for Nursing, Housekeeping, &c. Good salary required.—Miss JEFFRIES, 77 Morning-side Park, Edinburgh.

Posts Wanted—continued.

POST required as LADY MATRON, five years' experience, two in Boys' Public School, senior house. Similar one preferred, near London, if possible. Hospital trained. Good testimonials and references. Address—No. 10,848.*

TWO MISTRESSES seek posts in same school for September.—(1) Elementary Mathematics to London Matriculation standard, 13 years' experience; subsidiary subjects, French and English. (2) English, 15 years' experience, usual subjects to Junior Local standard. Address—No. 10,849.*

ENGLISH LADY (in Boys' Prep. School in Eastbourne) seeks post as FRENCH or ENGLISH MISTRESS. French acquired abroad. Highly certificated and experienced with boys and girls. Good salary. Address—No. 10,851.*

A YOUNG FRENCH LADY desires Post as FRENCH TEACHER in Girls' Boarding School, somewhere in the South of England or round London. Address—No. 10,856.*

MODERN LANGUAGE MISTRESS, coaches for examinations. Long experience in Public and Private Schools; very successful teacher. Or would undertake Secretarial work (Typewriting, not Shorthand), Press Correcting, or Translations. Excellent references. Address—No. 10,857.*

MUSIC MISTRESS, A.R.C.M., requires post in or near London. Excellent testimonials. Successes in all Associated Board Examinations and A.R.C.M. Examination. Piano-forte, Harmony, Class Singing, Aural Training. Address—No. 10,858.*

WANTED by L.L.A. post as MISTRESS in girls' school (preferably Bristol or London). Subjects: English, History, French, Elementary Mathematics. 5 years' experience.—D.I.H., Woodland View, Farleigh, Flax Bourton, Somerset.

* Replies to these advertisements should be addressed "No. —, c/o Mr. William Rice, 3 Ludgate Broadway, E.C.4." Each must contain sufficient loose stamps to cover postage on to advertiser. Post cards will NOT be sent on.

RECENT AND STANDARD TEXT-BOOKS

MATHEMATICS.

Latest Volumes of Bell's Mathematical Series.

General Editor: W. P. MILNE, M.A., D.Sc., Clifton College.

Arithmetic for Preparatory Schools. By TREVOR DENNIS, M.A., Head Master of Lady Manners' School, Bakewell, late Mathematical Master at Sherborne School. 4s., or with answers, 4s. 6d.

This text-book follows the lines of the syllabus issued by the Curriculum Committee of the Head Masters' Conference. Chapters are included on Graphs, Logarithms, and Household Accounts. Decimal Notation is introduced and illustrated by practical work. The types used conform to the standard laid down by the British Association Committee.

Analytical Geometry of the Straight Line and Circle By JOHN MILNE, M.A., Senior Mathematical Master of the Mackie Academy, Stonehaven. Crown 8vo, 5s.

The examples in this work have been carefully constructed so as to bring into prominence the geometrical properties dealt with. Long lists of questions involving purely manipulative algebra have been avoided.

A First Course in the Calculus. By W. P. MILNE, M.A., D.Sc., Mathematical Master at Clifton Coll., Bristol, Examiner in Mathematics, University of St. Andrews, and G. J. B. WESTCOTT, M.A., Head Mathematical Master, Bristol Grammar School, formerly Scholar of Queen's Coll., Oxford, and University Mathematical Exhibitioner. Crown 8vo, with Answers, 3s. 6d.

Statics. By R. C. FAWDRY, M.A., B.Sc., sometime Scholar of Christ's College, Cambridge; Head of the Military and Engineering Side, Clifton College. Crown 8vo, 5s., or Part I, 3rd Edition, 3s.; Part II, 2s. 6d.

Nature.—"This book can be confidently recommended."

Dynamics. By R. C. FAWDRY, M.A., B.Sc. Crown 8vo, 5s.; or Part I, Second Edition, 3s.; Part II, 2s. 6d.

School World.—"Mr. Fawdry has performed his task with the sure touch of one who is familiar with all the difficulties which beginners in this subject experience."

Differential Calculus for Colleges and Secondary Schools. By CHARLES DAVISON, Sc.D., Mathematical Master at King Edward's School, Birmingham. Crown 8vo, with Revision Exercises, Essays, and Problem Papers. 6s.

SCIENCE.

Chemistries by Prof. Smith.

Introduction to Inorganic Chemistry. By ALEX. SMITH, B.Sc., Ph.D., F.R.S.E., Professor of Chemistry and Head of the Department, Columbia University. 35th thousand. 10s. 6d. net.

Experimental Inorganic Chemistry. A Laboratory Outline for use with the above. 6th Edition, revised. 4s. net.

General Chemistry for Schools and Colleges. 45th Thousand. New Edition, revised and enlarged. 9s. net.

A Laboratory Outline of General Chemistry. For use with the General Chemistry. 4th Edition, revised. 47th thousand. 4s. net.

Elementary Chemistry for Schools. Adapted for use in English Schools by H. A. WOORTON, M.A., B.Sc., late Senior Science Master, Westminster School. 6s. net.

A Laboratory Outline for Elementary Chemistry. For use with the Elementary Chemistry. 2s. 6d. net.

Inorganic Chemistry. By JAMES WALKER, D.Sc., Ph.D., F.R.S. 11th Edition, revised and enlarged. Crown 8vo, 5s. net.

An Introduction to the Study of Plants. By F. E. FRITSCH, D.Sc., Ph.D., F.L.S., Professor of Botany, East London College, University of London; and E. J. SALISBURY, D.Sc., F.L.S., Lecturer in Botany, East London College. With over 250 illustrations. 3rd Edition. Demy 8vo, 6s. net. This volume completely covers the London University Matriculation Syllabus.

Elementary Studies in Plant Life. By F. E. FRITSCH, D.Sc., Ph.D., F.L.S., and E. J. SALISBURY, D.Sc., F.L.S. With over 150 illustrations. Crown 8vo. 3rd Edition. 3s. net.

Nature.—"It would not be easy to find a book better suited to the needs of junior students."

FRENCH.

A Short History of French Literature in the 18th and 19th Centuries. By W. H. HUDSON, late Staff Lecturer in English Literature to the Extension Board, London University. An outline of the History of Egypt, Babylonia, Assyria, Israel, Persia, Greece, and Rome.

An Introduction to English Industrial History. By HENRY ALLSOPP, B.A., late Vice-Principal of Ruskin College, Oxford. Crown 8vo. With Maps and Plans. 5th Edition. 2s. 6d.

Manchester Guardian.—"A well-proportioned economic history of England from 1066 to the present day."

Richardson: Landmarks in the History of Europe. By E. M. RICHARDSON, B.A., Assistant Mistress of St. Saviour's and St. Olive's Grammar School for Girls, S.E. Crown 8vo. 4th Edition, with many Illustrations and Maps. 2s. 6d.

Outline of Economics. By R. E. NELSON, B.A., Assistant Master in Beath Higher Grade School and in Fife Mining School, Cowdenbeath. Crown 8vo. Limp Cloth. 2s. A short Outline of Economic Theory, written primarily for the use of students taking Economics as part of a commercial course in continuation schools and technical schools.

The Guardian.—"A capital Outline of Economics. . . . He has set forth his complex theme with remarkable clearness, the result of very skilful marshalling of the facts."

G. BELL & SONS, Ltd., York House, Portugal St., W.C.2.

PRIZE COMPETITIONS.

The Translation Prize for June is awarded to "Dob"; *Proxime accesserunt*: "Mamble" and "Bésigue."

THE winner of the Translation Prize for May is Mr. P. O. Macdonald, Glencoe, Frinton-on-Sea.

Extract from Th. Jouffroy's lecture on "L'Etat actuel de l'Humanité."

By "DOB."

Let us make no mistake about it, civilization in its onward march has raised the mission of the statesman; the mental equipment and the views which sufficed formerly for a Richelieu are no longer sufficient to-day. Politics are not concerned nowadays with the balance of power in Europe, but with the future of humanity. The Civil Wars of Europe are over; the rivalry of her nations is gradually dying out, as the rivalry between the Grecian cities died out under the dominion of Alexander, and as diversity among the provinces of France was effaced in the unity imposed by the monarchy. Greece became a single nation under Alexander; and the quarrel that had been between Lacedæmonia, Athens, Boeotia, and Macedonia became that of Greece and Persia. In the same way Europe is beginning to be but one nation now that there is an America, an Asia, and an Africa. It is the unity of Europe against these masses, and the balance of power between these masses, that are now the statesman's concern. Mr. Canning had begun to understand this; therein lies his claim to greatness, and thence the thought which thrilled the common sense of all Europe and earned for him its concert of applause. Great ideas are dimly present in men's minds long before they take definite form: he is a genius who first brings them to light. The minister who first departs from the narrow ideas of patriotism, and leads the politics of his country, not towards the time-worn goal of its own aggrandisement and the abasement of its neighbours, but for the benefit, and in the direction, of the unity of Europe, and towards the civilization of the world by that unity and by the ideas of Europe—I say that that minister will be the statesman of the nineteenth century, and will achieve the power and glory of his country precisely because he has abjured the dogma of patriotism.

Academic oratory has never been much cultivated in England, but in France it has been illustrated by many eminent men, whose orations have become part of French literature. Such were Guizot, Michelet, Villemain, and others. Jouffroy lectured on history, philosophy, and *droit naturel* at the Sorbonne and the Collège de France during the Louis Philippe period. He is described as a speaker whose purity of diction and elevation of thought charmed selected audiences, but who had not sufficient power to hold a large gathering. The destiny of humanity was one of his various themes, and the composition from which the piece for translation was selected was really the combination of the first two lessons of a course on the philosophy of history. He was not a great thinker, and it is needless to point out the errors in his diagnosis of the condition of the human race in his day or show the vanity of his prophecies. The passage was one which offered few difficulties to the translator, and there was little to choose between the best versions. For *convent* we have no satisfactory equivalent; "undergo a period of incubation" is accurate, but ponderous; "ferment," "ripen," "germinate," fail to convey the idea of hidden growth. We can suggest nothing better than "grow in silence." Quite a number of competitors fell into a trap here, and wrote "great ideas brood," instead of "the mind broods over great ideas." For the sentence beginning *C'est là son titre de gloire* say, "That constituted his claim to glory, that was the thought." "Achieve the power of his country" is surely not English; say, rather, "win power for his country." *Met en lumière*; better 'puts in a clear light.' Five scripts bore no pseudonym.

We classify the 107 versions received as follows:—

Class I.—(a) Dob, Mamble, Bésigue, Borealis, Dane, Leander, Murphy, E.A.N., Civitas, Melmillo.

(b) Menevia, Trewin, Boy, Llanandras, E.M.S., Garnet, Mal éelos, Etern, Somewhen, Esse quam videri, Playshaw, Borderer, Bohemond, Calvus.

Class II.—Derdlim, Excelsior, Athos, Minikoi, Cablegram, Tom Turk, Téméraire, Novice, F.T.B., Liaison Officer, Hesperus, Iberia, Jolande, Traddles, Kokoe, F.B., Antelope, Ninette, Sara, Cléonte, Ragotin, Jean, G.B.L., Switzerland, Elysium, Elce,

The version by R.H.R.R. arrived too late for consideration.

A Prize of Two Guineas is offered for the best translation of the following extract from Charles Nodier's "Souvenirs de Jeunesse":—

On a peint toutes les voluptés intimes de l'âme; je regrette qu'on n'ait pas décrit la volupté immense qui saisit un cœur de douze ans, formé par un peu d'instruction et par beaucoup de sensibilité à la connaissance du monde vivant, s'emparant de lui comme d'un apajage dans une belle matinée du printemps. C'est ainsi qu'Adam dut voir le monde fait pour lui quand il s'éveilla d'un sommeil d'enfant, au souffle de son créateur. Oh! que la terre me paraissait belle! Oh! comme je suspendais mon haleine pour écouter l'air des bois et les bruits du ruisseau! Que j'aimais le pépiement des oiseaux sous la feuillée, et le bourdonnement des abeilles autour des fleurs! Et j'étais là, comme une autre abeille, caressant du regard ces fleurs, car je les connaissais toutes par leur nom, soit qu'elles s'arrondissent en ombelles tremblantes, soit qu'elles s'épanouissent en coupes ou retombassent en grelots, soit qu'ils émaillassent le gazon, comme de petites étoiles tombées du firmament. Les cheveux abandonnés au vent, je courais, pour me convaincre de ma vie et de ma liberté; je perçais les buissons, je franchissais les fossés, j'escaladais les talus, je bondissais, je criais, je riaais, je pleurais de joie, et puis je tombais d'une fatigue pleine de délices, je me roulais sur les pelouses élastiques et embaumées, je m'enivrais de leurs émanations et, couché, j'embrassais l'horizon bleu d'un regard sans envie, en lui disant avec une conviction qui ne se retrouve jamais: "Tu n'es pas plus pur et paisible que moi" . . . C'était pourtant moi qui pensais cela!

Dieu tout-puissant! que vous ai-je fait pour ne pas me rendre, au prix de ce qui me reste de vie, une de ces minutes de mon enfance! Hélas! tout homme qui a éprouvé comme moi l'illusion du premier bonheur et des premières espérances, a subi, sans l'avoir mérité, le châtement du premier coupable. Nous aussi, nous avons perdu un paradis!

Initials or a nom de guerre must be adopted by ALL competitors, but the prize-winners and the competitors awarded the second place will be required to send real names for publication if necessary.

No competitor will be awarded a prize more than ONCE during a given year, though the name of the competitor gaining the first place will be published each month.

All competitions must reach the Office by the first post on July 15, addressed "Prize Editor," THE JOURNAL OF EDUCATION AND SCHOOL WORLD, 3 Ludgate Broadway, London, E.C.4.

TOO LATE FOR CLASSIFICATION.

CHANNING HOUSE SCHOOL, HIGHGATE, N.6.—
Wanted, in September, Resident MISTRESS (Graduate) for Physics and Mathematics up to London Matriculation standard. Salary £80 and laundry. Apply to the HEAD MISTRESS.

WEST RIDING COUNCIL.—EDUCATION DEPARTMENT.

The West Riding Education Committee invite applications for an appointment as ASSISTANT in the Secondary Branch of the Department. Candidates should be Graduates, preferably in Honours. The possession of a Diploma in Education will be an advantage. Salary £250, rising to £350 by annual increments of £10. A form of application may be obtained, together with particulars of the duties and conditions of appointment, from the Education Department, County Hall, Wakefield. The form should be completed and returned, together with copies of not more than three recent testimonials, so as to reach the Education Department not later than 9 a.m. on July 21st. 1919.

Schools transferred and valued. No charge whatever will be made to vendors of Schools or School Partnerships by Messrs. GRIFFITHS, POWELL & SMITH unless a sale is effected or agreed upon. No commission charge whatever made to Purchasers of Schools or School Partnerships.

Applications from intending purchasers are solicited for the following properties:

GIRLS' SCHOOLS.

Yorks.—Flourishing Girls' Boarding and Day School. Gross receipts past year £2,940 9s. Net profits about £450. 40 Boarders, 42 Day Pupils. Rent of very fine house, standing in its own grounds, £150. Number of pupils greatly increasing. Present year promises to be very successful. Price for goodwill about £1,000 or close offer.—No. 6,048.

Hants.—Partnership in Boarding and Day School. 120 Pupils, 16 of whom are Boarders. Gross receipts about £1,500. Very nice premises. Terms of Partnership to be arranged.—No. 6,050.

Northants.—Successful Boarding and Day School. 154 Pupils, 47 of whom are Boarders. Prospectus terms about £50 for Boarders, and 2 to 4 guineas for Day Pupils. Any reasonable sum will be accepted for Goodwill, as the vendor must give up owing to death in family and other domestic reasons.—No. 6,052.

Surrey.—Girls' Boarding and Day School with Kindergarten Dept. Gross receipts past year about £565. Rent of good house only £45. Price for goodwill about £500.—No. 6,056.

Yorks.—Preparatory School for Boys. Established 35 years. Gross receipts past year £657. Net profit past year £200. Number of pupils 44, paying 3 to 5 guineas per term, without extras. Rent of good house with garden and play ground, only £60. Majority of boys are prepared for Public Schools. Price for goodwill £400.—No. 6,053.

Hants (Seaside).—Partnership in flourishing Boarding and Day School for Girls. Vendor wishes to retire after 20 years, having acquired a competency. Gross receipts past year £3,725 15s. Net profit about £600. There is a waiting list for Boarders for next term. Price for half share of Goodwill £500. Furniture at valuation.—No. 6,044.

Salop.—Flourishing Boarding and Day School for Girls. Conducted by vendor 25 years. Gross receipts past year £1,035 17s. 3d. Net profits past year £369. 15 boarders, 35 day pupils. Rent of fine large detached house, built for a school, and standing in its own grounds, £80. The low sum of £300 will be accepted for Goodwill. Furniture at valuation.—No. 6,041.

Somerset.—For disposal, owing to vendor having lost her eyesight, good class Day School for Girls. Conducted by present Principal 30 years. Gross receipts past year £900. Number of pupils, 30. Rent of large, well-situated house, with accommodation for boarders, £110. Price for goodwill, school, and household furniture 500 guineas, or near offer.—No. 6,040.

Oxon.—Boarding and Day School for Girls. Established 40 years. Receipts past year £1,620. Net profits £590. 24 Boarders, 30 day pupils. Rent of well-built stone house £75. Goodwill about £500. Furniture at valuation.—No. 6,024.

Lancs. (Seaside).—High-class Boarding and Day School. Established 30 years. 17 boarders, 34 day pupils. Net income about £526. Goodwill to be arranged. School furniture about £300.—No. 6,016.

Kent.—Partnership in Girls' and Boys' Day School. Established and conducted by vendor 12 years. Gross receipts past year £550. Vendor desires a lady, if possible, who could take the Junior Music and Drill. Price for half share to be arranged.—No. 6,014.

Music Mistress for Preparatory School for Boys in Surrey, able to help with elementary form work and French. Res. £70 to £85.—B 75031.

Music Mistress for Public High School in Midlands, to teach Pianoforte, Harmony, and help with secretarial work. L.R.A.M. or equivalent and experience. Non-res. £120 to £150, increasing.—B 74401.

Head Music Mistress for Church of England Boarding School in Canada to teach Pianoforte, Theory and Harmony. Experience essential. Res. £100 to £120 and passage.—B 75033.

Mistress to teach Violin and Piano in Church of England Boarding School in Canada. Res. £80 to £100.—B 75034.

Second Music Mistress for Church of England High School in the North of England, to teach Piano in the Middle School. Experience. Knowledge of modern methods a recommendation. Non-res. about £160 to £180.—B 74262.

First-rate Music Mistress for important high-class Boarding School near London to teach Pianoforte with Theory, Harmony, and to train choir. Res. £100 to £120 or more.—B 74921.

GYMNASTIC AND GAMES MISTRESSES.

Gymnastics and Games Mistress for high-class School in British Columbia, to teach Drilling and Games, and help with Forms I or II. Res. £120 and passage.—B 75096.

Drilling and Games Mistress for Public School in Egypt. Non-res. £197 and rooms.—B 75146.

Gymnastics Mistress for important High School in the Midlands, to teach Swedish Gymnastics, Country and Morris Dancing, and supervise games. Non-res. from £150, according to experience, increasing to £320.—B 75347.

Gymnastics and Games Mistress for Secondary Boarding School in Kent. Dartford or Bedford training preferred. Res. £70-£80.—B 74847.

TECHNICAL MISTRESSES.

Domestic Science Mistress for high-class Finishing School in Surrey, to teach Cookery, Laundry, Housewifery and plain Needlework. Some experience in addition to training. Res. from £70-£80.—B 75078.

Needlework Mistress for Training Department of important High School in London. First-class Diplomas in Needlework and Dressmaking, and good experience essential. Non-res. £160-£170.—B 74754.

Domestic Science Mistress for Public Secondary School in the Midlands, to teach Cookery, Laundry, Housewifery, Needlework, and simple Dressmaking. Non-res. £150-£190, increasing.—B 73920.

Domestic Science Mistress for high-class Public School on the East Coast, to teach Cookery and Housewifery. Non-res. post, with good salary.—B 75387.

SEPTEMBER VACANCIES FOR NATIVE FRENCH TEACHERS.

French Mistress in large Private Boarding and Day School on South Coast. Good teacher, with experience in good English schools. Resident £60.—F 73608.

Senior French Mistress in large Public School for Girls near London. Good qualifications and

good English experience. To take charge of French throughout the School. Protestant preferred. Resident £75.—F 73598.

French Mistress for large Public School in Yorkshire, with good experience. Res. from £80.—F 74422.

French Mistress for high-class private School in Devonshire, to teach French for Senior Oxford Local standard. Italian a recommendation. Res. £70-£80 or more.—F 74767.

MATRONS' AND HOUSE-MISTRESSES' DEPARTMENT.

TEXT-BOOKS FOR JUNIOR AND SENIOR FORMS

PUBLISHED AT THE

University Tutorial Press.

MATHEMATICS AND MECHANICS.

Algebra, Junior. By A. G. CRACKNELL, M.A., B.Sc., and

AUGUSTUS BARRACLOUGH, M.A. **3s. 6d.** With Answers. **4s.**
"Maintains the high standard of excellence we are accustomed to expect from so well known a source. The treatment of the graphic portion is particularly good."—*Journal of the Assistant Masters' Association*.

Algebra, School. By A. G. CRACKNELL, M.A., B.Sc. With or without Answers. **7s.**

"The author has brought the work into closer touch with intelligible calculations, and, at the same time, gives a clear account of the elements of algebraic theory."—*Schoolmaster*.

Algebra, School (Matriculation Edition). By A. G.

CRACKNELL, M.A., B.Sc. With or without Answers. **5s. 6d.**
"As a school text-book, this volume has much to recommend it, the examples and test-papers being carefully chosen."—*Mathematical Gazette*.

Arithmetic, The Tutorial. By W. P. WORKMAN, M.A., B.Sc., Head Master of Kingswood School, Bath. *Third Edition.* With or without Answers. **5s. 6d.**

"Destined to supersede all other secondary treatises on the subject."—*Westminster Review*.

Arithmetic, The Junior. By R. H. CHOPE, B.A. With or without Answers. *Third Edition.* **3s. 6d.**

"No better Arithmetic for school work has come into our hands."—*Educational News*.

Arithmetic, The School (Senior Local Edition). By

W. P. WORKMAN, M.A., B.Sc. This edition of the *School Arithmetic* covers the Senior Locals Syllabus, and is amplified by a large selection of examples arranged in Graduated Examination Papers. **4s.**

"The book is of a very high order of merit, and provides a thorough course in Arithmetic."—*School World*.

Arithmetic, Rural. By A. G. RUSTON, B.A., B.Sc. **4s. 6d.**

"We believe the book will be found just what is required in schools of agriculture."—*Secondary Education*.

Book-keeping, Practical Lessons in. By T. C. JACKSON,

B.A., LL.B. *Fourth Edition.* **4s. 6d.**
"A well-arranged and well-explained treatise."—*Educational Times*.

Geometry, Junior. By A. G. CRACKNELL, M.A., B.Sc. **3s. 6d.**

"A simple treatment of the elements of geometry. A feature of the book is the number of questions which require a numerical answer, incorrect and careless work being thereby easily checked."—*Schoolmaster*.

Geometry, The School. By W. P. WORKMAN, M.A., B.Sc.,

and A. G. CRACKNELL, M.A., B.Sc. (New and enlarged edition.) **5s.**

"Combines the theoretical and practical in a most interesting manner, and shows on every page the skill and care with which the material has been put together."—*School World*.

School Geometry (Matriculation Edition). By W. P.

WORKMAN, M.A., B.Sc., and A. G. CRACKNELL, M.A., B.Sc. **4s. 6d.**
Covers fully the syllabus for London University Matriculation.

Graphs, Matriculation. By C. H. FRENCH, M.A., and

GEORGE OSBORN, M.A. **1s. 6d.**

"The explanations are remarkably clear."—*Secondary Education*.

Hydrostatics, Matriculation. By Dr. WM. BRIGGS and

Professor G. H. BRYAN. *Second Edition.* **2s. 9d.**

"An excellent text-book."—*The Journal of Education*.

Mathematics for Technical Students, A First Course in.

By P. J. HALER, B.Sc., A.M.I.Mech.E., A.I.E.E., and A. H. STUART,

B.Sc., F.R.A.S. **2s.**

"The authors have succeeded in creating a 'workshop atmosphere' around this elementary course."—*Nature*.

Mechanics, Junior. By F. ROSENBERG, M.A., B.Sc. **3s. 6d.**

Mechanics, Matriculation. By Dr. WM. BRIGGS and

Professor G. H. BRYAN. *Third Edition.* **4s. 6d.**

"A practical book for this subject. It will be found exceedingly useful."—*Educational News*.

"Affords beginners a thorough grounding in Dynamics and Statics."—*Knowledge*.

Trigonometry, Junior. By WM. BRIGGS, LL.D., M.A., B.Sc.,

F.R.A.S., and G. H. BRYAN, Sc.D., F.R.S. **3s. 6d.**

"The examples given are numerous in each chapter, the diagrams and the arrangement practical."—*Secondary Education*.

BOTANY, CHEMISTRY, PHYSICS, &c.

Botany, Junior. By FRANCIS CAVERS, D.Sc. **3s. 6d.**

"Dr. Cavers has achieved a useful little book."—*Journal of Botany*.
"Combines observational and experimental work with text-book instruction in a judicious fashion."—*Preparatory Schools Review*.

Botany, Senior. By FRANCIS CAVERS, D.Sc. **5s. 6d.**

"Admirably designed to portray the plant as a living entity, to indicate how structure is subservient to function, and to show what conditions and purpose underlie the manifold variations which plants assume."—*Nature*.

Chemistry, Junior. By R. H. ADIE, M.A., B.Sc. *Second*

Edition. **3s. 6d.**
"A useful and practical course, constructed on thoroughly scientific principles."—*Oxford Magazine*.

Chemistry, Senior. By G. H. BAILEY, D.Sc., Ph.D., and

H. W. BAUSOR, M.A. *Second Edition.* **5s. 6d.**

"The ground is well covered on experimental lines. There are questions to every chapter and a section on chemical calculations."—*Guardian*.

Chemistry, Senior Practical. By H. W. BAUSOR, M.A.

3s. 6d. Including preparations, experiments on action of heat, quantitative and qualitative analysis.

Chemical Calculations. By H. W. BAUSOR, M.A. **2s. 9d.**

ADVANCED COURSE. **1s. 6d.**
"The calculations which are inseparable from Chemistry from its very beginnings are dealt with concisely, yet at sufficient length to make them clear to a young student."—*Knowledge*.

Heat, Junior. By JOHN SATTERLY, D.Sc., M.A. **2s. 9d.**

"A remarkably clear exposition of the main principles of the science, such as is required by elementary students."—*Secondary School Journal*.

Heat, Senior. By R. W. STEWART, D.Sc., and JOHN SATTERLY,

D.Sc., M.A. **4s.**
"The information is accurate and up to date."—*The Journal of Education*.

For other announcements of the University Tutorial Press, see pp. 485, 500.

Hygiene, First Stage. By R. A. LYSTER, M.D., B.Ch., B.Sc.

Sixth Edition, Revised and Enlarged. **3s. 6d.**
"A continuous and well-developed course of instruction in Hygiene. The facts are always reliable, the illustrations serviceable."—*Schoolmaster*.

Magnetism and Electricity, Junior. By R. H. JUDE,

D.Sc., M.A., and JOHN SATTERLY, D.Sc., M.A. **3s. 6d.**

"This little book makes a special point of fundamental principles, and is especially adapted to the needs of pupils making a start in the subject."—*Educational Times*.

Magnetism and Electricity, The School. By R. H. JUDE,

D.Sc., M.A. **4s. 6d.**

"From first to last there is an originality of treatment which makes it interesting reading."—*Nature*.

Mechanics and Physics (Mechanics, Hydrostatics, and

Heat), An Introductory Course of. By W. M. HOOTON, M.A., M.Sc.,

F.I.C., and ALFRED MATHIAS. **2s.**

"An excellent introduction to the fundamental principles of Mechanics, Hydrostatics, and Heat."—*Educational News*.

Science, Junior Experimental (Physics and Chemistry).

By W. M. HOOTON, M.A., M.Sc., F.I.C., Chemistry Master at Repton

School. *Second Edition.* **3s. 6d.**

"The explanations are clear, and we can recommend the work heartily."—*Secondary Education*.

Sound and Light, Senior. By R. W. STEWART, D.Sc., and

JOHN SATTERLY, D.Sc., M.A. **5s.**

"The treatment is lucid and concise, and thoroughly in accordance with the most recent methods of teaching elementary Physics."—*Nature*.

Sound and Light, Junior. By JOHN SATTERLY, D.Sc., M.A.

3s. 6d.
"Reaches a high standard, with plenty of practical work."—*Guardian*.

SELECTED BOOKS FOR LOWER FORMS.

ARITHMETIC, PRELIMINARY. By AUGUSTUS BARRACLOUGH, M.A., Second Master at Bournemouth School. 2s. With Answers, 2s.
 This book provides a course of Arithmetic suitable for pupils of ten to fourteen years of age.

"The chapters are clearly written, carefully arranged, and accompanied with a plentiful supply of examples and exercises."—*School Guardian*.

ARITHMETIC, THE PRIMARY. Edited by WM. BRIGGS, LL.D., M.A., B.Sc., F.R.A.S. In Three Parts. Parts I and II, 10d. each. Part III, 1s. 3d.

An Introductory Course of Simple Arithmetical Exercises, covering all the subjects usually taught in schools.

"The examples increase in difficulty by almost imperceptible stages, and they are very suitable for young scholars."—*Nature*.

CHEMISTRY, PRELIMINARY. By H. W. BAUSOR, M.A., late Scholar of Clare College, Cambridge. 2s.

A course for beginners dealing with the leading principles of chemical theory. An excellent book; will make a clear understandable foundation for a systematic treatment of chemistry in the higher forms."—*Educational News*.

ENGLISH COURSE, PRELIMINARY. By A. M. WALMSLEY, M.A., late Senior English Master, Middlesbrough Boys' High School. 2s.
 "An excellent first course in English grammar and composition suitable for the lower forms in secondary schools."—*Schoolmaster*.

EXPERIMENTAL SCIENCE, PRELIMINARY COURSE OF. By W. M. HOOTON, M.A., M.Sc. 2s.
 A detailed course of science training for beginners in accordance with modern ideas.

HISTORY OF ENGLAND, PRELIMINARY. By M. K. ELLIOTT, Honours in the Historical Tripos, Cambridge, and M. S. ELLIOTT, B.A. With Illustrations. 2s. 9d.

"In addition to an outline of political events it tries to give some idea of social and constitutional development and also to connect history with geography. It is clearly written and well illustrated."—*School World*.

FRENCH COURSE, PRELIMINARY. By H. J. CHAYTOR, M.A., and H. E. TRUKLOV, B.A. Second Edition. 2s.

"An excellent first year's work, well arranged on systematic lines, with due regard to the advantages of the direct method."—*Athenaeum*.

GEOGRAPHY, PRELIMINARY. By E. G. HODGKINSON, B.A., F.R.G.S., Assistant Master, Crewe County School. 2s.

A book for beginners, containing Elementary Physical Geography, an outline of the Geography of the World, and the Geography of the British Isles in detail. "An admirable textbook, clear, direct, and well-suited to the needs of pupils for whom it is intended."—*Literary World*.

GEOGRAPHY OF ENGLAND AND WALES, A PRELIMINARY. By ERNEST YOUNG, B.Sc., F.R.G.S., Head Master County School, Harrow. 1s. 6d.

This book cannot be used without an atlas, and is generally suitable for the lower forms of schools.

"A capital book, written in simple language, and containing abundant sketch maps of the right kind."—*London Teacher*.

GEOMETRY, PRELIMINARY. By F. ROSENBERG, M.A., B.Sc. With or without Answers. 2s. 9d.

A book for beginners containing a judicious blending of practical and theoretical work. Insists throughout on reasoning from first principles.

"The book is certainly one to be recommended."—*Preparatory Schools Review*.

PLANT AND ANIMAL BIOLOGY, A FIRST COURSE IN. By W. S. FURNEAUX. 2s. 9d.

"For beginners this little book should prove a very attractive introduction to the study of plant and animal life."—*Schoolmaster*.

SPELLING AND PUNCTUATION (WITH PIECES FOR DICTATION). By HARRY SHOOSMITH, M.A. Modern Language Master, Wandsworth Technical Institute Secondary School. Second Edition. 1s.

"Very seldom have we seen any book which deals so thoroughly with the difficult subject of teaching and learning to spell."—*Educational News*.

For other announcements of the University Tutorial Press, see pp. 484, 500.

MILLS & BOON'S NEW BOOKS.

MILLS & BOON will be happy to receive applications for Specimens from Heads of Schools and Teachers of special subjects. New Educational Catalogues sent post free.

ENGLISH GRAMMAR, WITH ANALYSIS AND PARSING.

By H. G. SMITH, B.A., Senior English Master, King Edward's School, Camp Hill, Birmingham; and G. H. BALL, M.A., Head Master, King Edward's School, Camp Hill. 2s. net.

ENGLISH COMPOSITION, INCLUDING PRÉCIS AND PARAPHRASE.

By H. G. SMITH, B.A., and G. H. BALL, M.A. 1s. 6d. net.

These books have been written with a view to providing a course in English Grammar and Composition suitable for use in secondary schools. They aim at explaining the fundamental rules of the language and making clear the difficulties which teachers of Latin and French experience in imparting a knowledge of their subjects to young boys.

The above two books are issued in one volume entitled "English Grammar and Composition," and form a three years' course in English. 3s. net.

POETRY FOR BOYS.

By STANLEY MAXWELL, M.A. 1s. 6d. net.

A collection of poems of established literary merit printed in bold type.

A NEW SCHOOL GEOMETRY.

Containing more than 1,700 carefully graduated exercises. By RUPERT DEAKIN, M.A. Crown 8vo. 2s. 6d. net. Also in two parts without Answers. Part I: The Properties of Lines, Triangles, and Quadrilaterals. 1s. net. Part II: Areas and their Algebraical Illustrations and the Properties of the Circle. 1s. 6d. net.

EXERCISES IN FRENCH FREE COMPOSITION FOR UPPER CLASSES.

By R. R. N. BARON, M.A., French Master, Cheltenham Grammar School. 185 Exercises. Sixth Edition. 1s. 6d. net.

A REFORM FIRST FRENCH BOOK.

Especially written for the use of Adult Students. By J. STUART WALTERS, D.ès L. Illustrated. 1s. net. Teachers' Edition on writing paper. 2s. net.

NOTES ON THE GOSPEL ACCORDING TO ST. MATTHEW.

With Questions and Concordance for the use of Schools and Young Students.

By the Rev. C. R. GILBERT, M.A. With 3 Maps and a Photograph. Crown 8vo. 1s. net.

DIRECT METHOD FRENCH TEXTS

Edited by R. R. N. BARON, M.A.

TRISTAPATTE ET GORET, Etc. Crown 8vo. 1s. net.

"The five simple stories contained in this book have been taken from the 'Livres roses Larousse.' Each is divided into short sections, and to each section there is an 'Exercice,' consisting of a set of French questions on the text, questions on grammar and vocabulary, and a subject for free composition."—*School World*.

PIERRILLE. By JULES CLARETIE. Crown 8vo. Second Edition. 1s. 6d. net.

"Well edited, with brief but adequate notes in French."—*The Journal of Education*.

TAMANGO and JOSÉ MARIA LE BRIGAND. By PROSPER MÉRIMÉE. Crown 8vo. Second Edition. 1s. net.

TAMANGO is also issued separately in limp cloth, at 4d. net. "A dramatic but fascinating story, well printed, with excellent exercises, notes in French, and a short account of the author."—*The A.M.A.*

LA BELLE NIVERNAISE. By ALPHONSE DAUDET. Crown 8vo. Fourth Edition. 1s. 6d. net.

"The editor has done his work well. The exercises are carefully arranged."—*The A.M.A.*

BUG JARGAL. By VICTOR HUGO. Crown 8vo. 2s. net.

"The exercises are particularly good, and include a sufficient amount of word-formation."—*Modern Language Teaching*.

CARTE DE GRAMMAIRE. By Miss L. E. THEEDAM, The Godolphin and Latymer School, Hammersmith. 6d. net.

A concise résumé of French accidence, written in French and intended to be used in connexion with Reform French Textbooks and readers, by pupils of Junior and Middle School forms.

AN INTRODUCTION TO HEAT.

By ARTHUR R. LAWS, B.Sc., and GEORGE W. TODD, B.A., D.Sc., Science Masters at the Royal Grammar School, Newcastle-on-Tyne. With 106 diagrams. 2s. 6d. net.

The main idea underlying it is that boys are gifted with a large amount of curiosity, and that, when they once realize that there is something behind many of the phenomena of everyday life, they are prepared to take a good deal of trouble to satisfy their inquisitive instincts.

OUTLINES OF APPLIED PHYSICS.

By H. STANLEY, B.Sc., Lecturer in the Merchant Venturers' Technical College, Bristol. With 75 diagrams. 2s. 6d. net.

EXPERIMENTAL MECHANICS AND PHYSICS.

By A. H. E. NORRIS, B.Sc. With 150 Diagrams and Answers to the Problems. Fifth Edition. Crown 8vo. 2s. net.

A FIRST SCHOOL BOTANY.

By E. M. GODDARD, B.Sc., Science Mistress, Girls' Secondary School, Colchester. With 207 diagrams. Second Edition. Crown 8vo. 2s. 6d. net.

ELEMENTARY QUANTITATIVE ANALYSIS.

By F. M. OLDHAM, M.A. With 11 Diagrams. Crown 8vo. Second Edition. 1s. 6d. net.

THE MERCHANT OF VENICE.

With revised Text, Questions, Notes, and Appendixes. By G. H. BALL, M.A., and H. G. SMITH, B.A. 1s. net. Text only, 6d. net.

THE TEMPEST.

Edited by FRANK JONES, B.A. 1s. net. Text only, limp cloth, 6d. net.

SHAKESPEARE'S KING HENRY V.

Edited by the Rev. C. R. GILBERT, M.A. 1s. net. Text only, 6d. net.

AS YOU LIKE IT.

Ed. by the Rev. C. R. GILBERT, M.A. With Notes. 1s. net.

A NEW SCHOOL ALGEBRA.

By W. J. WALKER, M.A., Head Master of Woodhouse Grove School, Apperley Bridge, Bradford. In two volumes, with or without Answers, 2s. net each; or in one volume, 4s. net.

"There are plenty of mental or oral questions and test papers. The type is large, and most left-hand pages begin with a new exercise. The examples are of the most part original and are carefully arranged."—*Mathematical Gazette*.

PREPARATORY ARITHMETIC.

By F. C. BOON, B.A., Principal Mathematical Master at Dulwich College. Second Edition. With Answers, 2s. net; without Answers, 1s. 6d. net. Answers separately, 6d. net.

A revised and enlarged edition of this well known book. A large number of new examples have been added, and the few misprints in the first edition corrected.

A FIRST SCHOOL CHEMISTRY.

By F. M. OLDHAM, M.A., Senior Science Master at Dulwich College. With 71 Illustrations. Sixth Edition. 3s. 6d. net.

GRAPHS IN ARITHMETIC, ALGEBRA, AND TRIGONOMETRY.

By W. J. STAINER, B.A., Head Master of the Municipal Secondary School, Brighton. With 120 Diagrams. 2s. 6d. net.

LATIN EXTRACTS FOR SIGHT TRANSLATION.

With Hints to Beginners. By G. H. BALL, M.A., Head Master of King Edward's School, Camp Hill, Birmingham. 1s. net.

THE NEW PRELIMINARY GEOGRAPHY.

By H. B. WETHERILL, M.A., Head Master of Allahabad High School. Seventh Edition. With Illustrations and 19 Diagrams. 2s. net.

REVIEWS AND MINOR NOTICES.

MUSIC AND IMAGINATION.

The task of selecting suitable teaching material presents itself anew to the music teacher at the commencement of each term. Old lists have had to be scrapped, as the German editions, on which a majority of teachers have hitherto relied, are no longer available, and it is interesting to note the style and type of much of the music which is now being written for educational purposes by our native composers.

Coming to the music written for the pianoforte, we find that many of the modern pieces have a title or verse of a poem attached to them, designed to foster an appeal to the imagination. "In connexion with human things," says Sir Hubert Parry, "realistic suggestion falls into its right place in the scheme of art." Music is alive with suggestions of human interest, but in writing to a programme the difficulty is to make the piece interesting, both as music and as a representation of what it purports to describe. Early attempts at pictorial description in music may be traced back as far as Kuhnau (1660-1722), who preceded J. S. Bach at St. Thomas's Church at Leipzig, a composer who tried to think out seriously the problem of the union of musical expression and poetical purpose. His plan—as, for instance, in the Bible Sonatas, where he describes the fight between David and Goliath—was to imitate his subject in music, and make his poetic purpose clear by detailing the story.

John Sebastian Bach made one attempt in the same direction, entitled "Capriccio on the departure of my dearly beloved brother." The first movement, he says, depicts "the cajoleries of friends, trying to induce him to give up the idea of the journey"; the second is "a representation of the various things that may happen to him in foreign lands"; the third movement expresses the laments and tears of his friends as they bid him good-bye; and the last movement is "a most entertaining fugue on a tune supposed to be played by the postillion on his horn, with the crack of the whip through it all."

Couperin, in France, about the same time was writing many fanciful little pieces for the *Clavecin* with such titles as "La Galant" and "L'Enchanteresse."

Claude Daquin (1694-1772) followed the ideas of Couperin in composing little picturesque pieces, based on the outlines of the dance-forms, representing or depicting something, each with its own title. The most famous of these is the "Coucou," in which ingenious and artistic use is made of the song of the cuckoo. During the development of the sonata composers concentrated all their energies in other directions, but with the rise of the romantic school the device again reappears, and from Beethoven onwards realistic suggestion is to be found at one time or another in the works of the majority of composers.

Writing on the subject of programme music in his excellent "Musical Studies," Mr. Ernest Newman says: "The representative power of music is growing day by day. The only æsthetic fact we can be sure of is this: that no piece of representation will be tolerated unless it is at the same time music. . . . In all poetic music there must be as thorough a satisfaction as possible not only of the literary or the pictorial, but of the musical sense. In spite of the warning of some of the critics to young composers against falling into the toils of programme music, and recommending them to continue along the lines laid down by the older masters, musicians have been and are turning out quantities of programme music.

There can be little doubt that, where a title is well chosen and really poetical, it serves to introduce us, as it were, to the mood of the music beforehand, and brings about an attitude of mind favourable to its reception. Mr. Stewart Macpherson, in his essay on "The Musical Education of the Child," gives this advice, which also contains, be it noted, a necessary word of warning. "It is clearly the duty of the teacher to cultivate carefully and wisely the imaginative side of the pupil's nature; on the other hand, there should be no forcing of that pupil's emotional susceptibilities. . . . An endeavour

on the part of the teacher to help the pupil to come into closer relation with the composer's train of thought by the use of poetic imagery, analogies with Nature, and other similar means, seems not only permissible, but wise, and likely to be productive of increased interest and corresponding progress on the pupil's part."

Modern discoveries have simplified for the teacher the problems of the laws of agility, touch, tone, &c., and pupils, when taught on modern enlightened lines, are rapidly steered through their technical difficulties, and are able at quite an early age to "get behind the notes" and realize that music really means something.

To compose elementary music of real attraction and musical worth is no easy task, and a happy title by no means makes up for bad workmanship; but among the publications recently received from Messrs. Joseph Williams & Co., the Anglo-French Music Company, Messrs. Augener & Co., and others, teachers should have no difficulty in finding material not only as good as, but in the majority of cases a great deal better than, much of that hitherto imported from abroad. We have pleasure, therefore, in directing attention to a number of works which fulfil the above conditions and are well worthy the attention of teachers.

"Kensington Gardens," "Cinderella," "Five Little Pictures"—all by Ruby Holland, are the daintiest possible trifles; "A Sunny Garden," twelve little pieces by Christopher John, all show a touch of real genius. No. 3, "The Gardener is a Very Old Man," with its halting syncopations, proves the writer to have a keen sense of humour.

Then we have "Titania's Court," four fairy lyrics by Margaret Portch; "Four Songs without Words," by Norman O'Neill; "Five Cameos," by Tobias Matthay; "Laughing Water," by Stephen Eden; "Four Album Leaves," and "Five Idylls," both by Felix Swinstead, and many other albums of like nature—all from the catalogue of the Anglo-French Music Company.

"Four Little Dances," by E. Markham Lee, are of a higher degree of difficulty; "Glyndebourne Dances," by Charles Harford Lloyd; "Six Miniatures," by Ivy Herbert, and a set of six pieces ("Night Thoughts"), by C. V. Stanford, from Messrs. Joseph Williams & Co. "Ballet Suite," by Cyril Jenkins; two books of "Monologues," by Leonard Butler, are from Messrs. Augener & Co.

EDUCATING BY STORY-TELLING.

Educating by Story-telling. By K. D. CATHER. With an Introduction by C. W. HETHERINGTON. (7s. 6d. Harrap.)

This volume is the first of a new series, intended to break away in some directions from traditional methods of study, and it is well that the series should begin with the examination of a tool which is, if not basal, at least applicable, to many energies of the class-room. The make of the book is as follows. The publishers write a short preface, explaining that Mrs. Cather is well known as a teacher and as a raconteur, who has in many cases collected her own stories, and pleading for more of the pleasurable in the school. There follows a quite valuable paper by the Editor, who is Director of the Play School in the University of California; but it does seem that this paper flies rather higher than the aim of the book itself. One sentence may be quoted: "The fairy tales of the future will be well told stories from our sciences or human life and nature, the two natural centres of interest in the environment, and we may expect as results in public opinion a broader common sense and a lessened gullibility. In this organization of science and modern thought in story form, for its larger use in education, the professional story-teller has still a great unfinished task to perform. Its beginnings are in this book."

These words are not nearly so guileless as they seem. They mean that story-telling as we understand it will have to change its aim and content. And this is the teaching of the volume, though apart from its bibliography, it seems directed to the lower grades only. It is divided into two parts, the first dealing with the story-interests of childhood and with the possibilities of story as a guide to literature, art, nature study, dramatization, history, geography, and ethics; the

second part consisting of a body of stories many of which were collected by the writer herself, and which, as a body of story, bear upon the main contentions of the whole volume. A valuable graded list and a complete bibliography are added.

Now, it has long been held, especially by story-tellers themselves, that he who can tell a story can, if properly equipped with the requisite knowledge, do almost anything in the way of teaching. For a perfect method of story, they say, contains in itself not only narrative, histrionic, forensic, emotional power, but it assumes a wisdom in telling just enough and not too much, which is the essence of the question-inviting cunning of the true teacher. If we are permitted to add that story-telling demands in the class-room that humanity without which many studies seem to flourish, surely we have conceded to the story a great deal. But there are difficulties. All story-method has its enemies; few perfect story-tellers exist, and, so far as our Editor here allows, the ABC of story-telling has to be written. Is it contended that we are to go back to pre-book days and rely largely on the human voice, or is the teacher to be trained primarily as one who can at will put any subject or any division of a subject into perfect music, perfect clarity, and perfect words? Indeed, what does Mrs. Cather or any other writer mean by "story-telling"?

Apparently she means literary power; and for this interpretation the schools are not at all prepared. They are scarcely prepared for the orthodox meaning of story, being crammed (small blame to them) with that mixture of self-consciousness and want of enthusiasm which ruins so many story hours to-day. If, however, we are to extend the meaning of the term, as Mr. Ransome does in his book ("A History of Story Telling"), then we may as well set to work and write manuals on literary training. The unhappy teacher, often without a library, without time, without help, falls back on chance work, elaborates it badly, and is dismally conscious of failure, scarcely being aware that many of the greatest professors of "method" would shrink from showing in *propria persona* how the thing is to be done. Mrs. Cather's book will encourage, its examples will be of infinite use, and its wide outlook will stimulate thought. But, as the author says in her preface, the book does not pretend to have said the last word on the subject. If it provokes many other words, it will have been written to great purpose. At all events, we have here the enthusiastic verdict of one who has succeeded in a difficult application of a difficult art.

Problems of National Education. Edited by JOHN CLARKE. (12s. net. Macmillan.)

The title of this book is apt to mislead, unless the reader notes that it is "by twelve Scottish educationists." No doubt it does deal with national education, but the subject is treated, to use the convenient official phrase, "with special reference to" Scottish education. There is the further limitation that Scottish education is here treated in the light of the Education (Scotland) Act, 1918. The book is accordingly timely, and fully justifies its existence. The editor, whose fitness for his task is proved by the success of his previous work, "Short Studies in Education in Scotland," confines himself to a brief preface, and reserves his energies for the none too easy function of "Warden of the Marches." We may say without hesitation that he has been thoroughly successful in selecting and guiding his contributors. There is a certain amount of overlapping between the first chapter and the eleventh, but, speaking generally, there is remarkably little of this irritating characteristic so common in books of this type. Naturally some of the chapters are much more to the point than others.

Miss Ainslie's treatment of Secondary Education for Girls has little more than a tincture of Scotland, and the same is true of Dr. Strong's Moral and Religious Elements in the School, and, in a less degree, of Dr. Morgan's Social Aspects of Education, and Mr. Malloch's Teaching as a Profession. On the other hand, there is a full-blooded Scottish flavour about Mr. MacGillivray's excellent introductory account of Fifty Years of Scottish Education. Sir Leslie Mackenzie

contributes a remarkably lucid and convincing chapter on Physical Interests, in which the ratio between general and particular is just right. Miss Fish writes, with her usual gentle precision, on the Interests of Girls in Elementary and Continuation Schools. Two striking chapters are those on the Classics in School and University, by Prof. Burnett, and on the Place and Function of Science, by Prof. J. Arthur Thomson. The two professors are curiously complementary to one another, the classics man being unorthodoxly sympathetic to science, and the science man reciprocally generous towards the classics. Prof. Thomson writes on science like a poet, and Prof. Burnett claims that "what we call 'science' may be best described as 'thinking about the world in the Greek way.'" Dr. A. P. Laurie deals with Technical Education in a fashion that is profitable for both English and Scottish readers. Mr. John Clark, of Glasgow, treats of Local Administration with an authority that his long and wide experience warrants. In some ways the best chapter in the book is Prof. Grierson's *The Scottish Universities*. Here we have the English and the Scottish Universities compared by one who has had inside experience of both. His sympathetic insight has produced a presentation of the two national ideals that makes a fitting ending to a book that cannot fail to improve the mutual understanding of the two nations.

ENGLAND HALF A MILLENNIUM AGO.

The Reign of Henry the Fifth. Vol. II: 1415-16.
By J. H. WYLIE. (30s. net. Cambridge University Press.)

Before his lamented death in February 1914 Dr. J. H. Wylie had issued five substantial volumes dealing with the opening period of the fifteenth century. They embodied the results of the researches of nearly thirty laborious years, and they contained much rich historical treasure brought to light for the first time from the dark recesses of the British Museum and the Record Office. They had the defects of their qualities. Dr. Wylie had the accumulative rather than the constructive mind. He got together masses of material so vast that he did not know what to do with them. At first he strove to give some sort of coherent form to them; but ultimately he abandoned the attempt, and he just dumped them down for future historians to grub amongst. They are, indeed, an inexhaustible treasure-house of curious information; but woe to anyone who regards them as a book and tries to read them!

The present volume was in the press at the time when Dr. Wylie died, and he had corrected the proofs of nearly one-fourth of it. The remainder has been revised and edited by two members of his family. It is to be hoped that the same careful editors may be able to prepare and print the material which Dr. Wylie had collected for the completion of the reign of Henry V. For it would be a regrettable pity if the fruits of so much labour should be lost to posterity. The volume now issued, with its five hundred royal-octavo pages and its masses of minute foot-notes, covers little more than twelve months of the history of England half a millennium ago. The twelve months, however, included the siege of Harfleur and the battle of Agincourt, and Dr. Wylie has exhausted all accessible sources in order to gather together every bit of first-hand evidence as to the course of the campaign and the careers of the persons concerned. Some of the most curious and interesting information, however, has remarkably little relevance either to the biography of Henry V or the history of England. Over fifty pages, for instance, are devoted to a life and character sketch of John, Duke of Berry, an aged uncle of Charles VI of France, who happened to die in June 1416. Again, the fact that a certain William Bourchier went with Henry V to France is the sole excuse for the inclusion of a thirty-page description of his manor of Great Waltham, with all its customs and its courts. Any hare, indeed, was capable of drawing Dr. Wylie away from his main narrative. The consequence is that we have here, as in all Dr. Wylie's works, not a book, but material out of which a score of books could be made by a writer of literary skill.

CLASSICS.

The Greek Theater [sic] and its Drama. By ROY C. FLICKINGER. (3 dols. net. University of Chicago Press.)
This is a book which challenges comparison with Haigh's "Tragic Drama of the Greeks" and "Attic Theatre," for in some sense it covers the ground of both of these. Although it lacks the literary appreciation of the former, it is an important work, and Mr. Flickinger would no doubt himself insist that detailed literary appreciation lay beyond the scope of his intent. To put it briefly, we may say that the object of the book is to trace the effect of the physical, technical, and national conditions under which the ancient dramatists worked upon the development both of tragedy and comedy; and in this object Mr. Flickinger has succeeded in a very high degree. All scholars will not, of course, agree with all his conclusions, but he gives us a wealth of detail—at times, perhaps, it is difficult to see the wood for the trees—and his judgment is always his own, never taken without examination from others.

Moreover, he is thoroughly up to date—the "Ichneutae" of Sophocles, for example, and the evidence of vase-paintings form part of his data for estimating the significance of satyr plays in his long introduction, to say nothing of recent Euripidean fragments from the "Oxyrhynchus Papyri," and the modern works of Miss Jane Harrison and Mr. A. B. Cook. It is not easy to pick out what is best from such a book as this, but most classical scholars will find the chapters on "The Influence of the Choral Origin," on "The Influence of Festivals," and on "The Influence of Physical Conditions" the most illuminating, and the latter is certainly the most original part of the work. We cannot refrain from giving at least one example of the independence of Mr. Flickinger's judgment. In treating of the *deus ex machina*, he refuses to repeat the conventional gibe against Euripides on this score, and insists that Euripides did not habitually use the device to get himself out of the difficulties of his plots (page 294).

On the other hand, there are things which we regret—the American spelling above all, not to mention such lapses of good taste as the reference to the chorus of Euripides' "Hippolytus" as "the intimates of a local washerwoman" (page 140), or such lapses of scholarship as the "erroneous" ascription of the "Rhesus" to Euripides at all (page 148). In the chapter on "The Influence of Festivals," we should have liked to see Mr. Flickinger attack the thorny problem of why Euripides was allowed to exhibit annually at the "Dionysia" if he were really such an attacker of the received religion as some modern scholars would make him out to be.

The book is well produced, and contains a wealth of excellent illustrations from archaeological sources.

EDUCATION.

A New School in Belgium. By A. F. DE VASCONCELLOS. With Introduction by A. FERRIÈRE. Translated by E. and C. PAUL. (5s. net. Harrap.)

In introducing this book to our readers, we must premise that the term "New School" is generic, not particular. What, then, is a New School? To define by examples well known to English people, we may point to Abbotsholme and Bedales as prototypes. Another example is the Ecole des Roches, in Normandy, opened in 1899 by M. Demolins, who is at any rate known in this country as the author of "A quoi tient la supériorité des Anglo-Saxons?" But M. Ferrière, who writes the introduction to this book, gives thirty characteristics, of which an institution must possess at least fifteen in order to be recognized by the International Bureau as a New School. Such a school must be in the country; the instruction must be based upon experience and enriched by manual work; there must be self-government by the pupils, to some extent at least; and, as we have said, it must possess not less than half of the thirty characteristics. M. Vasconcellos, Head Master of the New School at Bierges-lez-Wawre, in Belgium, here gives, in the familiar style of the lectures in which his account originated, interesting details of the work of the School. Though not numerous, the New Schools are surely of great importance, because they constitute a standing protest against the tendency of the "public schools" to rely upon tradition, and of the State-aided secondary schools towards a deadening uniformity. We hope that this very suggestive account of a New School will be widely read.

Outdoor School Work. By J. EATON FEASEY. (3s. 6d. net. Pitman.)

Mr. Feasey describes his book in a sub-title as "A Series of Practical Open-air Studies in Elementary Science, Nature Study, Drawing, and Geometry for Elementary and Preparatory Schools." His object is to show teachers how to emancipate themselves from the tyranny of the classroom, and schoolmasters who will follow Mr. Feasey's advice, and take their classes into the open air and introduce their pupils to science in the sensible and interesting

manner here described, will gain the lasting gratitude of the children under their charge. Mr. Feasey has long been known as a pioneer in work of this kind, and we hope the number of his disciples will continue to increase. The adoption of his methods in schools of all grades would do much to humanize the teaching of science.

The Problem of the Continuation Schools. By ERNEST YOUNG. (1s. net. Philip.)

Though as yet we have heard nothing from the Board of Education as to the "appointed day" for the inauguration of day continuation schools, Mr. Young writes as if their establishment throughout the country were imminent. With a profusion of quotations he gives in his forty-two pages some shrewd hints and useful guidance as to what must be done to secure success in continuation school work. We hope with him that the aim of the continuation schools, when we get them, will be "to enforce the sense of duty—duty to self, to home, to neighbour, to town or village, and to country." Mr. Young's booklet deserves a wide circulation.

(1) *Handwriting Reform.* By DAVID THOMAS. Introduction by D. R. HARRIS. (1s. 6d. Nelson.) (2) *Nelson's Print-writing Copybooks.* Books I and II, 3½d. each; Books III-VI, 4d. each. (3) *Embossed Letter Cards.* (Complete Alphabet in Box, 6s. 6d.)

Mr. Thomas's little book clearly expounds the principles of the print- or manuscript-writing which has during the last few years acquired so extraordinary a vogue. To those teachers who have not yet seen this type of penmanship the book is confidently commended. It gives sound advice on the materials and technique of handwriting, and is adequately illustrated by diagrams and examples. Although it serves as a teacher's handbook to the series of print-writing copybooks and embossed letters, it is not dependent on them for its usefulness. It is a valuable little book in itself. The embossed letters are intended to fulfil the same function as the sand-paper letters of the Montessori system, and the copybooks give carefully graduated models in block-lettering. The earlier books are for chalk or crayon, the later for pencil or pen. The whole series makes no claim to completeness: its application is confined to infants and juniors. Those who wish to understand fully the spirit of the new movement should supplement Mr. Thomas's book by one which gives a wider historical background and provides a greater variety of good traditional types.

Some Christian Ideals in the Teaching Profession. By AGNES S. PAUL. (3s. net. London: Student Christian Movement.)

This little book of 108 pages contains five addresses delivered to the students in training at the Clapham High School by its former head mistress. The subjects are: Discipline and Inspiration; The Teacher's Work of Interpretation; A True Sense of Values; A Contrast in National Ideals; Some Religious Perplexities of Childhood. The tone of the book is admirable. The author takes a broad and generous view of the nature of the teacher's calling, and at the same time adopts a reasonable attitude towards the possibilities of actual religious instruction in school. The last chapter is the least successful, for the very satisfactory reason that it deals with a problem that is practically insoluble. The teacher really cannot satisfy the child on the sort of points here raised, but Miss Paul certainly gives as much help as can be reasonably expected even from an exceptionally capable and experienced teacher.

Educational Tests and Measurements. By Dr. W. S. MONROE, assisted by J. C. DEVOSS and Dr. F. J. KELLY. (6s. net. Constable.)

This is an excellent book for Americans; for Englishmen its usefulness is seriously limited. It consists mainly of descriptions of standardized tests by which the efficiency of school instruction may be measured. But the complete tests and scorings are not given. For these the reader has to apply to certain American firms and educational bureaux, which are to Europeans difficult of access. Another objection more serious still is that the tests themselves are rarely applicable in their completeness to English schools. The arithmetic tests, for instance, refer frequently to dollars and cents, but never to sterling money, and the standard specimens of handwriting, by comparison with which samples have to be assessed, differ from English types and are out of line with the recent movement of reform in this country. There is yet another drawback—the norms or standards of attainments are correlated with grades, and not with ages. In fact the standardizing work done in other countries is entirely ignored. Among the hundreds of references to researches and experiments there does not appear to be a single allusion to England. The English reader would therefore be well advised to read an English book such as Dr. Rusk's "Experimental Education" before perusing Dr. Monroe's book. With his perspective thus corrected he will find in Dr. Monroe's book much that is immediately serviceable and more that is suggestive of future research.

Problems of Subnormality. By J. E. WALLACE WALLIN. (15s. net. World Book Co.)

From the interesting historical summary at the beginning to the very complete bibliography at the end this publication gives evidence of a comprehensive knowledge of the subject and of much painstaking work. The author lays stress on the differential diagnosis of the pedagogically retarded, and emphasizes the importance of separating into special classes the feeble-minded and the merely backward. A full description of the constitution and functions of such classes is given. The difficulties in making the diagnosis are pointed out, and the fallacies of depending only on the Binet-Simon tests shown. Mr. Wallin contends that the only person really capable of doing proper diagnostic work in the field under discussion is a technically trained educational psychologist, and deprecates its being left to the psychological amateur. The last chapter, one of the best in the book, deals with the hygiene of eugenic generation and covers a large field in a concise and efficient manner, although some of the recommendations set forth are too advanced for public opinion in this country at present. The book is rendered somewhat cumbersome and difficult to read by the quantity of statistical material provided, and the number of figures brought forward to prove a point sometimes interferes with a clear view of the point itself. An abridged edition containing the principal facts and conclusions would be more likely to reach the larger public it deserves.

ENGLISH.

Tradition and Change. By ARTHUR WAUGH. (7s. 6d. Chapman & Hall.)

Mr. Waugh has here reprinted criticisms of modern prose and verse; to them are added the paper which gives its name to the book and a singularly beautiful dedication. Apparently Mr. Waugh belongs by choice and by faith to a former time, now so far away; yet he is anxious to give change all the benefit it can expect from one who clings to tradition. War poetry and the "Imagists" afford specimens of his hard hitting; "Dickens's Lovers," Galsworthy's "Sheaf," and Joseph Conrad show his deep sympathy. "The Art of Henry James" is not an adequate piece of criticism. But the subjects are so diverse and books on modern writings are so rare that all the essays are welcome. The author's criticisms of the criticisms of Mr. Arthur Symonds, Mr. Dixon Scott, and Mr. Freeman seem to show that good criticism is at its best when it displays a happy knack of saying happy things. Probably this is what many modern critics think of their trade. It will be a pity if such a notion of the duty of criticism should filter from the lecture-rooms of the University into secondary schools. Better have no criticism at all than to teach boys and girls to be smart about Francis Thompson and "The Ancient Mariner."

Selections from Boswell's Life of Johnson. Edited by R. W. CHAPMAN. (3s. 6d. Clarendon Press.)

Johnson has decidedly come into the schools, and this book is a delight. Printed admirably, with a faint old-world look about it, edited with great skill, it brings out fairly and honestly the bear and the Christian gentleman. Boswell can never be read by the young, but he can be edited. Two illustrations only are given. Might we not have had Johnson and Boswell statues from Lichfield? A few editorial notes are added; but, indeed, the editing is so clear that the verbal portrait stands out, the counterpart of Sir Joshua Reynolds's. The editor's preface is written from Macedonia.

The Crown of Wild Olive. By JOHN RUSKIN. (1s. 3d. Macmillan.)

This and the two following books belong to the well known series edited for secondary schools by Mr. J. H. Fowler. Apparently Mr. Fowler has written the preface to Ruskin, and our only complaint is that it is too brief; Mr. Fowler is often too brief. If his suggestions to the student had been supported by illustrations, the preface would have been more likely to attract readers to Ruskin's other work. As it is, "Sesame" and the "Crown" are the only specimens of Ruskinese known to schools. Notes are added, and the whole feeling of the book is attractive.

Silas Marner. By GEORGE ELIOT. Abridged by MAY COPSEY. (1s. 6d. Macmillan.)

The Introduction to this book is still more brief; a few notes and questions are added, but the main work of the editor lies in the actual abridgment. At the present time, when Nuneaton and the district are combining to do honour to George Eliot, a good deal more might have been said to interest the school reader. We make the criticism knowing that teachers cannot be trusted to fill in gaps which the editors leave. All such books as these demand long, exhaustive, and suitable introductions.

Sir Philip Sidney's Defence of Poesy. Edited by D. M. MACARDLE. (1s. 3d. Macmillan.)

Now that schools are expected to read a good deal of the English literature of a bygone day, why is it that we cannot have the original

spelling? The old-world flavour of all Elizabethans, even Shakespeare, is diminished or lost if only the quaintnesses in syntax remain. At least publishers, following Prof. Arber's lead, might make the attempt. The Introduction is clear, and very much to the purpose, and notes and questions are added. The editor makes a strong point in regard to these. Sidney's gracious personality (there exists no good life of him for the young) is scarcely realized, and the shattering news of his death is not brought home to the reader. The uncouth but beautiful lines written in 1586 might have been quoted. If the young are not to be afraid of enthusiasm, what better subject could be put before them than Sidney? The Essay itself is adequately treated. Will teachers follow the advice of the editor?

English Literature during the last Half-century. By Prof. J. W. CUNLIFFE. (10s. 6d. net. New York: The Macmillan Co.)

Dr. Cunliffe has succeeded in providing us with a very readable series of biographies and appreciations of the work of the more important modern English writers. The scope of the book is sufficiently indicated by an enumeration of the authors whose work is considered. We have, in the order in which they occur, Meredith, Hardy, Butler, Stevenson, Gissing, Bernard Shaw, Kipling, Conrad, Wells, Galsworthy, and Bennett. The judgments passed appear to us well balanced and kindly, and though many readers will disagree with some of Dr. Cunliffe's likes and dislikes, they will be bound to be impressed by the fairness with which he states his cases. The book might appropriately find a place in school libraries for the use of senior pupils.

FRENCH.

Le Français des Français de France. Par JEHANNE DE VILLESBRUNNE. (2s. 6d. Oxford University Press.)

It was a happy thought to write a series of scenes that illustrate the conversational ways of the French aristocracy. There is a connecting link in the courtship of "le Vicomte Raoul de Prévelles" and "la Comtesse Liane de Nony." There is also a Marquis and a Marquise and a Baronne; there is no bourgeois taint anywhere. Even the Englishman introduced is Sir John Bull. The dialogue is light and amusing, with a good sprinkling of the argot peculiar to the select. The author thoughtfully supplies explanations (in French) of words and expressions that might distress the simple reader; he is enlightened as to the meaning of *ça boulotte*, *ce patelin-là*, *ronchonner*, *pharmineux*, and other quaint things. As to the use of this book in class we are doubtful; to those who move in Society we heartily recommend it; and we wish some of the dialogues were reproduced on the gramophone.

La Patrie. Echos de l'Histoire de France pour les Commencants. Par JULIA TITTERTON. (2s. Oxford University Press.)

The author has written twenty-one short chapters on noteworthy characters and scenes drawn from French history, such as Vercingetorix, Saint Louis, Jeanne d'Arc, "Le Naufrage de la Blanche Nef," and "Le Siège de Paris de 1870." Miss Titterton handles French effectively and with ease. It is, however, a pity that she has handicapped herself by grammatical limitations. Thus the first chapter not only deals with "La Gaule et les Gaulois," but also with "Pluriel, féminin," and the verbs are all in the present. This exclusive use of the present goes on for some time, and becomes very trying. Surely pupils who are ripe for such a book will have previously learnt the past tenses of at least the common verbs. There are some good illustrations, and a vocabulary which gives the phonetic transcription as well as the English rendering of words. It is not quite complete; thus, it does not contain the following (all on page 49): *vide, extraordinaire, incendie, effroyable, pompe, durer*.

GEOGRAPHY.

"Macmillan's Practical Modern Geographies."—*A Geography of America.* By T. ALFORD SMITH. (4s. 6d. Macmillan.)

The present addition to "Macmillan's Practical Modern Geographies" is by the same author as "The Geography of Europe" in this series. Mr. Alford Smith is well known as a pioneer in the field of Modern Geography. His long experience both as a successful teacher and as an examiner of the subject has enabled him to produce a textbook which may be recommended cordially for use in the higher forms of secondary schools, particularly where geography is taken in connexion with an advanced course. The historical, physical, and humanistic sides of the subject are all treated in a clear and interesting manner. Each chapter begins with practical exercises on map-reading, statistics, and so on, and ends with a set of appropriate questions. The 118 diagrams which illustrate the text include some remarkably good photographs, some of them reproduced from *The Geographical Journal*. It may be suggested that Fig. 77, which shows the time-belts of U.S.A., might have been modified so as to include Southern Canada, where there is an extra belt—the Colonial Belt. Also a

map showing the trans-continental railway routes of U.S.A. would be a welcome addition. The volume ends with a collection of 150 questions set in various recent public examinations, separate indexes of place names and subjects, and a useful appendix on Mathematical Geography.

"Macmillan's Geographical Exercise Books."—*Africa.* With Questions by B. C. WALLIS. (1s. 6d.)

Africa is the latest addition to this well known series of Exercise Books. The maps are clearly printed, and the questions cover a wide range.

"The New Regional Geographies."—*The British Isles.* By L. BROOKS. (2s. 6d. University of London Press.)

It is intended that this little volume shall be incorporated eventually in Book III ("Europe and Africa") of this series. The book is suitable for the use of pupils preparing for an external examination of matriculation standard, and it should certainly help to stimulate and train their reasoning faculties. Mr. Brooks expects that the pupils will have received earlier descriptive lessons on the British Isles, and he accordingly deals with the outstanding geographical facts and the reasons for them. The economic side receives special attention, the chapter on Britain's foreign trade being particularly thoughtful. The thirty diagrams include useful sketch-maps, but the rainfall map (Fig. 5) is scarcely up to date as regards S.E. England, and a key to the railways in Figs. 11, 14, and 23 is desirable. Each chapter ends with a few exercises, and there is a short index. Two errors in local geography may be mentioned. The clay from Kingsteignton which is exported to the Potteries from Teignmouth is not china clay, but potters' clay. Nantwich has brine baths, but its salt industry long ago gave place to a leather industry.

Practical Geography. By R. J. FINCH. (3s. 6d. net. Evans.)

This book contains explanations and exercises on maps and map-making; it also provides statistical tables for graphic representation. Mr. Finch is undoubtedly right when he insists that practical geography is essentially "work in the field"; hence the chapters on Outdoor Geography, a Visit to a Quarry, and a River Study are exceedingly instructive.

The Use of the Terrestrial Globe. (2s. Philip.)

This book describes the history of the globe as a representation of the earth; it also deals with the construction and uses of the globe, and certain map projections are explained. Every teacher of geography should possess a copy of this useful book.

Great Cities of the World. Each City published separately, 3d.; set of five bound in cloth, 1s. 3d. (McDougall.)

Ten of these little books have been issued already. They are more suitable for use as reading-books than as geographical textbooks. The important features of each city are described in an interesting way, and the illustrations are particularly good.

HISTORY.

The Century of Hope. A Sketch of Western Progress from 1815 to the Great War. By F. S. MARVIN. (6s. net. Clarendon Press.)

This laborious and closely packed volume gives a picture of the nineteenth century—before and after—as it presents itself to an optimist. It is an essay in the religion of humanity rather than a history; but, all the same, it is packed full of selected information, and it is suffused with a spirit deliberately and resolutely cheerful. An ingenious attempt has been made by the author to combine the treatment of an immense variety of subjects—political, social, ethical, literary, scientific—with the maintenance of some sort of historical sequence and continuity. The century is divided into decades, and an effort is made to show that in each of them a different principle is prominent—e.g. evolution, 1850–60; nationality, 1860–70; education, 1870–80. Then, round this imaginary dominant, masses of detail of all ages are accumulated. The stream of narrative is choked and lost beneath the avalanche, and no sense of movement is allowed to continue to the end. It is a pity that the book is thus overloaded, for it was a good idea to try to represent in one view the many sided and generally hopeful activities of a century of marvellous development and unparalleled achievement. Even as it is, teachers of modern history will find in the book much stimulus and suggestion.

A History of British Socialism. Vol. I. By M. BEER. (12s. 6d. net. Bell.)

The author of this work is an Austrian Socialist, who in 1912 published in his own language "Die Geschichte des Modernen Sozialismus in England." He then proceeded to produce an enlarged version of the work in the English tongue—with which a twenty years' residence in this country had made him familiar—accompanied by a selection from the earlier and less accessible Socialist literature of England. This task was interrupted by the war, the outbreak of which he frankly attributes to "the Austrian

madness." He now resumes it, and presents us with the first of two volumes of history. The volume before us is divided into two parts. The first treats of Medieval Communism; but under that restricted title it deals with all doctrines that can in any sense be termed Socialistic from the days of Paul to those of Paley. The second traces the rise of Modern Socialism from 1760 to 1834. The book is one of considerable scholarship and research; it is well documented; its tone is generally calm and judicial. It is distinctly valuable as a source of information concerning the origin and development of ideas that have an immense influence among masses of people at the present day.

The State and the Nation. By EDWARD JENKS.
(4s. net. Dent.)

Nearly twenty years ago Mr. Edward Jenks, then Reader in Law to the University of Oxford, published in the "Temple Primer Series" an extremely suggestive "History of Politics." It has long been out of print. Some of its opinions have been controverted by recent research; much new information concerning primitive society has come to light; hence Mr. Jenks, instead of preparing a new edition of the Primer for the Press, has rewritten the whole thing, although generally along the old lines. In Part I he describes the institutions of uncivilized peoples; in Part II he depicts those of patriarchal communities; in Part III he sets forth in detail the rise and development of political society. In a concluding chapter he examines various current "proposals for change," including the League of Nations, Proportional Representation (which he emphatically condemns), Syndicalism, and Guild Socialism. No student of politics can afford to neglect this scholarly volume.

SCIENCE.

The Theory of Electricity. By G. H. LIVENS.
(30s. net. Cambridge University Press.)

At the present time the theory of electricity embraces on one hand a firmly established body of doctrine whose predictions are exactly in accordance with experimental results, and on the other a group of tentative hypotheses whose imperfections are evidenced by the lack of full agreement between deduction and observation. We may say roughly that, while we know very accurately how electricity in bulk behaves, we are still very much in the dark about the laws it obeys when in small discrete elements. The aim of the present work is to present a comprehensive view of

all parts of the theory—those which are firmly established as well as those which are more speculative; and needless to say the most interesting chapters are those which deal with the latter. After a preliminary chapter on vector analysis and the group of theorems related to Green's, the thirteen which follow develop the theory on the familiar lines of Faraday and Maxwell, with an occasional glance at the explanations afforded by electrons of the electrical properties of matter. The two final chapters are those where we find ourselves on doubtful ground. These deal with General Electrodynamics and the Electrodynamics of Moving Media respectively, and, while not excluding references to other writers, the author has here followed in the main the theories of Larmor. These possess, at any rate, the merits of consistency and generality. The author, as a rule, considers general principles rather than the minute details of special problems, but a collection of 359 examples offers the student exercises of all degrees of difficulty.

The Origin and Evolution of Life. By HENRY FAIRFIELD OSBORN. (25s. net. Bell.)

In defining the difference between living and not-living matter the author of this book does not invoke any mysterious "vital force." On the contrary, he considers that in physical and chemical energies, as the term is ordinarily understood, may be found all that is necessary for vital activity. In his view the peculiar property of living matter is the power of capturing the kinetic energy of heat, light, electricity, &c., from outside, and of storing it as potential energy (food) for utilization at need, according to the environment. Such utilization is controlled, and the output of energy co-ordinated, by the agency of enzymes, hormones, &c. Conversely, the environment affects the chemical composition of the organism in general, and this in turn influences the germ plasm, which determines the character of the next generation. Thus condensed, the thesis will sound vague; but Prof. Osborn adduces evidence which makes his speculations highly interesting and suggestive. The second part of the book is a sketch of the evolution of animals as revealed mainly by palaeontology, on which the author's great authority is unquestioned. In this part attention is directed to such fascinating problems as the reasons why certain classes of reptiles, mammals, and other animals became extinct; why—under apparently similar environments—the evolution of certain groups of animals lagged behind that of allied groups, and

(Continued on page 496.)

FETTER LANE, LONDON, E.C. 4: C. F. CLAY, MANAGER

so forth. To these and many other questions Prof. Osborn proposes answers which are always stimulating and interesting. Apart from the speculations which it illustrates, his succinct and readable account of the procession of animal life through geological ages, with its attractive pictures and helpful maps and diagrams, makes the volume a desirable addition to the reference shelves of school libraries.

Textbook of Embryology. Vol. II: *Vertebrata, with the exception of Mammalia.* By J. GRAHAM KERR. (31s. 6d. net. Macmillan.)

A nice faculty of discrimination enables Prof. Graham Kerr to sift the essential from the trivial, and to set forth the grand features of individual development and of racial evolution. It has been his good fortune, thanks largely to his own researches, to have at his disposal the developmental history of those ancient and primitive fishes, the *dipnoi*, or lung fishes. It is thus not surprising that on many points there is disagreement with the theories of some earlier writers. The book opens with a chapter on segmentation, gastrulation, and the formation of the germ layers. The succeeding chapters deal respectively with the skin and its derivatives (including the nervous system), the alimentary canal, the coelomic organs, the skeleton, the vascular system, and the external features of the body. Chapters VIII and IX are devoted to adaptation to environment and general considerations; X to the practical study of the embryology of the fowl; while the two concluding chapters contain hints on the practical study of the lower vertebrates and on the general methods of embryological research. Throughout it is constantly borne in upon the reader that the main object of embryology is to gain information concerning the lines along which the structure of existing groups of animals has been evolved. Prof. Graham Kerr marshals his facts, and shows what may be learnt from them, with the persuasive skill of an advocate and the impartiality of a judge. The illustrations, both diagrammatic and otherwise, are admirable, and will be welcomed alike by lecturers and students; as, too, will the "literature" lists appended to each chapter. Both author and publishers are to be congratulated on the production of this valuable textbook.

Practical Chemistry for Intermediate Classes. By H. B. DUNNICLIFF. (5s. Macmillan.)

Prof. Dunncliff has succeeded admirably in drawing up a precise

and yet not exiguous course for Indian students. The wholly different conditions under which teacher and student work and the indigenous difficulties met with render the occidental type of textbook somewhat less valuable than might be expected superficially. Furthermore the Western attitude of mind does not exactly coincide with the view-point of the East. Some of the author's laboratory rules, although specifically designed for another class of students, might well be applied in many English chemical departments. There are sixty-one demonstrations, classified under the headings of general preparation; simple quantitative determinations such as solubility, loss in weight during reaction, tests for and separation of the commoner radicles, and simple volumetric analysis. The experimental details given are clear and accurate, and wherever possible the correlation of theory and practice is insisted upon.

PRIMARY SCHOOL NOTES.

Practical Patriotism in the Schools.

THE annual report of the Board of Education emphasizes the magnificent work done by the primary schools in assisting the War Savings movement. As many as 14,000 schools participated—that is, more than 73 per cent. of the total number of such schools. The efforts of the Welsh schools, some of which contributed £10,000 each, are particularly creditable. It is clear, however, that the returns of the Board are far from complete, and it is possible that many English areas have records equally noteworthy. The active co-operation of the Inspectors of the Board of Education in the Welsh areas in assisting the teachers to develop a practical spirit of patriotism by encouraging the scholars to purchase War Savings Certificates might very well be extended to every inspectorial area in the country, especially in view of the new national loan. The new spirit of *esprit de corps* which the achievements of Old Boys in the War have done so much to foster in every school, and the notable efforts accomplished in the national cause by the pupils themselves, are factors which Inspectors will be wise to acknowledge. The schools of to-day can no longer be assessed by the old inspectorial rule of three which confined itself strictly to

(Continued on page 498.)

MACMILLAN & CO., LTD., ST. MARTIN'S STREET, LONDON, W.C. 2.

the data covered by the curricula. A more vigorous and sympathetic identification with the spirit and ideals of the schools appears to be necessary. An active participation by members of the inspectorate in the school campaign to support the War Loan will therefore be welcomed by teachers, inasmuch as it will enable Inspectors to realize the throbbing vitality of the primary school system as no scheme of formal visiting and school reports can.

* * * * *

Trophies for School Savings Associations.

WHILE honours innumerable have been showered upon those who have been concerned with the organization of War services in an official capacity, the record of recognition of those who have done the real work in the schools remains remarkably bare. If the efforts made by the schools are too insignificant to merit official acknowledgment, there is no reason why formal recognition of creditable achievement should not be made in individual cases by the Board of Education. Such action would exert a great influence upon the tradition of the schools, all of which now have their honours lists. In the award of trophies, too, the same neglect of the children's efforts has been shown. The gift of a machine gun to a school, for example, would have exerted an important influence as a record in its history. There is a belated scheme for the award of German rifles to schools which have rendered good service in their War Savings Associations; but, from the ethical and educational point of view, English trophies would be preferable.

* * * * *

Head Teachers at Birmingham.

THE Annual Conference of the National Association of Head Teachers at Birmingham, on June 12 and 13, was noteworthy in the optimism with which the future of education was regarded. The Council announced its intention of resuming activities on a pre-war scale. The membership has gone up steadily throughout the war years, and now numbers 6,701; in addition, the number of local associations has substantially increased. In welcoming the Conference, strong emphasis was laid by the Bishop of Birmingham and Sir George Kenrick upon the necessity of bringing out the individuality of our children: "individuality was the soul of progress." Sir Oliver Lodge pleaded for the cultivation of the spiritual and moral values in education, while Archbishop McIntyre expressed the belief that successful teaching depended mainly upon the degree of professional ambition in the teacher. These principles largely dominated the discussions which followed. In his comprehensive survey of the school outlook, the new President, Mr. H. R. Morrell, of York, asked for strong measures to be taken to improve the status of teachers, otherwise it would be impossible to attract candidates to the profession. It was imperative that the supply of qualified teachers should be doubled during the next ten years. In order to secure the co-operation of the whole community in the work of education, Mr. Morrell suggested the formation of joint committees of parents and teachers in every area. The Conference approved the establishment forthwith of nursery schools in all districts under the supervision of competent teachers and nurses, the provision of University training for teachers, the promotion of teachers to higher posts in the administrative and inspectorial departments, and the provision of facilities for uncertificated teachers to become fully trained and certificated.

* * * * *

Equal Pay for Men and Women Teachers.

A KEEN debate, which was maintained at a high level throughout, followed a proposal from Cardiff in favour of equal pay for men and women teachers. An amendment from Leeds that the Council should be instructed to secure better salaries for both men and women teachers, but that no scheme would successfully attract men and women of equal social standing and ability which did not offer higher salaries to men than to women, was passed by about seventy votes to forty.

* * * * *

National Union of Teachers.

THE approval of the Executive of the Union has been extended to the proposals for a system of decimal weights, measures and coinage, and of the institution of decimal coinage as a first step. The revised scale of salaries authorized by the Cheltenham Conference has now been prepared by the Salaries Sub-Committee, and will be presented for consideration to the next meeting of the Executive. The Union Thank-Offering Fund for the Improvement of Teachers' Pensions under the former Superannuation Act now considerably exceeds £5,000. The Union War Aid Fund for wounded Service Teachers amounts to more than £153,200. The necessary steps have been taken to appoint three additional divisional officers, one of whom is to be employed mainly in the Metropolitan and Extra-Metropolitan Districts.

THERE IS EVERY INDICATION

that an unusual proportion of Parents will this Summer be seeking information as to SCHOOLS OUTSIDE THEIR OWN KNOWLEDGE OR THAT OF THEIR FRIENDS; and this movement will not be in one direction only, since some people find themselves in a position to afford to spend more on the education of their children.

THE TWENTY-SECOND EDITION OF

PATON'S LIST of SCHOOLS and TUTORS

will be of exceptional importance, as it will be in current use now the War is over, and children from India, the Colonies, and other places abroad, who have been kept back, will be brought home by their parents for education.

Grateful letters from parents show that we succeed in providing them with what they urgently require. Grateful letters from Principals of Schools prove that in their case also we supply a much needed want.

For Ladies as Gymnastic and Games Mistresses, and Medical Gymnastic Teachers and Masseuses.

THE Course is two years, and includes a large number of subjects, making the training very valuable and enabling each Student to specialize in some particular branch.

It includes Educational and Remedial Gymnastics, Fencing, Rowing, and Swimming. All Games are taken to a very high standard, and Dancing is also made a speciality. Also it includes two subsidiary subjects—Needlework and Elocution.

Lectures and lessons are given in Anatomy, Physiology, Pathology and Orthopaedics, Ambulance, Home Nursing, Theory of Movement, &c.

For prospectus apply—COLLEGE SECRETARY.

GARDNER'S PHYSICAL TRAINING COLLEGE, WALLINGTON, SURREY.

Complete training is given on Arvedson's principles in Educational and Remedial Gymnastics and Massage, also Dancing, Fencing, Swimming Sports, &c.

Students must be well educated, and between the ages of 18 and 30.

Fees per annum, 90 guineas resident, 45 guineas non-resident.

There is also a One Year's Course for Remedial and Massage work. Fee 21 guineas.

Three Scholarships will be awarded annually to the value of One, Two, and Three Years' training. For full Particulars apply to the SECRETARY.

DENMARK HILL PHYSICAL TRAINING COLLEGE

and School of Massage, Sunray Avenue, Herne Hill, London, S.E. 24.

TRAINING STRICTLY SWEDISH. PUBLIC EXAMINATIONS. SCHOLARSHIPS AWARDED.

OPEN-AIR GYMNASIUM. SPORTS GROUND. RESIDENTIAL HOSTEL ATTACHED.

THE NATIONAL SOCIETY OF PHYSICAL EDUCATION.

(Founded 1897.)

President: Sir H. H. RAPHAEL, Bart., M.P.

Headquarters: THE POLYTECHNIC, REGENT STREET, W. 1.

EXAMINATIONS for the Society's

Gymnastic Diploma, Elementary School Teachers' Drill Certificate, Swedish Physical Training Certificate, &c., &c., are held in March, June, October, and December.

College and School Principals requiring fully qualified Drill or Gymnastic Teachers should notify the Hon. Secretary.

Handbook and Syllabus may be obtained of Mr. JOHN M. THOMSON, 10 Dordrecht Road, Acton Vale, W. 3.

THE BERGMAN OSTERBERG PHYSICAL TRAINING COLLEGE. Kingsfield, Dartford Heath, Kent, and the BERGMAN OSTERBERG UNION OF TRAINED GYMNASIAC TEACHERS.

See advertisement on page 503.

TRAINING COLLEGE FOR Swedish Remedial Exercises and Massage.

Founder: F. BARRIE LAMBERT, M.B., B.S., D.P.H.

The training is modelled on that obtainable in Sweden, and includes preparation for the examinations of the Incorporated Society of Trained Masseuses, with practical experience at two London Hospitals.

For further particulars apply to the Directors, A. W. BROWN and E. M. HUMBLE, 36 Pembridge Villas, London, W. 11. Tel.: PARK 3948.

PHYSICAL TRAINING COLLEGE LOWER REDLAND ROAD, BRISTOL.

TRAINING in Swedish and British Gymnastics for public examination. Tennis, Hockey, Cricket under a County player. Swimming, Massage and Remedial Gymnastics under a certificated Masseuse. Anatomy, Physiology, Hygiene.

Dancing, Ballroom and Ballet, Dalcroze Eurhythmics.

Students prepared for the advanced certificate of The English Folk Dance Society.

Residential fees on application to—The Misses JENNINGS, HOLBROW, and COLSON.

For other Physical Training Advertisements see pages 503 and 510.

PHYSICAL TRAINING

See also pages 503 and 509.

PHYSICAL TRAINING COLLEGE,
QUEEN ALEXANDRA'S HOUSE GYMNASIUM,
KENSINGTON GORE, S.W.7.

EDUCATED GIRLS TRAINED
As TEACHERS of Drill, Gymnastics, Games, Dancing, Fencing, Swimming, Massage, and Remedial Exercises. A six-months' course in Massage only can be taken separately. Apply for prospectus to The Misses BEAR, Principals.

PORTLAND ROAD GYMNASIUM, London, W.—Students thoroughly trained for Public Examinations. Duration of Course, 2 to 3 years. All branches of Physical Work. English and Swedish Gymnastics, Hygienic Exercises, Dancing, and Remedial Work.—Miss TOLLEMACHE, Member and Examiner of the British College of Physical Education, M.G.T.I., Kyson, Highcroft Gardens, Golder's Green, N.W.4.

FOR IMMEDIATE DISPOSAL.—A very good GYMNASIUM and DANCING PRACTICE. Present owner has had it for 9 years. Disposal owing to health. Large well-fitted Gymnasium and Medical Room. Good railway centre. Gymnastics, Dancing, Swimming, Games, Remedial Exercises, and Massage. Profits during last year over £250. There would be work enough for two. Address—No. 10, 869, * Care of Mr. WILLIAM RICE, 3 Ludgate Broadway, London, E.C.4.

Posts Wanted—continued.

AS MODERN LANGUAGE MISTRESS (age 27), B.A. degree honours. Gold medal for colloquial efficiency in French and German. Teacher's diploma. Warmly recommended.—M.T.C., HOOPER'S (Educational Agents), Ltd., 13 Regent Street, S.W.1. Established 1881. Others. List gratis in exchange for full particulars of requirements.

Swedish Physical Training Course,

commencing at Stockholm 1st September,

UNDER DIRECTION OF

Captain HAROLD OLSSON,
(late Officer Instructor A.G.S., Aldershot).

Prospectus and full particulars on application to—

MARTIN OLSSON & SONS,
32 Bishopgate,
London, E.C.2.

Posts Wanted—continued.

SCIENCE and MATHEMATICAL MISTRESS seeks re-engagement. Qualified to take General, Elementary, Household, and Social Science. 12 years' experience; Schools (Boys' and Girls'). Replaced Science Master during the War.—S.M.M., HOOPER'S (Educational Agents), Ltd., 13 Regent Street, S.W.1. Established 1881. Others. List gratis in exchange for full particulars of requirements.

AS SENIOR MISTRESS, age 33 (an old Notting Hill-ite), seeks re-engagement. Successfully coaches for Matriculation and Oxford Locals in Mathematics, Botany, Chemistry. Excellent testimonials. Salary £150 resident.—V.S.S., HOOPER'S (Educational Agents), Ltd., 13 Regent Street, S.W.1. Established 1881. Others. List gratis in exchange for full particulars of requirements.

BURLINGTON CORRESPONDENCE COLLEGE.

Principal: Mr. J. CHARLESTON, B.A.
(Honours Oxon. and Lond.).

TUTORS.—The Staff includes Graduates of London, Oxford, Cambridge, and other Universities.

METHOD.—Thoroughly individual system, which ensures the closest attention to the needs of each student.

Rapid preparation for:—

Matriculation,
Intermediate Arts and B.A.,
Intermediate Science and
B.Sc. (Theoretical Subjects only),
L.L.A. (St. Andrews),
College of Preceptors' Diplomas.

SINGLE subjects may be taken if desired.

Address—THE SECRETARY,
Burlington Correspondence College,
14 Elsham Road, Kensington, W.14.

GEORGE GILL & SONS, Ltd.

A SELECTION FOR 1920.

The Oxford and Cambridge Edition.

RELIGIOUS KNOWLEDGE SECTION.

The Contents, in addition to other features of the Religious Knowledge Section of the Oxford and Cambridge Edition, include:—
Introduction, embodying Analytical Notes, Characteristics and Peculiarities of the Book; Historical, Biographical, and Geographical Notes.

The Text, with Marginal and Foot Notes, suggested by the requirements of the Examinations.

Critical Notes, quoted from the Authorities.

Glossary of Words and Phrases, explanatory of the Text.

COMPARISON BETWEEN THE AUTHORIZED AND REVISED VERSIONS, SHOWING REASONS FOR THE CHANGES, &c.

WHERE ADVISABLE, THE GREEK HAS BEEN GIVEN.

Edited by Rev. F. MARSHALL, M.A. s. d.

Gospel of St. Luke. Maps of Palestine, Sea of Galilee, Galilee, Jerusalem, Environs of Jerusalem, Temple; Special Introduction ... 2 3

Acts of the Apostles. Chapters xiii-xxviii. Specially prepared for Students taking the Life of St. Paul. Separate Maps of each Missionary Journey, Voyage to Rome; Geographical and Biographical Notes ... 2 3

SCHOLASTIC APPOINTMENTS

University Men and Women seeking scholastic appointments should apply to

Truman & Knightley
SCHOLASTIC AGENTS LTD

who introduce ASSISTANT MASTERS AND MISTRESSES to the majority of the leading Public and Private Schools at home and abroad.

Through this Agency, well educated gentlewomen with Higher Local and other good Certificates, interested in children and in teaching, can find congenial work in good high-class Private Schools, where the hours are not excessive, conditions pleasant, and the holidays are long. Salaries range from £50 to £100 or more per annum, with board and residence, according to age, qualifications, and experience. There are also many vacancies for Student, Junior Mistresses, and House Governesses or Duty Mistresses at salaries of from £30 to £50 per annum with board and residence.

There is a separate department for
LADY MATRONS and HOUSEKEEPERS
for schools.

No charge for registration.

::

Moderate commission.

SCHOOL TRANSFER DEPARTMENT.

Ladies and Gentlemen seeking Partnerships in, or to take over schools of their own, should communicate personally with Mr. TRUMAN, who undertakes all negotiations connected with the Transfer of Schools, and who is in a position to offer assistance and sound advice to purchasers, to whom no charge is made.

Offices: 158-162 OXFORD ST., LONDON, W.1

Telegrams: "TUTORESS, PHONE, LONDON."

Telephone: MUSEUM 1136.

University Tutorial Press.

Some Educational Text-books published during the War.

A Social History of England.

By **FREDERICK BRADSHAW**, D.Sc. Lond., M.A. Oxon., Lecturer in Economic History at Armstrong College, Newcastle-on-Tyne.
Price 5s.

The primary object of this volume is to supply within reasonable compass a text-book suitable for use in Colleges and Upper Forms of schools, and dealing with such matters of social and economic history as are not to be found in the ordinary history text-books, which as a rule devote themselves solely to political and constitutional topics.

"An exceedingly interesting and valuable little book . . . a book of high authority and serviceableness."—*The Journal of Education*.

Groundwork of Logic.

By **JAMES WELTON**, D.Lit. Lond., M.A., sometime Professor of Education in the University of Leeds, Author of "A Manual of Logic," "Principles and Methods of Teaching," &c. With Glossary of Technical Terms, Questions, and Exercises. Price 4s. 6d.

This Book is an attempt to meet the demand for an elementary text-book of logic suitable for beginners in that subject, written on modern lines and embodying the established results of modern thought.

"This book approaches logic on more human grounds than mere formalism, and draws its illustrations from subjects of permanent interest."—*Times Educational Supplement*.

Advanced Text-book of Magnetism and Electricity.

By **R. W. HUTCHINSON**, M.Sc., A.M.I.E.E., Joint Author of "Technical Electricity," Principal of the Municipal Technical School, Smethwick. Price 10s. 6d.

This book contains a full treatment of the subject from both the practical and theoretical points of view, up to the standard of Pass Degree Examinations. Special care has been taken to embody all the distinctive results of modern research, as well as the main principles of its technical applications.

"The text is carefully written; the diagrams are clear and abundant. The book can be heartily recommended."—*Science Progress*.

"The chapters on radioactivity, the passage of electricity through gases, and electron theories are well written."—*Nature*.

An Anthology of English Prose.

For use in Schools and Colleges. By **S. E. GOGGIN**, M.A., and **A. R. WEEKES**, M.A. Price 3s. 6d.

Illustrates first the development of our prose in scope and subject, from the days when it was a mere drudge to its present predominance; secondly, illustrates its development in point of style; and thirdly, gives such an idea of the work of our great writers as shall incite the student to read them for himself.

"Within its limits the choice of writers could not well be bettered. The editors have compiled a very useful book, allowing each of their chosen writers to incite his readers to learn more at first hand about his work."—*Saturday Review*.

A First Course in Mathematics for Technical Students.

By **P. J. HALER**, B.Sc., A.M.I. Mech.E., A.I.E.E., and **A. H. STUART**, B.Sc., F.R.A.S. Price 2s.

Adopted by the Air Board for use in the Royal Flying Corps. A simple and practical course on the rudiments of Mathematics suitable for students preparing for a course of technical study.

"An admirable book for technical students. The reasoning is clear and correct and the examples and illustrations deal more than usually with practical workshop questions."—*Practical Engineer*.

Electrical Engineering, Continuous Current.

By **W. T. MACCALL**, M.Sc., A.M.I.E.E. Price 13s. 6d.

The book is intended to supply all that is required in the ordinary three years' day course in Technical Colleges, and all that is usually done in evening classes. It is concerned mainly with engineering practice, but contains also a sufficient amount of electrical science to form the necessary theoretical basis.

"Well above the standard usually found in books which cover such a wide field; it can be thoroughly recommended, both to engineers and to students. The chapters on illumination and lamps are very good indeed."—*Nature*.

Engineering Science, A First Course in.

By **P. J. HALER**, B.Sc., A.M.I.M.E., A.I.E.E., and **A. H. STUART**, B.Sc., F.R.A.S. Price 3s. 6d.

Adopted by the Air Board for use in the Royal Flying Corps. Includes the elements of Applied Mechanics and Heat.

"Clearly written in an interesting manner and copiously illustrated. Altogether this is an excellent little book."—*Wireless World*.

Preliminary Geometry.

By **F. ROSENBERG**, M.A., B.Sc. With or without Answers. Price 2s. 9d.

This is a book for beginners. The language used is simple, and technical terms are reduced to a minimum; further, the text is rendered attractive to the eye by wide spacing and the avoidance of crowding.

"If we had learnt geometry from this book we should have learnt it very much more easily, and we believe should have understood it very much more thoroughly."—*Eastern Engineering*.

Educational Handwork, or Manual Training.

By **A. H. JENKINS**, First Class Diploma in Manual Training of The City and Guilds of London Institute, Diploma of Slojd School, Näås (with special Abrahamsen Medal), &c. Price 3s. 6d.

The object of this book is to give—for the first time in a single volume—an account of all the different branches of Educational Handwork commonly practised in schools. The book is well provided with illustrations, and all the exercises given have actually been executed under the conditions laid down in the book.

"The book bears evidence of a thorough grasp of school requirements; it is sound, practical, and full of common-sense hints as to procedure."—*Manual Training*.

Teaching. Its Nature and Varieties.

By **BENJAMIN DUMVILLE**, M.A., F.C.P., late Master of Method and Lecturer on Education in the Islington Day Training College. Price 5s. 6d.

This book differs fundamentally from almost all existing books on the subject of Teaching. It is an attempt to analyse the processes of teaching as they occur in all subjects; hence the author examines the nature of the teaching itself, showing why certain methods should be employed.

"A sane orthodoxy is the prevailing note of the book . . . clear, moderate, careful, well-balanced, and touches most of the main problems of teaching."—*Journal of Experimental Pedagogy*.

OCCASIONAL NOTES.

WE welcome the announcement that there is to be a Government inquiry into the organization of Oxford and Cambridge, in connexion with the acceptance of Parliamentary grants by those bodies. How far the investigation will extend is not yet clear, but it can scarcely be confined to the allocation of the public money amongst the many deserving objects which require help. There are at least four great questions which demand immediate consideration. First and foremost comes the problem of how to open the doors of the ancient Universities to poor men, including those whose intellectual abilities are not such as to secure them a scholarship. It is hardly necessary to add that we do not regard the expression "poor men" as synonymous with "sons of working men." The poor professional and business men find it quite as difficult as miners and railway men to give their children a University education; no classes in the community are more hardly pressed than ministers of religion and schoolmasters. Next comes the question of the position of women in the University. The time is surely ripe for the granting of degrees to both sexes on equal terms and for the incorporation of women's colleges in the Universities. As a third great problem stands the vexed question of the government of the University, and the constitution, functions, and powers of the assemblies of resident teachers and of the graduates respectively. Lastly, the development of the modern schools, such as those of science, engineering, oriental languages and modern languages, will demand attention. In this connexion, the whole question of the relations between trade and commerce, on the one hand, and a liberal education,

on the other, requires investigation. One of the peculiar problems for the Universities to-day, indeed, is how to reconcile preparation for business with philosophic and mind-forming studies, and the special problem for Oxford and Cambridge is how to encourage new subjects by scholarships and prizes without injuring that heritage of literary study which is their peculiar glory. For we do not wish to see Oxford and Cambridge revolutionized or assimilated to any other type of University, whether here or in other countries. The excellence of our ancient Universities is unique. Whether it is a greater or a less excellence than that of other Universities may be a matter of opinion, but no one will deny that it is unique, and that the world would be poorer for its loss.

THE Board of Education still shrink from shouldering the responsibility for continuation schools which Parliament, at their own instance, has laid upon them.

The Continuation Schools again.

Meanwhile, and by way of keeping the pot simmering, they make a show of activity in every direction but the right one. Like the festive gentleman who would do anything "in reason" but would not go home, they are willing to do everything except their duty. Mr. Fisher, for example, has recently requested the personal assistance of the Chairmen of the Local Authorities for the establishment of continuation schools on a voluntary basis. Last year's Act was not passed to enable Local Authorities to start schools on a voluntary basis. It was passed because of the admitted failure of voluntary efforts in face of the national need. The continuation schools, when we get them, cannot but increase the cost of adolescent labour, and to a greater or less degree they must for a time impede the working arrangements of shops and factories. That may be a reason for postponing their creation; if so, let it be said, and a definite postponement resolved upon. The obstacles are national in character, and can only be removed by national action. It is as futile as it is unfair to the Local Authorities that the Board should endeavour to engage them in a game of "this to you for the necessary action, please!"

THE unconventionality of the official "Note on Teaching in Continuation Schools as a Career" deserves praise, even though we may think it is not unconventional enough. The hope of en-

Continuation School Teaching.

listing teachers from the now rapidly demobilizing army is fading. The prospect is too unsure to tempt a man who has already given hostages to fortune. So the Note is addressed to the young people who still have freedom of choice. The style is admirable—serious, simple, and yet not condescending. But the tones of the picture are too subdued. It suggests a pleasant and withal a useful occupation, a competence modest but sufficient, security against a penurious old age, and as a sop to ambition the possibility of attaining the headship of a similar school. The elderly spinster may be attracted to so obscure and safe a haven: what has it to offer to the youth of to-day eagerly straining for the trumpet call "to life, to cities, and to war"? Yet the appeal could be made: the appeal of a great profession steadily rising in the public esteem with the keys of the future in its girdle, offering a career which is not bounded by the walls of the school. Was not the President himself a teacher once, and is not the road open for the teacher to high administrative

positions of all kinds? But that kind of appeal would probably be turned down by the permanent officials, who disrelish the idea of self-government, which none the less will carry us far, even in one day. So the Note will lie for the most part unheeded.

THE truth is, that the activity of those who hesitate to grapple with their real problems is doomed to be as sterile as the crackling of thorns under the pot.

The Next Step.

Until the Board are prepared to say that the continuation clauses of the Act shall take effect, it may be only partial effect from a given date, no one will credit them with being in earnest about the business, and their own doubts will spoil the little good they do. We have before pointed out that they may fix the appointed days for the various Authorities separately and differently for different industries. There are industries which are markedly localized. Let the Board make up their mind to start with one of these, and, having decided, after a careful survey of the conditions, which is to be favoured, let them call together the Local Authorities who will be affected and the leaders of the employers and employés, and announce their decision. Or let them select the areas of a few Authorities in which the administrative and educational problems are of more manageable dimensions, and in which the prevailing type of employment is such that the question of competition within these islands is of minor importance, and let them demand a start there. Then we could be sure—Local Authorities, administrators, and teachers—that the curtain was going up on the night, and that we could set the scenes and learn our several parts, with confidence that our labour would not be wasted. It is not yet the rule to pay for rehearsals, and there must be much rehearsal for this play. Do the Board really imagine that we are going to begin before the contract is signed?

MORE than once in recent months we have expressed our views on the method of the strike as employed by teachers, and we observe with great regret that it still seems to find favour among a considerable section of the profession. We are

Teachers' Strikes.

glad to note that Mr. Fisher, in his recent address to the teachers of Dorsetshire, took exactly the view which we have ventured to urge in these columns. No one can say that Mr. Fisher is not a friend of the teachers. Most of us would probably say that he is the truest, as well as the most powerful, friend that the teachers ever had in high places. But he warns us that a teachers' strike, unlike any other strike, injures not the employers, who lose nothing by it, but the children, who lose a very great deal, and the teachers themselves, who may lose incalculably in moral prestige, and ultimately in professional prospects. It is no answer to say, as we understand *The Schoolmaster* to say, that moral influence ought not to be expected from teachers alone, but from Education Committees as well. The locked-out children who swarm the streets of certain areas know nothing of Education Committees, and even their parents are apt to see these matters through the children's eyes. Except in a very indirect sense, one may as well talk about the moral influence of the moon as about that of an Education Committee. Moral influence is essentially personal influence, and it is just there that teachers on strike stand to lose irreparably.

GREATLY as we deprecate force as a remedy for teachers' grievances, we would still urge upon the employers of teachers—i.e. upon the Local Education

The Responsibility of Local Education Authorities.

Authorities—how great a responsibility lies upon them in these days of collective action. Assuming, as we suppose we may do, that *The London Teacher* fairly reflects the present frame of mind of the teachers of the metropolis, the position there is obviously serious. The remarks of the editor betoken a studied restraint which cannot but command respect. Yet he tells us that "the blight of despair hangs over the London teaching service," that "the teachers are bruised in spirit and sore at heart," and that two years ago "mutiny was averted only by arbitration." He believes that the London County Council, as a body, desire a contented teaching service relieved from penury, and that a majority of the Council are anxious to see justice done to the teachers. We welcome the improvement in salaries on which the Council have just decided; but the Council is a large body, the rank and file of which are accustomed to follow their leaders, and there is clearly a lurking fear lest those leaders should "gamble on the docility of the teachers." The warning here conveyed, and conveyed with a due sense of responsibility, is unmistakable. We trust that it will not be lost upon the Council, but that they will realize the vital importance of doing everything that is reasonable and just for the teachers in their employ.

WE are glad to see that in the new scale of salaries recently adopted by the Brighton Town Council for teachers in all institutions and schools the principle of a grace term has been adopted. The

Grace Terms for Teachers.

Departmental Committee on salaries in secondary schools strongly advocated the grace term, in order that teachers might keep themselves abreast of advances in knowledge by undertaking original work or research. The Brighton scheme goes slightly further than this by approving the principle that one grace term on full salary should be given to a teacher every seven years, and that the principle should be put into operation as soon as the staff of the schools is normal. In the first instance, preference will be given to those prepared to use such a term in travel, or in a course of study or research. Perhaps "research" is rather an exaggerated description to use for anything that can be undertaken in one term, but no doubt the period might be extended in suitable cases. The main thing, however, is that the principle should be approved. Teaching is admittedly work which makes large demands on the nervous system, and unless teachers make deliberate effort to maintain freshness of outlook, not only is there great danger that in the course of years the standard of knowledge will fall behind; but there is a serious risk of the growth of general staleness, and it is right that this should be recognized by providing facilities for a period of refreshment, though it is equally right that preference should be given to those who are prepared to make the best use of it. It is also to the good that travel is specially mentioned, since to many temperaments wisely planned travel is more stimulating and inspiring than more formal courses of study.

THE syllabuses for the Intermediate Science Examination for External Students have recently been approved as alternative syllabuses for the Higher

Higher School and Intermediate Examinations.

School Examination of the University of London, and pupils in secondary schools may now obtain this Intermediate Science Certificate by passing in the requisite number of subjects at the Higher School Examination. Moreover, in certain circumstances, such candidates who at the Higher School Examination have not completely qualified for this Intermediate Science Certificate may complete the Intermediate Examination in Science for External Students by taking an additional subject at any such subsequent Intermediate Examination. It is important to remember that higher school examinations were originally intended for secondary-school pupils who remained at school until eighteen years of age, either to complete their education or to proceed later to one of the Universities to undertake work for a degree in honours. They were designed, too, to test pupils pursuing advanced courses in schools assisted by the Board of Education. The advanced courses and the higher school examinations were such as to provide a reasonable amount of specialization, while demanding some continuation of general study. The concession now allowed is not of the kind, we fear, to encourage secondary-school pupils in London to proceed to one of the constituent colleges of the University to follow an Honours course. What the teachers are very naturally demanding is that their pupils should be allowed to take the Higher School Examination on the broad lines originally intended, and, having qualified in it, be altogether excused any sort of intermediate examination after entering college.

LONDON University is about to establish degrees in commerce. Provisional regulations have been issued, though they are still incomplete, for of two important subjects—history and accounting—there is as yet no syllabus. Otherwise the regulations appear thoroughly satisfactory; they should, if wisely administered, bring into being a degree that satisfies both city and University. Such a degree will exert a powerful influence on education; it will become a hallmark to be obtained by the students of commerce in training; it will direct the energies of those seeking a scheme of work for would-be students of commerce; and, perhaps most important of all, it will help to bring about a better understanding between the city and the University, and a closer union between education in the schools and the everyday life their pupils have to lead when their school days are over. The scheme has been generously welcomed by influential interests in the City of London, and the future is full of promise. There is but one doubt, and it is due to recent experience. Teaching seems to stereotype both subjects and men; a business man who becomes a teacher rapidly becomes a theorist; the academic element on the Committee of Management, accustomed to the conduct of examinations, may acquire undue influence even though outnumbered, and the degree if too academic will at once lose its usefulness. The obvious check upon this unfortunate tendency in education is the submission of all papers as well as schemes of examination to men still actively engaged in commerce.

SWIMMING claims advantages over all other forms of physical exercise for both sexes. Whilst invigorating mind and body, it inculcates a love of clean-

Instruction in Swimming.

liness and induces self-reliance. Diving, in particular, trains the nerves and gives ease and grace to the motion of the limbs, while it is noteworthy that experts in high diving make good airmen. If, however, boys and girls in our secondary schools are to derive the full value from swimming, efficient instruction must be provided for them. Quite good results can be obtained by instructors who are moderately good swimmers, or even by non-swimmers who are enthusiasts, provided that they have the necessary knowledge of the correct strokes. All interested in swimming should obtain a copy of "Swimming Instruction," by F. Baxter, issued by the Amateur Swimming Association, and just published by Messrs. Simpkin & Marshall (1s. net). It gives full instruction in land and water drills for class teaching of the most modern strokes, and is illustrated by kinema photographs. The methods are designed to simplify teaching and to shorten the time necessary to reach proficiency. The new strokes have been put to exhaustive tests, and have been found to give the maximum results with minimum effort.

AN important point raised at the recent Conference of the Montessori Society on Nursery Schools was the relationship between nursery schools and infant schools. Is it intended that nursery schools should supplant infant schools, or merely supplement them? At present the infant schools are actually in possession. In London alone they take in about 40,000 children between the ages of three and five. At one time they took in twice that number. It must be remembered, too, that a nursery school is small and attractive—and very expensive. Desirable as a complete scheme of nursery schools would be, is there any reasonable hope of its fulfilment during the present generation? In the meantime teachers in infant schools are wondering whether their work is to be crippled by a policy of parsimony and neglect, while the work of nursery schools receives abundant support. All these teachers rejoice in the awakened national interest in the nurture of young children, they rejoice in the good fortune of the nursery-school children, but they would like to see their own pupils attracting some of the attention and receiving some of the benefits.

IN an article on "A Liberal Education in Secondary Schools," in the July issue of the *Parents' Review*, Miss Charlotte M. Mason, of the House of Education, Ambleside, describes certain discoveries she and her staff have made. One of these is "that a single reading suffices to secure a clear knowledge (as far as it goes) of a subject, given the right book." Elementary-school children even have, we are told, shown "themselves able to hear or read a work of literary value, and after a single reading to narrate pages with spirit and accuracy, not hedging at the longest names nor muddling complicated statements." Miss Mason dwells on the single reading, she says, because "it is impossible to fix attention on that which we have heard before and know we shall hear again." Another of the discoveries is "that the mind refuses to know anything except what reaches it in more or less literary form." "We have shown that the mass of knowledge acquired in a term from the proper books, evoking vivid imagination and sound judgment, is many times as great, many times more thoroughly visualized

Reading and Education.

by the scholars, than had they waited upon the words of the most able and effective teacher. This is why we insist upon the use of books." Miss Mason publishes a large selection of examination answers, presumably as evidence of the justice of her claims, but we fear they are not entirely convincing; and we gather that up to the present she herself has made the choice of books suitable for each age to secure the results she claims.

A PART from the claim that having secured the right book a single reading is enough to impress its teaching and information upon the mind of a child, we have much sympathy with Miss Mason's plea for a course of wide and varied reading. But a necessary preliminary to such a course is, we think, the formation of the habit of intensive and concentrated attention, which by no means comes naturally to the great majority of children, or even adults. Wide reading in many subjects may be excellent for the trained mind of the well educated person, but to attempt to educate children by allowing them to read once only a great variety of books on a wide range of subjects will appear to most experienced teachers unwise and vain. At present Education Authorities will, we surmise, retain the services of able and effective teachers, who will see that individual reading is given its due and proper place in the education of the young, but that other equally important methods are not ignored.

HOW TO FIND CAREERS FOR SECONDARY-SCHOOL BOYS.

TOWARDS the end of April an informal conference was held between officials of the Appointments Department of the Ministry of Labour and representatives of six of the chief associations connected with secondary education. The subject under discussion was the possibility of giving advice and assistance to boys leaving public and other secondary schools who are desirous of taking up professional and business careers such as are dealt with by the Department.

The two facts which were made abundantly clear during the proceedings were: first, the very large numbers of boys who enter "blind alley" occupations when they leave school because they find it necessary to earn money at once—one speaker, who is certainly in a position to judge, estimated this at something like 90 per cent.—or who take posts or enter professions for which they afterwards prove to be entirely unsuited; secondly, that the Department is in possession of a vast amount of just the information needed to prevent both evils, and has ready to hand the machinery to place that information at the disposal of schools and of the individual boys concerned.

The advantages of co-operation between the Department and the schools were so obvious that it was decided to set up a Joint Advisory Committee. This has been done, and the associations which have agreed to be represented thereon are: The Head Masters' Conference, the Incorporated Association of Head Masters, the Teachers' Registration Council, the Incorporated Association of Assistant Masters, the Association of Teachers in Technical Institutes, the Science Teachers' Association, the Modern Language Association, and the Private Schools Association. The Chairman will be the Head of the Department, which will also be represented by two senior members of its staff. The evils to be remedied are admitted. How far organized co-operation between the teaching profession and the Appointments Department might furnish a cure surely deserves some detailed consideration.

The War brought the Department into being. So far, its work has been to act as an intermediary between demobilized officers and men of good education and employers. Further, it has been necessary, in approved cases, to give training grants to enable such officers and men to complete their training in order to fit themselves for civil life. For these purposes it has been found necessary to set up thirteen selective committees, which have already appointed, in their turn, some seventy-seven local Interviewing Boards, whose work has been, *inter alia*, to investigate applications for grants. These Interviewing Boards, being composed of experts in various businesses, are able also to offer expert advice to those who need such help. Though, of course, grants are only available for ex-service men, the Department, generally, operates for the benefit of civilians. In addition, it has come into close touch with over sixty professional societies, with whom it is constantly conferring; it has also had to obtain an intimate knowledge, not only of the whole field of industrial activity both at home and abroad, but of the curricula of educational institutions in Europe, the States, and the Dominions. It ought, therefore, to be in a position not merely to advise but eventually to foresee, to speak with some authority as to the absorptive capacity of any particular industry, and to watch the trend of scientific research in relation to industry. In a word, it is a register of vacancies and of applicants, an advisory body as to facilities for training in any profession or business, and a centre of professional information generally.

It is common knowledge that the difficulties in its path are so great that its work in connexion with demobilization is as yet far from finished. Sooner or later, however, its task will be accomplished. Can machinery originally intended to replace demobilized officers and men in civil life be adapted to another purpose—that of placing the pupils of our public and secondary schools in their proper niches in our complicated social system of to-day? The attempt seems worth making. Upon what lines can it be made with any prospect of success?

Clearly means must be devised by which the information in the possession of the Department as to careers can be placed at the disposal of the individual schools. This information must be sent either to head masters direct or to some member on each staff definitely appointed for the purpose, whose business it would be to get into contact with boys who were approaching the end of their school careers. Here the sympathy of the head masters is essential. Upon their attitude the success of any scheme must in the long run chiefly depend. That sympathy would need to be active; apathy would in itself be sufficient hindrance quite apart from opposition. Most head masters are hardworked, many overworked, yet they have but too numerous opportunities of realizing the magnitude of the wastage of human material which occurs. Next, the district Directors of the Appointments Department would have to get into touch with the schools and arrange for a system of interviews between local Interviewing Boards and boys about to leave. Such interviews would be invaluable in assisting a boy to find his bent. Advice thus given would come just when most wanted, before it was too late to prevent the first false step. Eventually a network of such local Interviewing Boards might be established on which experts in the industries peculiar to the various districts might not only give advice, but, in turn, possibly select candidates suitable for their own particular industry. Similar arrangements might be made with reference to the professions. The main work of the Department would be, at head-quarters, to organize, co-ordinate, and, in particular, to distribute literature. But the whole system would depend for its success upon its pliability, the absence of attempt at centralized autocratic control, and, finally, of ability to profit by experience.

The need for some method of ensuring that the boy who leaves a secondary school should know for what career he was best suited and how to enter upon that career was recognized long before the War. The Future Career Association has done pioneer work in this direction of very great value. The Appointments Boards of the Universities deal annually with a large number of their graduates. Any scheme that dealt

with the problem as a whole would have to take such organizations into account and be worked in co-operation with them. No such societies can, however, cover the whole field of educational effort, for, though much may be done directly through the parent, the school must be the unit. It remains to be seen whether the Appointments Board, working in conjunction with the teacher, either through an Advisory Committee or otherwise, can solve the problem. But solved it should be, now or in the immediate future. Reconstruction is a term used both too vaguely and loosely. Here, at any rate, is a question which affects our national life so closely that it can only be tackled on the broadest lines, and the appointment of this Joint Advisory Committee is an experiment which seems deserving of encouragement and support, and which would appear to be well worth the watching.

PERSONAL PARAGRAPHS.

By the death of Lord Rayleigh British science has lost one of its most distinguished representatives. Educated at Trinity College, Cambridge, Lord Rayleigh—the Hon. I. W. Strutt as he then was—followed a long line of brilliant mathematicians and physicists, and graduated as Senior Wrangler at the age of twenty-three. He was the first heir to a peerage to carry off the Senior Wranglership, and he had the great distinction of being first Smith's Prizeman. The following year he was elected to a Fellowship at Trinity, which he held until his marriage, in 1871, to a sister of the Right Hon. Arthur Balfour. In 1881 he was greatly honoured in being appointed to succeed Maxwell as Cavendish Professor of Experimental Physics. He remained at the Cavendish Laboratory for three years, a period fruitful in research and in the organization of practical work. It was there that he laid the foundations of the legal standards of electrical units, the extreme accuracy of his investigations and calculations being such that they are even now difficult to surpass. The refinement of his experimental work upon the redetermination of the densities of the principal gases led later to the investigation of the atmospheric gases, which, with the assistance of Sir W. Ramsay, resulted in the discovery of the inert gases, and opened up a new chapter in the chemistry of the atmosphere. From 1887 to 1905 Lord Rayleigh was Professor of Natural Philosophy at the Royal Institution, and on the death of the Duke of Devonshire he was chosen to succeed him as Chancellor of Cambridge University. A voluminous writer on scientific subjects, Lord Rayleigh's *magnum opus* was his "Theory of Sound," a treatise considered to be one of the finest examples of a scientific classic extant, and the four volumes of his scientific memoirs, published by the Cambridge University Press, records a long list of researches, both experimental and mathematical, in all branches of physics. Lord Rayleigh's life was full of activities of a most varied character; he presided over the Treasury Committee which recommended the establishment of the National Physical Laboratory; he was Chairman of the Ordnance Committee of the War Office, a member of the Board of Trade Committee on the Methods of Gas Testing, and Scientific Adviser to Trinity House. He applied his scientific principles to the management of his estate near Witham, and instituted a scheme of profit-sharing and investment for his farm labourers which has proved very successful. In connexion with this scheme he opened a number of milk-shops in London, and was for some time referred to as the "peer shopkeeper." Innumerable honours were bestowed on the late Peer. He was D.C.L. of Oxford, Sc.D. of Cambridge and Dublin, Secretary and President of the Royal Society, Officier de la Légion d'Honneur, a Nobel Laureate, and an original member of the Order of Merit. The inestimable value of Lord Rayleigh's work, his attainments and energy, earned him international renown.

By the appointment of Sir Henry Hadow, Principal of Armstrong College, to the Vice-Chancellorship of Sheffield University, Newcastle loses one of its ablest educationists. Sir Henry has played a notable part in the public life of Tyneside since his appointment to Armstrong College in 1909. He has been a great pioneer in education, and music owes much to his guidance and zeal. He returned only recently to Newcastle from his work for education in the Army.

* * *

THE death is reported of Canon Richard J. Knowling, until recently Canon of Durham and Professor of Divinity in Durham University. Canon Knowling was educated at Blundell's School, Tiverton, and Balliol College, Oxford, where he graduated with Honours in Lit. Hum. and Theology. After some experience as Classical Master at Abingdon School (1874), he was ordained Deacon, and from 1876 to 1878 acted as curate of Wellington, Somerset, where his father, Prebendary Knowling, was vicar. He then became curate at St. Martin-in-the-Fields, and in 1884 began his connexion with King's College, which continued until his appointment, in 1905, as Professor of Divinity at Durham. He was Vice-Principal of King's College in 1890, and in 1903 he was appointed Examining Chaplain to the Archbishop of Canterbury and the Bishop of Exeter.

* * *

THE REV. K. J. F. BICKERSTETH, M.C., has been appointed Head Master of St. Peter's College, Adelaide, South Australia. Mr. Bickersteth was educated at Rugby and Christ Church, Oxford, and was for four years chaplain and assistant master at Melbourne Grammar School. He joined the Army in 1916, as a brigade chaplain, and was subsequently promoted senior chaplain of the 56th (London) Territorial Division on the Western Front.

* * *

CANON G. A. HOLLIS is to be the new Principal of Wells Theological College, in succession to the Rev. R. H. Lightfoot, who is resigning, under medical advice, on being nominated to a Fellowship at Lincoln College, Oxford. Canon Hollis graduated from Keble College, Oxford, with a First Class in Theological Honours in 1892. Ordained in 1894, he was appointed to Wells as chaplain and lecturer in 1895, and later became Vice-Principal. After fourteen years service at Wells, he moved to Armley and later to Headingley, subsequently returning to Wells last year as Canon and Chancellor of the Cathedral Church.

* * *

OLD HARROVIANS will be interested to know that Mr. H. Yates Thompson, himself an Old Harrovian, has presented two medallions of Hogarth and Sir Joshua Reynolds to Harrow School.

* * *

MR. THOMAS DEAN, Head Master at the Swindon and North Wilts Secondary School, has been appointed Head Master of the Tiffin Secondary School, Kingston, and will take up his duties at the end of this term. Mr. Dean was formerly Head of the Mathematical Department and Organizer of General Industrial Courses at East Ham Technical College and Secondary School. During the War he served in France as Adjutant of the 17th Artillery Brigade, and he is consulting mathematician to the Admiralty on rigid airship design and construction.

* * *

THE conferring of the degree of Master of Arts, *honoris causa*, upon Sir Oliver Lodge by Birmingham University puts on record the great appreciation of the University of the valuable services rendered by Sir Oliver during the nineteen years in which he has held office as Principal. In conferring the degree, the Vice-Chancellor, Colonel Gilbert Barling, referred to the affectionate regard in which Sir Oliver was held by all sides of the University. Sir Oliver Lodge, in reply, said that, although he was resigning from the principalship, yet he would not be quite separated from the University,

since he had been invited by the Guild of Undergraduates to be Warden, in succession to Mr. Neville Chamberlain.

* * *

THE REV. H. B. TOWER is to succeed the Rev. W. H. Bond as Head Master of Church's College, Petersfield. Mr. Tower is an old pupil of Marlborough College and an Exhibitioner and Scholar of St. Catharine's College, Cambridge. He was a keen and successful college sportsman, his record including Rugby XV, Hockey XI, Rowing VIII, and Scottish Hockey Inter-Trials, 1907-9. Mr. Tower is at present second master of King's School, Canterbury, and Head Master of the Junior School. Formerly he was Minor Canon at Worcester Cathedral and assistant master at King's School, Worcester.

* * *

MR. A. DAKIN, Senior Mathematical Master at Hymers College, Hull, since 1914, has been appointed Head Master to the new Stretford Secondary School, which is to be opened in September. Mr. Dakin was educated at Loughborough Grammar School and Jesus College, Cambridge, and has been an assistant master at Birmingham Technical School and Redcliffe House, Clifton.

* * *

MISS G. CLEMENT, formerly Head Mistress of the Godolphin and Latymer School, Hammersmith, has been appointed Assistant Director of Higher Education under the Warwickshire Education Authority.

ONLOOKER.

TOPICS AND EVENTS.

THE ATLANTIC FLIGHT.—R 34, a lighter-than-air machine, has completed her passage across the Atlantic from east to west. The outward passage covered a distance of 3,130 miles in 108 hours, and all went well until the airship ran into a storm on Saturday morning, July 5, which occasioned considerable delay, but fortunately there remained sufficient fuel to effect the landing where it was prearranged. A log was kept by General Maitland, which should prove of considerable scientific value; but the parts given in the Press leave much to be desired. The airship started from Scotland at 1.42 a.m., on Wednesday, July 2, with a brisk easterly wind of twenty miles per hour. She rose rapidly to about 1,500 feet. Much fog was encountered over the eastern portion of the Atlantic, and it did not lift until 10 a.m. Thursday, when the airship was in about 35 deg. West. Wireless weather reports published in the International Section of the *Daily Weather Report* show that the winds to mid-Atlantic were light to fresh from between north-east and north-west, with a high and steady barometer, an anti-cyclone occupying nearly the whole of the open ocean. Bad weather had to be encountered after reaching Newfoundland, but this was satisfactorily weathered, and the airship safely landed at Long Island at 2 p.m. G.M.T. on July 6. R 34 completed her homeward passage most successfully, starting from Long Island on the night of Wednesday, July 9, some hours previously to the time arranged, with the object of getting clear from her moorings before experiencing a gale which was threatening to pass over her. Pulham (Norfolk) was reached at 6.56 G.M.T. on Sunday morning, July 13, the passage being made in 75 hours.

BRITISH ASTRONOMICAL ASSOCIATION.—Following the report of Sir J. J. Thomson's Committee on the position of science in our educational system, and its recommendation that the teaching of the main facts and principles of astronomy should have a definite place in school curricula, the Council of the British Astronomical Association has resolved to offer the assistance of the Association in furthering this object, and has appointed a special Committee for the purpose, consisting mainly of schoolmasters. The rapidly growing interest in astronomy shown in the demand for lectures in schools encourages the Committee to hope that they may be of service to those desirous of assistance. The Council of the Association has decided to admit schools to the advantages of affiliation, so that teachers may be able to keep in touch with the rapid progress of the science. Lantern slides could be hired from the Association for the use of an affiliated school, and the *Journal* of the Association would be forwarded regularly to it. The Council will prepare a series of lantern slides for educational purposes. These

may be bought by the school for permanent use. Whenever desired, the Education Committee will be ready to give suggestions. Many teachers are anxious to see astronomy occupy its proper place in our educational system, and the Council of the Association ventures to offer the above suggestions in the hope of facilitating their work. Inquiries and applications for affiliation to the Association should be addressed to the Secretary of the Education Committee, Mr. E. O. Tancock, Wellington College, Berks.

NATIONAL DEMOCRATIC PARTY AND EDUCATION.—A deputation from the National Democratic Party waited on Mr. Fisher on July 8 to ask him to re-establish the rule that secondary schools in receipt of Government aid must take 25 per cent. non-paying pupils from primary schools; to give an assurance that in no circumstances would grants be made to secondary schools unwilling to accept this obligation; to restore the rule that the governing body of a school in receipt of Government funds must contain a majority of representative governors; and to secure an early opportunity for discussion in the House of Commons of the whole question of grants in aid of secondary schools. Mr. Fisher said the fears of the deputation were not well founded. It is not, he said, desirable to insist upon a rigid rule in regard to percentage of non-fee-paying pupils admitted to secondary schools. To ensure that as many pupils as possible from primary schools shall receive the benefit of a secondary school education, it is best to make the rule in regard to percentage of pupils admitted as elastic as possible. Certain advantages will accrue from a system whereby certain non-local schools fulfil their obligations by accepting scholars from secondary schools. The old rule, which compelled secondary schools in receipt of Government grants to receive upon their governing bodies a majority of representative governors, rules out certain Roman Catholic schools, excellently conducted, which it is desirable to assist.

SCHEMES UNDER THE EDUCATION ACT.—In our May issue (page 271) we commented on Circular 1096 of the Board of Education, with its draft memorandum of suggestions for the arrangement of schemes under the Education Act, 1918. Since the publication of that Circular the Board have received various observations from Local Education Authorities upon the draft memorandum, and have had them under consideration, with the result that Circular 1119 has been circulated. The draft suggestions have been revised in the light of the comments made by the Authorities, and are now issued in definitive form. The changes made are of a minor order only. The effect of the changes is that in the introduction to its scheme an Authority is invited to furnish a general outline of its administrative system, and to include particulars of any arrangements for co-operation or combination with other Authorities. The Authorities are now asked also to include their arrangements for dealing with stammering and shortsightedness as well as with dull or backward children. Moreover, instead of dealing under "Special Services" with special schools, the provision of meals, the organization of social and physical training, and nursery schools, the Authorities are now asked to deal with these matters under separate headings. The Board are now ready to deal with the schemes which the Authorities may from time to time submit to their approval.

THE "SCHOOL SCIENCE REVIEW."—The Association of Public Schools Science Masters, now known as the Science Masters' Association, has started the publication of an official journal under this title. The new review is to be published in February, April, June, and October, and separate numbers may be obtained from Mr. John Murray, Albemarle Street, W.1, for 2s. net. All publications of the Association are supplied to members free of charge. The first issue of the new review appeared in June, under the editorship of Mr. G. H. J. Adlam, City of London School, and will be welcomed by all teachers of science in schools. The articles are short, and deal with subjects of immediate interest to practical teachers. We hope our new contemporary will have a long and vigorous life.

MODERN LANGUAGE ASSOCIATION.—On July 5, Mr. E. Allison Peers lectured upon "Experience and Experiment in the Teaching of French Composition." Among other matters, he dealt with the creation, in connexion with the Modern Language Association, of a Department of Educational Experiment and Research. There had been in the past far too much generalization from imperfect and individual experience. Numerous matters in connexion with modern language teaching were lying at hand, the subjects of idle discussion or vague textbook organization. Under able direction, however, many teachers might be induced to investigate these matters for themselves. Action and energetic co-operation would,

of course, be needed. Teachers would give their names to the Department, as willing to undertake investigations which a central organism with a Committee of experts would collate. Small sub-committees would deal with the results of each investigation. Local centres would also be formed in connexion with local branches of the M.L.A., where interim results would be compared at intervals and experiments discussed. Conclusions would be published by the Committee. Final conclusions would not be published till after a long interval had elapsed from the beginning of the investigations. It was essential that such a Department should have the active co-operation of a large body of members, for where *classroom*, and not *laboratory*, conditions prevail the number of subjects must be far larger than in the average experiment in practical psychology. The question of funds was not likely to prove difficult. Much could be accomplished on a small initial outlay, and, as the work and scope of the Department became more ambitious, a grant would not improbably be forthcoming. But a determined and energetic body of teachers was needed to champion the movement at its birth, and this the Association could certainly provide.

MODERN LANGUAGE ASSOCIATION: WESTERN BRANCH.—The Western Branch of the Modern Language Association has just concluded a successful year under the able secretaryship of Miss A. L. Hargraves, of St. Olave's School, New Kent Road, S.E. Three meetings have been held, one in each term. The first was at St. Paul's Girls' School, Brook Green, at which M. Henry D. Davray addressed the members on "*La France après la Guerre*"; the second took place at the Greycoat School, Westminster, when M. A. Turquet spoke on "*Théophile Gautier*"; while the third was held at the Burlington School, when the well known novelist and critic, Mr. W. L. George, discussed "*The Classic French Novel*." The meetings have been well attended by members and their friends; the two former because of the great desire of French teachers to hear correct French spoken after having been prevented from visiting France during the five years of war; while during the last lecture there was hardly sitting room for the large audience who crowded to hear one of our few novelists whose command of French is so well known, and whose book, "*A Novelist on Novels*," has proved that he has a distinct point of view. In French literature, at any rate, Mr. George's preferences seem to be Stendhal's "*Le Rouge et le Noir*" and Flaubert's "*L'Education Sentimentale*." These meetings have hitherto been held at 8.30 p.m., but during the next season it is proposed to hold others at 5.30 in order to suit the convenience of members who live too far away to come to evening meetings.

MERCHANT VENTURERS' SECONDARY SCHOOL.—This school, which has been conducted for many years as a part of their Technical College by the Society of Merchant Venturers, an ancient Bristol Guild, will at the end of the present term be transferred to the Bristol Education Committee and become a municipal school. The Merchant Venturers conduct in their college the Faculty of Engineering of the University of Bristol, and the urgent need for additional space for this rapidly growing Faculty had made it impossible for them to continue to house the secondary school, which during the present session has provided for more than 400 boys, and would have numbered over 600 had it been possible to accept all the applicants for admission.

ART FOR SCHOOLS.—At the annual meeting of the National Art Collections Fund, on July 14, Mr. Fisher gave an address in which he referred to the use made in this country of museums and art galleries. We ought, he said, to make a much more strenuous effort, such as is made in France, to secure that the treasures of our museums and art galleries, especially local museums, are brought to the notice of the children and adults of the neighbourhood, and that they are educated to understand and appreciate the good things available. Mr. Fisher thinks more use might be made of good picture post cards of the best pictures in our art galleries, and that more advantage should be taken of the interest and delight children show in museums and art galleries when conducted through them intelligently under proper guidance. He expressed the hope that the decoration of our elementary and secondary schools by the exhibition of reproductions of works of art would be further encouraged. We hope Mr. Fisher's wish will be realized. Our experience is that girls' schools have done excellently in this direction, and if their example could be emulated in boys' schools there would be little cause for complaint.

ASSOCIATION OF TEACHERS OF DOMESTIC SUBJECTS.—The Annual Conference of the Association of Teachers of Domestic Subjects was held on May 24. In the absence of Mrs. Lloyd George, the Countess Ferrers took the chair and gave an

address. There was an unusually large attendance of members from all parts of the country. Lady Ferrers said the Association had done much useful work by bringing before the public the importance of domestic subjects to the life of the nation, and their work was by no means finished, for there was still a large body of opinion hostile to the teaching of domestic science. She was old-fashioned enough to consider the family the unit instead of the individual, and to regard it as the perfect microcosm of the State. The more one believed in the family the more important did domestic science become. The home was the basis of national life and character. All outside efforts—infant welfare centres, elementary schools, secondary schools, University training—lost their full value if the child went out to receive these benefits, but returned to the stultifying atmosphere of an ill-ordered, ignorant, and confused home life. Every woman, even if she did not do the work, should know from personal experience and training, how to keep the material side of her home in good, wholesome, working order, and how to feed her household, so that the highest point of efficiency was obtained. Domestic science should be a compulsory part of national education from the highest to the lowest; no class should escape from it. Several papers, outlining the teaching of domestic subjects under the new Education Act, were read, dealing with urban and rural areas. Some discussion followed. In the afternoon Mr. Percy Wells gave a lecture on "*Qualities in Furniture*," illustrated by lantern slides.

NAVAL PRIZE ESSAY COMPETITION.—In order to encourage the scientific study of "*Sea Power*" and its uses in war and peace time, and to stimulate interest in the achievements of the Royal Navy and Mercantile Marine, the Navy League has decided to award prizes for essays on naval subjects. Among the prizes are a gold medal to be offered for competition among the Universities of the United Kingdom for the best essay on a naval subject to be set by the Navy League, to be known as "*The Navy League Gold Medal*." A monetary prize of £100 will also be awarded to the winner of the medal; three prizes of a monetary value to be offered for competition among public schools for boys—namely, £20, £10, and £5; two monetary prizes of £20 and £10 to be offered for competition to head teachers and assistant teachers of secondary schools; two monetary prizes of £20 and £10 to be offered for competition to head teachers and assistant teachers of elementary schools; four sums of £50 each to be offered to Canada, Australia, New Zealand, and South Africa, to encourage them to initiate a similar scheme, the details to be left to their discretion. The subjects for competition will be:—(1) Universities: "*Operations in the Baltic against Napoleon and his Allies, 1803-1814, with special reference to their influence on the course of the war.*" (2) Public and private schools for boys and high and private schools for girls: "*The relation between the strength of a navy and the policy of a nation in the cases of—(a) a Continental Power, e.g. Russia, Germany, Holland, France; (b) an Island Power, e.g. Japan, Britain; (c) a Peninsular Power, e.g. Spain, India.*" Teachers of secondary and elementary schools: "*What is in your opinion the best method of teaching the principles of Sea Power to children in secondary and elementary schools?*" Essays written by competitors from Universities should not exceed 3,000 words; by competitors from public, private, and high schools should not exceed 2,000 words; by teachers should not exceed 2,000 words. All correspondence relating to the competition should be addressed to the General Secretary of the Navy League, 13 Victoria Street, London, S.W.1. All essays must reach the Examination Council before November 30, 1919.

ROYAL ACADEMY OF MUSIC AND THE ROYAL COLLEGE OF MUSIC.—The Annual Meeting of the Associated Board of the Royal Academy of Music and the Royal College of Music was held on July 17. The report expressed the gratification of the Board at being able to announce that H.R.H. the Prince of Wales had graciously consented to become its President. A tribute was paid to the memory of the late Sir Hubert Parry. The number of candidates in the United Kingdom was 5,006 in the Local Centre Examinations, and 34,040 in the School Examinations. Mr. Ernest Mathews, in moving the adoption of the report, said: "It is particularly gratifying to us that his Royal Highness the Prince of Wales has seen his way to accept the position of President of this Board. In doing so he is only carrying on the work of his father and grandfather before him." With regard to the death of Sir Hubert Parry, he spoke of his personal friendship with him extending from the time, fifty-three years ago, when he first met him as an undergraduate at Oxford. He also wished, on behalf of the Board, to say how greatly he appreciated the presence of Dr. Hugh P. Allen, whose influence was already proving of great value to the Board. It is interesting to note that, during the first year, the Board examined about 1,100 candidates; in its tenth year,

12,000; in its twentieth year, 35,000; and in the past year a little less than 60,000. Sir Walter Parratt seconded the motion, and the report and balance sheet were adopted.

SCIENTIFIC PRODUCTS EXHIBITION.—The attention of teachers in general, and science masters in particular, is directed to the British Scientific Products Exhibition, now being held at the Central Hall, Westminster. Whereas last year the exhibits at King's College were confined largely to activities bearing on the prosecution of the War, this year happily it has been possible to focus the attention of the public chiefly upon the requirements of peace. The display gives remarkable evidence of the potentialities of British science and British labour. There are admirable collections of glass and other ware, and chemical apparatus of excellent quality. The chemist will also view with satisfaction the pioneer work in the manufacture of fine chemicals, which bids fair to eradicate Kahlbaum from our memory. Exhibits from several gas companies remind one of apparently limitless applications of coal-tar products. The development of the drug industry has been remarkable in its rapidity, as will be seen from the interesting and instructive exhibits from many well known firms. The teacher from rural schools will be interested in the work of the Rothamsted Experimental Station. In the Mechanical Sciences and Physics sections are shown optical and electrical instruments of the most varied types, from micrometer scales on the one hand to range-finders and the latest inventions connected with directional wireless on the other. The Geological Survey exhibit relating to the petroleum industry in England and Scotland has a very special interest at the present day.

PRESENTATION TO SIR WILLIAM OSLER.—On July 11 Sir William Osler completed his seventieth year, and the occasion was chosen by a number of his friends, colleagues, and pupils to present him with a collection of memoirs and essays on a great variety of biological, medical, and historical topics. The ceremony of presentation took place at the rooms of the Royal Society of Medicine, and was conducted by Sir Clifford Allbutt, Sir William Osler's brother Regius Professor of Medicine. We understand that the scheme originated in this country, but that the exigencies of the printing trade necessitated the production of the volumes in America. The volumes contain no fewer than a hundred and fifty contributions. The work consists of two large octavo volumes, adorned with a great number of plates. A steel engraving of a portrait of Sir William forms the frontispiece to the first volume. The subscription price of the volumes is two guineas, and any further information concerning the volumes can be obtained from Dr. Charles Singer, Westbury Lodge, Norham Road, Oxford, who has throughout acted as secretary and editor for the English Committee.

CAMBRIDGE LOCAL EXAMINATIONS.—The July Local Examinations were held at 218 Centres in the United Kingdom and 17 Centres in the Colonies. The total number of Preliminary, Junior, Senior, and Higher School Certificate candidates is 8,641.

FOREIGN AND DOMINION NOTES.

UNITED STATES.

As to continuation, the Legislature should say to all children alike: "You must go to school until you are fourteen. Many of you will attend a secondary school to the age of seventeen, and poverty shall not prevent the abler intellects from doing so. The rest we must ask to avail themselves, up to that age, of the means of continuing their education efficiently that are or will be locally provided." We are begging them to say this simple thing. Section 10 of our Education Act, among its other defects, draws an invidious social distinction. It addresses the child of prosperous parents thus: "You are now sixteen years old. You may have learned nothing, as being a dolt by nature and an idler by habit; but, by paying fees, your father has kept you under full-time instruction at a school recognized as efficient or in some other acceptable manner. You may go, then—to undersell the poor man's child in the labour market, or to become his lord and master." The youth kept at school for the games, for example, is to be exempt from the continued education which he sorely needs. Such social discrimination were inconceivable in the United States, where already some small progress has been made with obligatory continuation. The progress is small because, as a rule, initiative

is left to the Local Boards. Thus, in Massachusetts the State law provides that the Local Board, with the consent of the State Board, may compel attendance of the continuation school by children between the ages of fourteen and sixteen; but, whilst the Local Board may establish a continuation school, it is not compelled to do so, and, so far, Boston is the only city in the State that has effected compulsory attendance of the continuation school. Similarly, in Wisconsin, Indiana, and Ohio, compulsory attendance depends on a *permitted* establishment of continuation schools. In Wisconsin, on the other hand, the Local Board *must* establish a continuation school if twenty-five qualified persons petition for it; whereupon attendance becomes compulsory on all within the age limits. In general, it may be said that permissive legislation is a failure where obligatory continuation is concerned. We commend the difference between *may* and *must* or *shall* to the attention of the President of our Board of Education. In the United States there is to be predicted a forward movement in respect of continuation so soon as the Federal Department of Education is established. One of the chief objects of the Bill for establishing it is to equalize educational opportunities. In opposition to Whitehall, we are urgent that the rich idler, too, must have his chance.

The English Act directs the Local Authorities to submit schemes for securing regular attendance of the continuation school; but what powers have they for the making of disciplinary by-laws? And when we get the schools what are we to teach in them?

Experience alone, as we have said before, will reveal what is best in methods and matter. In the United States, says Bulletin No. 25 (1919) of the Bureau of Education, the continuation school has developed itself as a result of the movement for vocational education. "As it exists to-day, it is essentially a vocational school, limited in its instruction to those subjects that are directly related to employment of the student. This is a narrow conception—far narrower than the conception of the continuation school that has been taking root in England and France. Without sacrificing in any essential way its service to industry, the scope of the continuation school should be broadened to include those elements of general and liberal education that are so fundamental to sound democratic citizenship. It should supply to the boys and girls who must leave school and go to work something of the insight, something of the broader outlook, something of the stimulus to mental growth, that the full-time high schools and colleges provide." In England we must remember always that liberal and vocational education are complementary, not mutually exclusive; and our ideal must remain to make perfect the man in making perfect the workman.

The Bulletin quoted in the preceding paragraph reviews the progress of vocational education in the two years to 1918. The Smith-Hughes Act was passed and a Federal Board for Vocational Education created. The Committee of the War Department on Education and Special Training conducted a gigantic experiment in industrial education, and produced "the fighting mechanic." The Emergency Fleet Corporation of the United States Shipping Board evolved a highly successful plan to increase the available supply of skilled mechanics for the shipyards. In 1918 the Smith-Sears Act provided for the vocational rehabilitation of men disabled in war. Again, the Navy offered a wide variety of industrial courses to ambitious young men, who were enabled to study radio-mechanism, stenography, plumbing, and many other crafts. The Federal appropriations under the Smith-Hughes Act will amount ultimately to more than 7,000,000 dollars a year. Already the several States are making use of the sums allotted to them. The *School Review* (XXVII, 4) contains an account of "Industrial Education in Illinois under the Smith-Hughes Law." In the course of 1918 a full-time machinist trade school was established at Peoria, and part-time extension or general continuation classes were fostered at Moline, Rockford, and Chicago. It is noteworthy, by the way, that the Federal Board has now decided that Federal grants may be used for the teaching of commercial subjects as well as for instruction in the mechanic arts.

Vocational teachers may be men academically trained, and having in addition a knowledge of crafts; thus, at Rockford, Illinois, all the four full-time instructors had at least two years of college training and much practical experience. Or they may be artisans trained to teach. During the summer of 1918 there were special classes for the preparation of teachers of vocational subjects conducted under the direction of State Boards or Departments of Education in twenty-six States, with a length of session ranging from two to ten weeks. And, when the United States had to build ships in a hurry, picked men were sent to a dockyard at Newport News, who for half the day were instructed in the methods of

teaching, and for the other half were actually instructing groups of workers in the yard. After six weeks so employed, they returned to their own yards to set up classes for breaking in new men taken from kindred trades. It was an emergency measure, but *the ships were built*. In general, however, it is found that the average mechanic, with his lack of education and near horizon, cannot be converted into a skilful and inspiring teacher through the medium of short courses alone. The candidate, said a recent conference of schoolmen, should first demonstrate his fitness to instruct; then, since observation and practice teaching are essential factors in the preparation of the teacher, provision must be made for these exercises in normal school curricula. Lastly, new machinery and a new basis for the examination and certification of vocational teachers are urgently needed; practical tests of ability must be used, and examiners must be competent in things other than books. What of finance? To attract suitable men and to make them into competent teachers, money is required, and the Federal appropriations to the States under the Smith-Hughes Act are applicable to three objects. (1) For the payment of the salaries of teachers, supervisors, and directors of agricultural subjects, 500,000 dols. was appropriated for 1918, the amount rising to 3,000,000 dols. in 1926 and for each year thereafter; (2) for the payment of the salaries of teachers of trade and industrial subjects the appropriations were for the same amounts as for instructors in agriculture; (3) for the payment, in co-operation with the States, of the cost of preparing teachers, supervisors, and directors of agricultural subjects and teachers of trade and industrial subjects, the appropriation in 1918 was 500,000 dols., the amount rising to 1,000,000 dols. in 1921.

The pertinence of these movements in the United States to education in England will grow apparent on reflection. We are about to enter into a great period of commercial and industrial rivalry with America—friendly rivalry, yet intense. It is proper for us to point out how she is preparing herself in school, workshop, and laboratory. We had hoped that England would get much vocational education done in continuation schools which would cover the "unoccupied field." Our Education Act (headed "National System of Education") received the Royal assent on August 8, 1918, yet hitherto not one square inch of the unoccupied field has been occupied under the Act. The insistence with which we urge continuation will be excused by those who realize its economic as well as its social and educational importance.

FRANCE.

In France there is a certain unrest among the primary teachers, who are not satisfied with the proposed scale of salaries. In the domain of secondary education the establishment of a separate *baccalauréat* for women is condemned vigorously in many quarters. "Le cerveau n'a pas de sexe!" cry the feminists, urging that, if women are to compete with men in the newly opened careers, they must receive the same training. A form of industry towards which women have legitimate aspirations is agriculture; for during the War they saved agriculture for France. A recent ministerial circular urges that a beginning should be made everywhere with *cours de perfectionnement* for girls; and in such courses attention were fitly directed to the making of cheese and butter, the breeding of pigs and goats, the care of poultry houses, rabbit hutches, and beehives. M. Méline, a former Minister of Agriculture, in a book about to be issued, "Le salut par la terre et le programme économique de l'avenir," assigns to women an important part in the agricultural restoration of France. He would draw to the fields working girls tired of the factory and servant maids in search of a healthier life and brighter prospects. We believe in agriculture as an employment for women. When M. Méline suggests that they may be drawn to it by the study of housekeeping—as if the cooking of carrots would inspire a desire to grow them—we cannot agree with him. The charm of rural life is to be discovered in the open air, and not from stewpots; and the many French and English girls who have tasted that life will not lightly be drawn from its lure. In France it is proposed to multiply schools of agriculture, and girls will be admitted to share the instruction.

We must learn more French, and to do so we must have better teachers. The Englishman whose French was got from a holiday course—the itinerant German, who certainly had "a foreign accent"—the untrained young Frenchman—they left us with the French that we used in the War and was enough to have caused it. One way of making teachers of French is through an Institut français, a French university going, as it were, abroad, with gifts of language and culture in its hands. We have an Institut français in London. The Institut français at Florence is an offshoot of the University of Grenoble, which has just been empowered (*Bulletin Adminis-*

tratif du Ministère de l'Instruction publique, No. 2377) to institute in it for Italian and other non-French students (1) a "certificat d'études pratiques de français," (2) a "diplôme d'études françaises," lower grade, and (3) a "diplôme supérieur d'études françaises." Of making many parchments there is no end; it seems that these particular parchments are to be the rewards of real attainment. Candidates must bring at the outset proof that they have completed successfully their secondary studies; they must be regularly matriculated at the Institut and must have followed its instruction for two or three years; and the "jury," or Examining Board, is appointed by the University of Grenoble. That is what we want—teachers of French hall-marked by a French university. How many of the *Sprachgenies* who used to teach French and German (often a worthless dialect of German) in our schools could have obtained the "diplôme supérieur d'études françaises" at the Institut français of Florence, with its tests, "interrogation sur l'histoire de l'art français," "interrogation sur la pédagogie des langues vivantes," "interrogations sur des questions de phonétique expérimentale et pratique," and so forth?

GERMANY.

We trust our readers approved our attitude during the War. Our endeavour was to be patriotic without being idiotic. We grieved over the unrighteous ambitions, the illusion of all-mastering strength, the moral aberration, and all those other sins and errors of the present generation of Germans, for which it and later generations must suffer. A tragic adventure in the life of a great race has been incorporated in its past. Let us look at the present, so far as we can discern it, and confine the survey to our own field. It seems that a great "democratization"—we must reconcile ourselves to these new words—of education is in progress or *in spe*. Since 1917 Berlin has had in operation a new system for extracting the *élite* from the people. A *Gymnasium*, a *Realschule*, and a girls' secondary school have been transformed into establishments reserved for the more highly endowed pupils of the primary school, who receive free instruction, free books and material, and, in case of need, a grant of 300 marks for maintenance. A similar school opened at Hamburg in 1918 has now some thousand pupils, 5 per cent. of the school population of the town. But the general demand is for the *Einheitsschule*, one school for all classes. Another claim, notably in (Catholic) Bavaria, is that the public school, as a State institution, should be free from any dependence on the Church. Saxony has excused the children of dissenting parents from participation in the religious instruction, the study of the Bible has been cut down in the lower classes to two hours a week, and the catechism has been discarded, while the clergyman ceases to be a member of the School Committee. But, in opposition to a tendency to reduce or abolish the teaching of religion, the Conservatives and Free Conservatives advocate "national education based on religious instruction." In truth, the turbidity of the political waters affects education. Scholastic opinion in general may be discovered from the programme of the German Teachers' Association, which is this. A uniform school (*Einheitsschule*) from the Kindergarten up to the University; unrestricted right of every child to education according to his ability and willingness to pursue higher studies, without regard of the parent's wealth, position, or creed; free instruction and school material, free maintenance and clothes for necessitous children; extension of compulsory education in the common and continuation schools up to the age of eighteen; abolition of all church supervision and compulsory religious confession for teachers and pupils; elimination from the teacher's duties of any purely church function; inspection of school work by professional men thoroughly familiar with it; uniform training and salaries for all teachers; full citizenship and the guarantee of freedom of teaching and professional independence for teachers of every order. But those who know Germany intimately will hear through all this the voice of the *Volksschullehrer*; that of the higher teachers, university and school, with their strong pride of class, their social influence, their capacity of leadership, is not yet distinguishable. In education, as in other spheres, the permanence of reform in Germany depends on the power of the new democracy to construct and to administer—"zu bauen, zu bilden, zu versöhnen." Revolutions that are merely destructive are always transient.

CAPE OF GOOD HOPE.

It is always pleasant to learn that the native people in the British Dominions are being well cared for; the Cape *Education Gazette* (xviii, 26) shows that this is done in South Africa. At Umtata, on April 23 and 24, was held the Native Handicrafts Exhibition,

The Children of Ntu.

along with other ceremonies. On the first day the Exhibition was open only to Europeans; the second was set apart for the "children of Ntu," as the natives call themselves, after their great mythical ancestor. It was then that eighteen choirs combined in singing a song of welcome to the Education Authorities assembled to honour the occasion; and between stanzas of the song a *mbongo* declaimed in sections an address. The Superintendent-General he hailed as "Ruler of the Branch of Learning"; the inspectors of schools were "Bearers of the Treasure Bags of Wisdom"; the clergy were "Milkers of the Breasts of Heaven." Of the song, or psalm, the significant note was this: "Long in the prison of Foolishness and Want of Knowledge have we been confined, Do ye open for us the gates of Knowledge, that we too may enter and receive a share." The Exhibition both attested and will increase the interest of South Africans in the industrial and general education of the natives for whom they are responsible.

CANADA.

The report of the Ontario Minister of Education (Hon. H. J. Cody,

In Ontario.

who is D.D. as well as LL.D.) for 1918 is indicative of progress. The amount expended by the Province on education increases year by year. Against a slight decline in the attendance of high schools and collegiate institutions is to be set an increase in the enrolment and an improvement in the attendance of public elementary schools. More attention is being given to the health of the young, and many of the larger urban municipalities have made provision, as the law requires, for the medical and dental inspection of children. During the War the schools have taught their pupils what principles were at stake and what the British Empire means to the world; now that it is over, the schemes of instruction are being reconsidered with a view to more stress on history as the source of patriotism, on morals, and on pre-vocational subjects. A Federal subvention for agricultural education has promoted the rapid extension of the teaching of agriculture in the schools. In 1911 there were 33 public and separate elementary schools qualified for grants on account of agricultural instruction; in 1918 there were 1,020. Of the high schools, too, more teach the subject, and the normal schools are developing their courses for teachers of it and enlarging the areas of their educative gardens. Teachers in general are being better paid; but Ontario has not adopted the system of equal pay for men and women. Thus, whilst the average salary of a man teacher in a public elementary school is 1,039 dollars, that of a woman teacher is only 650 dollars.

Most of the manufacturing cities and towns in the Province show quickened interest in industrial and technical education, demanding plans and teachers for schools. But the compulsory attendance of continuation schools is not enforced. The

Industrial and Technical Education.

Adolescent School Attendance Act, providing for local option as to compulsory attendance, was passed in 1912 and amended in 1916; but no municipality has put it into action. Permissive law in this domain generally remains a dead letter. The Report (Appendix B) of Mr. Merchant, Director of Industrial and Technical Education, is worth study. Ontario has in the bud a system of continuation. The day industrial and technical schools have become firmly established as part of the provision for education in the Province, and the attendance of them improves. They are characterized by the emphasis that they put on the essentials of a general education, specialized training for particular vocations being reserved for the advanced classes. How are the teachers got? Does the Department of Education proclaim with a sigh of despair the number required? Let us quote from Mr. Merchant. "The regulations governing the qualifications and certification of vocational teachers for day and night industrial and technical schools have been amended with a view of attracting a larger number of those who have been trained in the industries to take up permanently the work of teaching and of encouraging them to fit themselves for this vocation. The Department of Education now grants interim certificates, to be made permanent at the end of a period of successful teaching, to candidates who have had approved technical training or trade experience and who have taken approved teacher-training courses. To enable teachers to qualify under these amended regulations, evening teacher-training classes have been opened up in Toronto, Hamilton, and London. A large number of the teachers engaged in the schools in these cities are registered for a two years' course. The course of training includes instruction in the general principles of education, with their application to technical and trade subjects, the analysis of trade operations and requirements, the construction of suitable courses of study, the development of lesson plans, and exercises in practical teaching, with criticisms."

Ontario believes that the universal training of the adolescent is one of the chief problems of reconstruction, of which the Minister says this:—"The basis of reconstruction is the conservation and development of our human resources. All plans for commerce, industry, agriculture—all plans for the general utilization of our material wealth, depend upon the intelligence and character of the people. Reconstruction is thus inextricably bound up with the broad subject of education." And in the past the "unoccupied field" of education consisted of the adolescent not attending a secondary school. Ontario, as it seems, intends to occupy that unoccupied field.

CORRESPONDENCE.

RELIGION AND THE CLASSICS.

To the Editors of *The Journal of Education and School World*.

SIRS,—Among the many articles upon educational reconstruction which have recently appeared in scholastic papers I have looked in vain for any mention of what is the greatest defect of all English education, *i.e.* the absence of religious instruction. For generations education has been handicapped by the bugbear of "the religious question in schools," and we schoolmasters have had to stand aside and watch those who control our destinies wrangling interminably upon questions which have seemed to us to have no more to do with religion than with schools. Thanks to an enlightened President of the Board of Education, we have at last been given an Education Act freed from the old dissensions; but ominous signs are already beginning to appear that the ghost has not been properly laid. Various educational bodies are passing resolutions in favour of "definite religious instruction in schools," and several books are being published which are intended for school religious teaching. Both these are signs that the British parent is not willing to have his child brought up without religious guidance; but there is great danger that, if he revives "the religious question" in the old spirit, he will get nothing but a further dose of the hypocrisy bred of that old controversy. To help in preventing such a fraud is the object of this letter.

No schoolmaster who has been on terms of intimacy with his Sixth Form is ignorant of the fact that the average boy enters upon a stage of doubt with regard to religious matters well before he leaves school. He begins to reflect; he discusses religion with all who will take him seriously; he criticizes the weekly sermon. He thus realizes that much of what he has been taught—at home or in Sunday school—is mythology, and not to be taken literally. There is some danger that this awakening of rationalism may lead a morally weak boy into real trouble, and it will certainly cause an over-sensitive one some spiritual agony. Yet we schoolmasters (at least in our official capacity) stand aside and withhold all guidance of the very intellectual awakening which we have laboured to achieve! Some guidance ought to be given in our official capacity, as part of definite school instruction. Such instruction will naturally vary according to the different school subjects with which it is incorporated; but given it can and must be. English literature affords a splendid scope; no master can expound Shakespeare, Milton, Matthew Arnold, or Wordsworth at all efficiently without either consciously or unconsciously influencing the religious ideas of his pupils.

There is much opportunity for enlightened interpretation in the ordinary course of classical reading, in dealing with authors such as Aeschylus and Herodotus, Pindar and Plato, but it would be better to have something more systematic than can be provided by the *obiter dicta* that spring up in connexion with such reading. Such a special course as I advocate is provided by the study of the elements of Greek Philosophy. Many will think this impossible as a school subject, but they will change their opinion when they have tried it, as I have for many years now. The course of Greek philosophical speculation establishes the two fundamental facts of religion—the existence of some spiritual power in the universe which we

(Continued on page 524.)

SELECTED BOOKS FOR PREPARATORY SCHOOLS

PUBLISHED AT THE

University Tutorial Press.

MATHEMATICS AND SCIENCE.

ALGEBRA, JUNIOR. By A. G. CRACKNELL, M.A., B.Sc., and AUGUSTUS BARRACLOUGH, M.A. 3s. 6d. With Answers, 4s.

"Maintains the high standard of excellence we are accustomed to expect from so well known a source."—*Journal of the Assistant Masters' Association*.

ALGEBRA, JUNIOR, TEST QUESTIONS IN. By F. ROSENBERG, M.A., B.Sc. 1s. 6d. With Answers, 1s. 9d.

"A complete series of examples carefully graded."—*Educator*.

ARITHMETIC, THE PRIMARY. Edited by WM. BRIGGS, LL.D., M.A., B.Sc., F.R.A.S. Second Edition. 10d. each. Part III. 1s. 3d.

A Course of Simple Arithmetical Exercises covering all the subjects usually taught in schools, from the four simple rules to stocks and shares.

ARITHMETIC, PRELIMINARY. By AUGUSTUS BARRACLOUGH, M.A., Second Master at Bournemouth School. 2s. With Answers, 2s. 3d.

"The chapters are clearly written, carefully arranged, and accompanied with a plentiful supply of examples and exercises."—*School Guardian*.

ARITHMETIC, THE JUNIOR. By R. H. CHOPE, B.A. With or without Answers. Third Edition. 3s. 6d.

"The book is well got up, and has a quite good selection of examples throughout."—*Mathematical Gazette*.

ARITHMETIC, JUNIOR, TEST QUESTIONS IN. Edited by A. G. CRACKNELL, M.A., B.Sc. 1s. 6d. With Answers, 1s. 9d.

"No better supplement to the ordinary class-book could be desired."—*Secondary School Journal*.

BOOK-KEEPING, JUNIOR. By T. C. JACKSON, B.A., LL.B., 2s.

"Students commencing Book-keeping will find this manual well-fitted to enable them to gain an early grasp of the subject."—*Schoolmaster*.

BIOLOGY, A FIRST COURSE IN PLANT AND ANIMAL. By W. S. FURNEAUX. 2s. 9d.

"The object of the author is to supply beginners with a safe introductory guide to the study of animal and vegetable life."—*Educational Handwork*.

BOTANY, JUNIOR. By FRANCIS CAVERS, D.Sc. 3s. 6d.

"Dr. Cavers has achieved a useful little book."—*Journal of Botany*.

CHEMISTRY, PRELIMINARY. By H. W. BAUSOR, M.A., late Scholar of Clare College, Cambridge. 2s.

"An excellent little book . . . will make a clear understandable foundation for a systematic treatment of chemistry in the higher forms."—*Educational News*.

CHEMISTRY, JUNIOR. By R. H. ADIE, M.A., B.Sc. Second Edition. 3s. 6d.

"The results of fifteen years' experience of a thoughtful teacher are always valuable. A thoroughly sound course of practical instruction."—*Nature*.

CHEMISTRY, JUNIOR PRACTICAL. By H. W. BAUSOR, M.A. 1s. 6d.

"An excellent guide for the beginner in practical laboratory work."—*Educational Times*.

GEOMETRY, PRELIMINARY. By F. ROSENBERG, M.A., B.Sc. With or without Answers. 2s. 9d.

"Will prove distinctly helpful to the beginner in the study of Geometry."—*Bookseller*.

GEOMETRY, JUNIOR. By A. G. CRACKNELL, M.A., B.Sc., 3s. 6d.

"A simple treatment of the elements of Geometry. A feature of the book is the number of questions which require a numerical answer, incorrect and careless work being thereby easily checked."—*Schoolmaster*.

HEAT, JUNIOR. By JOHN SATTERLY, D.Sc., M.A. 2s. 9d.

"A remarkably clear exposition of the main principles of the science, such as is required by elementary students."—*Secondary School Journal*.

MAGNETISM AND ELECTRICITY, JUNIOR. By R. H. JUDE, D.Sc., M.A., and JOHN SATTERLY, D.Sc., M.A. 3s. 6d.

"This book should not have any difficulty in holding its own, for it is one of the best regarded from the standpoint of exact thinking."—*Electrical Engineering*.

AN INTRODUCTORY COURSE OF MECHANICS AND PHYSICS. By W. M. HOOTON, M.A., M.Sc., F.I.C., and ALFRED MATHIAS. 2s.

"An excellent introduction to the fundamental principles of Mechanics, Hydrostatics, and Heat."—*Educational News*.

SCIENCE, PRELIMINARY COURSE OF EXPERIMENTAL. By W. M. HOOTON, M.A., M.Sc. 2s.

A course of Science training for beginners in accordance with modern ideas.

SCIENCE, JUNIOR EXPERIMENTAL (Physics and Chemistry). By W. M. HOOTON, M.A., M.Sc., F.I.C. Second Edition. 3s. 6d.

"The explanations are clear, and we can recommend the work heartily."—*Secondary Education*.

SOUND AND LIGHT, JUNIOR. By JOHN SATTERLY, D.Sc., M.A. 3s. 6d.

"Reaches a high standard with plenty of practical work and exercises."—*Guardian*.

LANGUAGES, HISTORY, AND GEOGRAPHY.

ENGLISH COURSE, PRELIMINARY (Grammar and Composition). By A. M. WALMSLEY, M.A., late Senior English Master, Middlesbrough High School. 2s.

"An English Grammar embodying in general the recommendations of the Joint Committee on Grammatical Terminology. The author has kept in view the real aim of grammar, namely, 'the production of good English.'"—*Athenæum*.

ENGLISH COMPOSITION, JUNIOR. By E. W. EDMUNDS, M.A., B.Sc., Senior Assistant Master at Luton Modern School. 2s.

"This excellent manual makes plain for the young pupil the essentials of good writing. A distinctly workmanlike production that can be heartily recommended as one of the best of its kind."—*Education*.

ENGLISH GRAMMAR, JUNIOR. With Parsing and Analysis. By A. M. WALMSLEY, M.A. Second Edition. 2s.

"The work of a practical teacher who knows the value of compromise between the old and the new methods."—*Journal of the Assistant Masters' Association*.

SPELLING AND PUNCTUATION (with Passages for Dictation). By HARRY SHOOSMITH, M.A., Modern Language Master, Wandsworth Technical Institute Secondary School. Second Edition. 1s.

"Very seldom have we seen any book which deals so thoroughly with the difficult subject of teaching and learning to spell."—*Educational News*.

FRENCH COURSE, PRELIMINARY. By H. J. CHAYTOR, M.A., and H. E. TRUELOVE, B.A. Second Edition. 2s.

"An excellent first year's work, well arranged on systematic lines, with due regard to the advantages of the Direct Method, and also to the necessity for thoroughness in the acquisition of the language."—*Athenæum*.

FRENCH COURSE, NEW JUNIOR. By G. A. ROBERTS, M.A., Head Master, Russell Hill School, Purley. 3s. 6d.

"The book becomes a serious rival to those existing."—*Schoolmaster*.

FRENCH READER, NEW JUNIOR. By J. P. R. MARICHAL, L. ès L. and L. J. GARDINER, M.A. 2s. 9d.

"Consists of well-chosen literary extracts in French."—*Education*.

GEOGRAPHY, PRELIMINARY. By E. G. HODGKISON, B.A. 2s.

"An admirable textbook, clear direct."—*Literary World*.

GEOGRAPHY, JUNIOR. By G. C. FRY, M.Sc. 3s. 6d.

"The matter is well arranged, the maps and diagrams are good, and the questions at the end of each chapter render the book a thoroughly practical aid."—*Schoolmaster*.

GEOGRAPHY OF ENGLAND AND WALES, A PRELIMINARY. By ERNEST YOUNG, B.Sc., F.R.G.S., Head Master, County School, Harrow. 1s. 6d.

"A capital book, written in simple language, and containing abundant sketch maps of the right kind."—*London Teacher*.

HISTORY OF ENGLAND, PRELIMINARY. By M. K. ELLIOTT, Honours in the Historical Tripos, Cambridge, and M. S. ELLIOTT, B.A., Cambridge Geography Diploma. With Illustrations. 2s. 9d.

"In addition to an outline of political events it tries to give some idea of social and constitutional development, and also to connect history with geography. It is clearly written and well illustrated."—*School World*.

HISTORY OF ENGLAND, SCHOOL. By M. E. CARTER, Honour School of Modern History, Oxford. 4s. 6d.

"Very careful judgment has been exercised in the selection of the matter, and a proper perspective maintained."—*Educational Times*.

LATIN COURSE, NEW JUNIOR. By J. V. THOMPSON, M.A., and LL. M. PENN, M.A. 4s. 6d.

"A very successful compromise between the old and the new methods—a combination of what is best in both."—*Journal of the Assistant Masters' Association*.

SHAKESPEARE, THE JUNIOR. "As You Like It," "Macbeth," "Merchant of Venice," "Much Ado About Nothing," "Tempest." Each 1s. 9d.

"To junior students taking up a detailed study of Shakespeare for the first time these editions will be invaluable."—*Schoolmaster*.

University Tutorial Press, Ltd., High Street, New Oxford Street, London, W.C.2.

call God and the immortality of soul—by exactly those rationalistic principles which the growing mind of an intelligent boy is apt to regard as sacrosanct. Unfortunately, not every classical schoolmaster is competent to give this instruction, and some textbook which shall expound the main development of Greek speculation up to Aristotle, in language sufficiently simple to be understood by schoolboys, is urgently required.* Meanwhile I append a scheme which shows in outline how such instruction may be imparted.

1. The earliest theological interpretation of the universe springs from the imagination of primitive savages, whom thunder and lightning induce to assume a Zeus. After a stage of animism this is developed by the poets (Herodotus mentions Hesiod and Homer) into an organized system of anthropomorphism.

2. The Ionian physicists (*i.e.* Thales, Anaximander and Anaximenes of Miletus, and Heraclitus of Ephesus), realizing that such an interpretation is largely the work of imagination, attempt a purely materialistic explanation of phenomena, but are unable to explain motion on such an hypothesis.

3. After the breakdown of materialistic monism comes a transitional stage represented by Pythagoras, Xenophanes, and the Eleatic Monists (Parmenides and Zeno), who regard our sense-presentations as illusion, and find reality in an underlying One, of which all we can say is that *It is*. The discrepancy between this Eleaticism and phenomena is emphasized by the speculations of Empedocles and Anaxagoras, and leads—in the atomism of Democritus and Leucippus—to an explanation of reality as a materialistic pluralism. But this atomistic explanation of reality is so different from our sense-presentations that philosophy is inevitably led to propound a theory of knowledge, which is developed in—

4. The Age of the Sophists, with an emphasis upon the subjective side of things.

5. Socrates criticizes subjectivity in the sphere of ethics, and his theory of conduct is fully developed by—

6. Plato, who evolves an idealistic interpretation of the universe, which gives a right significance to the subjective aspect of things without impairing the immutability of our moral judgments.

7. Aristotle follows with his teleological conception of the world.

It is, of course, impossible in a letter to do justice to this scheme, but those who are familiar with the subject will have no difficulty in showing how the breakdown of Ionian Monism, and the treatment, by Plato and Aristotle alike, of the soul as *ἀρχὴ κινήσεως* proves the existence of some spiritual force in the world, and that this spiritual force necessitates both the immortality of soul and the existence of what philosophers call a First Cause and theologians call God. These two facts can be proved rationally, and what I mean by speaking of the lack of religious instruction as the greatest defect of our educational system is simply that it makes no attempt to give any rationalistic instruction on these two fundamental points of all religious speculation.

R. B. APPLETON.

THE SUPERANNUATION ACT.

To the Editors of *The Journal of Education and School World*.

SIRS,—There must be several masters and mistresses in English secondary schools whose past service has included work in schools in Ireland. Apparently service in Great Britain is alone to count towards superannuation. I have communicated with the Board of Education, asking whether service in Ireland will count, and have received a reply that stress of work prevents any direct answer to my question, but that I am at liberty to include my Belfast service in my 10 Pen. Form, and that they will allow it or disallow it, as they think fit, or words to that effect.

This decision not to make a decision is, to my mind, most unfortunate, and I should be glad if any teacher interested in the question of service outside England, Wales, and Scotland, counting or not towards superannuation, would communicate either with Dr. J. W. Bearder, The Grammar School, Northallerton, or with myself.

WALTER HARRIS.

Longton High School, Stoke-on-Trent.

July 8, 1919.

THE COMPILATION OF STATISTICS.

To the Editors of *The Journal of Education and School World*.

SIRS,—1. It is a matter of common knowledge to all who have had occasion to use official statistics, whether published or departmental, that the national and imperial equipment for obtaining and

publishing statistical data is very imperfect in its scope and inadequate in its machinery.

2. Further, the efforts made are departmental, are under no common controlling or directing authority, and suffer very gravely from lack of co-ordination.

3. There is no need to adduce proofs of these statements, nor to enumerate the various efforts, fruitless in the main, which have hitherto been made to remedy these defects.

4. The Council of the Royal Statistical Society have appointed a Special Committee to deal with the subject, in the belief that the time is now ripe for a new movement in the direction of reform, and that the consciousness of the existing defects is present to the minds of His Majesty's Ministers, Members of Parliament, and Civil Servants, as well as to others interested in statistics.

5. It is proposed to petition His Majesty's Government to set up a Parliamentary Committee to examine the whole question of the collection and presentation of public statistics, and to report on means of improvement. It is believed that this method of procedure is more likely to be effective than the pressing of specific proposals on His Majesty's Ministers.

6. The officers of local government and other public bodies, as well as of scientific societies, are being invited to bring the matter at once before their Councils. Moreover, publicists and others who are known to be interested are being approached directly.

7. We ask the courtesy of your columns to lend support to this movement, and we invite your readers to help with their influence and signatures.

8. The Council will be glad if all who are disposed to sign such a petition would communicate with the Secretary, Official Statistics Committee, Royal Statistical Society, 9 Adelphi Terrace, W.C.2. A copy of the petition will then in due course be sent to them for signature.—I am, Sirs, your obedient servant,

GEOFFREY DRAGE,

Chairman, Official Statistics Committee.

Royal Statistical Society,

9 Adelphi Terrace, W.C.2.

(Continued on page 528.)

EMPIRE STUDY.

FACILITIES OFFERED TO EDUCATIONALISTS BY THE VICTORIA LEAGUE.

The aim of the Victoria League is to promote mutual understanding, help, and intercourse between all citizens of the British Empire, and to provide an organization through which members of that Empire may come into personal touch with one another, and obtain the understanding which comes of mutual service. The Victoria League is outside all party politics, and comprises men and women of every shade of political opinion, who work together to further its ends.

The Education Committee of the Victoria League aims at doing specialized educational work. For an annual affiliation fee of 5/-, schools may obtain the loan of lantern slides, with lecture notes, of stereographs and stereographic pictures, and of collections of specimens of products and manufacture. Another advantage is the use of a good lending library of books, dealing with the history and geography of the Empire. Correspondence links with schools overseas are also arranged.

Full particulars may be obtained from the Secretary of the Victoria League, King's Court, 48 The Broadway, Westminster, S.W.1.

DUSTLESS and HYGIENIC ROOMS

USE In SCHOOLS, LABORATORIES, &c.
The British Made and Owned

FLORIGENE

(A Regd. Name suggested by FLOOR-HYGIENE)

EARLY in the SUMMER VACATION
for best results.

"Florigene" has been continuously used for many years on **Wood, Concrete, and Stone Floors** of every description, also on **Linoleum and Cork Matting** in Government and Municipal Buildings, and in all kinds of Schools, and other Institutions in the United Kingdom and Colonies.

"Florigene" costs little, is easily applied by unskilled, and saves time and labour.

It is **IMPORTANT TO NOTE** that

ONE APPLICATION of "Florigene" **ALLAYS** THE DUST and DIRT for 2 to 12 months, according to traffic, not only during each sweeping (without Sprinkling of any kind) but also throughout all the intervening periods — which is of greater hygienic importance.

These sanitary, labour-saving, and economic advantages are **NOT** attained by sweeping-powders or any other method.

Not sticky—the ordinary daily dry sweeping alone required—Scrubbing being optional.

"Florigene" is an aid to the prevention of throat and other diseases, has been awarded the **MEDAL** of the **ROYAL SANITARY INSTITUTE**, and is strongly recommended by Medical and other expert authorities.

A Grammar School Head Master writes:—

"We have used your 'FLORIGENE' for several years in this School, and we have found it excellent in keeping down dust, which is now never to be seen anywhere. I believe the health of this School has been better since. The air is certainly more pleasant to breathe when movements are going on; there is also a great saving of labour in cleaning."

Numerous other Testimonials can be produced.

Half Column [$\frac{1}{2}$ page]	1 15 0	One-Eighth Page	... 0 17 6
Per Inch in Column, 8/-.			

SCHOOL ANNOUNCEMENTS—

Scholarships, Official Notices, School Transfers, Partnerships, &c.—
6d. per line; minimum charge, 5s.

Posts Wanted or Vacant.—30 words for 2s.; each 10 words after, 6d.
prepaid rate.

Lectures, Classes, Non-Resident Posts, &c.—48 words for 3s.; each
8 words after, 6d.; *prepaid rate.*

An extra fee of ONE SHILLING is charged on advertisements with OFFICE ADDRESS.

If a receipt is required for an advertisement under 10s., a post card or a stamped envelope must be enclosed.

[Advertisers are reminded that "Letters addressed to INITIALS or to FICTITIOUS NAMES, or to a CHRISTIAN NAME without a SURNAME," at Post Offices are not taken in, but are sent at once to the Returned Letter Office.]

All Letters respecting Advertisements and Subscriptions should be addressed—

MR. WILLIAM RICE,

3 LUDGATE BROADWAY, LONDON, E.C.4:

to whom all remittances should be made payable. Orders and Cheques should be crossed, "The London Joint City and Midland Bank, Ludgate Branch." *Postage stamps can only be received at the rate of thirteen to the shilling.*

Notice must be given of all remittances through the Post Office from abroad, stating full name and address of the sender; and all Foreign Money Orders must be crossed for payment through a Bank.

Date of publication of next issue will be found at top left-hand corner of front page.

LONDON: MR. WILLIAM RICE, 3 LUDGATE BROADWAY, E.C.4.

THE NEW GERMANY.

By Prof. L. W. LYDE.

THE new Germany is new only in area and outline, not in the character and conduct of its people; and the geographical aspects of the Treaty must—more is the pity—be studied in the light of Froissart's bit of gossip to Queen Philippa: "If we take a French knight prisoner, we send him home for his ransom; but, if we take a German knight, we keep him till his ransom comes."

The Treaty marks the end of one epoch, begun after Waterloo, during which the world has been industrialized—to its exceeding discomfort, and towards the end of which (1910) Britain was ousted from the first place in the iron industry of the Old World by Germany, through the use of cheap, unorganized, foreign labour, mainly Slav and Italian. This marked the triumph of a mechanical industrialism, in which the individual was nothing, and a State in the tribal stage of development—with a tribal deity of its own and other obsolete monopolies—was placed above the common spirit of Man.

It marks also the beginning of another epoch, in which a number of vital truths are going to be realized about that common spirit of Man—to the confusion of international, *i.e.* anti-national, finance. The most vital is the biological truth that survival is won only by capacity for variation to suit environment, abstract and concrete. On an earth of infinite variety it is quite futile to try to impose uniforms and uniformity, and the attempt is a crime against the *genius loci*. To-day the victorious reaction against this criminal folly has embodied in our Treaty a belief in the individual and a defence of small peoples, in whom the rise of national sentiment, based on the spread of education, is of democratic, not dynastic, origin. How far have we removed from Central Europe "the means to do ill deeds"? In answering the question, it is im-

possible to dissociate the various aspects of geography, especially to dissociate the political from the economic.

Historically, the frontier of the "occupied territory" in the west takes us straight back to the Roman Empire when facing the barbarian inroads; the special treatment of the Sarre basin reminds us of the Treaty of Verdun (843 A.D.), with its suggestive name; the whole site of the Moravo-Bohemian unit and the northern portion of Poland east of the Vistula—if the plebiscite is not vitiated by tactics similar to Bismarck's in Schleswig during 1864—will be exactly the same as 800 years ago; and France is the France of 1740.

Politically, the plebiscite areas present a real crux, for it is impossible to understand the exact principle or intention underlying either the application of the particular method of self-determination or the differentiation between the League of Nations, entrusted with Danzig, and the Allied and Associated Powers, entrusted with the Memel enclave. In the whole of the Malmédy district, over four-fifths of Upper Silesia, three-fourths of Schleswig, and two-thirds of the Masurian lakeland, a plebiscite is imposed where no geographer has any serious doubts as to the racial type; but in Schleswig, Silesia, and Masuria plebiscites are *not* imposed upon adjoining areas where there is serious doubt. This is greatly to be regretted, as it gives an impression of dishonesty in the application of the principle, and will certainly mislead those who have no knowledge of the local conditions. After the treachery of 1864, the purely Danish part of Schleswig, at all events, might have been spared a second plebiscite; and the Report of the Polish Commission is not a document which deserved to be ignored.

Otherwise, the political aspects of the changes are understandable and defensible—at all events, where no vast industrial interests were at stake. For instance, the western frontier of Poland as far south as Lorzindorf, *i.e.* the outpost of the coalfield, follows with great accuracy the actual limit of Polish nationality. The political aspect here is essentially politico-economic, and international finance is involved, which makes the issue exceedingly doubtful; but strategically, in the interests of European peace, it was most desirable to cut Germany off in the east as well as in the west—without doubt or delay or any opportunity for intrigue—from such "means to do ill deeds" as are hidden in the coal- and metal-fields of Upper Silesia.

At the same time, Germany has lost a considerable amount of territory, especially in the north-east and the south-west. In the north-east, where the territorial loss is greatest, the real loss is of man-power and of easy access to the Baltic Provinces of "Russia," where the German domination—feudal and economic—has been "hampered," according to German authorities, by the paucity of Germans (6 per cent.) in the local population. In the south-west the loss is of mineral wealth and of the "monopoly" of Rhine transport. In 1913 Germany got 21,000,000 out of a total of 28,500,000 tons of iron ore from Lorraine, and in 1916 the Sarre coalfield produced 17,000,000 tons of coal—a small loss (8 per cent.) to Germany, but a great gain (over 40 per cent.) to France. The whole of this iron-field, of the Sarre coal- and salt-fields, of the Pechelbronn oil-field, and of the Mülhausen potash-field (now probably the richest in the world) is lost! What will be the total effect on German agriculture and German capacity for manufacturing munitions of war?

Amongst the small peoples, Belgium obtains full and exclusive possession of the Moresnet lead and zinc field, where the old dual control gave such opportunities for intrigue and arrogance, and recovers provisionally the key to the strategic railway by which Germany invaded her in 1914. Luxemburg, from which Germany got 6,500,000 tons of iron ore in 1913, and in which Germans had secured practical control of the blast furnaces, ceases to be within the Zollverein, and recovers all the rights of exploitation which Germans had contrived to acquire. Denmark recovers provisionally—*pace* Mr. Lloyd George in the House of Commons on July 3—a considerable part of Schleswig, in which a purely Danish population has been terribly ill-treated in recent years. Bohemia obtains the Silesian salient in front of Troppau, by which Prussia

won command of the Moravian Gate. Poland, if international finance is not too strong, again becomes a nation—under difficulties.

Apart from territorial concessions, Germany has "to devote her economic resources immediately to the physical restoration of invaded areas." This includes restoration, or equivalent provision, of animals, machinery, raw materials, &c. She specifically agrees to provide for ten years at least 7,000,000 tons of coal to France, 8,000,000 to Belgium, and from 4,500,000 to 8,500,000 to Italy, and to make good—up to 20,000,000 tons for the first five years—any deficit in the output of the northern coal-fields of France (the source of two-thirds of the total French supply) compared with their output in 1913. The "ton for ton" principle applies nominally to merchant ships, trawlers, fishing-boats, and the river fleet (up to 20 per cent. of its strength in November, 1913). There is to be absolute freedom of navigation for the Allies, along with perfect equality of treatment, on all inland waterways of Germany, and the Elbe, the Oder, the Danube, and the Niemen (now a frontier river) are to be definitely internationalized under a European Commission representing non-riparian as well as riparian States; and no fortifications of any kind are to be allowed along the Baltic west of 16° E.—*i.e.* a good fifty miles east of the mouth of the Oder.

In the delimiting of the new boundaries good use is made of old administrative lines, of change in racial type, of rivers, which separate lands without separating peoples; in disputable areas there is right of appeal (to the League of Nations) and of optional removal, at the expense of the particular Government; and local needs, *e.g.* for coal in the Sarre basin, are carefully protected. Mannheim, the most important harbour in Germany that is purely a river port, is *not* made a bridge-head; and, if Germany carries out her Treaty obligations, Cologne is to be handed back at the end of five years.

The Treaty reads rather *unreal*. Perhaps the unreality is partly due to the politician's preference for words that are vague and may have more than one meaning; but the main reason is undoubtedly what may fairly be called the plebiscite "bluff," which itself is rather exaggerated by an unfortunate choice of language. In any case, "never" is a stupid word to use in a treaty, especially when the authors hope to "ensure an early and complete discharge by Germany of all her obligations"; and any reference to "a Germany earnestly striving to exercise her full powers to repair the loss and damage done by her" surely needed to be supplemented by an emphatic assertion that the Allies had taken full notice of the fact that the war had been waged by Germany most ruthlessly in areas and against countries (*e.g.* Norway) from which her own industrial and commercial magnates experienced most competition in the critical years 1910–1914.

SCHOOL PUNISHMENTS.

By W. F. BUSHELL.

I.

IT is a common criticism among schoolmasters that when a new and inexperienced man arrives for his first term he receives little guidance in the matter of discipline. Discipline, he would say, is the foundation-stone of all good school work; it is the necessary accompaniment of all instruction and character training; school is an essentially autocratic society where discipline is regulated from above—a society which has but little voice in the framing of its laws; and he is called upon to hold an important position in inculcating that discipline and obedience on the part of his pupils. He has taken a degree in some subject, and is therefore presumed, even if untrained, to be competent to teach it; but not even the most optimistic supporter of the untrained can fairly urge that he has had, as a rule, any experience as a master in maintaining discipline. He has some recollection of being set punishments, in the dark ages

when he was at school, by irascible and over-wrought pedagogues. He has accepted punishments such as five hundred lines perhaps (for such atrocities still exist), as a law of fate, and might even resent their abolition as an outrage upon the customs and laws of school life. So one generation passes on to another not only the good, but also the evil side of punishment.

How, then, is he to learn? It would be outside my province to discuss the point in any detail here, but I cannot refrain from commenting on the fact that the conservative instinct which, at all events in some of our schools, has often opposed the appointment of trained men, has made little effort to enable junior men, when starting on their scholastic career, to visit other schools for the purpose of learning from some of the abler masters there—perhaps by sitting in their classrooms or perhaps by personal instruction. I think few of us could confess to having visited many schools in search of this classroom education, but great would be the inspiration every schoolmaster could have gained if he had listened to such a man as John Smith, of Harrow, or many another, conducting his class. However, I am digressing; but, before coming to the question of the forms of punishment which I am prepared to advocate, I want to discuss how far the need for punishment is getting greater or less, and how far modern methods have lessened the need.

It is now some years since there was started in Rome that great educational experiment on the mentally deficient by Mme Montessori, an experiment which was subsequently extended to infants of normal ability, and even later to older children; and perhaps we may date from that time the beginning of that great flood of literature, which has been poured out from the two points of view, sometimes called "The Primrose Path" and the "Mechanical Obedience Point of View" respectively.

The old theory in schools was more or less a theory of original sin, and I think, as far as boys are concerned, a number of the public still believe in it; this theory, as far as I understand it, lays down that the nature of children is really semi-evil; that their chief desire, or perhaps one of their chief desires, is to do wrong, and that it is only by perpetual punishment that this original sin can be removed. It is only necessary to read the life of some of the early nineteenth-century head masters to realize that this belief was formerly very general. On the other hand, the advocates of the Primrose Path, who demand the fullest liberty for the child, although they no doubt often go somewhat far, have a much finer conception of human nature.

Self-realization, as it is called, is very much in the air. It is said that the greater the liberty for the fullest development the less the need for punishment. Of course, it is in practical details that this theory seems to break down. If a class of twenty boys want to realize themselves by one pretending to be a special constable and another pretending to be an undertaker, and so on, the class system of our schools will be impossible. Herbert Spencer was one of the earlier and more authoritative advocates of this school, and reserves a good deal of his indignation for the parent, but does not wholly seem to grasp the practical difficulties in the way of what he urges. But idealists are generally in advance of their age, and long may it be so.

The theory of original sin in its relation to school life has, however, received its death blow, for it surely could hardly survive the criticism it met with in one of the greatest of all educational works, *What Is and What Might Be*, by Mr. Holmes, the poet-philosopher of the Board of Education. When we look back over the educational history of the last hundred years; when we read, to take example, of Dr. Keate, the flogging Head Master of Eton, who certainly believed in original sin, and read of the bad discipline which his very forcible methods apparently engendered, and when we compare it with the modern-school discipline, with the comparative rarity of severe punishment, we must be led irresistibly to the conclusion that ancient methods were wrong and that good discipline invariably is the concomitant of little punishment.

Punishment is preventive rather than punitive. It will be said that this is a mere platitude. I agree; but I hold that it is a platitude which is continually forgotten, and that we rarely think out whether the particular punishment we are setting at a particular moment will have the desired effect of preventing rather than punishing. There is an opinion still extant, an opinion which is rarely argued, but merely stated, that the "softness," so-called, of the present day, and consequent lack of punishment, will lead the schools and the nation to decay and ruin. We are told that moral rule leads to effeminacy and softness, that corporal punishment and the like will alone maintain those qualities which have made this Empire what it is, and that we are breeding a race doomed to failure. Do the advocates of this really disbelieve in self-control and in moral force? Do they really believe that the boy who learns to control his emotions will be a failure in after life? Do they really believe that courtesy and manners engender failure?

I would refer them to the age of chivalry for their answer. But it is certain that colleagues who should have known better have told me that they would like the boys to commit some illegality once a week—an illegality which, they say, shall certainly be punished, but an illegality which, according to them, will engender qualities of character which will be the pride of their countrymen. No doubt this is said without much thought, and I am entirely convinced that the modern rarity of severe punishment, caused by a gentler rule, is reaping its reward in producing a race capable of far more than ever their ancestors did; but, while punishment exists, as it must to some extent, we are led to consider the different forms it may assume and the methods by which we may be enabled best to deal with various offences as they arise.

Now I take it that, roughly speaking, offences at school can be divided into two classes, the "Routine Class" and the "Serious Class." By the Routine Class I mean those offences such as unpunctuality, forgetfulness, &c.; by the Serious Class, I mean the bigger things. The division is reasonable, though the seriousness of the offence obviously cannot be determined by the standard of morality which the twentieth century has evolved; for morality is progressive; the laws of Hammurabi, for instance, do not profess the same morality as the Decalogue; neither does the English legal system in this respect follow out the intricacies of the Priestly Code. And in the same way the youth and the adult have different standards. Smoking is forbidden to the former, and the breach of this rule is a serious offence, but for all that it is a practice which the twentieth century has wisely and widely adopted.

In the punishment of these two classes of offences there is, I think, this distinction: in the routine class of faults a boy is punished chiefly for his own sake, in the more serious class as much for the sake of others as his own.

In the latter case, then, it is vital that the punishment shall be effective. The old rule was that such offences could be dealt with only by corporal punishment. At many schools the doubtful privilege of dispensing it is in the hands of the head master only; and I call it a doubtful privilege, for, though I suppose it must exist for the case of certain boys when all other appeals have failed, I very much doubt its efficiency as a *common* means of correction, and I certainly think that the power of dispensing justice in this fashion should be in the hands of as few members of the staff as possible. Does it engender a boy's self-respect? Does it increase his respect for his master? These are questions which must be faced when we are considering it.

As to secondary punishments for what I have called routine faults. These are the punishments where I think imagination on the part of the master is most required, and where I think imagination is most often lacking; and here I will say that the golden rule is to have as little punishment as possible. For what is the ideal classroom? We have all known classrooms, ranging from those where awful terror kept us chained to our seat motionless for the whole

hour to those where scenes of hubbub and riot were of daily and usual occurrence. The model form, I take it, is that where a public spirit exists to ensure that a boy must not offend, because neither the form nor the master would like it. Is not continual punishment for little faults such as fidgeting, accidentally dropping a book, or similar breaches of a mechanical law a sign of weakness on the part of the master? And yet we have all known such things awarded a fixed punishment which was never relaxed. What would that subtle factor, the opinion of the Form, say to it? and the opinion of the Form is not a thing that a master should fail to study. Would they not recognize that the mechanical law of punishments is an acknowledgment of the weakness of human nature, that is, an acknowledgment by the master that he would fail in his discipline if he did not punish, and does not that perpetual nagging and punishment induce a feeling of surfeit on the part of the Form which may easily result in dislike of the work itself? The statement that is often made that boys dislike work is, I believe, quite untrue, but if ever in any isolated case it may be so, I believe it may be traced to the lack of form management exhibited by the master.

And take yet another point of view. If Jones is inattentive, whose fault is it? Of course, I know there is a school of thought which scoffs at the view that it is the master's fault, but it is quite certain that if the boy is interested he will certainly not be inattentive; and it is equally certain that it is possible to make even the driest subject interesting by proper preparation. I will go further, and say that I believe there is no better lesson for a master to take to heart than a conviction that if Jones is inattentive it is his (the master's) fault, and the sooner he mends his ways the better; but, whether this is true or not, I maintain most strongly that for the master to believe this and act accordingly will have the most beneficial and excellent effect on his teaching.

But what will actually happen, asks the critic, if Jones is unpunctual? I say you must make him punctual; you must arrange matters so that it is an incredible thing that Jones is unpunctual; so that to Jones it would be as difficult to be unpunctual as to commit a criminal offence. Punctuality, in short, must be a tradition, and traditions are rarely broken. Or, what is to happen if Jones continually forgets his books? I admit there may be cases where a naturally unpunctual or forgetful boy has to be educated in the matter of punctuality and memory. But I do not think that, because in these small offences you deal in one way with Jones, you must deal in the same way with Smith. The old custom of giving both Jones and Smith a hundred lines has, by the mercy of heaven, almost died out, and if you ask me what I should do in really necessary cases, I would answer that an attempt at imagination, coupled with a knowledge of Jones's character, would probably induce me to make Jones bring his pen (if he had forgotten it) at various stated times, or else find out all about pens from the *Encyclopædia Britannica* or some similar contrivance. But what I will not do is to make a fixed and immutable rule that Jones shall always in such cases write out a hundred lines, and also I will not in any circumstances give over the punishment to someone else by putting him into an extra drill or an extra school, run perhaps by the school sergeant or some other functionary.

(To be continued.)

HIGHER EDUCATION OF EX-SERVICE STUDENTS.—The Board of Education, who are responsible for the scheme for aiding ex-Service students who desire to pursue full-time courses of higher education at Universities and other recognized public educational institutions, are at present dealing with applications for financial assistance for such courses at the rate of over a hundred a day. So far, 2,239 definite awards have been announced. By a special arrangement the Board were able to pay an interim grant in 2,006 cases in which the applicants were in immediate need of financial assistance.

WHY ARE NOT MODERN LANGUAGES RESPECTED?

By G. F. BRIDGE.

IT is necessary first to explain in what sense it can be said that modern languages are not respected. For they are respected very much indeed up to a certain point—that is, as useful accomplishments for commercial and social life. But as elements in a liberal education they are little accounted of. They are not regarded as an instrument of the highest intellectual training, as the classics are. To examine the causes of this phenomenon is the object of this article.

The first reason usually assigned for the shadow which undoubtedly hangs over modern tongues is that they are easy. Put in this bald way, the assertion is no doubt ridiculous, seeing that it is a matter of everyday observation that to speak and write a foreign language well is one of the most difficult things in the world. But if the contention is that modern languages, as taught according to the now prevailing methods, do not require such a strenuous intellectual effort as classics and mathematics, and that success does not depend so entirely on that kind of effort, then the charge merits examination. To begin at the beginning: the attainment of a good accent depends primarily on physical endowments—namely, good speech organs and a quick ear; next, on a good memory for sounds; and lastly, on a capacity for imitation. Success in speaking a foreign tongue, again, is no proof of intellectual ability. A chatterbox has a better chance than a philosopher of getting a First, and Alcides may easily be beaten by his page. Writing no doubt requires more thought than speech, but the composition that is most popular in schools—that is, free composition—is little more than talk transferred to paper, and does not need for its accomplishment much more than a special type of memory—namely, the power of retaining vocabulary and phraseology.

It will be urged, however, that translation, at all events, calls the thinking powers into play, inasmuch as the translator has a set of definite problems placed before him, in the solution of which he must use his wits as well as his memory. This is perfectly true, and there seems no reason why translation into a foreign tongue should not be as valuable an intellectual exercise and as instructive a study in the exact meaning and force of language as translation into Latin or Greek. Unfortunately, however, the trend of opinion amongst modern language teachers is against translation, and the aim of many of the ablest of them is to reduce it to the narrowest possible limits. Even the Government Committee on Modern Languages, who in their report maintain an attitude of commendable impartiality on questions of method, say: "Translation should be practised in schools only so far as it is necessary." Again, if the examination of language is of any value at all as a training in exactness of thought, the study of the syntax of a modern tongue, and its synonyms and vocabulary generally, ought to be a valuable instrument of discipline for young people from fourteen to eighteen; and such a study would certainly call out intellectual effort. But here also modern methods are against us; language teachers strenuously oppose grammar papers in examinations; and pupils who will never have to face direct interrogatories on syntax will not find it necessary to learn more than the rudiments of it. It would really seem, then, that there is some substance in the contention that the study of modern languages does not demand that severe intellectual effort and hard thinking that some other subjects require.

To avoid misunderstanding, let me add here that there is no intention in this article of criticizing those methods which have done so much to vivify language teaching, and the general principles of which are, with much variation of detail, widely accepted. So far as the acquirement of a foreign tongue is concerned, those methods seem to me sound; what is discussed in this paper is the systematic study of language, which is quite another thing.

But intellectual discipline is not the sole end of education;

in these days, indeed, the tendency is to push it into the background, the classicists, for instance, relying more and more upon the argument of the supreme value of Greek and Latin literature to the modern man. Turn we then to literature. Here the difference between the classical side and the modern side is striking. Every Eton boy, we have been told, who has any aptitude at all for linguistics is made to learn Greek in order that he may have the chance of reading a little Homer, amongst other books, but the teacher of French has no Homer on his shelf, and no Shakespeare. France has produced no poetic mind of the first quality. French has nothing to offer the boy of keen intelligence but Racine and Corneille, who have never appealed to Englishmen, and Molière, who was no doubt the cleverest writer of social comedy that ever lived; but you really cannot weigh social comedy as an educative influence in the balance against the heroic epic. Add some of the poetry of Victor Hugo and Alfred de Vigny and gleanings from a few other writers, and you have nearly exhausted the French poetry that is suitable for boys and girls of sixteen and upwards. The real greatness of French literature, in fact, lies much more in its prose than in its verse, and there is no more important question for modern language teachers at this moment than what French prose ought to be read in the highest forms of schools.

The French historians happily are more appreciated than they used to be, and there are one or two schools in which history is made the backbone of the reading in the upper classes. This movement will, no doubt, be stimulated by the Board of Education's regulations for Advanced Courses, which demand the study of history as well as literature. To the French thinkers we do not appear to have attained yet in schools, nor very much at the Universities. Yet no humanistic course can be considered adequate which does not introduce the student to some of the best thought on the greatest subjects. To bring young men and women into contact with great minds ought to be a fundamental aim in all humanistic study. If modern studies do not do that, then the student will have missed the best thing that is to be got out of a liberal education. But a review of the books read at school and college does not suggest that the great minds of the modern age receive much attention. The list of the French authors, read for the Honours degree at a northern University a few years back, for instance, comprises Corneille, Molière, Boileau, Racine, Voltaire (a play), de Vigny (a play), Hugo, and extracts from Rousseau. The classical students of the same University were reading in that same year Plato, Thucydides, and Demosthenes, in addition to poets and dramatists. The weakness of the studies in French is apparent. They lack virility and breadth. The authors are chosen apparently for their fine literary quality, not for their strength of brain or originality of mind. They belong to the literature of the drawing-room rather than the literature of the study. The course consists almost wholly of imaginative literature. Of great thought on great subjects there is next to nothing. It seems designed to produce pure scholars rather than broad-minded and thoughtful citizens of the world. *Non vitae, sed scholae discimus* might be its motto. Indeed, this legend would be literally true, for the great majority of those who take the modern language schools at the Universities do so with a view to teaching them. The number at University College, London, is stated to be 80 per cent. (see "Report on Training," issued by the Modern Language Association). This fact is of itself sufficient proof that these schools are not in a healthy condition, and do not appeal as they should to young men and women of ability.

In this connexion one cannot help referring to the fate of de Tocqueville, both in England and France, of his "*La Démocratie en Amérique*"—the book which John Stuart Mill considered the greatest work on democracy written up to his day. M. Lanson, in his "*History of French Literature*," says: "*Cet admirable ouvrage n'est pas aussi lu chez nous qu'il devrait l'être: et la raison en est qu'il y a trop de pensée pour le commun des lecteurs: jamais de saillies, rien pour l'amusement ni le délassement: c'est un enchaînement austère et vigoureux de faits, de jugements, de prévisions.*" Here is

revealed to us one of the weaknesses of the French: they expect their writers, whatever subject they handle, to be bright and sparkling; unadorned thought, however original or convincing, they can scarcely tolerate. It is a weakness which our schools of French appear to have taken over from the French. Yet surely a student of the humanities should learn to read what is solid and dry as well as what is brilliant and entertaining, and any course of study which does not compel him to do so will hardly escape flabbiness and dilettantism.

If young men and women ought to study the best modern thought on the greatest subjects, so they ought to read the greatest modern poetry—the greatest, that is, regard being had to the four points of greatness of subject, elevation of feeling, solidity of thought, and excellence of form and diction. Now, discussions about the merits of national literature are usually mere waste of time, because the appreciation of imaginative literature is a matter of intellectual temperament and personal taste. But which poet of the many who have written during the last three centuries has had the widest influence outside his own country and at the same time made the deepest impression upon minds of the first quality is a question of fact, and not of taste. That poet is Goethe. If, therefore, we really believe in the influence of great poetry on young people, we should wish them to read Goethe, especially when in the language in which Goethe wrote there is a body of drama—that of Lessing, Schiller, Kleist, Hebbel, and others—whose richness, variety, and depth of thought and feeling give it a high value.

German poetry, in fact, supplies exactly that element which we miss in French literature, and a combination of the best French prose with the finest German poetry and drama would furnish an education which might safely challenge comparison with the classical curriculum. But, unhappily, there is a considerable body of modern language students and teachers who are ready to throw German overboard because the Germans have in recent years been the troublemakers of the world. It would be as reasonable to throw French overboard because a hundred years ago the French were the troublemakers of the world; for what is a hundred years in the life of the race? This eager haste to jettison German can scarcely have failed to excite prejudice against modern studies, because it suggests that there is not in modern literature anything of supreme or everlasting value, that one literature will do just as well as another, and that it does not matter much whether boys and girls read Goethe or Gorky, Milton or Maupassant. So long as this spirit prevails, how can modern language teachers expect their subject to be put on a level with the classics, the value of which, by universal consent, never has been, and never can be, diminished by any event that has happened or will ever happen, or affected by all the weakness of the Greeks and all the cruelty and wickedness of the Romans?

Decidedly the classics have many advantages over modern languages. One is that the Greeks and Romans did not write novels, and that few of their comedies have survived. Another is that the amount of valuable Greek and Roman literature which has come down to us is so small that classical students usually read even the drier authors. The modernist may avoid de Tocqueville, but the classicist does not avoid Aristotle, though assuredly he contains as few witticisms and furnishes as little relaxation or amusement as does his fellow-thinker. A third point of superiority is that the classical scholarship of this country is a British product, and has been such for the last four centuries. It presents itself to young men and women as something national, and not as an importation from abroad. But perhaps the greatest of all the advantages the classics have is that the Greeks and Romans are all dead, and therefore we can say what we like about them. No subject can expect to have a very high place in education if teachers—and others—cannot speak the truth and the whole truth about it.

Now in recent years we have been able to see foreign nations only through an atmosphere of falsehood, and the atmosphere is not yet dispelled. If a stranger from Mars were to ask us how best to obtain a knowledge of the peoples

of Europe, the first advice we should have to give him would be: Read nothing that has been written about them during the last five years, and very little that has been written this century; and take with many grains of salt anything said about any of them on a public platform. Sobriety and impartiality on these subjects have perhaps been impossible since 1914, and those who have been able to maintain silence should account themselves fortunate. But surely the time has come when truth may be drawn up again from the bottom of her well. At all events, we may rest assured that unless modern language professors, masters and mistresses, teach the truth, and the whole truth, about foreign nations, whether they are, or have been, friends, enemies, or neutrals, and unless they teach in the spirit of strict impartiality, their subject will never command respect. If modern studies are made a propaganda in favour of particular nations, then those studies are doomed for ever to occupy a humble place in the esteem of the best educated classes.

REVIEWS AND MINOR NOTICES.

THE PHILOSOPHY OF EDUCATION.

The Intuitive Basis of Knowledge. By N. O. LOSSKY.
(16s. net. Macmillan.)

We have to thank Mrs. N. Duddington for this translation of the work of the Professor of Philosophy at the University of Petrograd. He calls it a "propædæutic epistemology," takes great care to keep to his subject, and is indeed continually referring difficulties to the metaphysician, the psychologist, and other responsible persons. Epistemology is enough for him. His main thesis is that knowledge can never be satisfactorily explained so long as the self is isolated from the not-self. Knowledge is a reality: our knowledge of the outer world is a fact, and the sensible epistemologist had better accept it as such, and set about establishing his theories accordingly. Prof. Lossky maintains that knowledge is essentially perception, and that "things in themselves" lose their intimidating power, since they can be directly apprehended. Intuition in his sense means "the immediate knowledge of the world of not-self." He does not object to his form of intuitionism being described as empirical, so long as it is labelled "universalistic." Since knowledge "is a process of differentiating the real world by means of comparison," and since knowledge can be realized only in acts of judging, "a judgment is the result of a single act of differentiating an object by means of comparison."

In working out the implications of these definitions, Prof. Lossky loyally enters upon the thorough but somewhat dreary examination of all previous philosophers that is familiar to the unfortunate readers of such treatises. He makes out an excellent case, and supplies much controversial material for his critics, and for the readers of this journal he provides some matter of professional interest. On page 233 he has some excellent remarks about the effect of terms on the minds of different people, and teachers should read what he has to say about *words* on page 287. The whole of the chapter on "The Universal and the Individual" is of value to the philosophical-minded teacher. His thesis that knowledge does not begin with the particular nor with the most universal, but with the "medium universal," has possibilities that every wise teacher will appreciate.

A good deal of the loose writing in school-method books on the subject of abstraction and generalization could not have come into existence if the writers had read such a chapter as this. Even our vigorous young psychologists of to-day will find something to their advantage in pondering the statement, "An interest in the individual and the capacity of apprehending it is a fine flower of culture." Again, on page 323, we have a passage (supported by a quotation from Fongsegrive) that throws light on that intuitional "flash" about which we

are hearing a good deal from our more advanced educationists. The "single instance" gets its proper place, and on page 351 we have an unexpectedly practical application of the principle of reasoning from consequent to ground, a process that every teacher should cultivate. Educationally, the book is thoroughly sound, and on the philosophical side it has the guarantee of a favourable introduction written by Prof. Dawes Hicks.

THE STORY OF FRANCE.

History of Modern France, 1815-1913. By EMILE BOURGEOIS. Two Vols. (not sold separately). (21s. net. Cambridge University Press.)

Nearly a quarter of a century ago the Cambridge University Press announced the prospective publication in their "Historical Series" of a History of Modern France by Mr. W. A. J. Archbold. For some reason or other that work never appeared, and consequently the story of France begun by Prof. Grant (1483-1789), and continued by Dr. Holland Rose (1789-1815), has remained incomplete until to-day. The delay is not to be regretted, for it has enabled the editor to entrust the task of writing the history of the recent critical era to one of the greatest of living authorities upon it, and to one of the most skilful of French literary men. The result is a work not only of great weight and learning, but also of no little charm. No doubt it has suffered to some extent in translation; a number of awkward expressions are obviously due to a too conscientious effort to attain to a strictly literal rendering. But on the whole the English version reads easily. In the work itself there is, perhaps, a certain lack of proportion. Of the 850 pages, only 170 are assigned to the forty-two years of the Third Republic, and in order to have a fuller treatment of this period we would willingly have sacrificed much of the familiar detail concerning the delinquencies of the restored Bourbons or the Third Napoleon. We should, however, have been sorry to curtail the story of the bourgeois monarchy of Louis Philippe. It is told with knowledge, ability, and sympathy; and it will materially assist in that rehabilitation of the memory of the Orleanist dynasty which has already been commenced by the devoted M. Cochin.

M. Bourgeois by no means confines his attention to the political history of his country. On the contrary, some of his freshest and most interesting sections deal with the literature and art of the nineteenth century, and with the social and economic developments of modern France.

Although M. Bourgeois has clear and unmistakable opinions to express on all the topics that come under his review, e.g. the Dreyfus case and the recent anti-ecclesiastical legislation of the Republic, nevertheless he maintains an admirable fairness of judgment and moderation of statement. This work must long remain the most authoritative handbook on its subject.

CLASSICS.

Latin Epigraphy. An Introduction to the Study of Latin Inscriptions. By Sir JOHN SANDYS. With Fifty Illustrations. (12s. 6d. net. Cambridge University Press.)

The publication of this book is something of an event in the annals of British scholarship, for it is the first of its kind to be published in England. Thanks to Sir John Sandys, English scholars can no longer be reproached with having made no contribution to this branch of classical learning, and all English students (who have previously only had Prof. Egbert's manual—published in the United States—in their own language) will be grateful for this most helpful introduction to a somewhat recondite subject. Those who are familiar with Dr. Sandys's chapter on Latin Epigraphy in his "Companion to Latin Studies," will appreciate his competence to deal with the subject in a masterly way. In the present volume, after two introductory chapters dealing with Latin inscriptions in classical authors and modern collections of Latin inscriptions, he goes to the heart of his subject in a most useful chapter on the archaic Latin alphabet. In the body of the work inscriptions are dealt with under the classification of Epitaphs, Dedicatory Inscriptions, Honorary Inscriptions, and inscriptions on public works, portable objects, &c. Then follows a chapter on Language and Style, and also—a most helpful one—on the Restoration and Criticism of Inscriptions. Several appendixes treat of Roman

names, officials, and emperors, and there is a collection of six famous historical inscriptions, including the Monumentum Ancyranum, and a full list of abbreviations. We are glad to note that Sir John Sandys holds that his subject is best treated as a minor branch of classical archaeology, the importance of which as a means of education is receiving an ever-increasing recognition. Perhaps also the study of epigraphy, with the exercise of the scientific powers which it undoubtedly entails, will do something to break down the false distinction between classical and scientific learning.

EDUCATION.

- (1) *The Measurement of Intelligence.* By L. M. TERMAN. (7s. 6d. net. Harrap.) (2) *Test Material for the Measurement of Intelligence.* By L. M. TERMAN. (3s. 6d. net. Harrap.)

The Binet-Simon tests of children's intelligence, designed for judging native ability apart from differences of training, were first published in 1905, and were revised in 1908 and 1911. They have attracted much attention among cultivators of scientific child study, and have naturally been subjected to a good deal of criticism by subsequent investigators. Among these Prof. Terman, of Leland Stanford Junior University, takes a foremost place, and in the present volume, with its accompaniment of "Test Material," we have a full exposition of the method and its possibilities, including guidance for the use of the "Stanford revision and extension" of the Binet-Simon scale. Prof. J. J. Findlay writes a sensible introduction, in the course of which he points out that, as the great majority of those concerned with education in this country have hitherto been unable to secure a ready means of understanding the method or of training themselves in its procedure, Prof. Terman's book is likely to render an excellent service both to teachers and to school medical officers. Of course, the eternal question arises as between those who would continue to rely upon intuitive estimates of children's abilities and those who believe in scientific procedure; but, provided the investigator is aware that his method, though extremely important, does not pretend to probe the deepest recesses of human nature, nothing but good can surely come of his efforts. A line of inquiry which lessens the danger of trying to fit round pegs into square holes deserves every encouragement.

The English Public School: a Symposium.

Edited by J. HOWARD WHITEHOUSE. (5s. net. Grant Richards.)

Whatever one may think of Mr. Waugh's "Loom of Youth," it must be admitted that it has given rise to much discussion of public schools, and incidentally of the older Universities. This booklet contains an article on Mr. Waugh's book which was published in the *Nation* last year, together with a discussion which followed in the columns of our contemporary and a quantity of additional matter. The symposium is interesting enough, and may have some good results. Already one of its suggestions is to be acted upon by the Government, for the announcement has already been made of a Royal Commission to consider the position and resources of the old Universities which so largely control not only the curriculum but even other aspects of the life and work at the public schools. After reading the many and divergent opinions of public schools here brought together, we hesitate to express yet one more, but it seems clear that, so long as our responsible authorities attach more importance to "public school form" than to actual worth and efficiency, the public schools with their long waiting lists will not think it worth while to consider outside criticism seriously.

Psychology and Parenthood. By H. ADDINGTON BRUCE.

(7s. 6d. net. Heinemann.)

As the title indicates, this book is meant primarily for parents, and it is certainly well that the definite findings of modern psychology should be placed, by means of popular presentation, within the reach of parents, though what is good for them is good for teachers also. One of the great questions of the hour is that of the relative effects of heredity and environment upon the child's development; in other words, whether we are to look to eugenics or to education and training, taken in a broad sense, as the more hopeful path of progress for the race. From the outset Mr. Bruce leaves us in no doubt that in his view—and we quite agree with him—we have to look chiefly to the removal of the hampering influences of unfavourable environment and of physical maladjustment, and to the institution of educational reforms. But some of the details of his proposed reforms give us pause. All the way through his chapters on "The Importance of Environment," "Suggestion in Education," "The Secret of Genius," and "Intensive Child Culture," he favours the beginning of formal education long before school age is reached, and he contends that even genius depends upon cultivating an infinite capacity for taking pains rather than upon exceptional mental gifts. We should be more impressed by the notorious example of Karl Witte if we thought that a German professor was the ideal man; and we have sufficient

faith in innate capacity not to regard the examples of J. S. Mill and Lord Kelvin, or any other "folio editions of mankind," as proving anything one way or the other. Still, it is at least interesting to have the opposite side of the case strongly presented, as it is here. The chapters on Laziness, Laughter, Hysteria in Childhood, and the Menace of Fear are all useful and timely. Stress is rightly laid, we believe, upon the subconscious remnants of early experiences which are left to help make or mar success in later life.

ENGLISH.

The Story of Dr. Johnson. By S. C. ROBERTS.

(4s. 6d. Cambridge University Press.)

It is remarkable that the plan followed in this volume has not, so far as we know, recommended itself to publishers before. The book professes to be an introduction to Boswell; but it is much more. It is a delightful introduction to Johnson's times. Its format and its illustrations induce reading, and there is a good deal here that we cannot get even in the larger volumes of the D.N.B. It is to be hoped that this is the first of a series of such books, for in these days enough is known about writers to supply text and illustration.

Mr. J. J. ROBINSON's little collection of *Songs of Search and Service* (Erskine Macdonald, 3s. 6d. net) is pleasantly distinguished among volumes of minor verse by the impress of the writer's personality. Written at various times between 1889 and 1918, the poems constitute a genuine bit of autobiography. Even where the phrases and images recall greater poets, as they frequently do, the songs seem to be the expression of real experiences and convictions. So, in spite of some imperfections of technique, they have that human appeal in which minor verse is too often lacking. The epigrams are the least successful; the writer is of too kindly a nature to have barbed epigrams in his quiver. In the later poems, written on the threshold of old age, courage, hopefulness, and loyalty to service are the dominant notes, as in the sonnet entitled "Neering a Goal: Thanksgiving."

"Then, as the dark strides on wherein I greet
The sudden trumpet blown to call me far,
I may go forward, that dread gift to meet,
Which rounds Hope's signal gleams into a star.
The Vast from which Life's gift and beauty spring
Must bring me nearer to my source and King."

Composition and Literature. By EUGENE R. MUSGROVE.

(6s. net. Longmans.)

It is always refreshing to find a subject treated from a new point entirely different from one's own, and, if only for this reason, this work is worth reading. Not only is the method new—that of the Head of the English Department of a New Jersey High School—it is stimulating. Before formal grammar is touched upon, the principles of composition (unity, coherence, and emphasis) are driven home; then, and then only, are grammar and analysis considered in so far as they are necessary for the construction of a correct sentence. If such statements as "Irony is sarcasm" shock some of our English grammarians, the section on Figures of Speech is none the less excellently written. When dealing with oral English, the importance of which as a training in judgment and alertness cannot be over-estimated, the author has much to teach us. The book concludes with a handy summary of English and American literature. The type is large, the paper good, and the general get-up all that can be desired. We say unhesitatingly, "Get it."

FRENCH.

- (1) *Croisilles.* Edited by B. L. TEMPLETON. (2) *La Belle aux Cheveux d'Or.* Edited by E. CREAGH KITTSON. (1s. net each. Constable.)

These are the first volumes of the "Organized French Series," designed by Hardress O'Grady, whose untimely death is a source of sorrow to all modern language teachers. It must be confessed that there is nothing in the form of these readers that can be regarded as strikingly novel, and in one respect there is, we believe, a fault in method. It should be possible to answer most of the vocabulary exercises from the text—e.g. if "réfléchir" occurs in the text, the exercise should ask for the verb connected with "la réflexion," not for the noun connected with "réfléchir." Miss Templeton and Mr. Kittson are both accomplished exponents of the reform method, and the workmanship of these little books is excellent. The books are very well printed, and the misprints are few and trifling.

Paris pour Tous. Maps by J. G. BARTHOLOMEW. Text by EDWARD JEFFORD. (2s. 6d. Dent.)

This little guide to Paris will commend itself to the traveller on account of its excellent maps and its concise and well arranged text, and it also deserves a place in our schools. Paris occupies so important a place in the history and literature of France that a book

like this is indispensable in the school reference library. In addition to detailed maps of present-day Paris there are others showing the gradual growth of the city and its appearance at the time of the Revolution. There is a short history of Paris and a series of "promenades" taking in most of the noteworthy buildings, and supplying brief descriptions of these. There are also sections dealing with such subjects as "la vie de Paris," "moyens de transport," "les lieux d'amusement," "hôtels," "églises, temples et synagogues," and an index to the maps. The book may be welcomed as a very useful addition to the "Collection Gallia."

HISTORY.

Germany, 1815-1890. Vol. III: 1871-1890. By Sir A. W. WARD. (12s. 6d. net. Cambridge University Press.)

The volume before us brings to a close the valuable history of the making of the German Empire which the Master of Peterhouse undertook to write for the Cambridge University Press. Originally intended to fall within the compass of a single volume, it has expanded until it is with difficulty compressed within the limits of three. It contains masses of information, derived from first-rate sources, which are nowhere else available, and it is written with an impartiality and lofty dignity that impress it with unquestionable authority. In the present volume the detailed narrative proceeds from the founding of the Empire till the fall of Bismarck. Two supplementary chapters, however, are added, which will be found to be the most generally interesting in the book. The first of these treats of German social and intellectual life, 1850 to 1900; the second traces in outline the course of events from 1890 to 1907. The latter year, in Sir A. W. Ward's opinion, is the one in which "a period in German history begins that must be regarded as preliminary to the World War, and as in more senses than one preparatory of it."

The Principles of Citizenship. By Sir HENRY JONES. (3s. 6d. net. Macmillan.)

This book, though small and inexpensive, is of great importance and immense value at the present day. It deals with those fundamental principles of ethics and politics which are challenged and denied by both Prussian Militarists and Russian Bolsheviks. It discusses, with the characteristic ability, clarity, and large liberality of its author, the problems of the nature of the State, its proper sphere and functions, its claim upon the service of its subjects, and its duties in respect of them. It is written in a fine spirit and in an attractive style. There are few books which can be commended more unreservedly to the careful consideration of the study circles of the Workers' Educational Association, the Adult Schools Union, and similar organizations that are concerned in the training of citizens.

Democratic Ideals and Reality. By H. J. MACKINDER, M.P. (7s. 6d. net. Constable.)

This is a book of political geography. The "reality" of which Mr. Mackinder treats is that which is based on the unchangeable facts of man's environment—climate, fertility, mountain barriers, river communications, winds, ocean currents, rainfall, and so on. He is profoundly convinced of the vital importance of these permanent geographic controls, and he urges the necessity of taking them into account in any and every scheme of social and political reconstruction. As to "democratic ideals," he has great respect for them and for their prophets and apostles. "Idealists," he says, "are the salt of the earth; without them, society would soon stagnate and civilization fade." But he has no difficulty in showing that idealists have frequently been fools, and that they have generally ruined their own causes by their folly. In particular, he points out how the errors and crimes of the French idealists of 1789 led to and necessitated the Napoleonic despotism, and how the garrulous ineptitude of the German idealists of 1848 opened the way to Bismarck's *Realpolitik*. He concludes that, if the idealism of the advocates of the League of Nations is not to end in a similar tragedy, the statesmen of the world must face the ultimate physical "realities," and their moral and social consequences, as he has briefly indicated them. Mr. Mackinder has written a stimulating book.

MUSIC.

Aural Culture based upon Musical Appreciation. Part 3. By STEWART MACPHERSON and ERNEST READ. (6s. net. J. Williams.)

With the present volume the authors have brought to a conclusion a work which was designed to set forth their views on certain aspects of music training in class. A course of training on the lines suggested in this and the two preceding parts of the work will, if rightly undertaken, do much to give the student a grasp of essentials, will quicken his perception of the fundamental principles of

tonality and rhythm, and prepare him for a course of harmony and counterpoint with his hearing faculties developed in such a manner as will enable him to derive full benefit from his more advanced studies. Mr. Read, in his part of the work, goes into details with commendable thoroughness, and also provides a mass of material for sight-singing, dictation, and memorizing; while in the final section of the work Mr. Macpherson, in a series of "Appreciation" lessons on well known works, instructs the pupil in the interesting differences of style and idiom due to "period." This is essentially a work for teachers, who will use the book to the best advantage if they themselves first assimilate the contents and give it out to the pupils in their own words.

First Principles of Music. By F. J. READ. (1s. 6d. net. Arnold.)

Following on lines with which we are familiar in the little textbooks of Davenport and Stewart Macpherson, Dr. Read brings to his task the many years' experience he has had in dealing with the Rudiments Class at the R.C.M. So one expects and finds all the details connected with musical notation, keys and scales, time and intervals, set forth in a clear and concise manner. Every step is illustrated with examples in notation, in addition to the explanations in the text. The author has also included short chapters on the ancient modes, sound, the pianoforte and its predecessors, orchestral instruments, musical form, a glossary of musical terms, together with specimen examination papers on each chapter. Dr. Read has rendered good service to the class teacher, and this little book will also appeal to the ever-increasing number of music students who believe in building their art on a sure foundation.

RELIGIOUS KNOWLEDGE.

"The Cambridge Bible."—(1) *Isaiah*. Chapters XL-LXVI. In the Revised Version, with Introduction and Notes by Dr. J. SKINNER. (3s. 6d. net.) (2) *Joshua*. In the Revised Version, with Introduction and Notes by Dr. G. A. COOKE. (2s. 3d. net.) (3) *Obadiah and Jonah*. In the Revised Version, with Introduction and Notes by H. C. O. LANCHESTER. (2s. net.) (Cambridge University Press.)

(1) Students of Isaiah have long been under a deep debt of gratitude to Dr. Skinner. As long ago as 1896-8 he published, in "The Cambridge Bible Series," his masterly commentary on Isaiah in two volumes, which has proved an invaluable guide to the study of this difficult Biblical book. This was based on the A.V. Now he has published a new edition of the second volume, based upon the R.V. This is a great advantage. But further, the new edition is enriched with a new introduction and with other additional matter. The Introduction now covers 72 pages (as against 60 in the old edition), and has been largely rewritten, and the commentary, with appendixes, occupies 281 pages (as compared with 244). Account is taken throughout of the considerable literature that has been added to the subject in the interval. There is a full and fresh discussion of the "Servant Songs," and much that is new besides. Dr. Skinner now definitely accepts the division into a "Trito-Isaiah" unhesitatingly. Students will welcome this volume wholeheartedly.

(2) Dr. Cooke's volume on Joshua marks a real advance on anything of its kind previously accessible in English. It is characterized by careful and painstaking scholarship. Topographical questions have been dealt with fully and accurately, and it is needless to add that critical results are fully accepted. Textual questions are also well handled, and there is a good map.

(3) Mr. Lanchester's volume is competent and useful. The complicated questions that hinge on the integrity and date of Obadiah are well handled, and the late date of Jonah is accepted. A good feature is the introduction into the discussion of a reference to the late Jewish (Rabbinic) allusions to the story of Jonah.

Dominus Noster. A Study in the Progressive Recognition of Jesus Christ our Lord. By CHARLES A. ANDERSON SCOTT. (6s. net. Heffer.)

Dr. Anderson Scott is to be congratulated on a new and original treatment of the historic and religious significance of Jesus. He does not attempt the impossible by aiming to present a complete "Life" of Christ, but he strictly confines himself within the limits of the available evidence and shows by a careful and historic presentation how the personality of Christ affected and impressed (1) His immediate disciples and contemporaries, and then (2) the early Church. The results of the critical study of the New Testament are here utilized in a positive and constructive way, and the result is remarkably satisfying and illuminating. The theme is worked out in a series of chapters which are headed respectively: "Jesus" (I), "Christ" and more (II), "The Lord" (III), "The Saviour" (IV). Chapter I contains a fine analysis of the

Complete Catalogue of Class Books for the Oxford and Cambridge Local Examinations, post free on application.

University Tutorial Press, Ltd.
High Street, New Oxford Street, LONDON, W.O. 2.

If you wish to
qualify to teach
SHORTHAND,
BOOK-KEEPING AND ACCOUNTANCY,
COMMERCIAL PRACTICE,
ADVERTISING, PRACTICAL BANKING,
COMMERCIAL LAW,

you can do so
in your spare time
by means of

PITMAN'S POSTAL COURSES.

The postal tuition meets exactly the requirements of teachers who are unable to secure oral training, or who desire to pursue the study of commercial subjects at home. One course, or any group of subjects, may be taken at any time, the lessons commencing from any stage of present knowledge. Write for details, stating the subjects in which you are interested.

Principal: FREDERICK HEELIS, F.R.S.A.

Director of Studies:—

Dr. ROBERT W. HOLLAND, O.B.E., M.Sc., LL.D.
169 SOUTHAMPTON ROW, LONDON, W.C.1.

years' experience.)

SCIENTIFIC APPLIANCES,

11 & 29 Stollan Avenue, Bloomsbury Square, London, W.C.1.

immediate impression made by the personality of Jesus on His contemporaries, of His character (grace, serenity, power); the impression made by His teaching, the methods and contents of which are succinctly set forth, and so on. The whole discussion is most important. It introduces order into what has proved only too often a bewildering labyrinth; and by its sobriety, careful scholarship, and critical treatment inspires confidence and conviction. It marks a real step forward.

SCIENCE.

Civic Biology. By CLIFTON F. HODGE and JEAN DAWSON.
(7s. net. Ginn.)

This textbook of biological "problems that can be solved only by civic co-operation" emphasizes the vital importance, for human welfare, of a knowledge of the life histories of plants and animals. The parts played by bacteria, fungi, weeds, insects, rats and mice in spreading diseases and ruining crops furnish texts of which the authors make skilful use. Teachers will find this an ideal guide to courses of utilitarian Nature study; while pupils will gain from it sound ideas of scientific method in natural history, as well as direction to opportunities of great social service. The book is well illustrated.

An Introductory Treatise on Dynamical Astronomy. By H. C. PLUMMER. (18s. net. Cambridge University Press.)

Although this country had the honour of producing Newton, who laid the foundations of dynamical astronomy, it is somewhat remarkable that not only have foreign investigators been the chief architects of the superstructure, but to them also has it been necessary to turn for comprehensive accounts of the continually rising edifice. Prof. Plummer's work, therefore, fills a serious gap in our scientific literature, and we welcome it as a most able survey of the principal features of the theory as it exists at the present day. Of course, in dealing with a subject of such vast range, much of interest and importance has necessarily been omitted. In particular there are no examples of practical computation. But, while apologizing for their absence, the author has taken care to develop the various theories up to the point at which algebraic formulae are ready for numerical evaluation. The subject-matter naturally falls into two sections, of which the earlier deals with undisturbed elliptic and parabolic motion and the latter with disturbed motion. Adequate accounts are given of the various classical theories, with which the names of Gauss, Olbers, Lagrange, Laplace, and Jacobi are connected, but the student who seeks information regarding the more recent developments will not be disappointed. We find, for example, an account of Charlier's important contributions to the solution of the problem of the determination of orbits; various methods for determining the orbits of visual and spectroscopic binaries are explained, while later there is an introduction to the theory of periodic orbits which has received its most brilliant application in Hill's Lunar Theory. To this latter theory two chapters are devoted. Although the textbook is essentially introductory it is by no means elementary, and the student must come to it well equipped with the apparatus of mathematical analysis. We are certain that it will be prized by all astronomers.

Botany of the Living Plant. By T. O. BOWER.
(25s. net. Macmillan.)

The title of Prof. Bower's book is singularly appropriate: the plant *lives* in his pages; structure is no mere "dry-bones" anatomy, but the means adopted by a living and struggling organism to meet the problems with which it is confronted. We are told in the preface that the volume is framed on the lines of the annual course of elementary lectures given in Glasgow University, and happily in the written work the lecture atmosphere is still most agreeably perceptible. The style is so simple and so direct that we can well imagine that those who have had the good fortune to sit at the feet of Prof. Bower will hear the tones of his voice as they read these pages. Most wisely the order of presentation adopted is not that of the ascending, evolutionary scale, but the opposite—viz., that of proceeding from the more or less familiar angiosperms to the gymnosperms, and thence downwards to the ferns, mosses, and liverworts, algae and fungi. These five divisions occupy thirty chapters, which are followed by two dealing respectively with "Sex and Heredity," and with "Alternation of Generations and the Land Habit." Here in the course of thirty pages are masterly essays on these important and interesting subjects. The book concludes with two appendixes: the one on some types of floral construction, the other on vegetable foodstuffs—i.e. the food values of most of the plants that enter into the diet of man. The index is termed "Index and Glossary": it hardly merits the second name, for very many words are not explained, and, in our opinion, a glossary should give the derivations of technical terms. With this slight criticism, we heartily commend this charming volume to all teachers and students of botany.

UNIVERSITIES AND SCHOOLS.

OXFORD.

In view of the rejection by the Convocation of the University of the Responsions Statute which made Greek optional and was approved by a large majority in Congregation, Exeter College is prepared to consider applications for matriculation from candidates who have been unable to learn Greek at school, but have passed the School Certificate or other equivalent examination in subjects other than Greek, and show good promise for the Honours Course. In such cases the College will make arrangement for their tuition in Responsions Greek; and such candidates will be expected to pass in this subject as soon as possible after they come into residence.

The Oxford Gilchrist Studentship has been awarded to Miss Dora Paton, of Somerville College. She obtained a First Class in the Honour School of Modern Languages (French), and intends to continue her studies in Paris and in Oxford with a view of undertaking advanced teaching.

LEEDS.

The University Council have appointed to the Chair of Education Dr. John Strong, C.B.E., Rector of the Royal High School, Edinburgh, since 1914. Dr. Strong was Senior Master in the Central High School, Leeds, 1897-1900, and holds an eminent position in Scottish education. He was Rector of Montrose Academy, 1900-1914, has served for the past eight years as co-opted member of the St. Andrews Provincial Committee for the training of teachers, and is Chairman of its Studies Committee. He is Examiner in Education in the University of Aberdeen; was a member of the Departmental Committee (1917) on the Remuneration of Teachers in Scotland; served as President of the Scottish Secondary Education Association 1916-17; and on the Union of Scottish Teachers was elected the first President of the Educational Institute of Scotland. Dr. Strong is the author of several works on education.

WALES.

The President has appointed a Commission to inquire into the organization of secondary education in Wales, and to advise how it may be consolidated with the view of establishing a national system of public education in Wales, having regard to the Education Act (1918) and the recommendations of the University Commission. The Committee will be composed as follows:—The Hon. W. N. Bruce (Chairman); Mr. W. R. Barker; Mr. J. H. Davies; Sir Owen Edwards; Miss L. M. Faithfull; Mr. William George; Mr. Thomas Griffiths, M.P.; Miss E. P. Hughes; Prof. Ramsay Muir; the Rev. Prebendary Prosser; the Rev. D. H. Williams; with Mr. T. G. Roberts as Secretary, to whom all communications on the subject should be addressed at the Board of Education, Victoria and Albert Museum, South Kensington, S.W.7.

In addition to this brief official announcement, a long statement evidently inspired at head-quarters has also appeared in all the Welsh newspapers giving the reasons why Mr. Fisher has resolved to appoint such a Commission of Inquiry. Emphasis is laid on the fact that the existing system was brought into existence before the passing of the great Education Acts of 1902 and 1918, and that consequently it does not harmonize easily with present-day requirements and conditions. Control of elementary and secondary education has been centralized and is at present exercised through the County Councils, except in the case of the intermediate schools which are only partially under their jurisdiction; and, therefore, anomalies and difficulties in administration have revealed themselves. For example, the Councils have not been able to give that full financial assistance to their schools which they have considered necessary in order to render them financially sound and to develop their resources to the highest pitch of efficiency. The statement is, however, extremely vague—probably designedly so—and educationists are therefore at present at a loss to know what is the true inwardness of this Commission.

It may, however, be conceded at once that a greater simplification of our educational system is possible, and it is no doubt extremely desirable that the public should have a clearer comprehension than it possesses at present of the functions of the different types of post-elementary schools in Wales. Further, the effect of the last Education Act, with its creation of continuation schools, trade schools, &c., is, of course, to complicate still more the whole system, and therefore, no doubt, much will be gained by an adequate inquiry. We understand that it is mainly on these lines that the Commission will work, and that it has no intention of embarking on a general survey of secondary education,

(Continued on page 542.)

MACMILLAN'S LIST.

Companion to Diaconus. By GEORGE G. LOANE, M.A. 6s. net.

A Geography of America. By T. ALFORD SMITH, B.A. (Lond.), F.R.G.S., Senior Geography Master St. Dunstan's College, Catford. With over 100 Maps and Illustrations. 4s. 6d.

[*Macmillan's Practical Modern Geographies.* *The Journal of Education and School World.*—"Mr. Alford Smith is well known as a pioneer in the field of modern geography. His long experience both as a successful teacher and as an examiner of the subject has enabled him to produce a textbook which may be recommended cordially for use in the higher forms of secondary schools."

Macmillan's Geographical Exercise Books. Africa. With Questions. By B. C. WALLIS, B.Sc. Sewed. 1s. 6d.

Education.—"It would be difficult to find a more useful book of geographical exercises than this. The maps are clearly printed and the exercises well arranged and designed. The teacher of geography on modern methods will be well advised to see this series."

History. The Quarterly Journal of the Historical Association. Edited by Professor A. F. POLLARD, M.A., Litt.D. Price 1s. 6d. net. Annual Subscription, post free, 6s. 6d. net.

its curriculum, &c.—in other words, its scope will probably be much narrower than that of the Commission which dealt recently with secondary education in England. Several questions are naturally asked, and to the answers which will be given to them great importance is necessarily attached. What, for instance, will be the attitude of the Commission towards the Central Welsh Board? Is this move an indirect method of suppressing it? The desire for autonomy in education in Wales is deep-rooted and firm, so that the proceedings will be carefully watched with the view of discovering whether there will be any attempt to use the Commission as a means of reducing our local control over secondary education. In two, at least, of the Commissioners, Mr. Alderman Williams and Mr. Wm. George, Wales has a guarantee that its autonomous powers are not curtailed, and undoubtedly relies on them to uphold them.

The appointment of the Hon. W. N. Bruce as Chairman is welcomed generally, because no one has done more towards the development of our intermediate system of education, and the Central Welsh Board is mainly his creation. He knows every aspect of our system thoroughly, and not merely from the official standpoint. The most serious criticism that is levelled against the personnel of the Commission is that it contains not a single head master, while Miss Faithfull can scarcely be well versed in the mysteries of our education system, and yet she is the only representative of the teaching profession. It passes our comprehension why teachers have been accorded such a meagre representation, and also why there is not a single teacher from Wales on it. If not too late, the omission should be rectified immediately in the interest of efficiency and also with a view of inspiring confidence in its deliberations.

The annual meeting of the Guild of Graduates of the University of Wales was held at the University College, Aberystwyth, on July 14. Mr. J. H. Davies, the Registrar of the College, was elected

University Court.

Warden for the year. There was a keen debate on the question of securing increased representation for the Guild on the reconstituted University, and finally it was unanimously resolved to apply for an increased representation of thirty-six. As Prof. Gruffydd, of Cardiff, said, the University is supposed to be democratic, but it could scarcely be regarded as such if it did not make use of its own graduates, while another speaker claimed that they alone came into contact with the democracy of Wales and understood the aspirations and desires of its people. It was, therefore, anomalous that the University should not give them a larger share in its government. The difficulty, however, arises at once that if the Guild is given a stronger representation, the County Councils, who claim an absolute majority, will also ask for more, and therefore nothing will really be gained.

An interesting and timely discussion was initiated at the University Court by Mr. Silyn Roberts, of the Appointments Board, on the relationship of University men to our industries. The Board were very keen on introducing more University men into the industries of the country; and not only did this apply to science men, but there was much scope for arts men in administrative and similar posts. To bring this about, the Secretary stated, a kind of clearing-house would be formed in London, and at the end of each year he would send up to the clearing-house a list of the men who were prepared to devote their lives to business, and the Federation were willing to take these men simply upon the recommendations of the Appointments Board without an interview—an entirely new departure in the United Kingdom. This scheme was heartily approved by the Board, and no doubt, if it is successful, it will greatly facilitate the passage of University men to our most important industries.

At the same meeting of the Court Lord Kenyon announced that the Treasury had consented to the Swansea Technical College becoming the fourth constituent college of the University, and he heartily congratulated the Mayor and Corporation on the result. Mr. Herbert Lewis, M.P., said that all who were interested in higher education had watched the efforts of this great metallurgical centre with the deepest sympathy. Not only will Swansea benefit enormously from this development, but Wales as a whole will be enriched. Among those on whom honorary degrees were conferred were the Hon. W. N. Bruce, Principal David Salmon (Swansea Training College), Sir D. Brynmor Jones, P.C., K.C., Lady Verney, and Prof. Hugh Walker.

This report contains several eulogistic references to the work of the Central Welsh Board, and supplies ample evidence of the continued progress of the schools. Paragraph X contains some rather cryptic references to the effect of the Education Act, and foreshadows some changes in our system of control—apparently they have some connexion with the appointment of the Commission, to which reference has already been made. Other sections deal with Welsh, advanced courses, and examinations.

Mr. E. J. Jones, Assistant Secretary to the Monmouthshire Education Committee, has been appointed Clerk to the Central Welsh Board, instead of Mr. I. Myrddin Evans.

Personal.

Mr. H. G. Wright has also been appointed Professor of English at Bangor University College. We are also pleased to see that the University of Glasgow has conferred the degree of LL.D. on Sir John Morris Jones. Mr. Gwilym Davies, M.A., has been appointed Professor of Latin at Cardiff College; Miss M. G. Jones has also been appointed to the head mistress-ship of Howell's School, Llandaff; and Miss C. Morgan to that of the Barry Intermediate School.

SCOTLAND.

The University Court have appointed Dr. Francis J. Charteris to be Professor of Materia Medica, in succession to Prof. Marshall, now of Aberdeen. Prof. Charteris has been Lecturer in Materia Medica at Glasgow University since 1911. The Court have also appointed Mr. Lloyd Turton Price, Lecturer in Clinical Surgery, to be Professor of Surgery, in succession to Prof. MacEwan, who has resigned. On the recommendation of the Secretary for Scotland the King has appointed the Rev. George S. Duncan to be Professor of Divinity and Biblical Criticism in St. Mary's College, St. Andrews University. Under the auspices of the University a School of Social Study and Training has been instituted, in connexion with Grey Lodge, Dundee.

On the recommendation of the Secretary for Scotland the King has appointed Prof. G. G. Henderson to be

Glasgow.

Regius Professor of Chemistry in the University, in room of the late Prof. John Ferguson. Prof. Henderson has been Professor of Chemistry at the Royal Technical College, Glasgow, since 1892. He is a distinguished graduate of the University, and he was for some years Assistant to Prof. Ferguson and Lecturer in Chemistry at Queen Margaret College. Dr. John Shaw Dunn, Lecturer in Pathological Histology in the University, has been appointed Professor of Pathology in the University of Birmingham. The Principal reported, at a meeting of the University Court, that, as the result of a conference of the four Universities, complete understanding has been arrived at with regard to the new Ordinance for the degree of B.Sc. The present degree is of honours standard; but this is not indicated in its title, and it has therefore been confused with the ordinary B.Sc. degree of the English Universities. It is intended in the new Ordinance to make this clear and at the same time to revise the Ordinance, which has been in existence for about thirty years. The Ordinances for the four Universities will differ in some details, but will be on parallel lines. It was also reported that the University War Memorial Committee has resolved that the memorial should take the form of a University Chapel, and that an annual commemoration day should be observed, at which the roll call of the fallen should be read. So far as is at present known, 580 alumni and students of the University fell in the war. The Scottish Universities Entrance Board have unanimously agreed that the conditions for entrance into the Faculty of Medicine should be the same as those in the Faculty of Arts and the Faculty of Science. New regulations will be framed, but these cannot be approved until December, and as a full year's notice must be given thereafter, the change will not take effect until January 1921. The War Office has presented to the University a challenge cup, the late property of No. 9 Officer Cadet Battalion, to be held as a challenge trophy in the University O.T.C.

The University Court have appointed Prof. Findlay, of Aberystwyth, to the Chair of Chemistry at Aberdeen, in succession to Prof. Soddy, now of Oxford.

Aberdeen.

At the summer graduation the degree of LL.D. was conferred on Sir Douglas Haig, Sir Roger Keyes, Sir James Cantlie, Sir James Porter, Prof. F. O. Bower (of Glasgow), and others.

On the recommendation of the Secretary for Scotland, the King has appointed Sir Harold J. Stiles to the Chair of Clinical Surgery in the University, in room of Prof. Caird, resigned. Sir Harold Stiles, who had a distinguished career at Edinburgh University, is a surgeon whose reputation extends not only throughout the British Isles, but to Europe and America. He did valuable hospital service during the war. At the summer graduation the degree of LL.D. was conferred on a large number of distinguished men, including

Edinburgh.

Cardinal Mercier (*in absentia*), Sir Thomas R. Fraser, Sir William McCormick, Sir Thomas Mackenzie (High Commissioner for New Zealand), Sir W. G. Macpherson, Sir Reginald Wingate, and the Secretary for Scotland. The degree of B.Sc. in Engineering was conferred on Miss Elizabeth H. M. Georgeson, the first woman student who has received this degree in Scotland. Miss Dorothy

G. Downie, who had already received the degree of B.Sc. in Pure Science, also received the degree of B.Sc. in Forestry, conferred on a woman student for the first time.

Appointments Department. Circulars have been issued by the Scottish Office and the Scottish Education Department to Education Authorities and Town Clerks regarding the employment of ex-officers and men of H.M.

Forces, whose names are registered with the new Appointments Department of the Ministry of Labour. Education Authorities are urged to give special consideration to the claims of these men in making administrative appointments. The circulars are rather belated, as most of the Scottish Education Authorities have already made appointments to their chief administrative posts, which have been as a rule filled by teachers and others who have had educational experience. There will, however, probably be openings in course of time when the continuation schemes have been prepared. A circular has also been issued by the Education Department, expressing the hope that Education Authorities will give every encouragement to the War Savings Movement, both in the national interest and as an important part of one of the functions of every Education Authority, namely, the encouragement of thrift.

Directors of Education. Dr. John Macdonald, Rector of Dunfermline High School, has been appointed Director of Education for the County of Aberdeen, at a salary of £800 rising to £1,000 a year. Mr. William D. Kennedy,

Rector of Oban High School, has been appointed Director for Banffshire, at an initial salary of £500 a year, with £100 for travelling expenses. Dr. D. C. McIntosh, Mathematical Master at the Edinburgh Ladies' College, has been appointed Director of Education, Clerk, and Treasurer to the Morayshire Education Authority. Dr. Philip, of George Watson's College, Edinburgh, has been appointed Executive Officer for the Education Authority of Ross and Cromarty. He is a distinguished scholar and a Gaelic speaker.

IRELAND.

Application of the Birrell Grant. The Intermediate Education Board have published the annual report for the year ending March 1918, on the application of the Teachers' Salaries Grant, better known as the Birrell Grant of £40,000.

The number of intermediate schools sharing in the grant is 354, and of intermediate pupils, i.e. pupils over twelve years of age

receiving intermediate education, 21,270. The corresponding figures for the previous year were 350 and 19,124 respectively. Of these, 232 schools with 14,710 pupils are under Roman Catholic management, and 122 schools with 6,560 pupils are under non-Roman Catholic management. In the Roman Catholic schools the number of duly qualified lay teachers is 264, an increase of exactly a hundred over the figure for 1917. There are also 99 nuns who claim to be lay teachers and who satisfy the conditions, but whether they are lay teachers or not is for the Government to decide. In the non-Roman Catholic schools the number of duly qualified lay teachers is 370, an increase of 75 over 1917. In addition, there are three Roman Catholic laymen and 49 non-Roman Catholic laymen heads and owners of their schools, receiving the profits of them. In the Roman Catholic schools there are 239 lay teachers and in the others 396 lay teachers not fulfilling the conditions—a decrease in the former of 49 and in the latter of 24. In the Roman Catholic schools the highest salary paid to an assistant is £200 non-resident and £150 resident, and in the non-Roman Catholic schools £375 non-resident and £280 resident. The schools as a whole have more than the requisite minimum of one duly qualified lay teacher for every forty pupils, since they have 634 and only 532 are requisite; but taken separately the Roman Catholic schools are still over a hundred short of their requisite number, which is 368; while the non-Roman Catholic schools have over two hundred more than their required number of 164. If the 99 nuns above referred to are included, the Roman Catholic schools have almost exactly the required number.

The Archbishop of Dublin, having been appointed Provost of Trinity College, has vacated the office of Vice-Chancellor, and the Lord Chancellor of Ireland, Sir J. H. Campbell, has been appointed in his stead. He was a scholar of the College in 1872 and Senior Moderator in Classics and History in 1874. On July 4 the University conferred honorary degrees of LL.D. on the Lord-Lieutenant (Viscount French of Ypres), General Sir H. H. Wilson, and Brigadier-General R. C. Jellicoe; and of M.D. on Major-General J. J. Gerrard, Sir J. M. Irwin, Major-General J. J. Russell, Major-General Sir W. T. Swan, and Major-General Sir H. N. Thompson; and of Sc.D. on Prof. F. O. Bower and Sir Lynden Macassey. Speaking at a dinner the same evening the Lord-Lieutenant gave statistics of the war services of Trinity

(Constituted by Order in Council, Feb. 29, 1912).

In accordance with the above-mentioned Order, a

REGISTER OF TEACHERS

is now maintained by the Council.

For information apply to The Secretary,
Teachers Registration Council,
47 BEDFORD SQUARE,
London, W.C.1.

College up to November 9 last. Of graduates and undergraduates 2,561 had served, of whom 743 were undergraduates, 136 were privates, 140 chaplains, 789 medicals, and 166 engineers. Four hundred were killed in action or died on service, 215 were mentioned in despatches, 130 received the Military Cross, and 46 the D.S.O. There were many other distinctions including one V.C. The University has lost its senior representative in Parliament by the promotion of Mr. A. W. Samuels, the Attorney-General, to a Judgeship. At the time of writing there is only one candidate before the electors, Mr. H. M. Jellett, K.C.

Alexandra College, Dublin, celebrated, on July 4, its jubilee, postponed on account of the war from 1916. The Provost of Trinity, Dr. Bernard (for many years its Warden), presided, and the Lord-

Lieutenant, Sir Henry Wilson, and Sir Lynden Macassey were present and spoke of women's work in the war. The work of the College was well described by the Provost and by Dr. White, the Lady Principal. Opened in 1866, before either Newnham or Girton, with 18 or 20 students in one house, it had now 316 students taking the full course, independently of others who were taking part-time courses; and the school, which was founded in 1873, and now under the successful head mistress-ship of Dr. Mulvany, was attended by over 300 girls. A message from Queen Alexandra described the growth and expansion of the activities of the College of which she was the patroness. The most important developments were the institution of a housecraft department and departments for special secretarial training and for the training of secondary teachers. In addition a Guild for social service had been working for twenty-two years, and in connexion with it are playrooms for children, libraries, a club for factory girls, a hostel for working girls of the middle classes, and a bursary scheme. The chief work of the College, however, has been as a pioneer in the cause of the higher education of women. The Lady Principal said it was proposed to add a dignified front to their College as a memorial of the Jubilee, their original one house having extended to eight. The terrace would then be brought into harmony with the Jellicoe Hall, and their buildings would have a more collegiate appearance.

The Irish Geographical Association celebrated its first annual general meetings in the Royal College of Science, Dublin, on July 3 and July 5. The President, Mr. H. J. Mackinder, M.P., was

unfortunately prevented by Parliamentary duties from being present to deliver his address, and in the absence through illness of the Chairman, Prof. Grenville Cole, the meetings were presided over by Prof. H. J. Seymour. There was a discussion on "The Position of Geography in Irish Schools"; a lantern lecture, by Prof. Oldham, on "Geography at the Peace Conference"; and an excursion on Saturday afternoon to Killiney Hill, Co. Dublin.

SCHOOLS.

WESTFIELD COLLEGE.—The Council have awarded scholarships as follows:—Dudin Brown Scholarship of £50 a year for three years to Evelyn M. Moore (Fulham County Secondary School) for History; Old Students' Scholarship of £50 a year for three years to Dorothy Smith (Hanson Girls' Secondary School, Bradford) for Botany. The Goldsmiths' Scholarship of £50 a year for three years has been awarded to Gwen D. Griffiths (St. Saviour's and St. Olave's Grammar School, New Kent Road) for English. A Bursary of £50 a year for three years to Miss Anna Bjarnadóttir (of the University of Iceland) for English. The Council have also offered Research Studentships for post-graduate work to Miss Eveline C. Martin (an old student of the College) and to Miss Julia G. Wales (Instructor in English at Wisconsin University).

PRIMARY SCHOOL NOTES.

The Education Act: Appointed Days.

THE fixing of August 1 as the "appointed day" for Sections I to V, inclusive, of the New Education Act will add considerably to the administrative activities of Local Education Authorities, since provision will now have to be made for the advanced instruction of older children in primary schools, for the preparation and submission of schemes by Local Education Authorities to the Board of Education, for safeguarding the health and physical condition of school children, and for ensuring a sufficient supply of efficient teachers. Sub-sections iv and v of Section VIII, which come into operation on the same date, empower Local Authorities to raise the

age of compulsory school attendance to six years, and to make provision for the instruction of pupils in primary schools up to the age of sixteen years.

The Forgotten Half-timer.

It is somewhat remarkable that the most important part of the Act, Sub-section i of Clause VIII, which proposes to raise the school-leaving age to fourteen years, remains in abeyance. Some 30,000 child-toilers are still allowed to work as half-timers in the cotton and woollen factories of northern England. The hope of the Half-time Council that Peace Day would signalize the emancipation of these unfortunate children has not been realized; on the contrary, parents of the avaricious type are applying eagerly for half-time exemptions on behalf of their children. As the advent of the "appointed day" for this sub-section would allow the youngest half-timers to attend school in this capacity until the age of fourteen years, it follows that the schools would not be free of such pupils until practically two years after the advent of the "appointed day."

Men and the Teaching Profession.

NOTWITHSTANDING the enactment of the Teachers' Superannuation Act and the prospects of improved financial conditions of service, there appears to be little or no improvement in the number of men recruits to the teaching profession. On the contrary, those who are in close contact with the inner feelings of men teachers cannot fail to note the rising bitterness with which the unwillingness of Education Authorities, Central and Local, to take prompt action to improve scales of salaries is viewed. The simple fact that not a single Authority in the country is prepared to pay thoroughly competent college-trained teachers an initial salary equal to that which is laid down for the rawest village constable, is one which makes a definite and painful appeal to all grades of teachers. There is a strong feeling that the game of see-saw between the Board of Education and the Local Education Authorities should give place to a statesmanlike and definite policy which will place teachers once and for all beyond the position of semi-starvation which has been theirs for the past ten years.

The Policy of High Initial Salaries.

THERE is evidently a strong feeling in certain quarters that the plan of offering comparatively high initial salaries to teachers will have the happy effect of creating a speedy stream of recruitment to the profession. On the other hand, the opinion is held among responsible teachers that the wiser policy would be to grant improvements of salary as the teachers gather experience, in order that full encouragement should be given to successful effort. Consultation with representative teachers would doubtless tend to secure a common basis of action; further, it would help to gain the goodwill which is essential to any comprehensive movement for recruiting the teaching profession.

The Staffing of Continuation Schools.

The courses of instruction at the Summer Holiday schools show a general tendency to include subjects which will naturally be taken with pupils attending upper standard and continuation school classes. It is evident also that the Universities are prepared to contribute to the Renaissance in English education by organizing special series of lectures for intending teachers in these schools. The number of applications from teachers for summer courses has been extraordinarily high this year, and it is clear that there will be a free movement of primary-school teachers to the continuative branches of education, provided the conditions of service approximate to those obtaining in secondary schools.

The New Salary Scale of the N.U.T.

THE revised scale of salaries which the Executive of the Union was authorized to draw up by the Easter Conference at Cheltenham gives a minimum salary of £170 for certificated class teachers, rising by annual increments of £15 to a maximum of £450 per annum. Years spent in college for purposes of training are to rank as teaching service. Head teachers are classified according to the grade of school, the respective maxima for the four grades being £500, £550, £600, £650. The scale applies equally to men and women.

The King and School Peace Holidays.

THERE is general satisfaction at the announcement of the desire of His Majesty that there should be a general addition to school holidays in celebration of the Peace. Quite apart from the nervous strain borne by children in common with their elders, the schools

Continued on page 550.)

UNIVERSITY OF LONDON PRESS.

EVERYMAN'S CHEMISTRY.

The Chemist's point of view and his recent work told for the Layman. By ELLWOOD HENDRICK. New Edition, with illus. Demy 8vo, 8/6 net.

Nature.—"The man in the street is not particularly interested in theory but prefers to learn something about practice, and it is safe to say that few popular books contain such a mass of examples of the application of chemistry to practical problems. . . . There can be no doubt the book is excellent."

Professor J. L. PATON (of Manchester).—"I think the book ought to be distinctly useful in the attempt to familiarize our young boys, especially classical boys, with some of the staple processes of the application of Chemistry to production and the method of scientific discovery. It is quite a live book."

THE NEW REGIONAL GEOGRAPHIES.

By LEONARD BROOKS, M.A., F.R.G.S.

- Book I. **THE AMERICAS.** Cloth, 3/6 net. (Ready.)
- " II. **ASIA AND AUSTRALASIA.** Cloth, 3/6. (Ready.)
- " III. **AFRICA AND EUROPE.** Cloth. (In the Press.)
- " IV. **A SENIOR SCHOOL GEOGRAPHY.** (In Preparation.)
- THE BRITISH ISLES.** Issued separately with maps, 2 6.

These volumes form a four years' Geographical Course for Secondary Schools. The old conventional order of studying the Continents is rejected in favour of a new and original grouping, offering advantages which will be obvious to every teacher of geography. The books are profusely illustrated and contain a large number of valuable questions, problems, and exercises, as well as specimen questions from examination papers.

The matter comprising Volume III has been in type for some months pending the alterations in boundaries, all of which have been given effect to in this volume.

THE STUDENT'S GUIDE.

By JOHN ADAMS, M.A., B.Sc., LL.D., Professor of Education in the University of London. Fifth Impression. Cloth, 4/6 net.

With practical pointers on how to study, how to memorize, how to take notes at lectures, how to divide one's time, how to prepare for examinations, is combined a revelation of what the student years might be—and so often are not—to the careless youth.

The Times.—"Dr. Adams has written an admirable book, and a student may be regarded as fortunate who avails himself of its wisdom. Those who must pursue their studies without the aid of a teacher will find much in this volume which will save them from many of the pitfalls which beset their path."

GEOGRAPHY AND WORLD POWER.

By JAMES FAIRGRIEVE, M.A., F.R.G.S., recognized teacher in the University of London in the theory and practice of Education. New Edition with 80 Maps and Diagrams. Cloth, 4/- net.

From *The Times*.—" . . . It is a valuable review treating in a broad philosophic way the influence of physical facts upon history," and in the words of the *Glasgow Herald* reviewer, "One could not desire a more fascinating introduction to the study of world history than this masterly analysis."

A MATRICULATION ENGLISH COURSE.

By B. J. SPARKS, B.A., B.Sc. Cloth, 3/-.

This book covers efficiently the whole of the ground in English Grammar and Composition for the London University Matriculation and Examinations of similar standard.

The Future Career Association.

(Established 1904.)

CONVEYANCING DEPARTMENT.

This Department is now under the direction of **Mr. F. C. NEEDES, B.A.**, whose experience, advice, and assistance are unreservedly placed at the disposal of **Purchasers** free of charge.

TRANSFERS and PARTNERSHIPS arranged by correspondence or interview.

INSPECTIONS and VALUATIONS undertaken.

An **unusual opportunity** offers itself to a young energetic lady of good social position, with educational qualifications, to acquire a **partnership** in one of the best **Girls' Schools** near London. Sound investment, but monetary consideration of secondary importance.

FOR SALE (*inter alia*).

1. **Ladies, possessed of capital and good educational qualifications** and experience, can hear of an excellent opportunity of acquiring a **good class and exclusive Boarding School** for Girls, with an income of about £10,000 p.a., and situate in most beautiful premises and grounds.
2. **North of England.—Flourishing Good Class Girls'.**—Etab. 40 years. 22 Day Boarders. Fees £3 a term plus tuition fees. 141 Day. Fees from £2.7s. to £4 a term. Receipts 1918, £1,786. Net profits £562. Good premises—vendor's freehold—will sell for £1,450, mortgage arranged or will let. School has a splendid connexion and has a good reputation. Goodwill about £800. School furniture, &c., at valuation. Excellent chance for two or more ladies.
3. **Salop.—Flourishing Boarding and Day School** of 15 Boarders, 11 Day Boarders, and 45 Day. Receipts to February 1919, £1035. Specially built premises, with every accommodation. In best residential part. Rent only £50. One term's capitation fees accepted. School and House furniture (if required) at valuation.
4. **Home Counties.—High Class Day** connexion of about 35 pupils to be had, with probably a few young boarders, all at high fees. Good chance of working up a large day connexion. Excellent premises, with grounds of nearly 3 acres. Rent about £300. One Term's capitation fees accepted. Suitable for a lady of good educational qualifications anxious to secure a High Class Day connexion, or a lady wishing to remove her Boarders to an attractive residential locality.
5. **Lincs., old estab., good Middle Class Girls' School.**—19 Boarders, 6 day ditto and 40 Day pupils. Receipts £1,052. Large house and grounds. Rent only £100. Vendor, who is going abroad, will accept one Term's capitation fees.

FRENCH MISTRESS, Brevet Supérieur, requires post for September. Crossing to England in August, interview possible if required. Write—Mademoiselle SÉDILLE, 68 rue des Capucins, Reims, France.

TRAINED Certificated **MISTRESS** desires post in Secondary School as Junior Form or Kindergarten Mistress. Kent or Surrey preferred. 10 years' experience in elementary School. Singing, Needlework.—R.B.H., Edburga, Minster, Ramsgate.

THE Principal of a London School wishes highly to recommend for visiting lessons an enthusiastic young **DANCING AND SWEDISH DRILL MISTRESS** who has been with her nearly three years. Very bright with her pupils. Trained at Liverpool.—R. C., 3 Park Mansions, N.W.8.

Posts Vacant.

WANTED, for an English School in Denmark, a fully trained Certificated English **TEACHER OF DOMESTIC ECONOMY** (resident). Apply, giving full particulars and stating salary required, to Countess RABEN-LEVITZAU, The English School, Nysted, Denmark. Term begins September 4th.

TYPEWRITING and Duplicating, MSS., &c.; accurate, prompt.—MILNER, 18 Cardigan Street, Cardiff.

MEDICAL and EDUCATIONAL GYMNASTICS.—Wanted an Assistant. Private practice. Apply (with qualifications and photograph) to Miss THEODORA JOHNSON, Swedish Institute, Clifton, Bristol.

have done an enormous amount of useful war work which has received little official recognition. Teachers, too, have carried on their duties, often single-handed, in the absence of colleagues on war service. Many have broken down completely under the strain; more remain on the verge of collapse. Under these conditions a prolonged holiday would probably save much efficient teaching power for the national service.

PRIZE COMPETITIONS.

THE Translation Prize for July is awarded to "Uncle Sam"; *proxime accessit* "E. A. N."

The winner of the Translation Prize for June is Miss F. R. Neve, 18 Lawn Terrace, Blackheath, S.E.3.

Extract from Charles Nodier's "Souvenirs de Jeunesse":—

By "UNCLE SAM."

All the intimate pleasures of the soul have been pictured. I am sorry that there has never been pictured the great joy which seizes the twelve-year-old heart, fitted by some teaching and much sympathy for the understanding of the living world, taking possession of it as a heritage on a beautiful morning of spring.

It is thus that Adam must have seen the world made for him when he awoke from a child's sleep at the breath of his Creator. Oh, how beautiful the earth seemed to me! Oh, how I held my breath to listen to the sound of the woods and the gurgle of the stream! How I loved the twitter of the birds in the foliage and the bees around the flowers! And I was there caressing the flowers with my eyes, for I knew them all by name, whether they spread in trembling umbels or opened out in cups, or hung in bells, or spangled the grass like little stars fallen from the heavens. I let my hair fly to the wind, I ran to convince myself of my life and of my liberty. I dived through the bushes, I sprang over the ditches, I climbed over the mounds, I ran, I shouted, I laughed, I cried with joy, and then I fell into a delightful fatigue, I rolled on the springing turf, I intoxicated myself with its perfume, and, lying down, I embraced the blue horizon with a look that held no envy, and said to it with conviction which will never come again: "You are not more pure or full of peace than I. . . ." It was I myself, however, who thought that.

Almighty God! What have I done to You that You cannot give me, at the price of what remains to me of life, one of these moments of my childhood? Alas! every man who has, like me, experienced the illusion of early happiness and of his first hopes, has, without having deserved it, undergone the punishment of the first sinner. We also have lost a Paradise!

The amount of space required for this month's exercise compels us to cut our notes very short. The sting of the piece was in the first sentence. It is melancholy to have to record that more than forty competitors failed to see the construction and took *s'emparant de lui* to mean that the world took possession of the child. But it is the frequent experience of examiners that the incapacity to disentangle a complicated sentence is a very common defect with students of French. In drawing up the list of Class II we have discriminated between those who understood the sentence and those who did not. The prize-winner omitted the words *comme une autre abeille*, but no version was without a mistake.

We classify the 103 versions received as follows:—

Class I.—(a) Uncle Sam, E.A.N., Redivivus, Bésigue, Dorma, J.S., Fortune le veut, Borealis, Sobrina, Pip.

(b) Agricola, Bobby, Hesperus, Novice, Nil Desperandum, Memus, Oatis, Malta, La Bourdette.

Class II.—Trèfle, Brisquet, Banksia, Ninette, Bluetie, Excelsior, Emmo, Englishwoman, Erebus, Misty, Antelope, Cablegram, Loo, Matherau, T.G.E., Jolande, Adli, Traddles, Britannia, Mal Eclos, Somewhen, Rusticus, Black Cat, Mamble, Ardeonaig, Chingleput.

(b) Bohemond, Damaris, Nailil, Esse quam videri, Playshaw, Anna Maria, G.L.F., Menevia, Iota, Park, Nutcracker, Francesca, Melmillo, 229, Jean, Massouvie, Kooka, L.E.D., E.A.P., Sanspe, Jeune Fantassin, Trewin, E.M.M., Iona, D.E.B., La Devonne.

Class III.—Common Sense, P.S., Marie Joseph, Téméraire, Clune, Sperantissimus, G.E.M., Aiglon, Tante Greebish, Clement, M.E.F., Shamrock, Domus, Tom Turk, Panurge, Kikuyu, F.B.,

(Continued on page 552.)

WM. HUNT'S OXFORD "IDEAL" LOOSE-LEAF EXERCISE BOOK.

(Patent.)

WM. HUNT'S Patent Ideal LOOSE-LEAF NOTE-BOOK constitutes the best and most convenient Higher Form and Science Class Exercise Book, Lecture Note Book, Loose-Leaf Scrap Book, Storage Covers for Notes, Letters and Papers of all sorts yet invented. The Book opens perfectly flat for writing, and binds up absolutely securely; can be un-made and re-made and the leaves transferred from one book to another or new leaves added in any manner without trouble and without risk of disarrangement or loss. No rings, posts, arches, or mechanism of any sort. Only one book necessary for many subjects. Each subject can be transferred to its own distinctive cover as convenient. 18 sizes and several qualities. Capacity one leaf or 300 with no lost bulk.

Showing the Book containing 300 sheets of paper closed. The Divisible Lace is here shown joined, by inserting the Pointed Tag into the Barrel Tag. When the Book is in use the Lace should be joined as above only. When not in use the lace ends may be tied in a bow knot.

Showing the manner of changing leaves. A leaf is shown withdrawn from one Divisible Lace before withdrawing it from the other.

J.C., Chu Chin Chow, Sasina, T.T., H.R., Switzerland, Amga, Wynne, Umbria, D.I.M., Hibernia, V.U.H., Poisson d'Avril.
Class IV.—Rabies, Sperabo.
 "Garnag's" version arrived too late.

A Prize of Two Guineas is offered for the best notes on the following quotations. Competitors are invited to name the authors and, if possible, the works in which the passages occur. Additional credit will be given for the citation of parallels, exact or near (or contrasts), or originals from English or other literature. Some of the quotations have been chosen with this latter object in view :—

1. Though the mills of God grind slowly, yet they grind exceeding small ;
 Though with patience He stands waiting, with exactness grinds He all.
2. Laugh, and the world laughs with you ;
 Weep, and you weep alone.
3. To be properly enjoyed, a walking tour should be gone upon alone.
4. A robin redbreast in a cage
 Puts all heaven in a rage.
5. Sachez mourir de faim. C'est le premier des arts, parcequ'il donne la liberté de l'âme.
6. Poetry is the record of the best and happiest moments of the happiest and best minds.
7. Sole judge of truth, in endless error hurl'd ;
 The glory, jest, and riddle of the world.
8. It is no little part of wisdom to know how much of an evil must be endured.
9. The great task for democracy is to make every man in the land a nobleman.
10. He was the guiding star of a whole brave nation, and, when he died, the little children cried in the street.
11. I chose my wife as she chose her wedding gown—for qualities that would wear well.

12. Let wealth and commerce, laws and learning die,
 But leave us still our old nobility.
13. Überall weicht das Weib dem Manne; nur in dem Höchsten
 Weicht dem weiblichsten Weib immer der männlichste Mann.
14. Leisure is gone—gone where the spinning-wheels are gone, and the pack-horses, and the slow waggons, and the pedlars who brought bargains to the doors on sunny afternoons.
15. One smallest new fact obtained in the laboratory, one brick built into the temple of science, far outweighs any second-hand exposition which passes an idle hour, but can leave no useful result behind it.
16. To me
 He is all fault who hath no fault at all ;
 For who loves me must have a touch of earth.
17. One thing is pretty certain, and, in its way, comforting—that, however far the rage for revivalism may be pushed, nobody will ever want to revive the nineteenth century.
18. J'aime la majesté des souffrances humaines.
19. Whoso will be a man must be a nonconformist.
20. . . . a way that no sign showeth,
 Nor aught of its goal or of aught between ;
 A path for her flight which no fowl knoweth,
 Which the vulture's eye hath not seen.

Initials or a nom de guerre must be adopted by ALL competitors, but the prize-winners and the competitors awarded the second place will be required to send real names for publication if necessary.

No competitor will be awarded a prize more than ONCE during a given year, though the name of the competitor gaining the first place will be published each month.

All competitions must reach the Office by the first post on August 15, addressed "Prize Editor," THE JOURNAL OF EDUCATION AND SCHOOL WORLD, 3 Ludgate Broadway, London, E.C. 4.

UNIVERSITY OF EDINBURGH.

Chancellor: The Right Hon. A. J. BALFOUR, M.P., D.C.L., LL.D., &c.

Rector: Admiral Sir DAVID BEATTY, G.C.B., G.C.V.O., D.S.O.

Principal and Vice-Chancellor: Sir J. ALFRED EWING, K.C.B., M.A., D.Sc., LL.D., F.R.S.

Secretary of the University: Professor Sir LUDOVIC J. GRANT, Bart., B.A., LL.D.

The **Winter Session** opens about the beginning of October and closes about the middle of March.

The **Summer Session** extends from about the middle of April to the end of June; in Law, from May to July.

The University embraces **Six Faculties**, viz.: **Arts, Science, Divinity, Law, Medicine and Surgery, and Music**, in all of which full instruction is given and Degrees are conferred. There are many different avenues to the **Degree of M.A.** (Honours and Ordinary), the graduation subjects embracing English, History, Modern Languages, Science, &c., besides Ancient Languages, Philosophy, Mathematics, &c. The wide scope of the Arts Curriculum permits of the combination of Arts, Science, Medical, or Special Studies; and it has been shown by successes of Edinburgh students in the Civil Service Examinations that it is possible to combine study for Degrees in Arts, Science, or Law with preparation for this and other Special Examinations. In addition to the Ordinary and Honours Degrees in Arts, the Higher Degrees of D.Lit., D.Phil., and D.Sc. are conferred. The Degree of **Bachelor of Education** is conferred on candidates who have attended Courses and passed Examinations in Psychology and in Education (Theoretical and Practical). A Diploma in Education is also conferred. A Degree of **Bachelor of Commerce** (B.Com.) has been recently instituted, and Special Courses in Industrial Law and other kindred subjects are being provided. Degrees in **Science** (B.Sc. and D.Sc.) may be taken in **Pure Science, Engineering, Public Health, and Veterinary Science**; and the Degree of B.Sc. in **Agriculture and Forestry**. Temporary Regulations have been framed for a **Diploma** and a **Certificate in Forestry** for the behoof of Officers and men who have served in the War. There are fully equipped Science Laboratories, and other necessary appliances, in all these Departments. The curriculum in **Divinity** affords a thorough training in Theological subjects, and the Degree of Bachelor of Divinity (B.D.) is conferred. The **Law** Faculty, besides furnishing the professional equipment necessary for those intending to practise in Scotland, contains Chairs in Jurisprudence and Public International Law, Constitutional Law and Constitutional History, Roman Law, and Political Economy, as also Lectureships in other important branches of Law, and is thus adapted for students preparing for the Civil Service Examinations, and for legal, political, and administrative appointments generally. The Degrees of Bachelor of Laws (LL.B.) and Bachelor of Law (B.L.) are conferred. The Faculty of **Medicine** has a full curriculum in Medicine and Surgery, and is equipped with very extensive Laboratories and all other necessary appliances for Practical Teaching. Ample facilities are afforded for Clinical Instruction at the Royal Infirmary, Maternity Hospital, Royal Hospital for Sick Children, Hospital for Infectious Diseases, and Royal Asylum for the Insane. Four Degrees in Medicine and Surgery are conferred by the University, viz.: Bachelor of Medicine (M.B.), Bachelor of Surgery (Ch.B.), Doctor of Medicine (M.D.), and Master of Surgery (Ch.M.); and these Degrees qualify for practice throughout His Majesty's dominions, and for admission to the Naval, Military, and other Public Medical Services in the United Kingdom. A **Diploma in Tropical Medicine and Hygiene** (D.T.M. & H.) is conferred on Graduates in Medicine of the University, and specially approved Medical Practitioners who have resided abroad. There are also **Diplomas in Public Health** (D.P.H.) and in **Psychiatry** (Dipl. Psych.). In **Music** there is a full course of study for graduation, and the Degrees of Mus.B. and Mus.D. are conferred.

The University Staff consists of 44 Professors, over 90 Lecturers, and about 60 Assistants and Demonstrators. The annual amount available for Fellowships, Scholarships, Bursaries, Prizes, &c., is about £21,485. Facilities are afforded for research in scientific and other subjects.

Women may attend the Classes in all the Faculties, and they are admitted to graduation in Arts, Science, Law, Medicine, and Music.

Information regarding Matriculation, the Curricula of Study for Degrees, &c., the Examinations for Fellowships, Scholarships, &c., may be obtained from the **DEANS OF THE FACULTIES**, or from the **CLERK OF SENATUS**; and full details are given in the University Calendar, published by Mr. JAMES THIN, 55 South Bridge, Edinburgh—price 3s. 5d. by post. The Preliminary and Degree Examination papers in each of the Faculties are also published by Mr. JAMES THIN, viz.—Arts and Science Preliminary, 1s.; Arts Bursaries, 6d.; Medical Preliminary, 6d.; Degree papers: Arts, 1s.; Science, 1s.; Divinity, Law, Medicine, and Music, 6d. each.

1919.

By order of the Senatus,

L. J. GRANT Secretary.

Telegraphic Address:
Scholasque, London.

SCHOOL TRANSFER DEPARTMENT.

Telephone:
Gerrard 7021.

Schools transferred and valued. No charge whatever will be made to vendors of Schools or School Partnerships by Messrs. GRIFFITHS, POWELL & SMITH unless a sale is effected or agreed upon. No commission charge whatever made to Purchasers of Schools or School Partnerships.

Applications from intending purchasers are solicited for the following properties:

GIRLS' SCHOOLS.

Wales.—Middle-class Boarding and Day School. Gross receipts past year £1,884. No. of Boarders 44, and 108 Day Pupils. Rent £120. Goodwill and School furniture £500.—No. 6,058.

Northants.—Successful Boarding and Day School. 154 Pupils, 47 of whom are Boarders. Prospectus terms about £50 for Boarders, and 2 to 4 guineas for Day Pupils. Any reasonable sum will be accepted for Goodwill, as the vendor must give up owing to death in family and other domestic reasons.—No. 6,052.

Yorks.—Flourishing Girls' Boarding and Day School. Gross receipts past year £2,940 9s. Net profits about £450. 40 Boarders, 42 Day Pupils. Rent of very fine house, standing in its own grounds, £150. Number of pupils greatly increasing. Present year promises to be very successful. Price for goodwill about £1,000 or close offer.—No. 6,048.

Lancs.—Preparatory School for Girls and Kindergarten. Boys up to 10 years of age received. Gross received past year £603. No. of pupils 72. Rent only £55. Goodwill £200. Furniture at Valuation.—No. 6,060.

Hants.—Partnership in Boarding and Day School. 120 Pupils, 16 of whom are Boarders. Gross receipts about £1,500. Very nice premises. Terms of Partnership to be arranged.—No. 6,050.

Hants (Seaside).—Partnership in flourishing Boarding and Day School for Girls. Vendor wishes to retire after 20 years, having acquired a competency. Gross receipts past year £3,725 15s. Net profit about £600. There is a waiting list for Boarders for next term. Price for half share of Goodwill £500. Furniture at valuation.—No. 6,044.

Yorks.—Preparatory School for Boys. Established 35 years. Gross receipts past year £657. Net profit past year £200. Number of pupils 44, paying 3 to 5 guineas per term, without extras. Rent of good house with garden and play ground, only £60. Majority of boys are prepared for Public Schools. Price for goodwill £400.—No. 6,053.

Salop.—Flourishing Boarding and Day School for Girls. Conducted by vendor 25 years. Gross receipts past year £1,035 17s. 3d. Net profits past year £369. 15 boarders, 35 day pupils. Rent of

fine large detached house, built for a school, and standing in its own grounds, £30. The low sum of £300 will be accepted for Goodwill. Furniture at valuation.—No. 6,041.

Somerset.—For disposal, owing to vendor having lost her eyesight, good class Day School for Girls. Conducted by present Principal 30 years. Gross receipts past year £900. Number of pupils, 30. Rent of large, well-situated house, with accommodation for boarders, £110. Price for goodwill, school, and household furniture 500 guineas, or near offer.—No. 6,040.

Oxon.—Boarding and Day School for Girls. Established 40 years. Receipts past year £1,620. Net profits £590. 24 Boarders, 30 day pupils. Rent of well-built stone house £75. Goodwill about £500. Furniture at valuation.—No. 6,024.

Kent.—Partnership in Girls' and Boys' Day School. Established and conducted by vendor 12 years. Gross receipts past year £550. Vendor desires a lady, if possible, who could take the Junior Music and Drill. Price for half share to be arranged.—No. 6,014.

"IT IS CLEAR

that a capable agent who has pursued his calling for years will have gathered, by visits, by personal interviews, and by correspondence, a globe of precepts, and that his profession of recommending schools is no idle pretence."

The Journal of Education, June, 1916.

**This is the definition, by a competent judge, of what should constitute a
USEFUL SCHOLASTIC AGENT.**

It may be presumed that no one would knowingly make trial of the services of any other kind, but it is still true that a proportion of Principals are induced to yield to the importunities of plausible and worthless concerns, with the resultant loss and disappointment that might be expected. This is a disillusioning experience for which there is no necessity. The established, reliable Scholastic Agencies are not many in number, and they are well known, and their record and standing easily to be ascertained. As one of these we have a sufficient claim to clients' confidence. If, further, we obtain the greater share of Parents' Inquiries, we also take unusual pains to secure them.

As a result, few days pass without at least one letter of thanks from parents who appreciate the assistance we have given them. Principals are equally generous in expressing their indebtedness.

The following extracts are from recent acknowledgments:—

"When I first came here I spent over £50 in six months, advertising in the leading papers—result, **one** boy. Then I came under your Agency—result, a **steady stream** of boarders every term, more than filling up the vacancies caused by boys leaving. I have already had to open another dormitory, and am on the point of 'venturing' on another boarding house."

"Two years ago you sent me a pupil named ———. Through her parents I have had **four** good pupils this year from four different places, and through two of these I have **five** more coming this term: that is ten pupils from paying **one** commission."

**If you have not yet made trial of our services, we shall be glad
to hear from you, with particulars of your School.**

The Secretary, ALEXANDER MORRISON, 26 Hill St.,
Bedford.

THE INCORPORATED SOCIETY OF MUSICIANS.

FOUNDED 1882.

INCORPORATED 1892.

OBJECTS OF THE SOCIETY.

The objects for which the Society is established are the promotion of whatever may tend to the elevation of the status, and the improvement of the qualifications, of all Members of the Musical Profession, or may aid the musical education of the people.

ADVANTAGES OF MEMBERSHIP.

The inclusion of the names of members in an Annual Register, which is supplied to all Public Libraries and Reading Rooms, for the purpose of affording the public an opportunity of selecting qualified teachers. (The publication of this Register has been suspended for the moment owing to paper and other restrictions, but will be resumed as soon as possible.)

A quarterly periodical called "The Report," in which an account of the Society's work and other matters of interest are recorded, and which is open to members for the discussion of all questions relating to the musical profession.

A Benevolent Fund for members, the Regulations for which have purposely been made as wide as possible in order to meet the many and very varying contingencies which arise from time to time.

An Orphan Fund for the children of musicians, which is open to the dependents of all musicians, whether their parents were members of the Society or not.

Sectional Meetings, which are open to all members in all parts of the country, and at which excellent arrangements are made for the reading of papers and the discussion of matters musical.

Legal Advice on all professional matters; Income Tax Claims; Copyright; The Recovery of Fees, &c.

Registers open to members of "Vacant Appointments" and "Engagements," and for the transfer from member to member of pupils moving to new districts.

Registers of Hotel and other accommodation available for members when travelling to fulfil professional engagements.

LOCAL EXAMINATIONS IN MUSIC.

The examinations of the Society, established in 1884, are carefully arranged in a systematic series of Progressive Grades, embracing a complete course of musical study, and constitute a most valuable guide for Teachers in recording the progress of their pupils.

The Syllabus is prepared by a Committee of experienced Teachers, who are qualified by active practice to judge of the standard which should be attained by pupils in all stages of progress.

A limited number of Prizes and Scholarships are awarded to those presenting exceptional work at the Local Examinations, the Scholarships taking the form of a payment for the further musical training of the Student.

FULL PARTICULARS MAY BE OBTAINED UPON APPLICATION TO THE GENERAL SECRETARY, 19 BERNERS STREET, W. 1.

PHYSICAL TRAINING, REMEDIAL GYMNASTICS, &c.

THE INCORPORATED GYMNASTIC TEACHERS' INSTITUTE.

(Founded 1897.)

Offices: 25 CHALCROFT ROAD, LEE, LONDON, S.E. 13.

THE Institute is an Examining Body of Teachers of Gymnastics, &c., and Fencing, and its membership, obtainable by Examination only, consists of Fellows, Members, and Associates.

The Institute also holds Examinations for Elementary School Teachers' Certificate for Physical Training.

Students are Trained as Teachers and for the Institute's Examinations.

Full particulars of the Examinations, &c., may be obtained from the Hon. Secretary, Mr. T. WILLIAMS.

Principals of Schools and Colleges requiring Trained and Certificated Teachers of Drill, Gymnastics, &c., or Fencing, should apply to the Hon. Secretary.

Other Publications.

Net Ball Rules, 4d.; Game of Net Ball and How to Play it, 7d.; Rounders Rules, 4d.; Scandinavian Dances (Series I and II), 3d.; Music to Dances, 9d. Post free from Hon. SECRETARY.

BEDFORD PHYSICAL TRAINING COLLEGE.

LING'S SWEDISH SYSTEM.

Principal: Miss STANSFELD
(President of the Ling Association of Gymnastic Teachers).

The object of the College is to train Students to enable them to become Teachers of Gymnastics and Games in Schools.

The Course of Training (three years) includes the Theory and Practice of Gymnastics on the Swedish System, Massage and Medical Gymnastics, Anatomy, Physiology and Hygiene, Dancing, Lacrosse, Lawn-tennis, Hockey, and Cricket.

An educational centre like Bedford affords special facilities for practice in Teaching and professional coaching in Games. Swimming and Boating in the summer.

For Prospectus apply—SECRETARY, 37 Lansdowne Road, Bedford.

CHELSEA COLLEGE OF PHYSICAL EDUCATION FOR WOMEN. (SWEDISH SYSTEM.)

Chairman of the Governing Body:
The Rt. Hon. The LORD DOWNHAM.

Three Years' Diploma Course of University Standard. The training afforded to students at this College enables them to secure appointments of the Highest Standard. Applications for admission next term should be made now.

Apply for Prospectus to Miss DORRIS WILKIE (Room 85), S.W. Polytechnic Institute, Chelsea, London, S.W. 3. Tel.: Western 899.

New Session begins Tuesday, September 30th, 1919.

MEDICAL SCHOOLS and COLLEGES.

UNIVERSITY COLLEGE HOSPITAL MEDICAL SCHOOL

(UNIVERSITY OF LONDON),

UNIVERSITY STREET, COWER STREET, W.C. 1.

Telephone: Central 9873.

THE WINTER SESSION will commence on the 1st OCTOBER, 1919.

The SCHOOL is for Final Studies only, and gives a complete curriculum to Men and Women Students for all the Final Examinations.

FEES.—For the Final Course, 80 guineas if paid in one sum, or 82 guineas paid in two instalments of 50 and 32 guineas.

CLINICAL STUDIES.—The Students of University College Hospital have the privilege of carrying out a portion of their clinical studies at the—

NATIONAL HOSPITAL FOR NERVOUS DISEASES, Queen Square;

THE CHILDREN'S HOSPITAL, Great Ormond Street; and

THE CENTRAL LONDON OPHTHALMIC HOSPITAL, Judd Street.

THE ROYAL EAR HOSPITAL, Dean Street, Soho, has been amalgamated with University College Hospital as the Ear, Nose, and Throat Department.

DENTAL STUDENTS (Men and Women) can obtain a complete curriculum at University College, University College Hospital, and the Dental Department of University College Hospital (the National Dental Hospital, Great Portland Street). This Department has recently been reorganized and equipped on the highest standard of modern requirements, and is admirably adapted for the teaching of students in the science and art of Dental Surgery.

SPECIAL COURSES in Operative Surgery (Junior and Senior) are held twice yearly—February and September.

Forty-seven appointments are open during the year to students, and paid appointments to the annual value of over £500.

SCHOLARSHIPS, EXHIBITIONS, and Prizes of the value of over £1,000 are awarded annually.

BUCKNILL SCHOLARSHIP of the value of £135 is tenable for the earlier Medical Studies at University College and for the Final Studies at the Medical School.

GOLDSMID EXHIBITIONS.—Two of the value of 80 guineas each, the subjects of the examination being Anatomy and Physiology, are awarded annually in September.

Provision is made both for undergraduates and graduates, and for research workers in the Graham Research Laboratories.

THE SCHOOL BUILDINGS are among the best equipped in London.

Students can reside at University Hall, Ealing (Warden, W. W. Seton, M.A., D.Lit.).

All further information and prospectus can be obtained from the SECRETARY, and the DEAN can be interviewed at any time by appointment.

Dean, G. F. BLACKER, M.D., F.R.C.P., F.R.C.S. Acting Secretary, G. E. ADAMS.

LONDON (Royal Free Hospital) SCHOOL OF MEDICINE FOR WOMEN (UNIVERSITY OF LONDON),

Special Classes for the Primary Fellowship Examination.

Arrangements and Bursaries for Dental Students. Clinical instruction is given at the Royal Free Hospital, St. Mary's Hospital, and at five Special Hospitals.

WINTER SESSION will begin on Wednesday, October 1st, 1919.

Prospectus and information as to Scholarships, residence in the School Chambers, &c., from the Warden and Secretary, Miss L. M. BROOKS.

LOUISA B. ALDRICH BLAKE,
M.D., M.S., Dean.

L.R.A.M. and A.R.C.M. Teaching
Singing Exams. Special Correspondence Course and personal tuition. Complete preparation. Pupil writes: "Your Course is excellent, and my singing work has greatly improved, thanks to your tuition.—A. F."—Mr. W. LEE WEBSTER, L.R.A.M., A.R.C.M. (Teaching Singing), 22 Lucknow Avenue, Nottingham.

University College Hospital Dental School

(NATIONAL DENTAL HOSPITAL),

Ct. Portland Street, W. 1.

WINTER SESSION commences
1st October, 1919.

This Hospital and School, situated in the centre of a large population, and within a few minutes of University College Hospital, has recently been reorganized and equipped on the highest standard of modern requirements, and is admirably adapted for the teaching of students in every branch of the Science and Art of Dental Surgery.

The mechanical laboratory, conservation room, and X-rays department are replete with all the latest approved appliances.

Students (men and women) enter as students of University College Hospital, and attend classes in Chemistry, Physics, Anatomy, and Physiology at University College, adjacent to University College Hospital.

Each student serves as a dresser in the extraction, anæsthetic, conservation, and X-rays departments.

Three house surgeons are appointed half-yearly.

ENTRANCE EXHIBITIONS of the value of £40 and £20 are awarded each session.

The Composition Fee for the full curriculum of four years, in all subjects required by the Royal College of Surgeons, also for other examining bodies, is 180 Guineas. If desired, this can be paid in one instalment of 62 Guineas and three others of 41 Guineas each.

The Composition Fee for Medical Men, amounting to 120 Guineas, has been arranged, covering the two years' mechanical work, hospital practice, and lectures, required by the curriculum of the Royal College of Surgeons.

The Calendar, containing full information as to lectures, fees, prizes, &c., may be had on application to the DEAN, who attends the hospital on Tuesday mornings at 10.30.

HOLIDAY COURSES.

INTERNATIONAL GUILD.
6 RUE DE LA SORBONNE, PARIS.

JULY. AUGUST. SEPTEMBER.

PHONETICS every day. Conversation, Grammar, French History and Literature.

For Prospectus, apply to the SECRETARY.

LONDON HOSPITAL MEDICAL COLLEGE & DENTAL SCHOOL.

The WINTER SESSION will OPEN on
OCTOBER 1st.

The HOSPITAL is the largest in England, 933 beds are in constant use. Last year, number of in-patients, 17,247; out-patients, 94,554; dental patients, 1,947; major operations, 9,056.

The **MEDICAL COLLEGE** and **DENTAL SCHOOL** are essentially modern, with large Laboratories equipped with the latest and most approved appliances. The Staff is so large as to permit of individual attention being paid to all Students.

RESEARCH FUNDS of over £25,000 give unrivalled facilities for Medical Research.

APPOINTMENTS.—141 Appointments are made annually from Students of the College recently qualified.

SCHOLARSHIPS and PRIZES.—33 Scholarships and Prizes are awarded annually, including four Entrance Scholarships.

Clubs' Union, Athletic Ground, Students' Hostel, &c.

For Prospectus and Particulars apply to the Dean (Professor WILLIAM WRIGHT, M.B., D.Sc., F.R.C.S.), who will be pleased to make arrangements for anyone wishing to see the College.

Mile End, E.

THE ROYAL DENTAL HOSPITAL OF LONDON, SCHOOL OF DENTAL SURGERY

(UNIVERSITY OF LONDON),

A SELECTION FOR 1920.

The Oxford and Cambridge Edition.**RELIGIOUS KNOWLEDGE SECTION.**

The Contents, in addition to other features of the Religious Knowledge Section of the Oxford and Cambridge Edition, include:—
Introduction, embodying Analytical Notes, Characteristics and Peculiarities of the Book; **Historical, Biographical, and Geographical Notes.**

The Text, with Marginal and Foot Notes, suggested by the requirements of the Examinations.

Critical Notes, quoted from the Authorities.

Glossary of Words and Phrases, explanatory of the Text.

**COMPARISON BETWEEN THE AUTHORIZED AND REVISED
VERSIONS, SHOWING REASONS FOR THE CHANGES, &c.
WHERE ADVISABLE, THE GREEK HAS BEEN GIVEN.**

Edited by Rev. F. MARSHALL, M.A.	s. d.
Gospel of St. Luke. Maps of Palestine, Sea of Galilee, Galilee, Jerusalem, Environs of Jerusalem, Temple; Special Introduction	2 3
Acts of the Apostles. Chapters xiii-xxviii. Specially prepared for Students taking the Life of St. Paul. Separate Maps of each Missionary Journey, Voyage to Rome; Geographical and Biographical Notes	2 3
Gospel of St. Luke. (Oxon. and Cantab. Edition)	1 6
Acts of the Apostles. Chapters xiii-xxviii. (Oxon. and Cantab. Edition)	1 6
Book of Genesis	1 6
Book of Exodus. Maps of Palestine, Sinaitic Peninsula, Egypt, Diagram of Tabernacle, Route of the Israelites; Special Historical Narrative	2 3
First Book of Kings. Full Account of Solomon's Reign; the Schism; the Two Kingdoms; Special Maps; Diagram of the Temple	2 3
Book of Ezra	1 6
Book of Nehemiah	1 6
Book of Haggai. Cr. 8vo	1 6
The Prayer Book. With Notes, &c. 176 pp., Cr. 8vo	1 6
The Church Catechism. With Notes and Illustrations. Specially written as a guide for Students	2 3

Examination Papers of St. Luke. In Packet form, loose: 32 Junior Papers, 32 Senior. Each Paper different	1 0
Examination Papers on the Acts of the Apostles. In packet form, loose: 36 Junior Papers, 36 Senior. Each Paper different, covering the whole of the Acts. Per Packet	1 0

SCHOLASTIC APPOINTMENTS

University men and women seeking scholastic appointments should apply to

Truman & Knightley
SCHOLASTIC AGENTS LTD

who introduce ASSISTANT MASTERS AND MISTRESSES to the majority of the leading Public and Private Schools at home and abroad.

Through this Agency, well educated gentlewomen with Higher Local and other good Certificates, interested in children and in teaching, can find congenial work in good high-class Private Schools, where the hours are not excessive, conditions are pleasant, and the holidays long. Salaries range from £60 to £120 or more per annum, with board and residence, according to age, qualifications, and experience. There are also many vacancies for Student, Junior Mistresses, and House Governesses or Duty Mistresses at salaries of from £30 to £60 per annum with board and residence.

There is a separate department for

LADY MATRONS and HOUSEKEEPERS
for schools.

No charge for registration.

::

Moderate commission.

SCHOOL TRANSFER DEPARTMENT.

Ladies and Gentlemen seeking Partnerships in, or to take over schools of their own, should communicate personally with Mr. TRUMAN, who undertakes all negotiations connected with the Transfer of Schools, and who is in a position to offer assistance and sound advice to purchasers, to whom no charge is made.

Offices: 158-162 OXFORD ST., LONDON, W.1

Telegrams: "TUTORESS, PHONE, LONDON."

Telephone: MUSEUM 1136.

BOOKS RECENTLY PUBLISHED

La Grande Guerre. Récits de combattants. Recueil fait et brièvement annoté par A. WILSON-GREEN, M.A. Crown 8vo. 4s net

The range of this volume of episodes of the Great War, written by men who took an active part in the events they describe, is wide and varied. It covers warfare on land and in the air, in France, in Serbia and at Cape Helles; it includes vivid pictures of life in and behind the trenches, in devastated France, in a French hospital, and in a German prison.

Italian Studies. Their Place in Modern Education. An inaugural address by THOMAS OKEY, Professor of Italian in the University of Cambridge. Crown 8vo. Paper covers. 2s net

Professor Okey pleads especially for some interest in *modern* Italy and her people, and desires for Italian studies a due place in the academic curriculum. He claims the interest of the modern student in a language which by its growing importance in practical life, its potency as an instrument for intellectual and spiritual culture, rightly deserves to stand on an equality with any modern language.

Pope. The Leslie Stephen Lecture delivered before the University of Cambridge, 10 May, 1919. By J. W. MACKAIL, LL.D., formerly Professor of Poetry in the University of Oxford. Crown 8vo. Paper covers. 2s 6d net

Science and War. The Rede Lecture, 1919. By the Right Hon. Lord MOULTON, K.C.B., F.R.S. Crown 8vo. Paper covers. 2s 6d net

Advanced Lecture Notes on Light. By J. R. ECCLES, M.A., Head Master, Gresham's School, Holt. Crown 4to. 7s 6d net

This book has been prepared in response to requests for a more advanced course from some who have found the same author's *Lecture Notes on Light* of service. Though the method adopted is, in the main, similar, the present volume approximates more to a textbook.

The Study of the Weather. By E. H. CHAPMAN, M.A., B.Sc. Large crown 8vo. With 56 illustrations. 3s 6d net

A new volume in the Cambridge Nature Study Series.

The Student's Handbook to the University and Colleges of Cambridge. Eighteenth edition. Revised to 30 May, 1919. Crown 8vo. 6s net

The Purpose of Education. An Examination of the Education Problem in the Light of Recent Psychological Research. By ST GEORGE LANE FOX PITT. Crown 8vo. 7s 6d net

A new impression of the second edition, bound in cloth. The volume contains a Preface by Prof. EMILE BOUTROUX, a Reply to Critics, and an additional chapter, *Perfection as the Ideal and Lessons of the War*.

"With the main thesis advocated we are in hearty agreement, and the presentment we have found stimulating in no ordinary degree. The perusal of the book could hardly fail to be profitable to any thoughtful man or woman."—*The Times*

Britain in the Middle Ages. A History for Beginners. By FLORENCE L. BOWMAN, Lecturer in Education, Homerton College, Cambridge. Crown 8vo. With 28 illustrations. 3s net

"Miss Bowman has rightly used contemporary literature as living evidence of the spirit of the times. . . . The book is very attractive and useful and should be widely used."—*The Times Educational Supplement*

Stories from Spenser. By MINNA STEELE SMITH, Fellow of Newnham College. Crown 8vo. With 8 pictures. 3s net

"Another interesting volume of the series so admirably begun by Miss Macaulay's *Stories from Chaucer*. It is a book that will appeal strongly to junior pupils in schools, and will fire them with the desire to read the stories in the original. It is embellished with a few good illustrations." *The Aberdeen Daily Journal*

The North Riding of Yorkshire. By Capt. W. J. WESTON, M.A., B.Sc. Crown 8vo. With 59 illustrations and three maps. 2s net Cambridge County Geographies.

Messrs. RIVINGTON'S LIST OF New and Recent Publications

Their Complete Educational List can be had, post free, on application.

LATIN.

BEGINNERS' GUIDE TO LATIN, being a First Latin Translation Book.

By GEORGE G. LOANE, Assistant
Master at St. Paul's School. 2s. 6d.

This attempts to provide a self-contained guide for the beginner of Latin. The accidence is given in small portions, and the passages for translation contain only such forms as have been so far learnt. The easier idioms are explained from time to time, and are then used in the translation. The whole accidence is thus covered and most of the elementary constructions come in.

ELEMENTARY LATIN TRANS- LATION BOOK.

By the Rev. A. E. HILLARD, High
Master of St. Paul's School, and C. G.
BOTTING, Assistant Master at St.
Paul's School. 2s. 9d.

This is not a book of Selections, but a series of pieces specially written in which the authors try to keep the principle of their other books by not introducing at any stage any construction or form which has not already been learnt. The order in which constructions and forms are introduced is that of the authors' **ELEMENTARY LATIN PROSE EXERCISES**, and parallel references are given. The subject-matter drawn upon for the pieces is mainly Roman History, and almost from the start an attempt is made to give a "continuous" narrative in each piece instead of separate sentences.

JUNIOR LATIN PROSE.

By H. J. DAKERS. Crown 8vo. 4s.

The aim of this book is to make the transition from the drill of detached sentences to the translation of simple stories as speedy as possible. There are a limited number of exercises of Sentences to give practice in the more important rules of Syntax. It is suggested that the best way of using these is to work through them orally with the pupils. These are followed by 130 short pieces, historical or mythological for the most part, for translation into **Continuous Latin**. The exercises and the **Pieces for translation** are all freely supplied with references to the **Syntax**, which it is hoped may thus be absorbed in use. Many of them have already been practically tested in class teaching, and all of them were written in Latin before the English took its final shape.

LATIN ELEGIAIC VERSE COM- POSITION.

By ROY MELDRUM, Assistant Master
at St. Paul's School. 5s.

This book of 208 pieces puts into practice the use of Latin Repetition. The selection of Latin and English passages has one common theme, so that the pupil may have a chance of collecting his thoughts to treat one theme adequately, and of becoming familiar with one set of words at a time, instead of passing hastily and in confusion from one set to another.

ELEMENTARY LATIN ELEGIAIC VERSE COMPOSITION.

By ROY MELDRUM. 2s. 6d.

Latin Version to each of the above:—
Latin Elegiac Key, 6s., postage 2d.;
Elementary Key, 5s., postage 2d.

FRENCH.

By A. R. FLORIAN,
Head Master of the Priory School, Shrewsbury.
GRAMMAR of MODERN FRENCH

3s. 6d.

This deals with the French language as it is written to-day, and covers all the ground necessary for a good knowledge of French. The examples are mainly taken from modern authors, and their names are appended to the quotations.

ELEMENTARY GRAMMAR OF MODERN FRENCH.

2s. 6d.

This is an abridgment of the above Grammar suitable for pupils during their first three years of French.

FRENCH EXERCISE BOOKS.

[Ready shortly.]
Forming companion volumes to the above
Grammars.

POÉSIES, FABLES ET CHANSONS for REPETITION.

With Notes, Exercises and Vocabulary
for use in Lower and Middle Forms.
Edited by BASIL READMAN, M.A.,
Assistant Master at Eton College.
4s. 6d.

SENTENCES FOR TRANSLA- TION INTO FRENCH, ILLUS- TRATING GRAMMATICAL RULES.

For Middle and Upper Forms. By
A. W. STREET, B.A. (Lond.) and
ARNOLD LEE, B.A. (Camb.), Modern
Language Masters in King Edward's
High School, Birmingham. 2s. 6d.

LE FRANÇAIS PAR L'EXEMPLE ET LES TEXTES.

Par C. L. ALBERT BONNE, Professeur
certifié de langues vivantes (Ministère
de l'Instruction Publique), French
Master at Bradford Grammar School.

LIVRE IV. *La Famille Brison, Contes
et Récits.* 2s.

This forms an introduction to Conversational French as well as a revision book. While the book contains no formal grammar, the lessons have been composed with a view to illustrate grammar rules. A large number of everyday idioms have been introduced.

By F. VICTOR MASSARD,
Senior French Master of Hamilton Academy, N.B.

A FRENCH GRAMMAR.

For pupils who have been studying
French for two or three years.

By F. VICTOR MASSARD and CHARLES
DURNO, M.A., Assistant Master at
Hamilton Academy. 4s.

A FRENCH EXERCISE BOOK,
forming a companion volume to the above
Grammar. 2s. 6d.

MATHEMATICS.

SCHOOL MECHANICS.

Part I. **School Statics.** 6s.
Part II. **School Dynamics.**

[Ready shortly.]

By W. G. BORCHARDT, M.A., B.Sc.

The earlier chapters of this book are suitable for beginners at the subject, while the later ones will be found sufficient for the Higher Mathematics for entrance to Woolwich, and for the Senior Cambridge Local Examination.

The Examples are almost entirely numerical, and have been made as *practical and interesting* as possible.

There are numerous Diagrams and the Principles of the subject are *illustrated by experiments*. It is so arranged that the practical work can be performed either by the student or the teacher. Sets of extra Laboratory Problems and Test Papers are given at the end of each part. In Part II (School Dynamics) chapters are given on Simple Harmonic Motion and Rotating Bodies.

ELEMENTARY CALCULUS.

By C. H. P. MAYO, M.A., Senior
Mathematical Master at Harrow School.
With numerous Diagrams. With and
without answers. 10s.

The aim of this book is (1) to be thoroughly modern and teachable; (2) to develop the rules and processes of the Calculus, and at once to show their applications by interesting examples.

CONTENTS: Definitions and Limits—Differential Coefficients—The Use of a Differential Coefficient—Maxima and Minima Values—The Functional Notation—A Function of a Function—Circular Measure—Polar Co-ordinates—Second and Higher Differential Coefficients—Further considerations of Maxima and Minima Values—Small Errors and Approximations in Measuring—The Differential of an Arc of a Curve—Curve Tracing—Rolle's Theorem—Integral Calculus—Application of the Integral Calculus to Physical Problems—Reduction of Integral to Standard Forms—The Length of an Arc of a Curve—Solids of Revolution—Successive Integration—Further Application of the Integral Calculus to Physical Problems—Differential Equations—Cusps, etc.

RELIGIOUS INSTRUCTION.

OCCASIONAL NOTES.

ON July 31 the London County Council presented to the King an address of congratulation on the conclusion of peace. The King's gracious and comprehensive reply touched upon the numerous activities of the Council, and included the following reference to the work of the London Education Committee:—"I am convinced also that nothing is more essential to national prosperity and happiness than education. The potentialities—physical, mental, and spiritual—of every member of the community should be developed to their fullest extent. A true education would embrace all these, would cultivate them all in due proportion, and would transform our national life in a generation. I appeal to you, and through you to all Education Authorities, to keep this great ideal continually in view." Such earnestly expressed sympathy should do much to encourage Local Education Authorities, and to stimulate them, their teachers, and their officials in the important work of providing all possible facilities for the education of the children and youths under their care—work which will contribute more than anything to the national well-being.

MR. FISHER'S remarks at Blackpool at the beginning of the month have considerably cleared the air. He did not, it is true, announce the appointed day for the Continuation School clauses of his Act, and, until that is done, the friends of the measure may not fold their hands. But he did say that he thought it would be safe to ask the Local Authorities to bring the change into effect by the autumn of 1921. The cautious phrasing

was probably dictated by a desire to see what the Local Authorities and the general public have to say to the suggestion. The general public have already made up their minds that this thing must be, and the Local Authorities will agree that the two years' interval gives them sufficient time to make their arrangements. The opponents of the scheme remain to be reckoned with. It should not be a difficult score to settle. The opposition has been mainly underground. We can call to mind no important section of the nation which openly dissents. Now that the President has taken his stand, there must be an end to the hostile insinuations and suggestions to which we have referred from time to time in this column. So we shall expect when Parliament reassembles to hear that August 1, 1921, is the appointed day. Then—and, as we hope Mr. Fisher realizes, only then—can the laborious task of preparation be begun in earnest.

WE have received a memorandum, comparing the salary scales and the present actual remuneration of teachers, in certain administrative areas. It appears from these figures that, under present conditions, scales of salary afford very unreliable information as to the amounts paid. In nearly all the areas to which the return relates the scale of salaries is approximately the same, but the differences in the emoluments actually paid to teachers of the same grade and period of service are remarkable. For instance, a certificated assistant master, with ten years' service, receives £187 in one area and £221 in another; while, if certain proposals now under consideration by a neighbouring Authority are adopted, he would be paid in that area £251. The salary of a certificated assistant mistress with, say, five years' service, is £126 in a county and £171 in an urban district within the county. The salary paid to assistant teachers invariably determines the remuneration of head teachers, and the lack of anything like uniformity of treatment is due to independent action on the part of Authorities in the attempt to satisfy recurrent demands. That teachers in one area are much worse off than their contemporaries in a neighbouring district naturally causes unrest and agitation.

IT can be only with reflections of unqualified regret, however, that those concerned in the business of education hear of strikes on the part of teachers in different parts of the country. We stand, as always, for the full recognition of the value of the teaching service and for the adequate remuneration of those who enter it. But we do not believe that it is consistent with the dignity of the profession, nor in accordance with the ideals of conduct and discipline it should represent, for teachers, as a body, to attempt to enforce their claims. That the claims may be legitimate does not, in our view, affect the wider issue. The President of the Board of Education has done more, perhaps, than any of his predecessors to provide for better conditions and prospects for all grades of teachers. Unfortunately, of course, his efforts to establish better salary scales have been complicated by the abnormal economic conditions due to the War. The cost of necessities has more than doubled, and the rewards of manual labour have been correspondingly increased; the lot of the policeman has been substantially improved; Civil Servants are receiving a liberal War bonus; and the proportion of those with incomes beyond

the "dreams of avarice" shows a remarkable advance. Mr. G. W. Currie, M.P., for instance, has informed us that, while in 1909 there were 11,000 persons with incomes of £5,000 and over, the number is now 18,000. It is only exceptionally, no doubt, that the claims—or, we may say, the needs—of teachers have been admitted in equal proportion to those of other servants of the public. Consequently, the position of affairs is extremely unsatisfactory, and we are glad to note that the President of the Board is now taking appropriate action.

THE Joint Standing Committee of Representatives of Local Education Authorities and of the National Union of Teachers now set up under the auspices of the Board of Education "to solve the salary problem in public elementary schools by agreement on a national basis" is, in fact, a Joint Advisory Committee. The results of its proceedings will be looked for eagerly, not only for economic reasons, but also from a desire to know how far a merely advisory committee, even with the influence of the Board behind it, can succeed where many teachers would have preferred a Whitley Council. The Joint Standing Advisory Committee will consider questions and differences between the Committees and the teachers, act as conciliator and arbitrator between the same bodies, or select such intermediaries, and co-operate generally in matters affecting elementary education. Finally, various county and municipal authorities have already set up similar committees in their own areas, with the difference that in these cases the personnel of the teacher side usually includes representatives of teachers engaged in higher education.

OF these local advisory committees probably the most closely watched will be those in Manchester and in the West Riding of Yorkshire. The scope of the latter, which is open to criticism, and for this very reason is interesting, includes general principles relating to curriculum and organization of schools: the connexion between schools and colleges of different types—elementary, secondary, technical, continuation, training, and University; salaries; attendance of children; and planning and equipment of school buildings. It differs from many such committees in that its constitution—8 elementary, 4 secondary, 4 technical, &c., members on the teacher side, against 8 members of the Education Committee, plus 4 experienced educationists on the other side, instead of the usual equality of numbers—gives a preponderance to the presumably professional element. Not all such committees are, however, so fully representative of all types of education. Bournemouth has formed an Advisory Committee for elementary education only; in Durham, the secondary-school teachers have accepted such a committee and actually nominated their representatives, whereas their elementary-school colleagues are standing out for a Whitley Council. Advisory committees are, of course, frankly a compromise. It remains to be seen how far the moral weight behind their recommendations can compensate for their lack of the "obligation of observance" which their rivals, Whitley Councils, would possess.

THE Board of Education's Circular 1124, dated August 2, sets forth once more the extreme gravity of the position as regards new entrants to the elementary

The Shortage of Teachers.

teaching profession. In January 1915 (the latest date for which the figures are available) there were about 150,000 adult teachers, and, as it is calculated that the normal annual "wastage" is about 6 per cent., 9,000 new entrants should be annually forthcoming. Yet the figures for 1918 were considerably less than 6,000. But this is by no means all. The demands of the Act of 1918, including the abolition of exemption from attendance under fourteen years of age, and the replacement of teachers withdrawn for work in continuation, secondary, and nursery schools, will, if properly met, mean an additional 6,000 teachers per annum for fifteen years to come. The total number of entrants required, therefore, unless the Act is to be more or less a dead letter, is about 15,000, or more than double the number now supplied. One of the Board's objects in issuing the new Circular is to emphasize anew the different spirit which, after allowance has been made for diverse conditions, seems to animate different Local Authorities in regard to this all-important question. In particular, London, and the county boroughs, boroughs and urban districts on the London border, Lancashire and Cheshire, and Birmingham and its neighbourhood, draw the main part of their staff from other parts of the country, themselves contributing only a miserably inadequate supply of new entrants. Again, why should Sheffield's percentage be four times that of Leeds, Birkenhead's four times that of Stockport, &c.? All the evidence goes to show that some authorities have been thoroughly slack in the matter of the supply and training of teachers.

THE fall in the number of candidates for the teaching profession has, as the Board's figures show, been going from bad to worse for ten years past. When one looks back over those years, there is no need to search for the causes of the inadequacy of the supply. There has been only one cause worth mentioning, and that is the unattractiveness of the teaching profession as compared with other openings for promising boys and girls—boys especially. So much has this cause operated that secondary-school masters have commonly been unable to reconcile it to their consciences to recommend an able boy to become a teacher. But the present outlook is of course distinctly brighter. Salary scales have improved and are improving; and the existence of a liberal pension scheme will go far to influence parents who are at the stage of finding an opening for a boy. It should at this moment be a chief care of every Local Authority, including Part III authorities (to which, by the way, the Board address a pointed reminder), to do everything possible to bring to the notice of parents the improved prospects now open to teachers, and the facilities offered to assist boys and girls to become teachers. We would add that any Authority which does less than its duty in helping young teachers through the expensive stage of college training ought to be drastically penalized. The position is very critical. At present we are far from holding our own. As for new developments, the Act of 1918 will be reduced to waste paper unless this question of questions is boldly and thoroughly tackled.

The Duty of Local Authorities.

THE question of *real* music teaching in schools is once more brought into prominence by a circular letter signed by the members of the Committee of the

The Teaching of Music in Schools.

Union of Directors of Music in Secondary Schools, a copy of which has been sent to all preparatory schools. From the same Committee an appeal was made some years ago to establish sight-singing classes in preparatory schools, and, although some schools took up the subject with enthusiasm, the results, on the whole, were disappointing. Parents themselves are, we fear, too often the stumbling-block on the road to real reform in the matter of musical education. Immediate results are expected from all who learn music. The boy or girl must have a piece or two to play at the end of the first term, and the unfortunate music teacher resorts to "cramming" methods, at the very time when a real foundation of musical education ought to be laid, *i.e.* between the ages of nine and thirteen. True musical education should comprise mastery over the elements of notation and all things connected with it, the awakening of the aural faculty to the fundamentals of time and pitch; sight-reading should form a part of every class or individual lesson, and voice production should be taught in the singing class. Music is, as a language, universal, and we should, at any rate, see that its alphabet is learned and its first principles properly applied during the impressionable years of school life.

WE have referred on a previous occasion to the position of the School Medical Service under the Ministry of Health, and expressed the hope that in connexion with the schools the new Ministry will discharge its responsibilities in consultation with, and through, the Board of Education. The draft regulations for the training of health visitors, issued by the Board of Education, implies that concerted action is contemplated. The Board understand that the Ministry of Health have decided to lay down the general principle that all persons hereafter to be recognized as health visitors should have been through a special course of training approved for the purpose. They recognize that existing health visitors cannot reasonably be required to undertake training, though a number may be desirous of doing so, and may probably be granted facilities for the purpose by their Authorities. New *entrants* to the profession, however, will be expected to undergo an approved course of training, the grants available for Local Authorities being conditional upon the employment of qualified persons. It is proposed to make provision for the recognition of two types of health visitor—namely, those who have taken a full course of two years' duration and persons already possessing a substantial knowledge or experience who have been trained for one year. The school health visitor does not at present receive more than a modest recompense for her services. When qualified, as proposed, she will be entitled to expect a rate of remuneration at least equal to that of a certificated teacher.

Psychological Tests and Examinations.

THE question of substituting psychological tests for examinations is again brought to our notice by Dr. I. L. Kandel's pamphlet on "Education in Germany during the War," a document just issued by the United States Bureau of Education. So vitally are the schools of Germany connected with the State that the recent upheaval could not fail to bring their educational system under the closest scrutiny of the

nation and its leaders. Attention has mainly been directed towards the breaking down of the barrier between the elementary schools and the higher schools. The attempt to remove it altogether by the establishment of a common school system, as in America, has failed, and, by way of compromise, the brightest children in the elementary schools are being given, as in England, a free secondary-school training. But the method of selection is not by scholarship examinations, as with us, but by a system of psychological tests applied by skilled psychologists. We are not told precisely what the tests are: we are simply told that they test "attention, concentration, memory, wealth of ideas, judgment, and observation"—a description vague enough to fit anything. A simple composition exercise, rightly chosen, tests all these, and more. As, however, all other secret tests of intelligence have ultimately turned out to be nothing but an extension of Binet's intelligence scale, we may safely assume that these German tests are of the same kind. We may further assume that the children so selected are few in number, for the tests have to be given individually, and each case takes up from half an hour to an hour, and there were apparently only two psychologists at work in 1917, selecting the specially gifted children in the whole of Berlin. Dr. Kandel does not tell us what has happened since the Armistice. We shall probably hear more about the psychological tests; we shall certainly hear more about the *Einheitsschule*, or common school movement.

FOR several years before the War swimming was gaining steadily in favour among both sexes, and during the War splendid progress was made by women swimmers, especially in the art of life-saving. With the resuscitation of swimming clubs following on demobilization, the existing facilities for swimming are likely to prove inadequate in most towns. If swimming is to be included in school courses of physical instruction, as provided for by the Education Act of 1918, it seems probable that many Local Education Authorities will have to take advantage of the clause in the new Act which empowers them to establish school swimming baths. In such cases the Authorities concerned cannot do better than consult the pamphlet on "School Swimming Baths," compiled and published by the Education Committee of the Amateur Swimming Association (obtainable on application from Mr. F. Baxter, 46 Birch Lane, Longsight, Manchester). Two designs for baths planned by specially qualified architects are included in the pamphlet, and suggestions are made as to situation, accommodation, oversight, and so on. It is a great benefit for a school to possess its own bath, for comfort and efficiency alike demand that instruction of children should not be carried on in the presence of the bathing public.

EXHIBITION OF FRAMED WALL PICTURES.—It is proposed to make an exhibition of framed wall pictures a special feature of the North of England Education Conference which is to be revived at Southport on January 8, 9, and 10 next, when Mr. Fisher will give the inaugural address. The Corporation Art Gallery will be available for the display of pictures, and, as in the past England has been so largely dependent on Germany for its school pictures, it is hoped that British firms will take the opportunity of showing of what they are capable. Full particulars can be obtained from Mr. Wm. Allanach, one of the Joint Honorary Secretaries, at the Education Office, 2 Church Street, Southport.

THE GIRTON JUBILEE.

THE Jubilee celebrated at the close of last month, July 26, at Girton, earliest of women's colleges, marked the culmination of an era. Coinciding, as it aptly did, with the national peace celebrations, it was itself a manner of celebration of peace and victory. The history of women in the past fifty years has been essentially one of struggling endeavour towards wider opportunities; that of the first women's college is an outstanding episode, perhaps even the main thread, in that history. And success, even recognition, has crowned the endeavour. In place of a little group of students sheltering at Hitchin, admitted on sufferance and by the kindness of individual professors to the University examinations, there is the large College at Girton, two miles only from Cambridge, with the sister College, Newnham, yet more nearly within the precincts. Their students have the right, by University decree, not only to take all Tripos examinations, but also to have their names published in the class lists—the actual degree alone is lacking.

The celebrations were in the form of a garden party in the afternoon and a dinner in the evening—the first for friends and visitors as well as students, the latter confined to former students. The Queen graced the occasion, not indeed by her presence, but by a message of felicitation; the Minister of Education, Mr. H. A. L. Fisher, as also the Vice-Chancellor of the University, attended the garden party and made addresses. Mr. Fisher's speech struck a note of happy augury. After dwelling upon the benefits the country had received from women's colleges, the raising of the standards in secondary education, the leadership and training for those engaged in war work, the preparation for new civic responsibilities, he expressed the hope—diplomatically veiled, but unmistakable—that the Universities of Oxford and Cambridge would shortly confer degrees upon women. Women had inexplicably, to the mind of this Oxford scholar, chosen Cambridge for their first foundation. Oxford might take a sweet revenge by being first to admit women to degrees and full membership.

The hope that the two older Universities, whichever of them be first in the field, may indeed, this year of the first women's college jubilee, convert their hard-won recognition of women students into full and free welcome is one that all forward-looking men and women must entertain. Undoubtedly the future of the women's colleges is in the balance. At this turning point in their history, when they are looked to as never before to guide and train the young womanhood of the nation, it is to them a momentous question whether they are to take up their responsibilities with enlarged authority and new dignity or must still tarry on sufferance at the confines of the ancient seats of learning.

The material needs of Girton and other women's colleges, drawing neither from old endowments nor from Government grant, dependent in the main upon very moderate students' fees, were also touched upon by Mr. Fisher in his address. The speeches at the more intimate reunion of *alumnae* at the dinner omitted consideration of future needs—moral or material—to dwell upon achievements of the past and upon the links that knit together guests of widely different years and occupation. The Mistress, Miss Jex Blake, was greeted with a prolonged ovation that testified to the warm affection felt for her by those many generations of *alumnae* who had known her during her long association with the college. She dwelt upon the opportunities of usefulness afforded to students during the war, touching in this connexion upon the services of Mrs. Ayrton, whose scientific discoveries had enabled her to construct an invaluable fan for the dispersal of poison gas. She struck one note of sadness, reminding the listeners of the loss of another eminent science student, Miss Ethel Sargent, whose researches in botany had won for her the distinction of addressing the British Association, as also that of being chosen Honorary Fellow of the College. In conclusion, she expressed the feelings of all the guests by thanking the actual students, up for the vacation term, who

were present not as diners but as attendant "orderlies," and whose voluntary and very efficient services had made entertainment on so large a scale possible and even easy.

The chief guest of honour, Miss Lumsden, last survivor of the little band of Girton pioneers, and pioneer again in the field of secondary education, recalled the early days at Hitchin—her clear and melodious voice belying her seventy-eight years and testifying to the health-giving power of useful energy and sustained interest in life. Time did not admit of speeches from the many distinguished women who were present from subsequent years: Miss Maynard, of Westfield College; Miss Dove, of St. Andrews and Wycombe Abbey (Mayor of her township, had the votes of her town been able to appoint her); Mrs. S. Arthur Strong (Eugénie Sellers), of the British School at Rome, holding the only real Fellowship the College can as yet boast; Mrs. Ayrton, already mentioned; Miss A. M. Anderson, O.B.E., of the Home Office... it becomes invidious to enumerate. The task of proposing the health of the Mistress was very fittingly entrusted to one of a younger generation, Mrs. Runciman, and a last toast to the Old Students, proposed by the present senior student and leader of the "orderlies," closed the festivities for the evening. On the Sunday a commemorative service was held in the Chapel.

The note sustained throughout was that of generous welcome, with a lavishness of hospitality the more marked by contrast to the somewhat Spartan economy ordinarily exercised perforce by the College. The occasion was felt and treated as one of rejoicing, and not, as anniversaries so often are, one for enforcing claims. Girton students have indeed shown themselves ever ready to recognize to the full capacity of their generally limited means the claims of their College. Those present at this Jubilee were unwilling to let so momentous an event pass without at least some slight expression of gratitude, and decided to make a presentation to the Mistress, inviting all old students to join with them in the gift, of a sum to be added to the nucleus in hand for a studentship, or in whatever other manner she should think fit for the benefit of the College.

THE BOARD OF EDUCATION AND COMMERCIAL INSTRUCTION.

THE Board of Education, by issuing Circular 1116,* a Memorandum on Commercial Instruction in Evening Schools, have for the first time given a lead to those engaged in commercial education. The contents of the Memorandum seem to justify the use of "education" rather than "instruction." "Since commerce is a department of human intercourse, the study of commerce is a study of one aspect of society. Commercial science, therefore, is a social science, and its study has the advantage of being at once scientific in method and humanistic in content." Here, then, is the opportunity for education, and, if instruction only is given, then teachers, inspectors, and organizers are at fault.

The Memorandum lays down the principles upon which courses should be founded. They should be designed to consolidate a knowledge of the fundamental arts of calculation and expression, whether in speech or writing, and to train students more thoroughly in the use of books and other instruments of knowledge; for, if proper subject-matter be chosen for calculation, composition, and reading, and suitable methods are followed, students will be trained to think effectively upon matters relating to their daily working life. The second aim is the acquisition of such practical knowledge and skill as can be acquired in a school and cannot be acquired

* Memorandum on Commercial Instruction in Evening Schools. Board of Education Circular 1116. (9d. net. H.M. Stationery Office, Kingsway, W.C.2.)

completely, if at all, during the daily routine of commercial life. The third object is to teach students to think effectively about commerce, and, that this may be done, the definite study of commerce as a whole must be introduced.

Following the statement of aims comes a classification of courses according to grade, into Junior, Senior, and Advanced, followed by curricula appropriate to the different grades. In these there is little that is new; the usual subjects appear grouped and stressed according to the purpose of the particular course. Schemes of work complete the Memorandum.

In the Junior Course, English takes the foremost place, and rightly; it has a good claim for recognition in both senior and advanced courses. "Those have the best command of English who from birth have lived in an environment where accurate language, a copious vocabulary, a pure pronunciation, and the habit of reading are characteristic. All that can be done in a school is to reproduce these conditions, so far as is possible. The pupils should be enabled to read good English, to hear good English, and should be practised with a view to their speaking and writing good English." "One cannot write or speak worthily, however, without having something to say. And the stock of knowledge possessed by the average student in a junior course is comparatively small. The basis of the study of English in an evening school, therefore, should be the study of a book or of books."

Arithmetic, bookkeeping, geography, and business economics find their places in nearly all the courses. Arithmetic is satisfactorily cut down to necessary calculations, the applications of proportion being specially stressed. Three methods of approaching the principles of accounts are noticed. The first, that of journalizing all transactions, is out of date, and teachers who use it for anything but an illustration of the historical development of the subject must surely be back numbers. The second approximates most nearly to the actual order in which the records of a transaction are made in the books of a firm. The third goes directly to the heart of the matter, and, when the principle is appreciated, adds the practical details of the various stages in making the formal record. The detailed treatment suggests that the Board's Inspectors have found good reason for their existence.

The paragraphs on Business Economics are among the most suggestive in the Memorandum, and every one engaged in commercial education would do well to read them carefully; it is impossible to do justice to them in a few lines. A business economics syllabus must depend on local conditions—and on the teachers. Educated teachers, with experience of, if not of actual working experience in, commerce are a necessity; they must be trained, and, when found and trained, they must be retained; lucrative appointments in commerce must not be more attractive than the teaching service of the country.

SCHOOL PUNISHMENTS.

By W. F. BUSHELL.

II.

THAT brings me to another point. All masters should be responsible for their own punishments; they should very rarely give them into the hands of others. There are still schools where punishments, like extra drills managed by the school sergeant and extra schools run by the different masters in turn, do exist; and these functions contravene what I lay down as my next rule, that a master should be responsible for his own punishments. This I hold for two reasons: first, for the sake of the boy; and, secondly, for the sake of the master.

First, for the sake of the boy. Surely a boy will see that the master is really in earnest if he is prepared to sacrifice his own leisure and really take trouble by keeping the boy in or otherwise managing the punishment himself. Surely he will see that what the master really cares about is his (the boy's) interests? In such a case, can anyone doubt the

success of the punishment as a preventive factor and its consequent effect on the boy? Secondly, for the sake of the master; surely it induces a much more pastoral attitude on his part? It is so easy to say that the boy shall attend three drills on three successive days; it means only a word to the school sergeant perhaps and then the responsibility is his, but does it give the least chance to that imagination in punishment which I have so strenuously advocated? Functions like extra school for turned work, unless very carefully used, are liable to equal abuse; for surely a boy's work is often bad because either he is bottom of his Form and is hardly up to the standard or because he has failed to understand something in the written or oral exercise he has had to show up. Certainly bring the boy in; but let the master bring in himself as well, and go through the work again and again until the boy does understand, and until he can and has reproduced it to the master's satisfaction.

Turned work must always be said properly; no master would have it otherwise. But it is often unjustifiable to put a boy into an extra school at no trouble to ourselves, for, after all, we must not forget that the boy's failure may be due to the imperfection of our own teaching. This point—*i.e.* the responsibility of a master for his own punishments—I have treated at some length, for I believe it to be a doctrine which, if universally adopted, would do a great deal ultimately to lighten the burden of punishments in all schools, and it is probable that the list of punishments is by no means a bad criterion of the efficiency of the school. But, answers the critic, this doctrine that, as a general rule, the master should be responsible for his own punishments, implies that he has sufficient leisure to do so. It is notorious that a schoolmaster tends to be overworked, and even though such a plan may be ideal, it is impracticable. To that I would answer that one of the best and busiest schoolmasters I have known held to this doctrine and carried it out most effectively; there were certain times when boys would come to him for turned work and the like, when he was perfectly prepared to devote himself to the explanation of difficult work for the incapables. And, even though it is, as I have said, notorious that a master has plenty to do, yet it is equally notorious that it is the busiest man who can find time for something fresh. I am sometimes appalled at the end of the day to think of the amount of time I have wasted, and I never think I am really busy until I spend the odd five minutes before dinner in tidying my books, an occupation for which, in my less busy periods, I seem to find no time. It would be wrong to deceive ourselves. There is always time to hear turned work or go through some work out of school if we want to do so.

How about equality in punishments? Justice is, of course, absolutely essential, and if any feeling of injustice has been left in a boy's mind it is almost certain that the punishment will have done far more harm than good. In the bigger things, if they occur, it is doubtful whether variability in punishment is possible or desirable. Of course, there is much apparent variability depending on the boy's position in the school; but, granting the existence of this, and granting the boy's perception of this, there is probably seldom a case among bigger things where injustice rankles. But in the case of smaller things, what I have called the secondary punishments, I do not believe that variability matters nearly so much. Boys unconsciously recognize that the punishment is being made to fit the crime, and, above all, to fit the individual. Of course, for the master who is really unjust I have no sympathy, and the sooner he deserts his profession the better.

Then what is the use of the exhortation, the so-called quiet talk? It depends, of course, on the exhortationist. The master who maintains his discipline by telling the boys, as Mr. Benson says, to remember what their mother would say if she saw them, would certainly do more harm than good, but the ordinary private exhortation by a sensible man, the "dressing down" call it if you will, is worth a good deal. The memory of boys for such things is almost phenomenal, and I would say that there are many readers

of this who can well remember every word that was addressed to them as boys, in some such talk in the privacy of the master's study. In the comparatively small world of school there are few events which leave such an impression upon a boy's life, an impression which he will very often not show, but an impression which will all the same be there. Here, as always, personal influence must count for much, and a word in season is a weapon in the hands of a house master whose value can hardly be exaggerated.

There is another question, the undetected fault—or, better still, the fault that has been traced to one of twenty or thirty boys, of whom it is impossible to make one show up. Are we justified in punishing the whole in lieu of the surrender of the offender? The mere threat is generally sufficient to make the offender declare himself, but can we justify the threat? If the worst comes to the worst are we prepared to justify our punishment of the whole body, 90 per cent. of whom are probably innocent? Thring, of Uppingham, one of the greatest of head masters, was, it is said, prepared to justify it; in fact, he went further, and even if he knew the culprit would sometimes punish the whole Form for the fault of one, holding that the public spirit of the Form should have been such that the fault should have been impossible. This was in many ways a fine attitude to adopt, and was probably the best way of inculcating the public spirit he desired; but the other question, the question of virtually compelling a boy to own up by threatening otherwise to punish his friends is on a different basis, as there are elements of injustice and meanness attached to it. On the other hand, the apology for it seems to me to be mainly on the score of necessity, while at the same time there is often a bond of tacit understanding that the boy shall get a lighter punishment. Such a bargain works well on the whole, and is a gain to both sides. One must remember, however, that such general punishments undoubtedly cause irritation, and by this I mean undesirable irritation; the innocent are rarely prepared to suffer for their brethren and companions' sake, and I suspect that this irritation is caused by the feeling that the punishment is to some extent unjust, which in fact it is. The inculcation of a public spirit by holding all responsible is ethically based on high principles, but obviously discretion must be employed. High principles are to some extent a result of growth, and thus must be fairly recognized.

My last point is the question of punishment as it affects senior boys, such as school monitors. Some time ago we were reading some correspondence in the halfpenny press as to the expulsion of a school monitor who had been detected in getting out of his house at night. On that particular case I cannot, of course, say anything, as I do not know the circumstances on which the school authorities, rightly and properly, said nothing. Dignity is always better than publicity. What, however, the correspondence really brought to light was the intolerable view of the functions of school monitors which was apparently held by some of the outside public. They were said to be officials appointed to spy on the boys in order to save the masters trouble. Such a belief shows little knowledge of the origin of the system.

Well, we have got to admit, with this case and perhaps others in view, that school monitors will sometimes do wrong. It is necessary, however, to remember (1) that the most extraordinary care must be exercised in creating school monitors; (2) that there are schools where the monitorial spirit is such that practically not even the small offences will be committed by them; (3) that this is the ideal for which all schools should strive; (4) that it should be made absolutely clear to all boys that they are being given these responsibilities, and the consequent privileges, because it is felt that they will act in complete harmony with the more vital wishes of the head master of the school.

I have an enthusiastic belief in the advantages to be derived from secondary education, but I have a still more enthusiastic belief in the special character training that it gives to a monitor, and I think it is imperative that it should be made clear to such that, to whom much is given,

from them much is expected. It should be regarded as impossible that they should do wrong, and it should be regarded as impossible that they can be punished. Such a belief, freely expressed, as to the essential integrity of human nature, will go a long way to foster it, and will, I aver, meet with a response that even the pessimist may admire.

If something does go wrong? Well, we must admit that the school has not reached its ideal, but let us recognize the lapse as an eccentricity on the part of the culprit. Not an eccentricity that can be passed over, for in such a case the monitor must be held more blameable than the ordinary mortal; but let us not condemn the whole body of monitors or withdraw one iota from the position of belief in monitorial nature. And I doubt if any satisfactory punishment in such a case is possible except by deprivation of office.

(Concluded from page 534.)

PERSONAL PARAGRAPHS.

THE death of Principal T. F. Roberts, of the University College of Wales, Aberystwyth, at the age of fifty-nine years, on August 4, will be deeply regretted by all interested in education in the Principality. The late Principal was a native of Aberdovey and was educated at the local elementary school and afterwards at the Towyn Academy. When only fourteen he entered Aberystwyth College—the youngest student in the annals of that institution. In 1877 he was awarded the first open classical scholarship of £100 per annum tenable for five years, awarded in the joint examination of Lincoln and St. John's Colleges, Oxford, and took up residence at St. John's. He passed through a distinguished career at Oxford, taking First Class Honours in Classical Moderations and First Class Honours in Lit. Hum. In 1883, when only twenty-three, he was appointed the first Professor of Greek in the then newly-established University College of South Wales and Monmouthshire, Cardiff. During his tenure of office at Cardiff he took an active part, not only in promoting the welfare of the College, but also in furthering the interests of Welsh education generally. His work at Cardiff will be long remembered with affection and pride by the students to whom he imparted through the medium of the classics something of that selfless devotion and idealism which was so strongly characteristic of his rare personality. In 1891 he was appointed Principal of the University College of Wales, Aberystwyth, on the resignation of Principal T. C. Edwards, and retained this position up to the time of his death. Principal Roberts has been a most prominent figure in Welsh educational movements during the past thirty years. Having passed through the general experiences of the youths of Wales in their quest for knowledge, he had a keen insight into their needs, and was thoroughly conversant with the difficulties to be overcome in the provision of facilities to meet the growing demand for higher education. He took part in the conference which drew up the Charter of the University of Wales. He was the first Chairman of the Cardiganshire County Governing Body of Intermediate Schools, and was a member of the Cardiganshire Education Committee, and of the Council of St. David's College, Lampeter. He was also a member of the Council of the National Library of Wales, of the Executive of the Central Welsh Board, and of the Joint Board of Legal Education for Wales.

AND AT GLASGOW AND BOMBAY.

last gathering at the school before Miss Gosnell's retirement—when she was presented with a silver tray and tea service by the old scholars, and with a watch, a brooch, and an address by the past and present members of the staff. Miss Gosnell has for many years taken an active interest in the administration of education, and she was a well-known member of the Head Mistresses' Association.

* * *

THE Council of the Girls' Public Day School Trust have appointed Miss E. Ransford (Med. and Mod. Lang. Tripos, Girton College) Second Mistress at the Belvedere School, Liverpool, to be Head Mistress of Ipswich High School, and Miss R. M. Fletcher (Final Hon. Eng. Lang. and Lit., Somerville College), Second Mistress at the Brondesbury and Kilburn High School, to be Head Mistress of Bath High School.

* * *

CAPTAIN J. H. SMITH, M.C., formerly Mathematical Scholar of Brasenose College, Oxford, is taking up the lectureship in mathematics at Huddersfield Technical College. For several years he was engaged as senior mathematical master at the Hulme Grammar School, Manchester, and in 1915 he was elected President of the Manchester Mathematical Society. He has seen considerable service in the Army, and went through some of the severest fighting in France, being awarded the Military Cross. After the Armistice he took part in the Army Education Scheme, organizing University courses for officers and delivering lectures on "Mathematical Analysis."

* * *

MR. A. J. SCHOOLING, Senior Classical Master at the Strand School, London, is succeeding the Rev. C. S. Butler, who has resigned the Head Mastership of Barnsley Grammar School at the age of seventy years—a position which he has occupied since 1887. Mr. Schooling was educated at Merchant Taylors School, London, and took First Class in the Classical Tripos in 1903. He has had teaching experience at Dean Close School, Cheltenham, and at Liverpool Institute High School, and during the war he served for three years with the Artists' Rifles.

* * *

MR. E. GRAHAM, who has recently severed his official connexion with Harrow, first went to the famous school on the hill as a boy in Mr. Bosworth Smith's House in 1873, and returned as a master in 1882. Since 1899, Mr. Graham has been in charge of Rendall's House, and he will be greatly missed at Harrow. He was Hon. Secretary and Treasurer to the Council of the Harrow Mission, and, in addition to taking an active share in many other departments of work, he was a founder of "The Harrovian," the school magazine, and of the ornithological collection.

* * *

THE resignation of Mr. G. P. Kirkman will be deeply regretted at Bedford School. He has been connected with the school for twenty-six years as form master, house master, and of late as head of the Army classes.

* * *

GREAT regret is felt throughout the Dartford district at the news that Mr. C. J. Mansford, who has been Head Master of the Grammar School for the past seventeen years, has been compelled to resign through ill-health. In 1902 the school numbered only twenty-nine pupils, and some idea of what Mr. Mansford has accomplished during his tenure of office may be gained when it is stated that there are now three hundred pupils on the school roll, as well as a long waiting list. During the early part of the war Mr. Mansford went to France with the French Red Cross, and since his return he has been occupied during all his spare time in propaganda work for the War Office. It is the unanimous wish of all connected with the school that the rest he is taking will promote a speedy restoration to normal health.

* * *

MR. E. T. BALDWIN, Senior Master at Dronfield Grammar School, has been appointed Head Master of Earl's Colne

Grammar School *vice* Mr. A. J. Appleton, who has resigned. Mr. Baldwin took his degree with Honours in Modern History in 1912, and was formerly a master at Bablake School, Coventry. He has specialized in the teaching of English and history, and is an examiner in history and geography to the Oxford University Locals Examination Delegation.

* * *

MR. A. C. BADCOE has been selected as Secretary for Education under the Exeter Education Authority, in succession to Mr. H. Armitage, resigned. Mr. Badcoe was educated at Bovey Grammar School, the Municipal Secondary School, Cardiff, and University College, Cardiff. He is a trained certificated teacher and has had twenty years' experience in many types of schools—elementary, secondary, technical, and pupil-teachers' centres. From 1900 to 1918 he was Assistant Secretary to the Dorset Education Committee and is now Assistant Secretary to the Norfolk Education Committee.

* * *

THE Council of Armstrong College, Newcastle, has appointed Lieutenant-Colonel Sir Theodore Morison, K.C.I.E., K.C.S.I., Principal of the College. Sir Theodore was educated at Westminster and Trinity College, Cambridge, and went to India in 1889 returning in 1905. During the war he held a commission in the Cambridge Regiment (Territorials) and saw service in France and German East Africa.

* * *

MR. A. L. WATSON, Senior History Master at Enfield Grammar School, has been appointed Justice of the Peace for Hertfordshire. Mr. Watson was educated at Hertford Grammar School. He is a member of the Hoddesdon Education Sub-Committee, and has for many years taken an active interest in county affairs.

* * *

MISS K. M. BUCK has been appointed Organizing Secretary of the Association of Teachers of Domestic Subjects. She has ably filled the post of Hon. Secretary to the Association for the past ten years. Communications respecting the Association of Teachers of Domestic Subjects should be addressed to her at 10 Norfolk Street, Strand, W.C.2.

ONLOOKER.

TOPICS AND EVENTS.

NEW IDEALS IN EDUCATION.—Despite the fact that the early date forced on the promoters of the Sixth Annual Conference, held at Cambridge during the last week of July, precluded the attendance of public and preparatory school masters, the number of members present exceeded that of preceding Conferences. The general opinion at the close of the strenuous week seemed to be one of general satisfaction, not only with the subject, "The Creative Impulse and its place in Education," chosen by members of last year's Conference at Oxford, but with the inspiring treatment of the subject. The speakers had evidently been carefully selected—not for names of world-wide fame, but each for an earnest study of the subject which each had made his own, and for the fact that each speaker was himself a craftsman. Mr. Henry Wilson's Inaugural Address (obtainable from Secretary of New Ideals, 24 Royal Avenue, Chelsea, 2d.)—the keynote of the Conference—lifted the subject into an atmosphere of vital reality. The child shall learn that his creative activities are essential to his country; he will produce for her, live for her, and, if need be, die for her. The true citizen "creates with delight, endures with sweetness, thinks of others' welfare before his own, and strives to make his city the counterpart of that not made with hands." His lead was ably followed by Prof. Rothenstein, Mr. Alec Miller, Mr. Geoffrey Shaw, Prof. Lethaby, and Miss Margaret Swanson on Educational Needlecraft. Perhaps the most brilliant and convincing paper was that of Mr. Alec Miller, a young sculptor, who undertook the difficult task of "The Craftsman's Place in Industry." He pleaded for close co-operation between school and workshop, by which alone the present abyss between the educated designer and the ill-educated workman could be bridged. The large shop and the art school must be broken down, because they perpetuate the false distinction between the designer and workman, the studio and workshop.

New features of this year's Conference were an exhibition of children's work and a course of lessons in block-printing given to members by Mr. Seaby, of University College, Reading, which were both popular and helpful. All the papers will be published during the autumn, and can be obtained from the Secretary.

THE EDUCATIONAL WORK OF THE Y.M.C.A.—From time to time short paragraphs in the daily papers have given to the public an account, accompanied by statistics, of the educational work attempted among our troops. From such accounts it appeared that, while in many places the Military Authorities were setting up their own machinery for the purpose, in not a few they had invited the Y.M.C.A. to add a scheme of classes to its manifold activities on behalf of men and women on active service. Two recently published reports give a detailed account of the work carried out under the auspices of the Y.M.C.A. Universities Committee. One of these, covering forty pages, relates to the work in France; the other, of half the length, deals more shortly with the educational activities in other places. The net result is to show that the Universities Committee took a substantial share in supplying or promoting lectures and classes not only in a large number of camps at home, but also in France, Italy, Salonica, Egypt, Malta, and Holland. Not only a most imposing array of lecturers, including "the most distinguished specialists in England," but over two hundred civilian teachers, were sent out, buildings were hired, or even erected, to serve as schools and libraries; textbooks and reference libraries were supplied, together with all educational apparatus. In some places the entire management of the scheme was entrusted to the representatives of the Universities Committee, although the teaching staff was to a small extent supplemented by qualified instructors released from their military duties. It was only in Italy that the Army was represented by an education officer, Captain McGregor, M.C., Professor of Political Economy at Leeds, who was entitled to speak with authority on educational problems. This huge and widespread work could not have been done without the expenditure of a considerable sum of money. A letter from Sir Arthur Yapp to the War Office estimates its cost at a little under £100,000 for France and a little more than £20,000 for the other areas. Any one who knows the difficulty of obtaining any buildings at all in the places where the scheme was started, the expense of printing and binding, the cost of living for the staff and all the other difficulties to be faced, will rather marvel at the moderate expenditure than exclaim at the amount. The published statistics of class attendances does not include all those who took advantage of the scheme, for very many serious students were demobilized before their course was wellnigh begun. The rapidity of demobilization prevented anything in the nature of a prolonged course of study except for a few. But to a large number of the active-minded among the men the lectures and classes brought steady and calming influence beyond all price.

THE INCORPORATED STAFF-SIGHT-SINGING COLLEGE.—The annual report for 1918-19 discloses a state of affairs which gives great hopes for the future. The College has been carefully piloted through the vicissitudes of the Great War, thanks to its energetic secretary, Mr. E. Douglas Smith, and reports a steady increase in the number of schools examined, among them being the Ladies' College, Cheltenham. The authorized textbook of the College, "The Manual of Sight-Singing" (Dr. Sawyer), is in greatly increased demand, and it is of interest to note that, on the strong recommendation of Sir H. Hadow, it has been adopted in various centres for the education of our overseas troops. The Council have in contemplation an additional grade in the Certificate Examination, to include all the tests at present in the Grade 3 (Advanced) Certificate, with the exception of the teaching tests, and so provide a convenient step between the Grade 2 (Intermediate) Examination and that of the Junior Teaching qualification, which latter requires evidence of practical experience in teaching. The splendid work which the I.S.C. are doing well merits the support of all interested in the advancement of music in our schools and elsewhere, for we fall far short of the standard which obtained in the time of Henry VIII, who, as Parry tells us in his "Summary of Musical History," "himself set an excellent example by his ability in singing at sight, which accomplishment before long came to be considered a necessary part of a properly educated gentleman."

ANCOATS HOLIDAY PLAY SCHOOL.—Members of the Manchester University Settlement at Ancoats again conducted a holiday play school for children from the Ancoats district of Manchester. A municipal school at West Didsbury was again obtained for the purpose, and daily two hundred children were taken in special cars from their homes in Ancoats to the distant suburb. At night

“IT IS CLEAR

that a capable agent who has pursued his calling for years will have gathered, by visits, by personal interviews, and by correspondence, a globe of precepts, and that his profession of recommending schools is no idle pretence.”

The Journal of Education, June, 1916.

**This is the definition, by a competent judge, of what should constitute a
USEFUL SCHOLASTIC AGENT.**

It may be presumed that no one would knowingly make trial of the services of any other kind, but it is still true that a proportion of Principals are induced to yield to the importunities of plausible and worthless concerns, with the resultant loss and disappointment that might be expected. This is a disillusioning experience for which there is no necessity. The established, reliable Scholastic Agencies are not many in number, and they are well known, and their record and standing easily to be ascertained. As one of these we have a sufficient claim to clients' confidence. If, further, we obtain the greater share of Parents' Inquiries, we also take unusual pains to secure them.

As a result, few days pass without at least one letter of thanks from parents who appreciate the assistance we have given them. Principals are equally generous in expressing their indebtedness.

The following extracts are from recent acknowledgments :—

“When I first came here I spent over £50 in six months, advertising in the leading papers—result, **one** boy. Then I came under your Agency—result, a **steady stream** of boarders every term, more than filling up the vacancies caused by boys leaving. I have already had to open another dormitory, and am on the point of ‘venturing’ on another boarding house.”

“Two years ago you sent me a pupil named ———. Through her parents I have had **four** good pupils this year from four different places, and through two of these I have **five** more coming this term: that is ten pupils from paying **one** commission.”

If you have not yet made trial of our services, we shall be glad to hear from you, with particulars of your School.

J. & J. PATON, Educational Agents,

143 CANNON STREET, LONDON, E.C. 4.

**Telephone:
Central 5053.**

special cars took them home again. The children spent the mornings at the school, where there were classes in singing, dancing, eurhythmics, painting, doll-dressing, toy-making, wood-work, and cobbling. For the tiny children there were bricks, nine-pins, and raffia-weaving. Every now and again groups gathered to play jolly games in the sunny playground. On long tables places were laid for the midday meal. This was so appetizing that a boy was heard to remark: "It is like having a Sunday dinner every day." After dinner the children rested for a little while, the younger ones usually going to sleep. Later in the afternoon the children went out for rambles, visiting the gardens of the large houses in the neighbourhood, where they ate their tea out of doors. A return was made to Ancoats about eight o'clock in the evening. The parents of the children are eager for them to attend the holiday school. As things are at present, it is impossible to take more than two hundred children, but there were enough children wanting to come to fill three schools of the size of that at present in existence. The Settlement is besieged night and morning by parents anxious to have their children included in the holiday school party. Donations are needed, and these should be sent to the Warden at the University Settlement in Every Street, Ancoats, Manchester. The School was open for the first three weeks of the summer holidays, and at the end of this time an open day was held, when there was an exhibition of handwork done by the children, together with a display of dancing.

EMPLOYMENT FOR SECONDARY-SCHOOL PUPILS.—On the advice of the London (Central) Advisory Committee for Juvenile Employment, the Minister of Labour has established in London Employment Committees, consisting of head masters and head mistresses of secondary schools. Registers of secondary-school boys and girls requiring employment have been compiled, says the *Times*, and special steps, such as personal visits to employers, are taken to obtain suitable openings for them. Special officers have been told off to act as secretaries to the Head Masters' and Head Mistresses' Committees, and these officers may be interviewed by secondary-school boys and girls—with their parents if desired—at the Howard Hotel, any week-day, except Saturday, between the hours of 9 a.m. and 12 noon. The co-operation of employers, who have vacancies suitable for such applicants, is an essential to the success of this new departure, and they are invited to notify

their requirements to the Secondary School Head Masters' or Head Mistresses' Employment Committee, Howard Hotel, Norfolk Street, Strand, W.C.2, without delay.

MATRICULATION FOR WAR STUDENTS.—The Joint Matriculation Board of the Universities of Manchester, Liverpool, Leeds, Sheffield, and Birmingham give notice that candidates for the alternative form of the Matriculation Examination, instituted to meet the case of persons whose education has been interrupted by War service, must in future present themselves for examination within six months of the date of demobilization or discharge. Candidates who were demobilized or discharged before August 1, 1919, must take the examination at the earliest opportunity, but in no case later than December next.

AN IMPORTANT KINEMA INVENTION.—It is a notorious fact that although the kinema trade is very anxious to supply material for educational needs, it has done little to adapt its goods to educational conditions. For instance, one of the great drawbacks of film displays is that, in order to see an instructive film, school pupils have to go to the local kinema theatre. The drawbacks of a theatre for such purposes are too obvious to need comment. But an invention was demonstrated recently which now makes it possible for the kinema to come to the school. This is the portable projector put on the British market by Messrs. George Palmer, of 81 Shaftesbury Avenue, London, W.1. This apparatus is convenient in size; it is portable, weighing less than 23 pounds; it is simple in construction, and, by connecting it with the electricity supply of the school, it can project a standard-sized film on to the wall of the school-room. There is no doubt that this invention brings us much nearer to the right use of the kinema in education. In future the class in literature, say, will not wait till the local theatre exhibits "Kenilworth": it will be able to see the film when the teacher thinks the right time for seeing the story of the book has arrived. Again, the conditions under which the film will be shown will be the normal school conditions. No questions of ventilation or infectious disease will then arise, nor will there be a disturbance in the school programme. And, when recapitulation will be necessary before an examination, the film will again be shown. If in the future each Education Authority will build up a central library of films as they

Telegrams—"GALLENKAMP, FINSQUARE, LONDON."

now build up a library of lantern slides, the films required can be sent to the schools and exhibited under the right conditions at the right time.

EDUCATIONAL GRANTS FOR EX-SERVICE MEN.—Under the Government Scheme of financial assistance for the higher education of ex-Service officers and men, the total number of grants awarded by the Board of Education now amounts to 5,400, including officers and men in about equal proportions. The courses in respect of which grants have been awarded include more than 1,000 for engineering and technological subjects, between 600 and 700 for classics, philosophy, and literature, and about an equal number for pure science and mathematics. Applications are still being received in large numbers, and are being dealt with at the rate of more than 200 a day.

WAR SERVICE RECORD.—The Faraday House Electrical Engineering College has published a War Service Record of past and present students of the College. With the exception of those students who have made the great sacrifice, considerations of space made only a skeleton outline of their service careers possible, yet the record runs to fifty large quarto pages. Many "Faradians" were engaged on engineering work of national importance at home, but it was decided to limit the record exclusively to those who served with the British and Allied Forces.

The first award of the William Gibson Research Scholarship for Medical Women (minimum £250 per annum) has been made to Miss M. Esther Harding.

DUSTLESS and HYGIENIC SCHOOLS

USE

FLORIGENE

(Regd.)

DURING the SUMMER VACATION for Best Results.

(BRITISH MADE.)

It is **IMPORTANT** to **NOTE** that **ONE APPLICATION** of "Florigene" **ALLAYS** the **DUST** and **DIRT** for **2 TO 12 MONTHS**, according to traffic, not only during each Sweeping (without sprinkling of any kind) but also throughout all the intervening periods—which is of greater hygienic importance. "Florigene" is also easily and quickly applied, and saves time and labour.

These sanitary, labour-saving, and economic advantages are **NOT** attained by sweeping-powders or any mechanical or other method.

Send for Particulars, Medical Reports and Testimonials, to the Sole Manufacturers:

THE PUBLIC SCHOOL SPELLING CARD.

Sixtieth Thousand. Price 6d. (3d. net to purchasers of 100 cards).

Containing nearly 1,000 words (in which actual mistakes have frequently been made, as collected from Dictations, Essays, Examination Papers, &c., during a period of more than thirty years), with Rules.

Also, in Book Form,

HOW TO SPELL AND SPEAK ENGLISH.

Third Edition. Price 1s.

This also embodies most of the errors in the sentences set for correction in the Examination Papers of the London Matriculation, the Oxford and Cambridge Locals, the College of Preceptors, &c.

By **H. R. LADELL, M.A.**

(late Head Master of the London International College, Isleworth).

FRENCH ESSENTIALS AND FRENCH CONVERSATION SENTENCES.

Fourth Edition. Price 2s., cloth. By the same Author.

"This short grammar is compiled by a master who knows his business. The type is good, the arrangement good, and there is nothing superfluous."—*The Journal of Education*.

"The colloquial sentences at the end are a useful addition."—*The Bookman*.

"As a teacher of long experience the author has been able to give special attention to those points at which he finds pupils are most apt to blunder. This is essentially a school book. It should save the class teacher a vast amount of tedious labour by putting him, as it does, in possession of the essence of the author's many years' experience in class teaching."—*The School Board Chronicle*.

SHORT FRENCH EXAMINATION PAPERS (110).

Each containing Six Idiomatic Sentences to render into French.
Very Useful for Oral Work. Second Edition. Price 2s. 6d., cloth.

By the same Author.

"A very useful set of questions."—*Modern Language Quarterly*.

"We noticed at the time of its appearance this very useful collection of test papers, and need only here add that the key is full and accurate save for some obvious misprints and one or two slips that we have noticed."—*The Journal of Education*.

A KEY (with a list of errata), issued to Teachers and Private Students only, can be obtained from the Publishers, 6s. net. (Half-price to purchasers of a dozen copies of the Examination Papers.)

THE ROYAL NAVAL COLLEGE, OSBORNE

For information relating to the entry of Cadets, Parents and Guardians should write for "How to become a Naval Officer" (with an Introduction by Admiral the Hon. Sir E. R. FREMANTLE, G.C.B., C.M.G.), containing an illustrated description of life at the Royal Naval Colleges, at Osborne and Dartmouth, post free on application to GIEVES, Limited, 21 Old Bond Street, London, W.1.

Special Entry of Naval Cadets.

The Secretary of the Admiralty announces that the scheme of Special Entry to Naval Cadetships, which was instituted in 1913, for a period of four years, will be continued until further notice. The examinations are held annually in June, and candidates are required to be not more than 18½, nor less than 17½, years of age on June 1st.

Regulations can be obtained on application to

GIEVES, Limited,
"ROYAL NAVY HOUSE," 21 Old Bond Street,
LONDON, W.1.

A MESSAGE TO VIOLIN LOVERS.

We have the finest stock of **New Violins** and many **Old Violins**, and sell them at their actual tone value, regardless of maker, history, and label.

Amateurs and professionals looking for a good-toned, well-made violin, should keep in touch with us until suited. Fine reproductions of famous makers—Stradivarius, Guarnerius, Maggini, Vuillaume, are continually provided by us.

We would welcome your enquiries, and request that our ever-changing lists of **Old Violins** and **Violin Music** may be sent to you periodically.

LATIN

First Latin Lessons. By A. M. M. STEDMAN, M.A. Revised by C. G. BOTTING, M.A., St. Paul's School, London. 15th Edition. 2s. 6d.

Easy Latin Exercises on the Syntax of the Shorter and Revised Latin Primers. By the Same. With Vocabulary. 16th Edition. 2s. **Key**, 5s. net.

Latin Vocabulary for Repetition. Arranged according to Subjects. By the Same. 19th Edition. 2s.

A School Latin Grammar. By H. G. FORD, M.A., Senior Classical Master, Trinity Grammar School, Melbourne. 4th Edition. Revised. 4s.

Junior Latin Examination Papers. By C. G. BOTTING, M.A. 12th Edition. Fcap. 8vo. 1s. 6d. **Key**, 5s. net.

Latin Examination Papers in Miscellaneous Grammar and Idioms. By A. M. M. STEDMAN, M.A. 17th Edition. 3s. 6d. **Key** (8th Edition), 6s. net.

MATHEMATICS

A Child's Book of Arithmetic. By HERBERT MCKAY, B.Sc. With numerous Illustrations by LILIAN FAIRWEATHER. 1s. 6d. The easiest and most attractive book for Beginners.

Easy Exercises in Arithmetic. Containing 5000 Examples. By W. S. BEARD. 10th Edition. Fcap. 8vo. Without Answers, 1s. 9d. **Answers**, 1s. net.

A New Junior Arithmetic. By H. BOMPAS SMITH, M.A. Professor of Education, University of Manchester. 4th Edition, with Additional Examples by W. S. BEARD. Without Answers, 3s. With Answers, 4s.

Easy Exercises in Algebra for Beginners. Containing 3,500 examples. By W. S. BEARD. 4th Edition. Without Answers, 2s. 3d. With Answers, 2s. 6d.

A Preliminary Geometry. By NOEL S. LYDON, Assistant Master, Owen's School, Islington. 2nd Edition. 1s. 9d.

Geometry on Modern Lines. By E. S. BOULTON, M.A., Senior Mathematical Lecturer, Merchant Venturers' Technical College, Bristol. 3s.

SCIENCE

Preliminary Practical Science. By H. STANLEY, B.Sc., F.I.C., Science Lecturer, Merchant Venturers' Technical College, Bristol. 2s. 3d.

A simple introduction to Physical Science based on experiment.

Elementary Experimental Science (Physics and Chemistry). By W. T. CLOUGH, A.R.C.Sc., and A. E. DUNSTAN, D.Sc., F.I.C., East Ham Technical College. 17th Edition. 4s.

A Junior Chemistry. By E. A. TYLER, M.A., F.C.S., Swansea Technical College. 10th Edition. 4s.

The Complete School Chemistry. By F. M. OLDHAM, B.A., Senior Chemistry Master, Dulwich College, London. 13th Edition. 7s. 6d.

Examples in Physics. By C. E. JACKSON, M.A., formerly Senior Physics Master, Bradford Grammar School. 4th Edition. 5s.

Elementary Lessons on Plant Life. By D. G. SCOTT, M.Sc., Assistant Lecturer in Botany, University of Liverpool. 4s.

A complete Catalogue will be sent on application

METHUEN & CO., LTD., 36 ESSEX STREET, LONDON, W.C.2

SELECTED BOOKS FOR TECHNICAL SCHOOLS & SCIENCE CLASSES

Mathematics.

- Algebra, School.** By A. G. CRACKNELL, M.A., B.Sc. With or without Answers. 7s. Also in two Parts. Part I, 3s. 6d. Part II, 3s. 6d.
- Algebra, Junior.** By A. G. CRACKNELL, M.A., B.Sc., and AUGUSTUS BARRACLOUGH, M.A. 3s. 6d. With Answers. 4s.
- Arithmetic, The School.** By W. P. WORKMAN, M.A., B.Sc. With or without Answers. Second Edition. 4s. 6d.
- Arithmetic, The Junior.** By R. H. CHOPE, B.A. With or without Answers. Third Edition. 3s. 6d.
- Book-keeping, Practical Lessons in.** By T. C. JACKSON, B.A., LL.B. Fourth Edition. 4s. 6d. Also in Two Parts. 2s. 9d. each.
- Geometry, The School.** By W. P. WORKMAN, M.A., B.Sc., and A. G. CRACKNELL, M.A., B.Sc. New and Enlarged Edition. 5s.
- Geometry, Preliminary.** By F. ROSENBERG, M.A., B.Sc. With or without Answers. 2s. 9d. A new helpful Geometry for beginners.
- Mathematics for Technical Students, First Course in.** By P. J. HALER, B.Sc., A.M.I.Mech.E., A.I.E.E., and A. H. STUART, B.Sc., F.R.A.S. Second Edition. 2s.
- Mathematics for Technical Students, A Second Course in.** By the same Authors. [In preparation.]

Applied Sciences.

- Building Construction, First Stage.** By BRYSSON CUNNINGHAM, D.Sc., B.E., F.R.S.E., M.Inst.C.E. Second Edition. 3s. 6d.
- Electrical Engineering, Continuous Current.** By W. T. MACCALL, M.Sc., A.M.I.E.E. 13s. 6d.
- Electrical Engineering, Alternating Current.** By W. T. MACCALL, M.Sc., A.M.I.E.E. [In preparation.]
- Electricity, Technical.** By Professor H. T. DAVIDGE, B.Sc., M.I.E.E., and R. W. HUTCHINSON, B.Sc., A.M.I.E.E., F.R.G.S. Third Edition. 7s. 6d.
- Engineering Science, A First Course in.** By P. J. HALER, B.Sc., A.M.I.Mech.E., A.I.E.E., and A. H. STUART, B.Sc., F.R.A.S. 3s. 6d.
- Geometry, First Stage Practical Plane and Solid.** By G. F. BURN, A.M.I.Mech.E. Third Edition. 2s. 9d.
- Heat Engines, First Stage.** By J. W. HAYWARD, M.Sc. 3s. 6d.
- Hygiene, First Stage.** By R. A. LYSTER, M.B., B.Sc., D.P.H. Sixth Edition. 3s. 6d.

Chemistry.

- Chemical Calculations.** By H. W. BAUSOR, M.A. Second Edition. 2s. 9d. Advanced Course. 1s. 6d.
- Chemistry (Theoretical), First Stage Inorganic.** By G. H. BAILEY, D.Sc., Ph.D. Fourth Edition. 2s. 9d.
- Chemistry (Theoretical), Second Stage Inorganic.** By G. H. BAILEY, D.Sc., Ph.D. Edited by Dr. Wm. BRIGGS. Fourth Edition. Revised by H. W. BAUSOR, M.A. 5s. 6d.
- Chemistry, Junior.** By R. H. ADIE, M.A., B.Sc. Second Edition. 3s. 6d.
- Chemistry, Senior Practical.** By H. W. BAUSOR, M.A. 3s. 6d. Including preparations, experiments on action of heat, quantitative and qualitative analysis.
- Organic Chemistry, The Elements of.** By E. I. LEWIS, M.A., B.Sc., F.C.S., late Science Master at Oundle School. 3s. 6d.

Physics.

- Heat, Theoretical and Practical, Textbook of.** By R. W. STEWART, D.Sc., and JOHN SATTERLY, D.Sc., M.A. 5s. 6d.
- Heat, Junior.** By JOHN SATTERLY, D.Sc., M.A. 2s. 9d.
- Magnetism and Electricity, Senior.** By R. H. JUDE, D.Sc., M.A., and JOHN SATTERLY, D.Sc., M.A. 7s.
- Magnetism and Electricity, Junior.** By R. H. JUDE, D.Sc., M.A., and JOHN SATTERLY, D.Sc., M.A. 3s. 6d.
- Magnetism and Electricity, Advanced Textbook of.** By R. W. HUTCHINSON, M.Sc., A.M.I.E.E., F.R.G.S. 10s. 6d.
- Practical Physics (Mechanical Quantities, Heat, Sound, Light, Magnetism and Electricity).** By W. R. BOWER, B.Sc., A.R.C.S., and JOHN SATTERLY, D.Sc., M.A. 5s. 6d.
- Science, Junior Experimental.** By W. M. HOOTON, M.A., M.Sc., F.I.C. Second Edition. 3s. 6d.
- Mechanics and Physics, An Introductory Course of.** By W. M. HOOTON, M.A., M.Sc., F.I.C., and ALFRED MATHIAS. 2s.

Complete Educational Catalogue, and Catalogue of Textbooks in Science and Technology, post free on application.

THE JOURNAL OF EDUCATION WITH WHICH IS INCORPORATED THE SCHOOL WORLD.

SCALE OF CHARGES FOR ADVERTISEMENTS.

PUBLISHERS' ANNOUNCEMENTS—

Whole Page	... £5 10 0	One Column [$\frac{1}{2}$ page]	£3 0 0
Half Column [$\frac{1}{2}$ page]	1 15 0	One-Eighth Page	... 0 17 6
Per Inch in Column, 8/-.			

SCHOOL ANNOUNCEMENTS—

- Scholarships, Official Notices, School Transfers, Partnerships, &c.—6d. per line; minimum charge, 5s.
- Posts Wanted or Vacant.—30 words for 2s.; each 10 words after, 6d. *prepaid rate*.
- Lectures, Classes, Non-Resident Posts, &c.—48 words for 3s.; each 8 words after, 6d.; *prepaid rate*.

An extra fee of ONE SHILLING is charged on advertisements with OFFICE ADDRESS.

If a receipt is required for an advertisement under 10s., a post card or a stamped envelope must be enclosed.

[Advertisers are reminded that "Letters addressed to INITIALS or to FICTITIOUS NAMES, or to a CHRISTIAN NAME without a SURNAME," at Post Offices are not taken in, but are sent at once to the Returned Letter Office.]

All Letters respecting Advertisements and Subscriptions should be addressed—

MR. WILLIAM RICE,

3 LUDGATE BROADWAY, LONDON, E.C.4:

to whom all remittances should be made payable. Orders and Cheques should be crossed, "The London Joint City and Midland Bank, Ludgate Branch." Postage stamps can only be received at the rate of thirteen to the shilling.

Notice must be given of all remittances through the Post Office from abroad, stating full name and address of the sender; and all Foreign Money Orders must be crossed for payment through a Bank.

Date of publication of next issue will be found at top left-hand corner of front page.

LONDON: MR. WILLIAM RICE, 3 LUDGATE BROADWAY, E.C.4.

THE CO-OPERATION OF HOME AND SCHOOL.

By Dr. H. E. PIGGOTT.

AT a recent meeting of teachers it was stated that the school ought to be and must become the pivotal interest of the community, local and national. The statement was challenged, and the assembly fell into two parties who respectively maintained and attacked this opinion with warmth. As superior interests, business, politics, pleasure, personal matters, or hobbies, were mentioned. Although the idealists seemed to silence the realists, there was agreement that there is a gulf fixed between "what is and what might be." How can this gulf be bridged?

In general nothing is nearer the hearts of the parents than their children and their children's present and future good. Yet education, which is fundamental to their children's welfare, does not rouse the enthusiasm or open the pockets of most parents. Why is this? Most parents speak as if they know about education, yet their words are rather of criticism than of appreciation. Those, however, who really know most about education best realize its value, and generally set no limits to the sacrifices they will make to secure a liberal education for their children. The present indifference, or positive unfriendliness, to the work of the school would appear to be due either to ignorance of its aims or knowledge of its weakness, or to a combination of these, in the minds of parents and others interested in children. The prejudice against schools is partly due to the strong element of compulsion involved in the Education Acts, and this accounts largely for the traditional hostility between the home and the elementary school. But it is also due to a discrepancy be-

tween the supposed aim of the schools and the apparent purpose of life. This ignorance neither the schools nor the authorities have made any systematic attempt to remove. It is little wonder that parents accuse the schools of teaching what is useless in life, that evening schools are despised and neglected, and that plans are already being laid to circumvent the Act of 1918.

The remedy is more education, not merely of pupils but chiefly of parents, to dispel this misconception and to win for the schools the co-operation of the homes. Ultimately, by the re-education of parents, and by the education of prospective parents while they are still at school, the traditional indifference may be removed. But primarily the school will benefit by its own efforts in this direction and in an astonishingly short time.

There are two things to be done. (1) To develop in individual parents a personal interest in education and a real appreciation of its value for their children. School and home may then hope to co-operate cordially in the work of educating the children. (2) To foster this personal interest and organize it as a community interest, and develop the individual support into a national demand for the best that education can give to the young generation. School and home must work together to develop strong, liberal, and progressive public opinion in national education. Some countries have gone far along this path of national development. In Scotland of old, and in the United States, education stands in the front rank of national and local interests.

These things can be done, and the school must take a large share in the work. Teachers may reasonably expect to get what they ask for themselves, for their school, and for education when they take seriously the work of educating the public, beginning with the parents of their own pupils. It is this first object which concerns us here.

This new work is a process of education and therefore rests ultimately upon first-hand experience. Parents know two schools. First, the school of their childhood of twenty, thirty, or forty years ago. But that school, its methods, and its sentiments no longer exist. Secondly, out of that dim and often unpleasant memory, however, parents evolve the school of to-day by the aid of their children's school tales. The result is usually disastrous, for this school also does not exist.

The remedy is simple, yet not altogether easy in practice. Let parents see, hear, and judge for themselves. Bring them into the school; let them meet the teachers and learn to understand their aims and methods. Let them see their children at school, working and playing—that is, living school life. Let them see the work which has been done or that which is being done. Help them to get the teacher's point of view and appreciate his ambitions for his pupils. They will not fail to appreciate the teacher's work or to respect him as the builder of the new generation.

The change of attitude in the home and its effects upon the pupils will be marked. The sympathy and cordiality, the readiness to co-operate, the spontaneous tributes to teacher and school will lift the work of teaching from the plane of drudgery to that of a life interest.

Teachers deal largely with pupils in the bulk. The class is the whole, the pupils are but units; they are never completely regarded as independent individuals, but as members of a group, members having certain characteristics chiefly in relation to the work and play of the group. Parents regard their children as individuals having characteristics in relation to the home and the family. These views are largely complementary, and need to be supplemented and corrected each by the other.

The attendance of parents at sports and prize days is valuable, but not enough to accomplish our purpose. It gives little indication of what is being done in the school. It does not exhibit clearly the relations between staff and pupils, or of pupils to their work. Parents need to see the work of the school going on, to see in some cases collected and finished results (exhibitions, plays, entertainments), to see their own children mingled with their peers in the school world, to catch the spirit of the school as a working community, to feel that

Education is Life and not merely preparation for life, still less for getting a living.

How is it to be done? The answer is necessarily individual in character. Infant schools have in this matter long been leaders, often unconsciously. Their "play way" education, the regular attendance of parents to bring and fetch their children, make opportunities to see education in process frequent and easy. Few parents complain of the education of the infant school. They see that the child's activities draw him out and bring him along. Yet many parents criticize the elementary and secondary schools, partly because as the child grows older the future career becomes more and more a real problem, but chiefly because they understand so little of the child's preparation for it at school. The child's development in response to it is not so obvious.

Parents must be invited to the schools. Those who have tried the plan have been surprised at the enthusiasm with which parents accept invitations to see the school at work. The difficulty of day visits, especially for busy parents, is obvious, yet here much may be done by arranging afternoons when the school is open. One way is to invite all the parents of pupils in one class on a given afternoon. The pupils can be seen at work in the classroom, in the hall, &c., under nearly normal conditions. The school is not unduly disturbed or crowded.

Open evenings present more difficulties to the teachers than to the parents. Even so, they are usually felt to be well worth while. The difficulty of excessive strain may be overcome by transferring the afternoon school to the evening and adjusting work so that the desired experiences are given to parents.

In a secondary school where pains have been taken to get into touch with the parents of pupils, the following arrangements have been made. Not all have been possible during the War, but together they form a related set of efforts.

First, along with the notice of the pupil's admission is sent (a) a short printed note congratulating the parents on the child's successful candidature for admission and inviting them to communicate anything relating to the child's health, special interests and experience, which it may be of advantage to the school to know (not many parents reply to this); (b) a circular about the special activities and interests of the school.

Secondly, soon after the beginning of the term, all parents of new pupils are invited to view the school and meet the teachers of the child's Form. The usual plan is to invite them to tea on a Saturday afternoon. As they arrive they are welcomed by the head master, introduced to the teachers, who take them in small groups to the Form rooms and to the laboratories, art room, &c. As soon as all have arrived, tea is served at the tables in the hall, and parents in pleasant intercourse get to know each other and the staff. After tea the head master informally explains the general aims and curriculum of the school course, with a mention of any special methods or other points of interest. He refers to any special advantages, deficiencies, or limitations of the school, and shows the consequent bearings on the full and liberal education of their children. In some cases parents by special arrangements or even personal assistance can help to overcome the difficulties—in any case there is a better understanding of school conditions and school limitations; frequently help in out-of-class interests is offered.

From half to two-thirds of the parents accept this invitation, and invariably great interest is shown and keen appreciation of the opportunity to meet the Head and the teachers and to see the school. Frequently the new pupils come with their parents—to show the way, to introduce them to teachers, and generally to help to make them feel at home. They are proud to act as guides in their new school. These pupils also help to wait at tea, and often provide items of entertainment which have a double interest for the visitors. In this way, too, parents become acquainted with their children's school friends.

These meetings of "First Form" parents usually take place early in October, since most new pupils are admitted in September. Except for the admission of pupils transferred from

a secondary school, new pupils are admitted only when there are enough places to make up a new Form, or two or three divisions of a Form. In September from sixty to eighty First Form pupils are admitted, and the parents' meeting is fairly large.

Thirdly, each successive winter the same sets of parents should meet again as second-, third-, fourth-, or fifth-form parents. Their interests are now different. They know the teachers well by repute, and in many cases personally; they are anxious to discuss their children's promotion. Fourth- and fifth-form parents talk of the examinations, and aptitude and future careers of the pupils. Teachers and parents are thus able to supplement each other's observations and knowledge for the pupil's benefit.

In these later visits it is less necessary for the children to accompany their parents, and often more convenient that they should not. Groups of younger pupils come to assist and to entertain, and can be excluded easily during any informal address and discussion.

It is, however, appropriate and interesting to let the older pupils come after tea to demonstrate to their parents their school work in music, experimental science, art, French, or any other subject. This helps the visitors to understand the nature and value of the work as part of their children's education, especially if the teacher in charge offers a brief explanation of what is being done, and why. In these days many parents of pupils in secondary schools have themselves had no experience whatever of these forms of education; such demonstrations are therefore valuable. Before the War there were full school open evenings for parents, during which the hall and every room and laboratory was occupied with pupils at work on their ordinary school course. Special displays in the hall or lecture rooms at intervals were in the programme. These were always overcrowded and much appreciated. An oral examination in history or geography would be enjoyed as well as laboratory work.

Most parents are keenly interested in their own children, and especially desire to see them working and playing with their fellows—a new experience for parents. Open meetings at school are always a success if the children are there. Parents get clearer conceptions of school subjects and of their educational value. They observe the teacher's skill in handling his class and his subject; confidence grows. The school grows in their esteem, and they are more willing to co-operate with it.

By some such plans as these, consistently carried out, parents can be interested, educated, and helped. They will become loyal and keen supporters and enthusiastic helpers of the school. No two schools or Heads of schools will find the same plans and methods suitable in detail to their peculiar circumstances and opportunities. But, if they see the need of interesting and educating parents in their children's education, they will find that direct contact of parents with Head, staff, pupils, and school is absolutely essential. It is the new experience out of which alone the right attitude can be developed.
